L. PRANG & CO.'S Easter Cards for 1881.

We take pleasure in herewith presenting to the trade our Price List of Easter Cards for this Season:

ASSORTMENT.—Our Easter Cards are made up in sets of one dozen, except Nos. 11 to 19, and are put up in a box or envelope. Each set contains all the designs of the series; and as no series has more than six designs, each design is more or less repeated in the set.

ENVELOPES.—Fine Cream-Tinted Envelopes are furnished with every series, without extra charge.

EASTER CARDS, WITH SILK FRINGES.—We would call especial attention to these, as they will doubtless prove very attractive. These goods are made up with the best quality heavy silk fringe, made expressly for us. All fringed Easter Cards are furnished with Protectors and Envelopes, and are put up with assorted colors of fringes.

LIST OF PRANG'S EASTER CARDS FOR 1881.

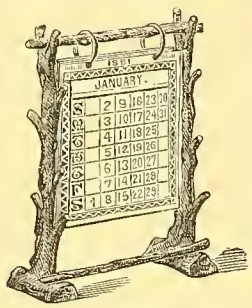
BOSTON, MASS.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

RUSTIC CALENDAR.

The cut illustrates the "Rustic" calendar stand and pen rack, designed by Wm. D. Bennage, Jr., and manufactured by Matthews & Co., 1,202 Chestnut street, Philadelphia. The drawing is so explanatory that no description is necessary. The stand comes in bronze, silver or gold; it is very attractive as an ornament, and is not too large to be inconvenient. The calendar cards can be changed every year, the manufacturers supplying them suitable for this use. The New York agency of the "Rustic" calendar is held by James D. Whitmore & Co., who have control of the wholesale sales for the coming season.



AN EASTER PENCIL.

An Easter novelty in charm pencils has just been prepared by Leroy W. Fairchild. As will be seen from the illustration, it represents an egg from which a chicken is emerging. The egg is of silver, satin finished, and the part representing the chicken is gold colored, daintily worked and chased. The conceit is pretty and taking.

NEW PATENTS.

No. 239,052. Pocketbook.—George Lustig, South Deerfield, Mass., assignor to Charles Arms, same place.

No. 239,055. Book Holder.—La Verne W. Noyes, Batavia, assignor, by means of assignment, to Geo. H. Hazleton, Chicago, Ill.

No. 239,119. Stylographic Fountain Pen.—Alexander M. Sutherland, Brooklyn, and Francis C. Brown, New York, N. Y.

No. 239,125. Toy.—Charles L. Travis, Minneapolis, Minn., assignor of one-half to Alonzo T. Rand, same place.

No. 239,130. Pen Holder.—Robert Wilson, Keswick, county of Cumberland, England. Patented in England June 27, 1879.

No. 239,158. Fountain Pen.—Joseph Friedmann, Seymour, Conn., assignor to Jacob Friedmann, New York, N. Y.

No. 239,164. Machine for Drying Moist or Varnished Sheets.—Joseph E. Hinds, Brooklyn, N. Y.

1. A machine for drying moist sheets, consisting of a series of traveling hands moving in opposite directions, in combination with transferring devices, arranged at or near the turns of the bands, to transfer the sheets from one band to the other without making contacts with the varnished side. 2. A machine for drying moist sheets, consisting of a series of traveling bands, arranged in horizontal, overlying rows, and moving in opposite directions, in combination with vibrating flies, arranged at the turns of two rows of bands, to receive the sheet from one and transfer it to the other band.

No. 239,232. Printing Press.—William C. Evans, Philadelphia, Pa.

The combination, in a printing press, of a suitable frame, its platen and two pairs of fulcrum journals, with a bed having bearings adapted to the journals, so that, during the movement of the bed, its fulcrum will be changed.

No. 239,244. Fountain Attachment for Pens.—John W. Green, Washington, D. C., assignor of one-half to Joseph Reckendorfer, New York, N. Y.

No. 239,263. Glass Engraving Machine.—John Ernest Miller, Pittsburg, Pa., assignor to George Duncan & Sons, same place.

No. 239,281. Cards for Playing Games.—Walter Stranders, New York, N. Y., assignor to Edward R. Ives, Bridgeport, Conn., and Cornelius Blakeslee and Edward G. Williams, Brooklyn, N. Y.

A combination of cards, each representing a living creature and composed of separate sections, one section having a representation of the head of the creature, with an accompanying sentence or phrase, another section having a representation of the body of the creature, with an accompanying sentence or phrase, and another section representing the legs or lower portion of the creature, with an accompanying sentence or phrase, the several sentences or phrases of the sections of each card being arranged in proximity, so that they can be read together, and the sentence or phrase on each section of all the cards being preferably adapted to be read in sequence with each other or with those of the sections of any other cards with which they are adapted to be combined to portray a figure.

No. 239,296. Writing Tablet.—John B. Burwell, Staunton, Va.

A double or reversible writing tablet, composed of a central division board or card having a projecting upper end, the rigid outer covers, and the sheets of blotting and writing paper arranged between the outer covers and the division board on both sides of the latter.

No. 239,297. Index Cutting Machine.—Jacob Dodder, Washington, Iowa.

1. In an index-cutting machine, the combination of a treadle, an endwise-moving table and a mechanism for moving the table, and which is operated by the treadle, a clamp for holding the book in position, a rotary lifter for turning the edges of the leaves and its operating mechanism, and a device for pushing back the edges of the leaves. 2. In a machine for cutting indexes in books, a vertically adjustable rotary lifter, provided with sharp points for catching under the leaves which have been cut, and turning them back out of the way, in combination with a mechanism for revolving the rotary lifter.

DESIGNS.

No. 12,192. Font of Printing Type.—Andrew Little, New York, N. Y. Term of patent, 14 years.

A silent man is easily reputed wise. A man who suffers none to see him in the common jostle and undress of life easily gathers round him a mysterious veil of unknown sanctity, and men honor him for a saint.

A DETECTIVE INVENTION.

Photography has long been one of the useful arts; but, with recent developments and the promise of more, it may soon become indispensable in business houses. The "detective camera" lays bare the work of the clever artists who "retouch" post office orders and checks, and it figuratively "shoots" them as they present themselves at the counter of the bank. An invention of Mr. Bolas can be so fitted near the paying desk of a bank cashier that he can, by touching a key, obtain four or five portraits of a suspected customer in as many seconds; and the photographs will remain as unimpeachable witnesses to the identity of the person photographed. Professional beauties, statesmen and other public characters will, in future, be careful to present their checks, &c., by deputy, or the cashier will be able to take their portraits without so much as "By your leave." The photographic record will, however, be proof that the person whose portrait is taken did present himself at the counter of the bank, and the ends of justice will be furthered by its assistance. But the "detective camera" will not be limited in its uses to the special services of a bank; it will not unlikely be found of considerable value in commercial and industrial establishments of all kinds, and will in effect multiply the "eye of the master" a thousandfold, for it can be so arranged in connection with a clock, that the exact aspect of a workroom at any given hour or at any fixed intervals can be recorded with the perfect impartiality of sunlight. With a sun-printed record there can be no question as to whether a workman was in his place or not, and the "detective camera" will thus become a very useful "overlooker"—an absolute accurate recorder of the state of a workshop at any given time—a caution to idlers, and a testimonial to the industrious. It is rumored that Sir William Harcourt has extensively resorted to the "detective camera" or some such process in obtaining secrets from private letters which pass through the post. Intriguing members of Parliament and passionate lovers must be cautious what they say in letters whilst the right honorable gentleman is Home Secretary.—*Echo.*

Artificial stone can be produced by the following process, recently suggested by Ternikoff: A mortar consisting of equal parts of lime and sand is exposed for a few hours to a temperature of 150° Centigrade in the presence of water vapor. The paste having been taken out of the furnace, is now passed under the cylinders of a machine like that used for molding bricks, and it comes out in the form of cubes which, on being exposed to the air, become dry and hard. In the course of eight or nine hours these cubes are said to become as hard as good building stones, and are fit for use. This artificial stone is, in fact, a sort of brick or mortar baked at a low temperature, and the cost, too, is about the same as that of bricks.

A glue ready for use is made by adding to any quantity of glue, common whisky, instead of water. Put both together in a bottle, cork it tight and set it for three or four days, when it will be fit for use without the application of heat. Glue thus prepared will keep for years, and is at all times fit for use, except in very cold weather, when it should be set in warm water before using. The obviate the difficulty of the stopper getting tight by the glue drying in the mouth of the vessel, use a tin vessel with the cover fitting tight on the outside to prevent the escape of the spirit by evaporization. A strong solution of isinglass made in the same manner is an excellent cement for leather.

The J. W. Stoakes Automatic Shading

PEN.

FOR PLAIN, FANCY AND ORNAMENTAL

LETTERING.

WASHINGTON, D. C., March, 1880.

I desire to say that the "Shading Pen" invented by Mr. STOAKES meets a want long felt by penmen. The work done by it is perfect in line and shade. The rapidity with which lettering is done, aside from the beauty of the work, is enough to recommend it for general use.

H. A. WHITNEY, Ass't Cashier, U. S. Treasury.

U. S. ENGINEER'S OFFICE, ST. LOUIS, MO., February 11, 1880.

I have tried the PEN, and it gives great satisfaction. It is worth twice the price asked. It is valuable for headings, etc. JNO. R. BALLINGER.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

George E. Meek, London, England, is in town.

H. F. Gibson, news dealer, &c., Fredonia, N. Y., has sold out.

J. Stackpole, news dealer, Chicopee, Mass., has sold out to H. M. Loring.

Henry Funk, publisher, Monticello, Ill., has sold out to Mize & Waggoner.

Sheridan Brothers, publishers, San Buenaventura, Cal., have dissolved partnership.

Joseph Cohen, fancy goods dealer, Newark, N. J., will discontinue the business on April 1.

P. J. Thomas, of the firm of Thomas & Messer, dealers in paper hangings, Baltimore, Md., is dead.

The stock of J. L. L. F. Warren, publisher of the *California Farmer*, San Francisco, Cal., has been attached.

A. N. Kellogg, publisher, New York city, has formed a stock company, under the style of A. N. Kellogg Newspaper Company.

Lazarus Fried has retired from the firm of Neuberger, Messner & Co., wholesale dealers in notions, New York city. Mayer Neuberger and Moritz Messner continue under the old style.

A. Ackerman, agent, formerly at 29 Beekman street, has removed his envelope paper cutting business to No. 16 Beekman street. Mr. Ackerman makes a specialty of working for the trade.

William M. Donaldson & Co., lithographers, Cincinnati, were burned out on Saturday; loss $27,000, fully covered by insurance. Payne & Co., manufacturers of envelopes, occupying a portion of the same building, were damaged $25,000; also covered by insurance.

At the annual meeting of the "Fairmount Park Art Association," recently held at the Academy of Fine Arts, Philadelphia, Charles J. Cohen, the well known manufacturing stationer of that city, was re-elected a trustee of the association to serve for the ensuing three years.

The American Crayon and Slate Company will remove to No. 43 Dey street, two doors below its present location, on or about May 1, the change being due to the increase of business. It has added the XX Lehigh D slates to its already large line of goods. The business of this concern is steadily increasing.

L. F. Lawrence, Adams & Co., of Boston, manufacturing stationers, whose failure was reported last week, are said to have liabilities of about $25,000. They became embarrassed last June, their debts then amounting to $29,785, and obtained an extension of four, ten, thirteen and sixteen months. The firm has issued a circular announcing that it will continue to carry on the business for the benefit of its creditors.

Orders for R. Fideau's patent hammocks continue to be received in goodly numbers, and are increasing. Large shipments have been made during the past ten days to the trade in different parts of the country. Those intending to order would do well to do so before the rush of business sets in later on. All customers are supplied in the routine in which their orders are received. Mr. Fideau has been compelled to enlarge his store by taking down the partitions so as to meet the large increase of his business.

Wm. Irwin Martin, of Samuel Raynor & Co., arrived home safely with his family this week from his trip to the mountains of North Carolina. Mr. Martin formed part of an excursion party consisting of William Whiting and wife, of Holyoke, and James D. Whitmore of this city to make this trip. Mr. Whiting's health, it is said, has been considerably benefited, and he, with Mr. Whitmore, still remains at the Davis Hotel, Kittrells, N. C., where the whole party sojourned during their stay. Mr. Whiting will probably remain until about May 1. Mr. Martin visited among other places, while away, Richmond, Petersburg and Norfolk. A place of particular interest to him was the crater at Petersburg, brought into notoriety during the late war on account of the explosion which occurred there.

Webster Stetson, aged 15, living with his parents at No. 340 Navy street, Brooklyn, and working in the printing house of Price Brothers, No. 112 Fulton street, this city, was caught on Monday afternoon by a band he was attempting to adjust and carried twice around the pulley. He received a compound fracture of the left leg and right arm, a simple fracture of the right leg, and a severe scalp wound. He was taken to the Chambers Street Hospital, where he died at 11 o'clock at night.

Some of the novelties and other goods in silk, plush and leather recently manufactured by Henry Levy & Son are said to surpass any imported articles of the same class. Many members of the trade who have seen these goods have expressed themselves as being agreeably surprised at their excellence of design and elaboration of finish.

B. G. Benjamin has for a year past been employed as a bookkeeper by the Photo-Engraving Company, No. 67 Park place. On Friday he was held in the Tombs Court on a charge of embezzlement, it being alleged that during the year, by falsifying pay-rolls, he had misappropriated $700.

C. C. White reports that he is well supplied with steam and water power to fill orders promptly, and that he carries a full assortment of stocks. His goods are meeting with much favor, and it is said that any one once handling them is sure to order them again.

Boorum & Pease are about issuing a circular to inform the trade that their new styles of fine leather goods, autograph albums, &c., will soon be ready, and that they will have a large number of novelties in both lines.

James R. Prentice, formerly of the Troy Paper Company, has started in the paper business as wholesale and retail dealer, on his own account, at No. 303 River street, Troy, N. Y.

The firm of Banfield, Forristall & Co., wholesale dealers in fancy goods, Boston, Mass., has been dissolved by the retirement of A. W. Banfield. Jacobs, Rogers & Co. continue.

Loeh & Brother are working with full force for the summer season as well as for fall. They promise a great many novelties, which will surprise their customers.

R. A. Heim, bookseller and stationer, at Atchison, Kan., has mortgaged his entire stock to his wife, and has assets of $6,500, with liabilities of $8,000.

W. J. Boning, Philadelphia, agent for the Livermore stylographic pens, reports a very good business during the month of March.

J. H. Van Kirk & Co. have leased the store at No. 76 Beekman street, and will remove thereto on or about May 1.

Chaffee & Williams, publishers, Ida Grove, Ia., have sold out.

Theodore V. Smith has just returned from an extended trip in the West.

Charles Frenz, stationer, &c., Hickman, Ky., has been closed by the marshal.

J. N. Elliott, news dealer, &c., Foxburg, Pa., has sold out to J. E. Templeton.

Evan W. Thomas, dealer in paper hangings, Philadelphia, Pa., has been sold out at auction.

Attention is called to an advertisement offering an excellent stand to a stationer and printer.

Curl & Stough, booksellers and stationers, Brazil, Ind., have sold out to P. L. Wheeler & Co.

McLoughlin Brothers shipped this week a large invoice of toy books and games to London, England.

J. E. Linde, card and card board dealer, at 29 Beekman street, will remove about May 1 to No. 19 the same street.

Jacob Hyman, paper and card board dealer, will remove on or about May 1 from 29 Beekman street to 165 William street.

A new descriptive list, with cuts and descriptions of seventy styles of leading pens, will be sent free by mail on addressing the Esterbrook Steel Pen Company, 26 John street, New York.

Myers Brothers are finding a large sale for De La Rue's manufactured satin pictures. These goods, besides having a high degree of beauty, are so varied in style and design that they can be utilized for all festive occasions.

Walter F. Cushing and Henry N. Brooks have formed a copartnership under the style of H. N. Brooks & Co., and will continue the wholesale and retail stationery, book and printing business, at No. 12 Palace Block, Meriden, Conn.

I. H. Hamburger has placed on the market this week two hundred and fifty new series of Christmas cards. They are prepared with great care, and are from paintings by the best artists in Europe and America. The assortment contains many gems and novelties.

"The Album Writer's Friend" is a collection of prose and poetry, comprising over three hundred selections, suitable to write in autograph albums, valentines, and for birthday and wedding celebrations. It also contains a new and choice collection of verses suitable for Christmas and New Year cards. J. S. Ogilvie & Co., 25 Rose street, New York, are the publishers.

A. M. Collins, Cope & Co. have isssued a new, handsome catalogue of bevel edge panel cards, showing a material reduction in prices. Their line embraces about seven hundred different kinds, including colors, sizes and qualities. They are about issuing a new line of folding cards for advertising purposes and orders of dancing numbered from 1,050 to 1,070 inclusive, which are probably the most artistic they have issued this year.

Ohpacher Brothers, art publishers, of Munich, Germany, have opened a branch house in New York, at 338 Broadway. One of the members of the firm has taken charge, and the house is represented by Samuel Garre. This firm developes a new competition in Christmas, Easter and birthday cards, and has introduced a series of elegantly finished and special designs, which will attract attention and buyers anywhere. Its fringed cards are in excellent taste; but a special feature is a design printed on white satin, which is mounted on card board, and having the edges gilded to prevent fraying. These goods are got up in the best style and are remarkable

for their artistic character. Wiltshire & Clement hold the New Jersey agency for these goods.

E. H. Fonticella, printer, Bodie, Col., is advertised to close out.

W. W. Lewis & Co., stationers, &c., Pittsburg, Pa., have sold out.

J. W. Wonder, dealer in notions, Monmouth, Ill., is selling out at auction.

Miss Clark, fancy goods dealer, Montreal, P. Q., Can., has been burned out.

Wm. C. Taber, Jr., of Charles Taber & Co., New Bedford, Mass., is in town.

Ira D. Dargy (agt.), bookseller and stationer, Canandaigua, N. Y., has sold out.

S. Rosenthal, dealer in notions, Havana, Ill., has removed to Lincoln, same State.

Schaefer & Heilman, manufacturers of paper bags, Cincinnati, O., have dissolved partnership. B. Q. Schaefer continues.

Ryan, Wales & Co., dealers in wall paper, Minneapolis, Minn., have dissolved partnership. Harvey Wales & Co. succeed.

A first class salesman is offered a good chance in a well established house by an advertisement to be found in another column.

Henry Snider, of Louis Snider's Sons, Cincinnati, and Mark Holmes, of Snider & Holmes, St. Louis, were in town during the week.

J. B. Shaw, recently with McLoughlin Brothers, has formed a connection with W. A. Harwood & Son, in the capacity of salesman.

The firm of Howard & Mundy, publishers, Weston, Mo., has been dissolved by the retirement of Mr. Mundy. Mr. Howard continues alone.

McCarty & Hasberg again request the trade not to place import orders until they have an opportunity for seeing the samples now carried by their representatives on the road.

Bailey, Banks & Biddle, Philadelphia, have been obliged to copyright all of their designs for writing paper, cards, menus, &c. They have taken this step in order to put a stop to the imitation of their designs which has been going on for some time, and has caused them much annoyance and loss.

Charles J. Cohen, who has just returned from a brief visit to the trade in the vicinity of Philadelphia, states that the prospects for the spring are quite encouraging. A new and complete catalogue and price list of envelopes manufactured by Mr. Cohen is in press, and will soon be ready for distribution.

Eberhard Faber reports business good in all of the lines which the firm handles. The gold pen and pencil case department is now receiving special attention from the house, and the fruits of the labor bestowed on it are shown by an increased number of orders. Parties visiting the city are invited to call on the firm and see these lines; while those who do not expect to come to the metropolis for some time are requested to send for catalogues.

Harry A. Schmook and John Aikenhead, representing John Gibson, have returned to the city, and report an excellent trade, especially in reward, Easter and birthday cards. Mr. Schmook, who has for the past four months been greatly troubled with his eyes, is now nearly well again, and expects to start West on his next trip in a few weeks. Mr. Gibson has been so much overcrowded with work during the past season that he has been compelled to put in another new lithographic steam press, with all of the latest improvements.

POTSDAMER & CO.,

Lithographic Art Publications

22 Sizes. **FOLDING AND SINGLE ADVERTISING CARDS** 123 Designs.

Equal in design and finish to and at less than one-half the price of the same grade of goods in steel. No tints or colors are used for the effects, but the work is engraved and etched similar to steel and printed in Black.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---$2.00 PER ANNUM.

Single Copies - - - - 10 Cents

NEW YORK, THURSDAY, MARCH 31, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

OUR foreign trade continues to develop gratifying features, our exports still being in advance of the imports.

ACCORDING to the eighth monthly statement for the current fiscal year, the excess of exports, merchandise values, for February, 1881, was $19,900,295, against $4,309,202 for the same month of 1880. The excess of export values for the eight months ended February 28 was $210,387,405, and for the twelve months ended same date $225,453,012, against $152,618,305 and $212,306,044 for the corresponding periods of 1880. While our exports so largely exceed our imports, it is satisfactory to know that they are increasing in extent, the values for February showing a growth of about $8,000,000 and for the twelvemonth of $136,500,000.

TRADE "down South" has been having rather a hard time of it this winter. A Georgia correspondent says: "We have had a terrible and unprecedented winter. * * * For weeks many of the country roads were impassable. * * * Much of the cotton crop was destroyed in the fields," &c. But, after all this, despite snow, rain, hail, frost, broken railways, bad roads, and the other evils, we are told that the people are in "moderately good spirits." Collections are reported dull, but no one seems to be anxious or failing. After all of the winter's tribulations are past and gone there will probably be a much more cheerful feeling at the South. Trade will revive and prosperity will put another face on business. There is no cause for despair, and we doubt if there is any reason for fear. A little element of impatience at the unusual character of the season is natural in those who have not been accustomed to such straits of weather; but the sensation, like that of being skinned, is nothing after getting used to it. The South will have enough to do when the skies are propitious and everything gets into full swing.

IT really seems probable that the World's Fair of 1883 will come to naught. The obstructions thrown in the way of this enterprise by people who ought to give it all the aid and encouragement in their power is something remarkable. At the same time the daily papers are indifferent, apparently controlled by hidden influences which are working to defeat this great enterprise. It may be that all of the gentlemen who are engaged in pushing the exhibition are not possessed of the means and authority to carry the affair through with the *éclat* that may be necessary; but that is no reason why they or the efforts they make should be despised. There are people standing back who ought to take an equal share in the work of promoting the success of the Fair, but who try to detract from and to hinder it. However much some individuals may claim all of the notoriety and prominence to which their wealth and alleged social position entitle them, there is certainly a popular feeling that there is a little too much of the grandiose idea perceptible in their speech and actions. We do not deny that those who contribute their money liberally should take an important part in the control and direction of affairs to which they supply their means, but it is certainly objectionable to have an autocracy of wealth without a seasoning of intelligence and brains. We do not exactly like the site selected for the exhibition, inasmuch as it is rather remote; but this objection is, after all, easy to overcome. With our present facilities for traversing the city increased by those which are sure to follow when the exhibition becomes certain, there will not be much to complain of as to reaching the ground. We should, however, have preferred the location at the north end of Central Park from Fifth to Eighth avenues, extending north to One hundred and twentieth street. But having made a beginning the fair should be carried to completion, and those people who are discontentedly gnawing their lips and biting their thumbs ought to be willing to further its success, yielding their preferences with magnanimity and giving it a hearty support.

ANSWERS TO CORRESPONDENTS.

R. J. A. B.—Wants names of publishers of penny songs, and to know if the songs have both music and words or words only.

Ans.—Pauline Lieder, 60 Chatham street, and Henry Wehman, 50 Chatham street, New York, publish penny songs. The music is not given.

ORIGIN OF LEADERS IN NEWSPAPERS

The greatest novice in newspapers knows that "leaders" is the term given to that portion of the journal written by the editor or the literary staff attached to the editorial department, and consisting usually of comments on important questions or events of the day. They are supposed to indicate the opinions of the editor, and therefore pass also by the name of "editorials;" are usually distinguished by being leaded, and as usually being inserted under the sub-head.

These short essays on current public topics do not date from the origin of newspapers, but have their little history attached to them. In the days of George I. or Queen Anne, no English reader of a newspaper met with any of these brief compositions, not very methodical nor over and above finished, and the main object of which is to give him information and amusement upon a variety of topics. But in the year 1739, Mr. Raikes, the editor of the *Gloucester Journal*, commenced a series under the title of "Country Common Sense." A large number of his readers got offended at what they considered as an interference with the news of the week. So Mr. Raikes abandoned his design.

Mr. Abree, however, the proprietor of the *Canterbury News Letter*, had seen what had been done in the *Gloucester Journal*, and was captivated by the idea. So had several other editors. All of them met with opposition at first but they steadily continued the essays, and finally won the approbation of all their readers. Since then, editorials have become an indispensable feature of all newspapers, and some of them of a vigorous nature, such as the *Saturday Review* and others, are now made up entirely of these essays, and are improving yearly in public estimation.—*Paper and Print.*

RUSSIAN LANGUAGE AND LITERATURE.

The youngest language in Europe that has acquired a considerable literature is that of Russia. The commencement of Russian literature dates only from 1708, when Peter the Great issued his new alphabet as an improvement upon the clumsy characters of the Sclavonic, which was then abandoned for the spoken but unwritten Russian. The growth of the language can be estimated by the fact that the library of St. Petersburg in 1850 contained 40,000 volumes in the Russian language. Imagination can picture alone the possibilities of the future, when it is remembered that in 1860 the English language was spoken by 60,000,000 people and the Russian by 65,000,000, while it was a Russian photographer who exhibited before a London audience a reproduction of the Codex of Strabo, preserved with jealous care in the convent library of Mount Athos.

The Rev. Edward Everett Hale has begun a suit in the United States Circuit Court for this district against George Munro, for infringement of copyright. The complaint alleges that Mr. Hale wrote the story called "The Man Without a Country" in 1863, the story being published in the *Atlantic Monthly* and afterward republished in book form, and that more than 90,000 copies have been sold. In 1876 he rewrote and republished the work, in each case taking out the copyright, of which he is the sole owner. Last year, according to the complaint, George Munro published "The Man Without a Country" in the "Seaside Library," printing on the cover the false statement that he had copyrighted it. Over 6,000 copies are alleged to have been sold by Mr. Munro, greatly injuring the sale of the work as published by the author, who, therefore, asks for $5,000 damages.

PHOTOZINCOTYPES.

In Moll's *Notizen*, J. Husnik writes as follows on photozincotypes with a sensitive asphalt solution:

We have at last reached the point of a more intimate knowledge of asphalt, and have thereby obtained a correct explanation of many of its properties hitherto kept secret. It appears that by treating this substance with ether certain less sensitive components are removed, so that a residue "insoluble in ether" is left, which possesses in a considerable higher degree that sensitiveness to light so much desired in order to render the asphalt process practically useful. The way in which asphalt manifests its sensitiveness to light consists in becoming insoluble, or difficult of solution in its usual solvents, after exposure. Thus, a zinc plate, coated with asphalt solution, which has been exposed for some time under a linear negative, may be developed by spirit of turpentine, so that all the whites dissolve while the lighted parts remain undissolved. And if after fully developing, the zinc plate be washed first with spirit and then with water, and now allowed to become perfectly dry, the operation of etching may at once be begun; but, as such a plate had formerly to be exposed for hours in the sun, and for days—in winter even for weeks—in the shade, in order to get a good picture which can be developed with turpentine, it was not possible to turn the process to practical account. Gillot, Yves, and Barret, and other firms in Paris have, however, employed the asphalt process for years, but the secret of the greater sensitiveness of their solution was never known.

In Switzerland and America also one often heard of the asphalt process being employed for zincography, and, as already mentioned, the veil has now been torn from the secret. We know at last that progress in this process is to be sought in the direction of elimination from the solution of the insensitive particles.

Such a sensitive solution can, when requisite, be diluted with a little anhydrous benzole (not benzine, in which asphalt is insoluble). Benzole, which contains a little water cannot be used either, as in drying it would cause the asphalt solution to wrinkle up and would not furnish an equal surface.

The solution must be kept perfectly free from dust. Before being coated the zinc plate should be carefully dusted, and any excess of the coating solution should be poured off into another vessel, and not back into the stock bottle until it has stood to settle for a couple of days, after which the upper part may be poured back. When the film has become dry it may be slightly warmed and then exposed under a clear line negative—preferably in the sun, as then only half an hour of an exposure is required. The plate is now laid in a bath containing oil of turpentine, and when the image has become visible the denser portions may be gone over with a small soft pencil, so that they may be developed at the same time as the light.

When the shadows appear sufficiently clear, remove the plate and coat it with alcohol or place it in a bath containing alcohol, and when the oil of turpentine has been partially washed out, place it under a jet of water falling from a certain height, so that the water may come in contact with the whites and remove any oil of turpentine that might still be adhering to them.

The development is an operation requiring great care and rapidity of work, which can only be learned by practice. The plate, being well developed, is next warmed, and when it has cooled again the next stage is the etching. Should the shadows, however, not be deep enough, they should be gone over with a pencil dipped in oil of turpentine, and when that has been allowed to act for a short time the whole plate should again be washed in the above mentioned turpentine bath, and the procedure with the alcohol bath and the water tap repeated. This plan gives sharp pictures, and may be used with advantage for much reduced reproductions of wood cuts.

Market Review.

Office of the American Stationer,
Wednesday, March 30, 1881.

THE MONEY MARKET.—The monetary situation was without any feature of special interest, and the market worked smoothly throughout the entire week. The borrowing demand was at no time very pressing, and brokers readily supplied their requirements at rates ranging from 3 to 6 per cent., most of the transactions, however, having been effected at 4 @5 per cent. The government bond dealers obtained accommodation at 4@5 per cent., with but few transactions above 4 per cent. But little business was done in time loans, the rates therefor being nominally 5@6 per cent. The discount market was dull, and prime mercantile paper ruled at 5@6 per cent.; but few names sold below 5½ per cent. The prospects for the future of the money market are most favorable. The government bond market was quite active during the week, and was generally strong in tone, the closing quotations showing an advance as compared with those of the previous Saturday of ¼ per cent. in 4's and 4½'s, and ⅜ per cent. in 5's; 6's declined ¼ per cent. early in the week, but recovered the decline at the close. Railroad mortgages were less active than of late, and the market was irregular and unsettled, sympathizing largely with the share speculation. The stock speculation throughout the week was feverish and unsettled in tone, and generally prices exhibited a downward tendency. The market for foreign exchange was moderately active and about steady. The actual rates at the close for prime bankers' sterling were 4.80½ and 4.82¾@4.83. Cable transfers were 4.83¼@ 4.83½, and prime commercial bills 4.79@4.79½.

THE PAPER MARKET.—The apprehension under which some of the manufacturers labored a few months ago, that the increased production of the new mills would glut the market and reduce prices, has disappeared. The mills generally are full of orders at satisfactory prices, and are not inclined to make new contracts below current figures. The consumption keeps pace with the production, and there is no accumulation at the mills or in the hands of dealers. Fine papers are dull, with demand light, yet, except occasional cutting among dealers, prices are fairly maintained, with a slight tendency to a lower range. Dealers quote: Fine flat caps, 15½@ 16½c.; superfines, 18@20c.; record, 23@25c., and ledger, 27@30c. The higher grades of manilla wrappings are in fair demand, with prices firm and steadily held. Common manillas are weakening a little, and prices are quoted easier. We now quote a No. 3 at 6c. and a rag wrapping at 3½c. Straw and binders' boards are both very dull, but prices are steadily held. The straw wrapping manufacturers met at Albany on March 15, and passed a resolution to maintain the present schedule of prices, although it was well understood that prices were being cut generally by the manufacturers as well as the dealers. No further business was transacted except to agree to adjourn for two months. It is the impression among the trade that the organization, which has been in existence for over a year, is about disbanded, and that it will be some time before it will meet again.

THE STATIONERY MARKET.—There is a moderate business doing in the shipment of goods to the South and Southwest, but trade with the Northwest continues almost at a stand, owing to the difficulties of transportation. The spring season is very backward, the movement being a full month behindhand. We have had a long and severe winter to contend with, and are now confronted by bad roads in a wide area of country which greatly retards the free distribution of goods. Next month is looked to for the development of a good trade, and it is hoped will make up for the loss of it thus far. The Easter card business is still good, most of the dealers reporting large sales. Prices are generally in a steady line.

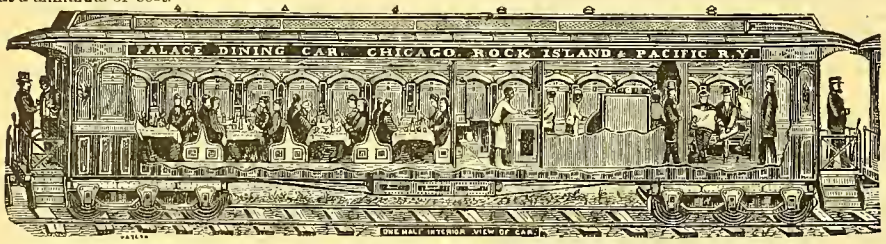
"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.



That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE, Vice-Pres't and Gen'l Man'gr, Chicago.

PHOTO-TRACINGS IN BLACK AND COLOR.

Two new processes for taking photo-tracings in black and color have recently been published —"Nigrography" and "Anthrakotype"—both of which represent a real advance in photographic art. By these two processes we are enabled for the first time to accomplish the rapid production of positive copies in black of plans and other line drawings. Each of these new methods has its own sphere of action; both, therefore, should deserve equally descriptive notices.

For large plans, drawn with lines of even breadth, and showing no gradated lines or such as shade into gray, the process styled "nigrography," invented by Itterheim, of Vienna, and patented both in Germany and Austria, will be found best adapted. The base of this process is a solution of gum, with which large sheets of paper can be more readily coated than with one of gelatine; it is, therefore, very suitable for the preparation of tracings of the largest size. The paper used must be of the best drawing paper, thoroughly sized, and on this the solution, consisting of 25 parts of gum arabic dissolved in 100 parts of water, to which are added 7 parts of potassium bichromate and 1 part of alcohol, is spread with a broad, flat brush. It is then dried, and if placed in a cool, dark place will keep good for a long time. When used, it is placed under the plan to be reproduced, and exposed to diffused light for from five to ten minutes—that is to say, to about 14° of Vogel's photometer; it is then removed and placed for twenty minutes in cold water, in order to wash out all the chromated gum which has not been affected by light. By pressing between two sheets of blotting paper the water is then got rid of, and if the exposure has been correctly judged the drawing will appear as dull lines on a shiny ground. After the paper has been completely dried it is ready for the black color. This consists of 5 parts of shellac, 100 parts of alcohol, and 15 parts of finely-powdered vine black. A sponge is used to distribute the color over the paper, and the latter is then laid in a 2 to 3 per cent. bath of sulphuric acid, where it must remain until the black color can be easily removed by means of a stiff brush. All the lines of the drawing will then appear in black on a white ground. These nigrographic tracings are very fine, but they only appear in complete perfection when the lines of the original drawing are perfectly opaque. Half-tone lines, or the marks of a red pencil on the original, are not reproduced in the nigrographic copy.

"Anthrakotype" is a kind of dusting-on process. It was invented by Dr. Sobacchi, in the year 1879, and has been lately more fully described by Captain Pizzighelli. This process—called also "Photanthratography"—is founded on the property of chromated gelatine which has not been acted upon by light to swell up in lukewarm water, and to become tacky, so that in this condition it can retain powdered color which had been dusted on it. Wherever, however, the chromated gelatine has been acted on by light the surface becomes horny, undergoes no change in warm water, and loses all sign of tackiness. In this process absolute opacity in the lines of the original drawing is by no means necessary, for it reproduces gray, half-tone lines just as well as it does black ones. Pencil drawings can also be copied, and in this lies one great advantage of the process over other photo-tracing methods, for, to a certain extent, even half-tones can be produced.

For the paper for anthrakotype an ordinary stroug, well sized paper must be selected. This must be coated with a gelatine solution (gelatine 1, water 30 parts), either by floating the paper on the solution or by flowing the solution over the paper. In the latter case the paper is softened by soaking in water, is then pressed on to a glass plate placed in a horizontal position, the edges are turned up, and the gelatine solution is poured into the trough thus formed. To sensitize the paper, it is dipped for a couple of minutes in a solution of potassium bichromate (1 in 25), then taken out and dried in the dark.

The paper is now placed beneath the drawing in a copying frame, and exposed for several minutes to the light; it is afterwards laid in cold water in order to remove all excess of chromate. A copy of the original drawing now exists in relief on the swollen gelatine, and, in order to make this relief sticky, the paper is next dipped for a short time in water, at a temperature of about 28° or 30° C. It is then laid on a smooth glass plate, superficially dried by means of blotting paper and lamp black or soot evenly dusted on over the whole surface by means of a fine sieve. Although lamp black is so inexpensive and so easily obtained, as material it answers the present purpose better than any other black coloring substance. If now the color be evenly distributed with a broad brush, the whole surface of the paper will appear to be thoroughly black. In order to fix the color on the tacky parts of the gelatine, the paper must next be dried by artificial heat—say by placing it near a stove—and this has the advantage of still further increasing the stickiuess of the gelatine in the parts which have not been acted upon by light, so that the coloring matter adheres even more firmly to the gelatine. When the paper is thoroughly dry, place it in water and let it be played on by a strong jet; this removes all the color from the parts which have been exposed to the light and so develops the picture. By a little gentle friction with a wet sponge the development will be materially promoted.

A highly interesting peculiarity of this anthrakotype process is the fact that a copy, though it may have been incorrectly exposed, can still be saved. For instance, if the image does not seem to be vigorous enough, it can be intensified in the simplest way; it is only necessary to soak the paper afresh, then dust on more color, &c.; in short, repeat the developing process as above described. In difficult cases the dusting on may be repeated five or six times, till at last the desired intensity is obtained.

By this process, therefore, we get a positive copy of a positive original in black lines on a white ground. Of course, any other coloring material in a state of powder may be used instead of soot, and then a colored drawing on a white ground is obtained. Very pretty variations of the process may be made by using gold or silver paper, and dusting-on with different colors; or a picture may be taken in gold bronze powder on a white ground. In this way colored drawings may be taken on a gold or silver ground, and very bright photo-tracings will be the result. Some examples of this kind, that have been sent us from Vienna, are exceedingly beautiful.

Summing up the respective advantages of the two processes we have above described, we may say that "nigrography" is best adapted for copying drawings of a large size; the copies can, with difficulty, be distinguished from good autograph, and they do not possess the bad quality of gelatine papers—the tendency to roll up and crack. Drawings, however, which have shadow or gradated lines cannot be well produced by this process; in such cases it is better to adopt "anthrakotype," with which good results will he obtained.—*Photographic News.*

The Simon patent index cutter manufactured by J. P. Bell & Co., of Lynchburg, Va., is a very useful tool. It makes a round corner, is durable and powerful, cutting any size of index neatly, very quickly, and with the greatest ease. The price, with upper gauge, is $15, and without gauge $12.

NEW PROCESS OF ENGRAVING AND PRINTING.

COPPER PLATES vs. LITHOGRAPHY.

Advantages of this Process over Stone Work:

A CLEAR SHARP IMPRESSION—AS METAL IS HARDER THAN STONE.
THE PAPER RETAINS ITS GLOSS—NO DAMPING REQUIRED.
WE PERFORATE EVERY BLANK WE PRINT BY OUR ROTARY MACHINE.
OUR NEW DESIGNS ARE ALL ORIGINAL AND FINELY EXECUTED.
WE USE NOTHING BUT HEAVY TUB-SIZED FIRST-CLASS PAPER.
EACH BOOK IS STRONGLY BOUND AND EVERY HALF DOZEN PUT UP IN BOXES.
OUR PRICE IS MUCH LESS THAN LITHOGRAPHIC WORK.

NOTES, DRAFTS, RECEIPTS, ORDERS, CHECKS, &c., by the above Process, and also from STEEL PLATES.

Designed and Manufactured especially for Stationers.

TWO WORKS
OF
Great Value
TO
STATIONERS.

The Stationers' Price Book and Illustrated and Descriptive Catalogue, . . $2.00

Lockwood's Directory of the Paper Trade, . . . $2.00

EVERY STATIONER wants the above Works for the

FOLLOWING REASONS:

The **Price Book and Catalogue** furnishes Stationers information which, if they have at all, is usually scattered and never right at hand when wanted. As a book of immediate reference it will be found invaluable.

The **Directory** of Paper Manufacturers and Jobbers is a guide to **First Hands** in the Paper Trade. Any one who uses it intelligently can save many times its cost at once.

THE PRICE BOOK is deliverable in the cities of New York, Boston, Philadelphia, Chicago, Detroit and St. Louis, where purchasers can have it packed with any goods they may be buying.

THE DIRECTORY is sent post-paid.

All Stationers who wish to keep **ABREAST WITH THE TIMES,** must own these two books.

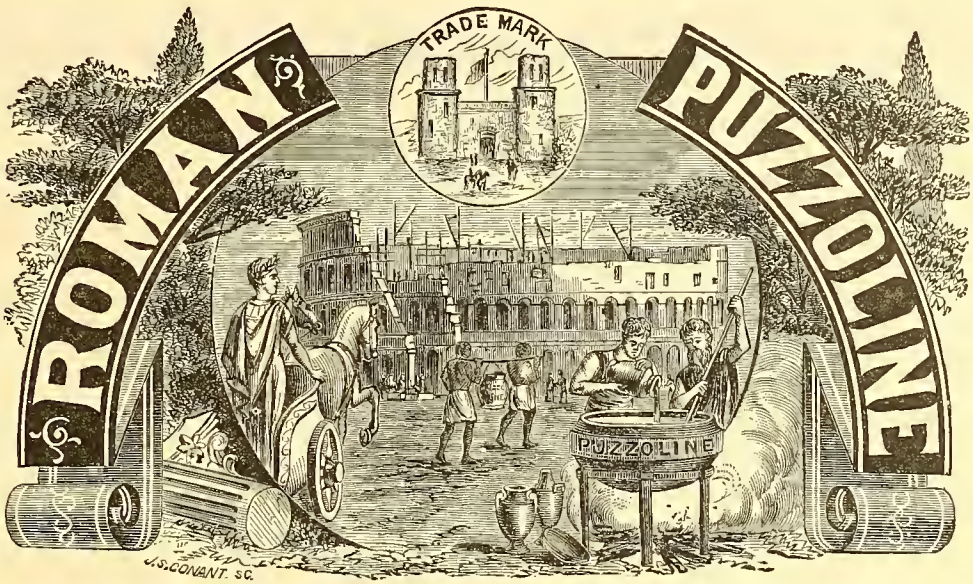
The Cement of the Ancients.

UNEXCELLED FOR STRENGTH AND DURABILITY!

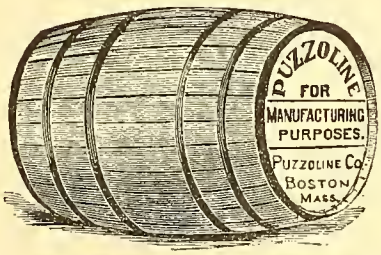
☞ CAUTION.—Manufacturers or others using adhesives of any kind are invited to examine into the merits of the above before purchasing, as none are genuine without the Trade-Mark, a castle, blown into the bottle.



☞ CAUTION.—Manufacturers or others using adhesives of any kind are invited to examine into the merits of the above before purchasing, as none are genuine without the Trade-Mark, a castle, blown into the bottle.

This new adhesive is a **liquid glue and cement combined,** and possesses greater strength and tenacity than any other known cement. It is composed of no injurious ingredients, **is entirely odorless,** and is **always ready** for use; no heat being required as with other adhesive compounds.

As a **Cement** in repairing **Crockery, Glassware** and **broken Ornaments** of all kinds, it is **unequaled.** It will stand the test of boiling water as no other adhesive will. As a **Glue** it is not affected by heat or moisture, and will hold more firmly than any other known preparation



CIMITOLINE.

A MUCILAGE.

Its action is quicker, it is not affected by moisture, will not sour, mold, or dry up in any climate, and does not wrinkle the paper, as is the case with mucilage now in general use.

MANUFACTURED SOLELY BY

THE PUZZOLINE COMPANY,

PEARL AND HIGH STREETS, BOSTON, MASS.

The MacKinnon Pen or Fluid Pencil.

FULL LENGTH, POCKET SIZE.

FULL LENGTH, DESK SIZE.

Patented March 21, 1876; January 21, 1879; Reissued July 15, 1879. Patented July 29, 1879.

THE COMMERCIAL PEN FOR THE AGE.

The Only Successful Reservoir Pen in the Market.

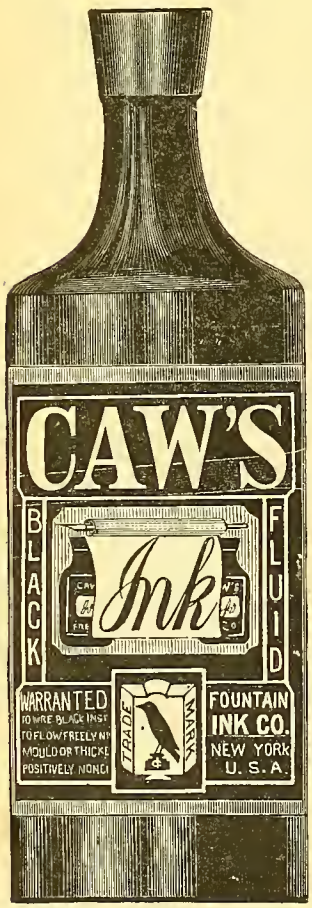
THE ONLY PEN ever made with a CIRCLE OF IRIDIUM (DIAMOND) around the Point.

THE ONLY PEN accompanied by a WRITTEN GUARANTEE from the Manufacturers.

THE ONLY RESERVOIR PEN supplied with a GRAVITATING VALVE. Others substitute a SPRING, which soon gets out of order.

THE ONLY PEN that will stand the Test of Time.

The above are FACTS which it behooves every man in the trade to know. Enough said.



Bottle for Quarts, Pints, 8 oz. Packed One Dozen, in cases.

CAW'S BLACK FLUID

Is the only known Ink that is

Positively Non-Corrosive to Steel Pens.

Flows freely; does not thicken by exposure, and has the decided advantage of writing **BLACK AT FIRST.**

—WARRANTED—

To Write Black Instantly.
To Flow Freely.
Not to Fade.
Not to Mould.
Not to Thicken.
Not to Corrode Steel Pens.

☞ A Copy of the above is printed on all labels for **Caw's Black Writing Fluid**, for the purpose of attracting attention to each especial feature claimed. This is done to facilitate its introduction, and that the consumer, when using, may notice its merits, and thereafter use it in preference to the unsatisfactory thick, black inks, or pale, green writing fluids of the past.

NEW STYLE OF STANDS.

Packed 3 dozen in Case.

The above is the exact size of No. 1 Stand. No. 2 being twice this size.

FOUNTAIN INKS.

These Inks are expressly prepared for use in Fountain Pens. Put up in two sizes of bottles. No. 1 containing the same as cones or other styles of bottles generally sold as 3 oz., the Stopper arrangement being very convenient for both Fountain and other pens. No. 2 is twice the size of No. 1, and has a new device for filling Pens that keeps the Bottle always corked and free from dust, even while open ready for use.

FOUNTAIN INK CO., Manufacturers, 200 Broadway, New York.

DE LA RUE'S

A full sample set of Easter Cards, being three cards of each series, and one of each design, in all sixty-nine cards for $12.50. Twelve satin samples, being three of each series, and one of each design of the four series, for $3.60. An envelope is sent with each card.

DELANO'S

RAILROAD Red Rubber Bands and Rings. COMMERCIAL

THESE goods are put up in bulk, each box containing a pound, thereby saving the expense of putting them up in gross and great gross packages, and are designed for use by parties consuming large quantities. These goods are very popular with **STATIONERS DEALING with LARGE CORPORATIONS, &c.**

THE SIZES ARE AS FOLLOWS:

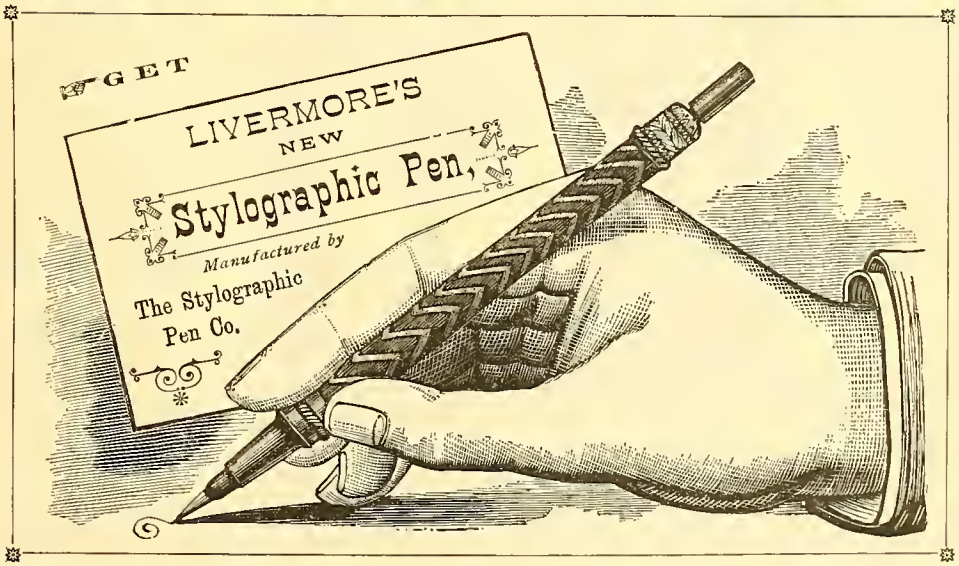
Elastic Bands. Nos. 27, 28, 29, 30, 31, 32, 33, 0¼, 0½, 0¾, 00¼, 00½, 00¾, 000¼, 000½, 000¾, 0000¼, 0000½, 0000¾.

Nos. 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 19, 20 and 50. **Elastic Rings.**

P. O. Box 1337. Z. DELANO, Boston, Mass.

IF YOU WANT THE BEST STYLOGRAPHIC PEN,

The Latest and the Best. Circulars on application.



Examination Solicited and Satisfaction Guaranteed.

The attention of the Trade is called to the improvements made and advantages offered in Livermore's New Stylographic Pen.

Patented July 15, 1879, and March 9, 1880.

FIRST—**A Smaller Air Tube**, allowing more space for the ink, and rendering the operation of filling easier and less frequent.

SECOND—**The Manner of Fastening the Needle**, not to the air tube, where it would be in danger of being bent or injured every time the pen was filled, but in the point, where it is not so exposed.

THIRD—**The Protection of the Spring** by a silver casing, preventing the ink from clogging its action.

FOURTH—**The Duplex Interchangeable Point Section**, furnishing great facility in cleaning the pen.

FIFTH—**The Ease with which Repairs can be Made.** The needle being in the point, it is not necessary to send the whole pen to the factory, but any dealer can supply a new point.

SIXTH—**Freedom from Legal Difficulties.** The New Stylographic Pen is manufactured under the patent controlling the use of an air tube to a Fountain Pen, and it is therefore free from legal complications.

M H

BLOTTER TABLET PATENTED

PADS OF PAPER WITH BLOTTER ATTACHED.

ELEGANCE. ECONOMY. CONVENIENCE. CLEANLINESS.

THE paper is tableted, so that each sheet may be freely removed, leaving a perfectly clean, smooth edge. No paper is wasted. The sheet on which you write is always clean, being protected by the blotter. The blotter, of the full size of the paper, is so attached at the top of the pad that both sides of it may be used, and will last out the entire contents of the pad, being always at hand, and perfectly clean.

The blotter is kept clean, and also from wearing, by the card board cover, which is made of a highly polished stock, perfectly smooth, and that will not catch dust or dirt from the desk. The cover is richly ornamented on every pad, giving the whole a neat and elegant appearance. All kinds of paper and printed blanks are put up in this form at prices as low as if loose; making the most complete line of staple and elegant stationery ever offered to the trade.

HASBROUCK & WATSON,

SOLE MANUFACTURERS. 51 NASSAU ST. NEW YORK.

THE PAPER TRADE IN THE CITY OF NEW YORK.

[Continued.]

A type of the successful man is William H. Parsons, who is a native of New York, but the son of an Englishman who was lost in the steamship President. He is also a brother of John E. Parsons, the well known lawyer. His connection with the paper trade began in 1853, when he entered into the employ of Buchanan & Kilmer, with the understanding that in the January following a new firm, of which he was to be a member, was to be formed. This was the firm Cheeseborough, Buchanan & Co., which lasted about two years. Cheeseborough's interest was then bought out by the other partners, Buchanan, Kilmer, and Parsons, who continued together under the firm name of Buchanan, Parsons & Co. It will not be out of place in this connection to say it has been remarked of Mr. Buchanan, that nearly every man whom he associated with himself in business has proved to be successful. First there was Chauncey Kilmer, who has long had almost a monopoly in furnishing paper for the New York *Sun*, is now a stockholder of that journal, and is reputed to be a millionaire. Next he took into copartnership the subject of this sketch, William H. Parsons, who, as everybody in the trade knows, is excellently well provided with this world's goods; and, lastly, Perkins and Goodwin, whose successful career has already been sketched at length in these columns.

About the year 1855 the firm of Buchanan, Parsons & Co. was dissolved, and Mr. Parsons branched out on his own hook and formed the firm of William H. Parsons & Co. The company was William F. Mott, Jr. Two or three years later this firm was also dissolved and Mr. Parsons took his brother, Arthur W. Parsons, into business with him under the firm name of William H. Parsons & Brother. Arthur W. Parsons retired in 1876, and is still living in this city. William H. Parsons then, having taken into copartnership George F. Hicks, who had been for some time his chief clerk, recurred to the original firm name of William H. Parsons & Co., which is retained to the present time, and Mr. Hicks is still the company.

Mr. Parsons may be called the pioneer of the paper trade in the uptown movement. He began business in Fulton street, but his was the first paper warehouse in Beekman street (No. 16) and the first also in Duane street. He moved up to Duane street between 1861 and 1863, and occupied the building No. 74—where THE PAPER TRADE JOURNAL is now published. He moved to his present location, 81 and 83 Duane street, in the spring of 1880.

He began in the general paper business, combining with it paper stock, in which, in fact, nearly every paper house at that time dealt at least to some extent. For a long time, however, his business has been confined to selling book, news and hanging paper, and the importation of paper makers' materials. For many years he has been interested in the ownership of a number of mills, and is now president of the Bowdoin Paper Manufacturing Company, of Brunswick, Me., the mill of which turns out five tons of news per day. At the present time he supplies a considerable portion of the paper used by the New York *Herald*.

The principal changes that have occurred in the paper trade since the beginning of his career have been briefly indicated by him to the writer as follows: The decadence of the commission business. When he entered the trade most houses were simply dealers on commission, without any direct connection with the manufactur-

ers. Now, although a large quantity of paper is still sold on commission, most houses are directly interested in the mills. At that time, too, scarcely any but machine finished paper was used for books; now super calendered paper is used almost entirely. The practice of putting up paper in rolls instead of sheets has also come into existence during his career.

[To be Continued.]

Telegraphy costs in England one-tenth what it does in the United States. For twenty-four cents twenty words, exclusive of the address, can be sent from any point in Great Britain to any other, and yet the profit over working expenses at the end of only eleven years has reached $10,000,000 aunually. The miles of line have iucreased in that time from 5,601 to 23,156, and the messages from 6,500,000 to 26,547,137. The average length of messages is far more than twenty words, as the annual profit is more than the receipts would be were the messages all single rate. The English post office contemplates reducing the single rate to twelve cents, irrespective of distance. We shall never know the convenience of telegraph communication until we have a post office telegraph and uniform rate in the United States.

BYRON WESTON

DALTON, MASS.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST and ONLY AWARD** given for

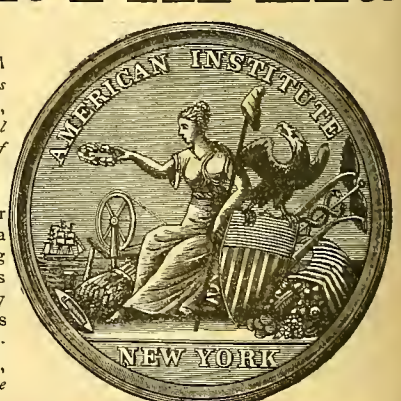
LINEN RECORD and LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition*, *Massachusetts Charitable Mechanics' Association*, *Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission*, *Medal of Progress American Institute*, *1877*, *and Medal of Improvement and Progress*, *Boston*, *1878*. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.



☞ **Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.**

Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 74 Duane Street, New York.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

REDMAN & KENNY, N.Y.

"The Stationer"—Every Thursday—$2.00 Per Annum.

VOL. IX.---NO. 14. NEW YORK, APRIL 7, 1881. WHOLE NO. 302.

Correspondence.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BOSTON, Mass., April 5, 1881.

Trade among the stationers has been good all along the line during the week. Stocks are ample for the season, and the near outlook is encouraging. Buyers from various parts of the country all confirm the opinions previously expressed—that the year's volume of trade will be fully equal to that of last year.

The principal attractions among the city and near by retailers just now is the trade in Easter goods, such as flowers, eggs and cards, the specialties of the season having increased in a wonderful degree. Taken all in all, the Easter festival this year will have developed a marked improvement in business of almost all kinds, especially the stationer's. The chief featare of the Easter trade is cards, which vie with those of Christmas this year; and it is acknowledged on all sides that the American designs "take the cake" for artistic quality, richness and variety. One newest card has butterflies on one side and a large Easter egg on the other, composed of daisies with a garland of violets. The trade in cards fairly occupies the stationers, and overflows into the book stores and the dealers in fancy goods.

Thayer & Wadham, No. 30 Franklin street, have recently got out card albums in fifteen different styles, prices varying from $1.50 to $10.

Winkley, Thorp & Dresser make a specialty in elastic bands, of pure rubber and extra strong. The new quarters of this enterprising firm, 111 Devonshire street, present a beehive appearance of activity.

The Boston *Post*, which made for itself a great reputation under the editorial management of the Greenes, as a Democratic paper during the existence of the Whig party, but which has had varied fortune under other management, business and otherwise, has been bought by A. P. Moore, of Malden, Robert G. Fitch and George B. Goodwin. This is the paper that the notorious Winslow, now in Buenos Ayres, had something to do with, and which he came very near wrecking.

The creditors of L. F. Lawrence, Adams & Co., Devonshire street, expect to realize a good dividend, the condition of the firm's affairs not being so bad as at first supposed. The notes and accounts payable amount to $30,746; stock, fixtures, printing office and bills receivable, $31,999. The concern has always enjoyed the good opinion of dealers. The business will be continued for the benefit of those particularly concerned.

At a recent sale of autographs here, that of Thackeray brought $7; Samuel Adams, $42.50; and John Hancock, $32. It is asserted that the manufacturing of autographs is regularly carried on, and that the profits are fair. It will soon be difficult to distinguish the "original Jacobs."

Young's Hotel, one of the best hostelries in town, where so many commercial travelers put up, is to be enlarged by its extension to Court street and the addition of two stories, making seven stories in all. It is also decided to change the character of the house so as to care for ladies as well as gentlemen.

A good many goods have been sold by samples during the week, the agents of New York houses having been in town in considerable force. These gentlemen have such winning or persuasive ways that it is impossible to throw them off—but then the lines of goods they offer are wanted, and their visits are welcome.

A Boston madame imparts to the ladies of the "Hub" the art of high-shouldered writing, such as is practiced by ladies of quality in England, the same—the handwriting, not the ladies—being peculiar and angular. The style imparts "tone" to visiting and wedding cards.

John Holmes, of the editorial staff of the *Herald*, has been flat on his back for some weeks with inflammatory rheumatism, but this has not prevented him from attending to his editorial duties, he having used the telephone in that direction; and his work has shown no deterioration, in the meantime, from its former usual excellent standard. There's nothing like pluck and brains.

The daily *Advertiser* will be published in the eight page form next month. This will be a big innovation for such a respectable, venerable and staid newspaper. L.

BALTIMORE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, Md., April 5, 1881.

Business, both wholesale and retail, has been dull since I last wrote you, owing, as I before suggested, to the bad weather and late spring. And the worst of it is there is a likelihood of a continuance of the almost winter winds and rains, from the fact two circuses are advertised to appear here between now and the last week in the month. Forepaugh will be in the city tomorrow and three succeeding days, and Barnum, "the undisputed prince" as he dubs himself, will stretch his tent during Easter week. It is an ill wind that blows nobody good, however. The rivalry between the two showmen has been a godsend to the newspaper proprietors and printers. Whole pages of the daily journals are filled with announcements of attractions to be seen in the respective exhibitions, and posters and dodgers and show cards in endless variety meet the eye on dead walls and store windows.

A. Kurtz, of T. N. Kurtz & Son, has gone West ou a business trip.

Oliver Clay, of D. A. Carroll's Methodist book store, who was laid up for some time on account of sickness is, I am glad to announce, out again attending to his regular duties.

Our City Council, the other day, passed a resolution appropriating the sum of $150 to each of the reporters who, during the year, reported the Council proceedings. There is no warrant, of course, for such an expenditure, especially in view of the fact that the reporters are all paid by the papers which employ them, and John W. Dulaney, of the firm of W. J. C. Dulaney & Co., who represents the Twentieth Ward in the First Branch, was strong in his denunciation of such a waste of the people's money. None of the papers reported his remarks on the subject.

Wm. Dunlap, who, years ago, was identified with the book trade, died here on the 1st inst., in the seventy-ninth year of his age. He was born in the county Derry, Ireland, and emigrated to this country when a mere youth. Failing in Boston and New York in mercantile pursuits, he came to this city forty-four years ago, and as a wholesale agent for books represented Baltimore firms throughout the Western and Southern States. He leaves four children, a son and three daughters, and one of the latter, Miss Lydia, has contributed largely to the literary press, many of her productions appearing in the New York *Ledger*.

The new pencil sharpeners (Stone's patent) manufactured by George A. Ogle, of this city, are said by those who have used them to be superior to any sharpener in the market. They are made of the best steel, and, in addition to sharpening the pencils to any fineness desired, protect the points when not in use, being constantly worn on the pencil. They cut hexagon and round pencils equally well, and in order to supply a long-felt want Mr. Ogle has commenced the manufacture of another size for use on colored pencils.

If the new departure made by Bailey, Banks & Biddle, the jewelers of Philadelphia, is imitated by any of the jewelers in this city, we shall next hear, I suppose, of stationery men adding watches, diamonds, &c., to their stocks in trade. A representative of the aforesaid house of B., B. & B. was in town this week with the words "Stationery Department" printed over

the name of the firm. *Ne sutor ultra crepidam.* It would be well, at least so the trade here thinks, if the jewelers would leave stationery to our stationers and confine themselves to articles more in their own line.

The popularity of Dixon's Graphite lead pencils has grown here immensely during the last year. They give universal satisfaction and are in constant demand.

Carl F. Van Brunck, stationer and printer, formerly with W. J. C. Dulaney & Co., has opened an office on his own account in Lombard street, where blank books of all kinds ready made and made to order can be had.

John R. Edwards, the well known blank book manufacturer, is as busy as ever, and the demand for his work is, if anything, increasing. His establishment is the biggest of the kind in this city.

John B. Piet is doing a large business with Prang's Easter cards, which are pronounced by all to surpass anything yet turned out from the famous establishment of Prang & Co.

Isaac Freidenwald, the well known printer, has taken G. and R. H. Eichner into partnership.

The following representatives of the trade have been in town since my last: Z. A. Devoll, with Nescochague Manufacturing Company, Philadelphia; Harry Phillips, with Daniel Slote & Co., New York; H. B. Sommer, of H. B. Sommer & Co., tag manufacturers, Philadelphia; W. P. Morton, of Hard & Parsons, New York, and O. J. Ramsdell, of Carter, Dinsmore & Co., of the same city. W. P. M.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, Ill., April 1.

To-day is set down in the calendar as "All Fools' Day," and one has not to walk far on the streets of Chicago to be reminded of the fact. The small boys see to keeping their victims posted. But one of the most gigantic pieces of foolishness ever perpetrated on this city is that "little joke" of "Old Prob."—the present snow storm. A piece of rag or paper pinned to the back does little damage to anything, save the temper of the victim, and is easily removed. An old hat containing a "cobble" or brick will mislead an unwary toe, but the pain soon vanishes. Even the ruin of a fine new "plug," by means of an insidious string, is only a severe joke; but when it comes to breaking in upon the business of an entire city with a mistimed blizzard—that passes beyond the field of humor, it endangers souls. Such is the Signal Officer's joke this year, and our people do not take kindly to it.

The approach of "moving day" creates some disarrangement here. Among other business changes, the following are definitely announced:

Miller & Umbdenstock, successors to Miller, Wagner & Umbdenstock, printing, stationery and railroad supplies, will remove on or about April 15 from their present quarters on Clark street, to 90, 92 and 94 Franklin street. A new building has been erected especially to meet the requirements of this firm; and, when fairly settled, they will have added several lines of new and improved machinery, to meet the increasing demands of their already large business.

Tuerck Brothers & Johnston, hydraulic motors, will remove shortly from their present location, 202 La Salle street, to roomier quarters at 86 and 88 Market street. The increasing demand for their excellent hydrant-power motors has necessitated the change.

The book house of F. H. Head, 40 Madison street, has been succeeded by a consolidation, to be known as the Colegrove Book Company. The change was partly brought about by the retirement of Seth Hadley, who goes to Nebraska to engage in the milling business. Mr. Colegrove, whose name is given to the new firm, has been long connected with the old establishment.

Belford, Clarke & Co. remove from 10 and 11 Lakeside Building to 192 and 194 State street. They rent the third flat of Lehman's "Fair" for their wholesale business. They handle Lowell's publications.

I regret to announce that M. M. Smith is in very delicate health, and has left this city for Florida on that account.

Chas. P. Willard, printers' engines and boilers, has had a "great rush." He cannot get his goods fast enough, and is greatly troubled on that account, for, he says, "trade is red-hot." He has just sold a two-horse "Acme" to W. J. Jefferson, 41 Lake street, and a four-horse "Peerless" to C. M. Triviss, 10 State street.

E. L. Stevenson & Co., 39 Monroe street, is a new artists' material house. Their new store is finely fitted, and the stock is complete and well selected.

Henry A. Sumner & Co. announce the appearance, on April 9, of a fresh novel, entitled "No Gentleman." The author is the daughter of a gentleman well and prominently known throughout the United States.

A little special inquiry into the condition of individual houses will best illustrate Chicago's present position as respects enterprise and prosperity.

Among the stationers I find a universal feeling of safety and anticipation, in the midst of a great activity.

Culver, Page & Hoyne are crowded with orders. Their large stock of Easter cards has been going North, South, East and West ever since their arrival, while in general goods there has been a steady increase of orders ever since the opening of the month.

Brown & Kelly, after rapidly getting themselves into position, find more than they can do already. Their stock is large and various and of excellent selection, and this fact is fully appreciated by retail customers as well as the trade. Truly, their first Easter as an independent firm is bright and promising.

J. S. McDonald & Co. have their hands full with their "Stylograph, or rapid letter copying book," and their trade in blank books, &c., is constantly increasing.

In other stationery supplies and specialties, the Sanford Manufacturing Company displays the neatest line of goods of their class I have seen this season. Especially true is this of inks and mucilages. This company is making a great variety of inks, which are put up in the best of style. The finish of its goods is illustrated in such small points as the attachment of a corkscrew to each bottle, the patent ink vent, which permits the fluid to be poured into a small bottle without spilling. Its black ink is black from the start. Among the various colors, its violet ink is especially beautiful. It makes a novelty in the shape of paste for scrap books, which is appreciated by the trade. It also furnishes sealing wax in several grades and colors. In proof of the merit of its goods the company points to the orders with which it is constantly flooded.

L. H. Thomas is also doing an immense business in the same line, as witness the Chicago *Tribune*, from which I clip the following: "Real estate and rents are looking up at Rogers Park. Since the removal to that suburb of the Thomas ink and bluing factory there has not been an unoccupied tenement there. Rents have materially advanced, and holders of corner lots are naming much higher prices than twelve months ago. One day last week the above concern received ten carloads of bottles, which is probably the largest shipment of that particular class of goods ever received by any firm west of New York."

The steady advance of taste and culture in the East has not been unfelt in the West. As the first arduous struggles of pioneer life give place to the luxury of conquest, the æsthetic sense develops and the taste of the people improves. Edward Lovejoy, 88 State street, is one of the foremost caterers to this refined taste, his fine and beautiful selections of fancy and artistic goods being well appreciated.

Printers in the East can appreciate the importance which the fancy advertising card business has attained of late. Among the most novel and attractive as well as cheapest articles of the kind are those manufactured by the United States Ticket and Tablet Company, 170 Clark street. These are fancy cut cards, of various designs—including fish, palettes and leaves—printed in delicately shaded tints at one impression, the name and business being left in white letters or added in type by the printer. The palette designs are new, and consist of a card cut into palette form, and having "Pioneer" views printed in color thereon. Among these especially striking and correct are the views of Chicago in 1830, St. Louis in 1764, San Francisco in 1848, and Pittsburg in 1790. All of these cards are made in various sizes and colors. The autumn leaves are no more describable than are their prototypes in nature, but they are very attractive. The company is sending immense quantities of these cards all over the country.

In speaking of Chicago, it will be gratefully remembered by students of all classes that it is the birthplace of the "dictionary-holder." The importance of this article of luxury and convenience is no longer debatable; it is winning, and will hold its place wherever Webster and Worcester are known. In regard to this ingenious piece of furniture it may be interesting to know that it is the "crookedest concern on earth," containing only four pieces, two eleven feet in length, and two about four feet in length, with 200 bends in all! It is a marvel of cheapness. Mr. Noyes considers the holder, with its leather book-protectors and accurately tempered wire, about perfect. In spite of an unusually discouraging winter, the sales of the holder have been surprisingly large, and testimonials have flowed in with nearly every mail. Mr. Noyes is, of course, proportionately good natured. It may be well to remark that the white finished holder is recommended to lawyers and editors, as not being affected by "brimstone" exhalations.

The "Emerson" files and binders, so long known to the trade, still hold their original reputation against all newer competitors. It is useless to speak in praise of an article so familiar; but I may say that Mr. Barritt's sales of these goods are constantly increasing. The papers are furnishing them to subscribers; libraries are employing them wholesale; while in offices, &c., they hold their own. Mr. Barritt is just now making an extension in his business, and intends henceforth to pay especial attention to general book and pamphlet binding.

Certainly among the most striking novelties lately presented to printers, are the "society cards" of Clark & Edwards, 164 Clark street. These are printed in correct and brilliant colors, and are designed for the use of societies and their members. The firm also supplies a finely designed letter-head for the use of the G. A. R., the name and number of the post being inserted

to suit customers. All of these goods are selling rapidly.

In an article on map making, published some time ago in one of the magazines, the various steps of progress in this art were finely illustrated. One has only to compare an old colonial map of this country with one of the present day to appreciate the immense advances that have been made in this art. Among the best finished and accurate productions of this class that I have yet seen are those of H. R. Page & Co., 203 and 205 Wabash avenue. This firm takes pride in being able to cite its maps as accurate and finished and always up to date—an item of great importance in a country where new towns and railroads, constantly building, soon place a map out of date. This house makes no maps for "stock," and consequently each edition keeps pace with the district it represents. It also claims that Barnes' "Indexed maps"—the best thing of the kind published—can be retailed cheaper than any others. This map is one of its specialties.

For John J. McGrath—wall-papers—I can say that for the twenty-five years' existence of the house, trade has never been so good as during the present season. It is running day and night and the steam is never shut off in its building. Its traveling men have all been withdrawn from the road, as its business is already large enough to give it all it can possibly do. The stock it carries is the finest I have yet seen in the West, and it sells to the buyer at his own door at manufacturers' prices. The house claims to carry the most complete line of goods of their class in the world.

Mr. Kingsley's paper decorations are very novel and remarkable in their effect. That such an exact imitation of nature could be attained by art is almost incredible; yet Mr. Kingsley's works, resisting the weather, as flowers will not, are quite as striking and effective as they. His is an exquisite and economical plan for Easter decorations; the fancy goods dealers and stationers ought to handle the goods.

To printers wishing an effective and cheap power, Chas. P. Willard, 20 La Salle street, offers an excellent little engine and boiler at a very moderate price. The little machine takes up a very little space and requires scarcely any attention. It is easily run without experience, and is calculated to do all the work of a much more costly engine. He is selling them very rapidly to printers in and out of Chicago.

One of the most wonderful little machines yet invented is the "Tuerck Motor," made by Tuerck Brothers & Johnston. It is run by hydrant power, and is therefore suited only for use in towns having water works. But in such places its work, for the size of the machine, is something surprising. That a little motor, which one man could almost pick up and run away with, should be able to run the presses and machinery of a large newspaper and job printing office seems scarcely possible; yet it is accomplished every day by the Tuerck motor. Printers and others would do well to note this fact, and correspond with the firm.

And now, having proven in a way the prosperous condition of Chicago, and as after Easter—so close upon us—come the summer holidays, may I not say a word as to the adjuncts of pleasure offered by our city?

Spalding & Brother are now fully under way in their new building, at 108 Madison street—a beautiful store, by the way—and offer every requisite for "out of door" enjoyment. All of their goods are beautiful, reliable, and as cheap as may be. Their stock, from fishing tackle and games to bycicles and boxing gloves, is perfect and complete; and I cannot speak better of the house than to instance their reputation throughout the country.

But there is another recreation which, year after year, is gaining ground among the nature lovers of the world. I allude to canoeing, a sport yet in its infancy, but already attracting great attention. This fact is attested by the Racine Company, which from a starting contract for two boats per day is now turning out eight per day, with demand for more. I would recommend persons who think of canoeing this summer to order early, as delay may force them to be "left out in the cold." The company is also doing an immense trade in the "Victor" slate, the importance of which is known to every dealer. Suffice it, then, to state that its orders to the factory during the present year have been more than double those for the same period last year.

Easter is upon us; therefore—if there be such an expression—let me wish the readers of THE STATIONER a "joyful Easter," assuring them that the present one is truly such a one for Chicago.

The Chicago Stationers' Board of Trade gave a banquet at the Tremont House on Wednesday evening. I understand that the affair passed off pleasantly, and that the attendance was fair.

G. B. H.

PHILADELPHIA NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA, Pa., April 4, 1881.

On the occasion of the publication of an extra spring number of THE AMERICAN STATIONER, it has seemed proper to me to give a review in detail of the trade of Philadelphia. To accomplish this I have visited the leading manufacturers and wholesale dealers, and in what follows I give you a report of their labors and hopes.

A. M. Collins & Sons are well satisfied with trade. The month of March has been very profitable for them. In all, their spring season will be very brilliant.

It is the same with J. B. Lippincott & Co., who are forced to give their stationery department more room in their store. This new arrangement is nearly ready. In a few days, when the samples are properly laid out, I shall have something more to say concerning this important house.

Langfeld, Turner & Andrews will not have any dead season this year. The orders which they now have in hand will keep them at work in full force during the whole summer. But this does not prevent them from making active preparations for next season as will be seen on reading their advertisement in this number of THE AMERICAN STATIONER.

A. J. Holman has issued his spring catalogue, illustrated with engravings, showing a variety in bindings of Bibles and photograph albums. This house is constantly adding to its styles of Bibles and photograph albums, and now offers what is said to be the largest variety ever manufactured in America. It has changed the prices of photograph albums to a net basis, allowing a liberal discount to jobbers.

The Lockwood Manufacturing Company, of Philadelphia, in addition to being a large manufacturer of envelopes and tags, also manufactures folding paper boxes, used for a great variety of purposes. These boxes are shipped flat to all sections of the country, and are made under various patents owned by the company. Some three years ago a suit was commenced at Trenton, N. J., against a customer of this company, by the Novelty Paper Box Company, which claimed that the Lockwood box infringed the Novelty Company's patents. Much testimony was taken, and the case was argued in June, 1879, and has recently been decided. Judge Nixon, of the United States Circuit Court, has, after final hearing, decided in favor of the Lockwood, and as this company has also purchased the Jaeger patent, which is the first patent on a folding box that has a tucking or locking device, leading manufacturers are now negotiating with the Lockwood Company for business under its patents.

John W. Gladding has a complete line of crown ends and bands, full duck, the finishing of which is an entirely new and original idea, and must be seen to be appreciated. The price is low. John W. Gladding has also added to his stock a large assortment of American Russia flexible mems, gilt-edged, from 18mo. to crown 8vo., 60 and 96 leaves and in three rulings; $ c. faints and quadrilles, in all forty-two styles. They are both oblong and square fold. He has them put up neatly in boxes, half dozen thin, and quarter dozen thick. These are as fine a line and as cheap as any in the market.

Crosscup & West's new process of engraving, with which they can make relief plates (engravings) direct from nature or from an artist's drawing or photograph, without the use of a pen drawing, or the service of the engraver, will effect a revolution in wood engraving. They have already received many orders for work by the new process; but they are kept so busy by the current trade that they have not yet been able to complete their arrangements for this new invention, for which, however, they will be ready in a very few days.

Turner & Harrison are doing considerable with their "Fountain" pens, which are in very good demand. They have been receiving good orders for the "Falcon," "Commercial," "Bank" and Swan pens, the reputation of which is firmly established throughout the United States.

The Warrington steel pens are in very good demand, because of their excellent quality and being put up in attractive style. The manufacturers have several lots they are closing out, and those of the trade who have not these goods already in store should avail themselves of the bargains that are offered.

Janentzky & Co., manufacturers and importers of artists' materials, are preparing to add another floor to their store. Their business, which has increased to great proportions, compels an enlargement which will permit of a better display of their stock, which embraces an infinite number of different articles.

The copying paper and books of William Mann are in great demand, not only for their excellent qualities, but also for their ready sale. Trade is very active with this house, which has a superb assortment of staple articles and an infinite variety of fancy goods, in which all new articles are represented.

Since Geo. McDowell & Co. have taken their new store their trade has considerably increased. The Clothier pens sell in large quantities. Their travelers are on the road in Pennsylvania, Maryland and the West, and doing a good business. The Gaigel and Skat playing cards meet with great success.

Wm. F. Murphy's Sons have as much as they can do to furnish the banks, railroads, and the great companies, which are their regular customers. Their letter-press copying books sell well, being known and esteemed by the trade.

A. W. Stuart is very busy. Since the beginning of the season his blank book factory has

been full of work. Mark J. F. Doyle, the superintendent of the house, is still taking plenty of orders.

Hearing that many improvements had been made in the establishment of Charles J. Cohen, manufacturing stationer, 505 Chestnut street, I decided to wait on Mr. Cohen and ask permission to view the different departments. The well known courtesies were gladly extended. The salesrooms are situated on the second floor of 505 Chestnut street and 26 South Fifth street, the two being connected by a bridge under a covered glass roof. The front floor is about 30 by 100 feet, and is closely occupied with counters showing samples of every article in domestic and fancy stationery manufactured or imported by the house. Down the centre are five four-light chandeliers, followed by a very elegant real bronze eighteen-light pendant, illuminating the counting room, which is inclosed by a carved cypress-wood partition, surmounted by glass. Adjoining is Mr. Cohen's private office, neatly carpeted and furnished in maroon leather. The counting room has accommodations for visiting members of the trade, which convenience renders the place very desirable for headquarters of such visitors.

On the floor of 26 South Fifth street, which is reached by crossing the bridge noted above (or from Fifth street, as preferred), is the complete line of envelopes manufactured by the house, as also a large variety of staple stationery most in daily demand. On the third floor is a heavy stock of photograph albums, papeteries, autograph albums, water colors in boxes, velvet frames, and the hundreds of articles too numerous to be stated.

On the fourth floor is paper in an amazing variety of weights and grades, ink and inkstands, stationers' hardware, &c., &c. On the fifth floor is the stock of envelopes held in reserve for filling immediate orders; there are always some millions on hand; here also is the machinery for making everpoint leads which are so well known throughout this country and Europe under the old style of the firm, "Henry Cohen & Co." All of these floors are connected by small and large elevators and by a hatchway; this latter communicates with the sub-cellar in which is stored Arnold's writing fluid in original casks as imported from London.

The envelope factory adjoins within a few feet, but is in a separate brick building in the rear of 511 and 513 Chestnut street, and is connected by speaking tubes on each floor with the main warehouse just described. In the cellar of the factory building are manilla papers in many weights; here also the mucilage used is prepared and the paper cuttings put in bags for return to the mills. On the first floor are the cutting presses which cut out the envelopes before they are folded; also a complete assortment of white and colored papers. On the second floor are the folding machines in two rooms. On the third and fourth floors are the hand folders who make up special sizes for orders.

The paper box factory is in adjoining buildings. Here are made all the boxes used in the envelope factory, as well as many others for the trade. It may not be known to the present generation that this extensive establishment is the outcome of the business established in London, England, in 1803, by S. Cohen, the grandfather of the present proprietor. Henry Cohen, so well known in this country, was the eldest son of S. Cohen, and left London in 1837 to establish an American branch. Philadelphia was selected, and for nearly forty years the business was conducted by him with ability and energy. B. S. Cohen is a brother of the late Henry Cohen, and still resides in London, being head of the English house. Our American Charles J. Cohen is a young man somewhat over thirty, full of the energy and judgment inherited from his predecessors, and always ready to improve the opportunities of the day.

Alvah Bushnell, 105 South Fourth street, has added a plate glass front to his store and refitted it throughout. These improvements are another evidence of the prosperity of Mr. Bushnell's business, which has so increased within the year that he has been obliged to obtain additional room outside of his premises.

T. Sinclair & Son, of Philadelphia, are publishing a new series of comic chromo advertising cards, "Giroflé Girofla," representing four scenes from the popular comic opera of the same name. These cards are finely colored, and have appropriate inscriptions in French, and have a good sized uniform space for printing the business cards. The series will be controlled exclusively by A. M. Collins, Cope & Co., of New York, who will furnish samples on application. Sinclair & Son inform me that they have had orders during the past six months for between thirty and forty millions of chromo cards, and they are now increasing their facilities very largely by the addition of new machinery, presses, &c., in order to meet the demand for their popular publications. They publish for their large jobbing trade, and furnish cards in sheets and in entire editions only. Their prize competition for sketches of cards, which takes place on May 10, has attracted the attention of many of the most eminent artists in the country, and promises to be a grand success.

There is great activity at Prang & Co.'s Philadelphia house. The demand for Easter cards is greater than ever. As orders for these cards had to be sent in sharp, there has been extra labor imposed, which has compelled Mr. Kimball, the manager for the firm here, to work his force partly at night. This condition of business will last until Easter. The "Easter Dove" is the handsomest card which has been made, and is a great success. If Mr. Prang breaks with the Bostonians, let him come here; the Philadelphians will jealously testify their appreciation of his eminently artistic works.

Potsdamer & Co. are feeling the effects of their liberal advertising In black work, the first editions of numbers—20 and 5, landscapes; 21, medallion heads; 22, triplicate folders, with beautifully blended natural history subjects—were secured in advance of publication by buyers who had seen the sketches. In chromos, their success has been astonishing. Nos. 18 and 19 (now 118 and 119) have run through two editions already, and of Nos. 119 and 121, now coming through the press, the last, a set of Japanese ladies, No. 120, Japanese acrobats, &c., more than half are gone. A large and steady demand comes from all parts of the country for their folding cards, used for announcements of millinery and dry goods openings. The beautifully shaded lines, untinted, nearly approach steelplate, while their moderate cost puts them within the reach of those who want their advertisements to be artistic yet inexpensive.

Charles Beck has a fine selection of Easter and birthday cards. I noticed in his assortment the following subjects, which deserve special mention: Cupids, new design; children, richly colored; floral designs, with Easter tent; birds of bright plumage; children and Easter eggs; hearts and crosses; religious designs, splendidly colored; children and eggs, entirely new design—all with fringes. Charles Beck has also received from Europe an invoice of advertising cards, all designs and of different kinds, the prices ranging from $5 to $20 per thousand.

Theo. Leonhardt & Son, who make a specialty of French cards, have received from Paris some Easter, birthday and advertising cards, which are in excellent taste and very Frenchy. They comprise: No. 1,575, six designs of children, embossed and richly colored; 221, six designs, chromo-lithograph, young girls and young men; 229, six designs, chromo-lithograph, a very funny card; 621, eight designs, fancy subjects; 243, six designs, children playing; 220, six designs, young artists; 241, six designs, marines, very richly colored; 420, six designs, figure pieces of children, in six colors. These are all sold with trade discounts. A great part of this invoice has been disposed of here and also by the agency of the firm at San Francisco.

Matthews & Co. report trade very encouraging; their Easter cards are selling very rapidly, and their very large stock is steadily decreasing, which takes away the dullness in business of former seasons incident to Lent. The college season having fairly opened, is bringing in its usual number of orders for college commencement invitations and programmes, which, together with several large orders of Western trade work, fills up their capacity to its fullest extent.

Thomas S. Dando, of the firm of Thomas S. Dando & Co., is now in Paris, where he has already selected the prettiest specimens of advertising and birthday cards, sachets, &c., of French manufacture. He will next go to Austria and Germany upon the same errand, and will return by way of England, whence he will sail for home, returning about the middle of May. His first selection of French cards for scrap books and for advertising has arrived, and it comprises many new and very rich designs at very low prices.

Thomas M. Simpson is selling enormous quantities of chromo and plain cards. He is putting up exclusively for the trade eighty different series of cards, each series packed in assorted hundreds. He packs samples, one card of each series (eighty in all), with price list, and sends them by mail for 50 cents, postage paid. These samples cost more than their price, but Mr. Simpson has taken this means of giving the trade all of the facilities possible.

Mason, Ward & Co. have much to do to fill their orders for Easter cards, which are coming in without ceasing. Their stock is nearly broken. They will receive by steamer an invoice of birthday cards, which are charming, and comprise designs which are altogether novel, and which will create a sensation. J. VIENNOT.

ST. LOUIS NOTES.

[CORRESPONDENCE OF THE STATIONER.]

ST. LOUIS, April 2, 1881.

When all other subjects are exhausted speak of the weather. It is precisely for that reason that I begin my letter with it, as just now it forms the all absorbing topic and will not "get thee gone." Snow, rain and hail follow each other in rapid succession; everybody growls and grumbles; business men are fretful and all are looking for that spring opening. It reminds me of a story. Somewhere in Vermont there dwelt a certain good old deacon, well known for his piety and, sad to relate, his profanity. One day, while hauling potatoes up a rather steep hill, just as the tired horses had reached the top, the back board of the country wagon gave way, causing the entire load of potatoes to run down the hill in a mad, gleeful sort of way, for all the world like a lot of boys just escaped from school. Our good old friend, the deacon, could only look

on in dumb astonishment, words failing him at the moment to express his exasperated feelings. An old farmer in a neighboring field taking in the situation at a glance, but hardly understanding the deacon's silence, yelled over at him: "What's the matter, deacon, why don't you swear?" "Swear," returned the deacon, emphatically slapping his knee, "swear? Gol darn it, I can't do the thing justice!"

It will not be necessary to say much respecting the sale of Easter cards. St. Louis is not behind other cities in elegant displays, nor are its citizens slow in availing themselves of the many opportunities given them to purchase freely and, I may say, lavishly, for at no time has there been such a sale of Easter cards. Everybody sells them—dry goods houses, dollar stores, jewelers, and last, but not least, stationers and booksellers. The largest as well as the richest display is made by the Hugh R. Hildreth Printing Company, whose assortment comprises cards from Prang, Hildesheimer, De La Rue, Dando & Co., Hamburger and others. Sales began so early that many designs and styles have been sold out and cannot be replaced. Prang's cards evidently take the lead, as they did last Christmas and during the valentine season.

Trade for miscellaneous goods has been light the past two weeks, very few buyers venturing here during this spell of weather. The store presents a very fine appearance, an elegant album case having been put up near the entrance, affording opportunity to display upwards of three hundred albums. It is made of black walnut, with glass sliding doors, plain but richly made, serving both as an ornament and a most practical piece of furniture to show off albums and keep them clean—a most necessary thing in our sooty city.

The Dennison Manufacturing Company, as you are probably aware, has moved to Third street, where it occupies a commodious ground floor, a vast improvement upon its old store, although not quite so bright and cheerful. Its trade is up to the average, and how can it be otherwise? Whoever desires goods of its manufacture will go there and nowhere else.

Short & Boland are doing a good business, always considering the weather. They are pushers, and if there is any trade lying around they will obtain it.

The St. Louis Book and News Company keeps on the even tenor of its ways, and generally manages to obtain a full share of the trade. There are some rumors that it contemplates giving up the retail stationery; but how true that is I cannot tell. You can take it for what it is worth.

Scharr Brothers, the engravers, made a good selection of Easter cards and report a good trade in them. They are always busy, as people will get married, and will therefore have cards and invitations engraved.

Were I to mention everybody in the trade, my letter would be spun out at too great a length, besides showing too much sameness in reports. Suffice it to say we are doing all we can, not all we should like to do. Micawber-like, we are "waiting for something to turn up," and that something is fair weather and a clear sky.

F. E. S.

PASTE FOR LABELS.—For adhesive labels dissolve 1½ ounces common glue, which has laid a day in cold water, with some candy sugar and ¾ ounce gum arabic, in 6 ounces hot water, stirring constantly till the whole is homogeneous. If this paste is applied to labels with a brush and allowed to dry, they will then be ready for use by merely moistening with the tongue.

L. PRANG & CO.'S Easter Cards for 1881.

We take pleasure in herewith presenting to the trade our Price List of Easter Cards for this Season:

ASSORTMENT.—Our Easter Cards are made up in sets of one dozen, except Nos. 11 to 19, and are put up in a box or envelope. Each set contains all the designs of the series; and as no series has more than six designs, each design is more or less repeated in the set.

ENVELOPES.—Fine Cream-Tinted Envelopes are furnished with every series, without extra charge.

EASTER CARDS, WITH SILK FRINGES.—We would call especial attention to these, as they will doubtless prove very attractive. These goods are made up with the best quality heavy silk fringe, made expressly for us. All fringed Easter Cards are furnished with Protectors and Envelopes, and are put up with assorted colors of fringes.

LIST OF PRANG'S EASTER CARDS FOR 1881.

No. of Series.	No. of Designs.	DESCRIPTION.	HOW PUT UP.	Retail Price per Set.
1	1	Daisy Egg, Folding Design, silk tassels	12 Cards, with Envelope	$7.20

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

SCHOLAR'S COMPANION.

An improved scholar's companion consists in the combination of a water reservoir, a sponge cup or holder, and a cup to hold money, provided with a disk of felt for drying the slate.

The water reservoir forms one end of the companion, and has a pencil sharpener formed upon or secured to its outer end. The inner end of this reservoir is formed of alternate solid and perforated or open portions, and is provided with a suitable beut spring, so as to return a valve to position as it is released. This valve is pivoted upon a pin or journal, which passes through the end of the water chamber and the valve. While the valve is closed its solid parts close the perforated parts of the inner end; but when the valve is opened, by means of a small knob or handle which projects from its side, the water runs from the reservoir in fine drops upon the sponge. This reservoir is entirely detachable from the other parts, and has a pin or projection for catching in a bayonet slot made in the adjoining part. The same projection may be used to operate the valve and lock the reservoir in place, or a separate one may be used for both purposes.

By a slight turn of the reservoir and then an outward pull the reservoir is removed, and then the dampened sponge, which is secured in a sliding cup, can be forced upward so as to protrude. When the companion is to be closed up the cup is moved inward, so that the sponge will not be in the way, and yet will absorb all the water that may leak from the reservoir in case the valve should have become worn or leaky, or accidentally opened while in the pocket. A partition is placed slightly inward from the outer end of the cup, so as to form a second and shallower cup or recess. In this recess is secured a light flat spring, which holds a rag which is used for cleaning pens and other such purposes

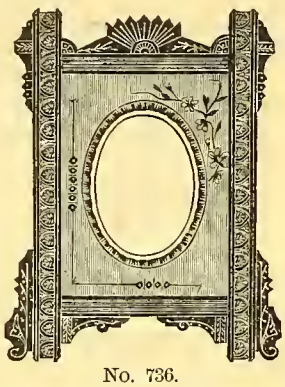
The part at the end where the rag is kept fits in and is detachable from a part which has a series of felt disks fastened upon its end, so as to wipe the slate dry after it has been washed off by the sponge. In the bottom is a looking glass, by means of which the scholar can see whether his face is clean. Two pins projecting inward serve to keep cup-shaped cover in position over the top of the looking glass. This cover has grooves in its sides, so as to allow the pins to pass through it, and then the cover is given a partial turn by means of a knob or handle upon its top, so that it will catch underneath the pins. By means of this cover a money box is formed, in which money can be kept without any danger of being lost.

The casing or shell of these companions can be made of any suitable sheet metal which will not readily rust or corrode, and the companions will be made of such a size that they can be readily carried by children. The patentee of this device is Anthony Daul, of Newark, N. J.

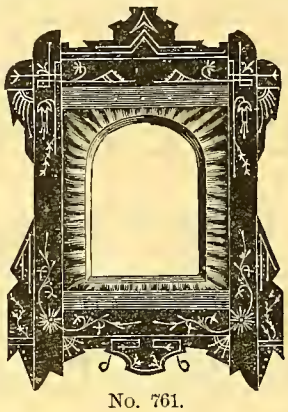
NEW DESIGNS IN FRAMES.

Some new designs in photograph frames are illustrated in the engravings. In No. 736 is shown a 6½ by 8½ ebony frame, with Grecian ornaments in gold on the sides. It is engraved in white and gold, is fitted with paper mat, has hand painted flowers and satin puffing around the opening. This is suitable for cabinet photographs. No. 761 is a 6½ by 8½ ebony frame engraved, with nickel rim and satin and velvet mat. This also has a cabinet opening. No 743 is another ebony frame, engraved in gold and white, and having a satin puffed mat with nickel rim. The opening is adapted for imperial size. No. 742 is also an ebony frame fitted with paper mat, cabinet size, illuminated in gilt. E. & H. T. Anthony & Co. are the manufacturers.

No. 743.



No. 736.



No. 761.

NEW PATENTS.

No. 239,322. Method of an Apparatus for Producing Outlines.—Andrew C. Fenety, Boston, Mass., assignor to Hobart Linton, same place.

A method of making outline copies of opaque pictures or objects, the same consisting in illuminating the front of the picture or object, throwing an image of the same upon a shaded ground glass plate by a suitable lens, tracing the outlines of the image on the back of the plate with suitable dry marking material, transferring the outlines thus obtained to a sheet of paper to obtain reversed outlines, and retransferring from the sheet to a second sheet to obtain outlines that are not reversed, the outlines yielded by the dry marking material being inconspicuous and easily rubbed out.

No. 239,335. Toy Cap Exploder.—John F. A. Mumm, Dayton, Ky.

No. 239,340. Toy Circus.—William S. Reed, Leominster, Mass.

No. 239,402. Cushioning Device for Printing Presses.—Walter Scott, Plainfield, N. J.

No. 239,409. Compositihn for Slating the Surfaces of Blackboards.—Wm. A. Waller and Jas. P. Hitch, Blandinsville, Ill.

A composition for slating blackboards and other surfaces, consisting of lamp black, gum arabic, Spanish white and plaster of paris, mixed with water.

No. 239,413. Slide Paper Box.—Arthur G. Wilson, New York, N. Y.

No. 239,455. Paper Bag Machine.—Wm. C. Cross, Boston, Mass.

No. 239,456. Paper Bag Machine.—William. C. Cross, Boston, Mass.

No. 239,457. Paper Bag Machine.—William C. Cross, Boston, Mass.

No. 239,458. Paper Bag Machine.—William C. Cross, Boston, Mass.

No. 239,459. Paper Bag Machine.—William C. Cross, Boston, Mass.

No. 239,540. Shawl Strap Handle.—John B. Perkins, Taunton, Mass.

No. 239,543. Paper Bag Machine.—Leon Planche, Salins, France. Patented in France, July 15, 1879; in Belgium, July 29, 1879; in England, July 25, 1879; in Austria, August 5, 1879, and in Germany, August 15, 1879.

No. 239,584. Paper Pulp Mold for Stereotyping.—Willard S. Whitmore, Washington, D. C.

A stereotype mold or matrix composed of a foundation or base of paper and a facing of wet paper pulp whose fibres have never been set by drying.

OUR TRADE WITH GERMANY.

The vast difference in the trade between the United States and Germany and the trade between France and Germany will be seen by the following interesting review thereof by Consul Stanton:

The trade between Germany and France, since the war between the two countries, has assumed proportions hitherto unattained. In most years France exported more to than it imported from Germany; but in the years 1866 to 1869, 1870 and 1878, the relations were reversed. The export of French manufactures to Germany has always been extensive, amouuting in 1864 to 144,500,000 francs. The import, on the contrary, amounted in 1864 to only 11,900,000 francs, but rose rapidly, attaining in 1869 the figure of 49,700,000 francs. The mutual trade of these two countries developed greatly after the war, and in 1878 France imported merchandise from Germany to the extent of 152,000,000 francs, exporting in that year 165,400,000 francs' worth of manufactures. To the United States Germany's exports gradually increased to the year 1873, since which time they have declined year by year. The imports from the United States have increased from 79,000,000 francs in 1864 to 328,600,000 francs in 1874, since which year they also have declined.

A company has been formed in Geneva for working the Jura quarries for lithographic stones. Its capital is to be 500,000 francs. Considering the almost exorbitant quotations of the Solenhofen quarries, in Bavaria, which, however, supply the best stones, a little competition in this branch will be of some benefit to consumers.

Never run up small debts. Creditors are like children—the smaller they are the more they cry.

NEW GOODS! Manufactured and Just Offered to the Trade by **NEW GOODS!**

ACME STATIONERY AND PAPER COMPANY,

117 Fulton and 52 Ann Sts., New York.

LAWYERS' BRIEF BOOKS.—(Copyrighted December, 1880.)

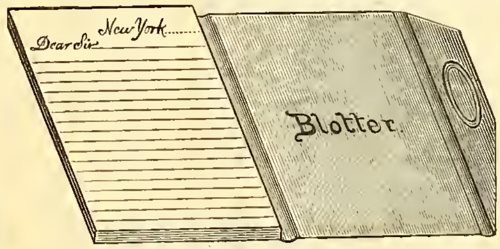
Made of our best Manilla writing paper in four sizes, bound in heavy paper covers, with an index printed on one side, and a filing blank on the other, so as to fold like a Lawyer's Brief. These have been highly approved by many prominent lawyers as meeting a want long felt by the profession, and will find a ready sale when brought to their attention. Size, 8x10 inches, oblong, 24, 40, 60 and 100 pages.

PORTFOLIO TABLETS.—(Patent Applied for.)

THE attention of the trade is particularly called to this **new line of Fine White Writing Papers** in Tablets, handsomely bound in PORTFOLIO STYLE, with a sheet of best blotting Paper attached.

Decidedly the BEST, MOST CONVENIENT and HANDSOMEST package of Writing Paper in the Market.

CLOSED.



OPEN FOR USE.

THIS Portfolio Tablet has been highly approved by every one in the trade who has seen it, as an article that will sell at sight, and that will be needed in the stock of every stationer.

SIZES AND STYLES.

Billet, Octavo, Commercial, Packet Note, Bath and Congress Letter.

WHITE DESK OR SCRATCH PADS. (Unruled.)

No. 101, 2¼x4 inches; No. 102, 3x4¾ inches; No. 103, 3⅝x6 inches; No. 104, 4x6¾ inches; No. 105, 4½x7¼ inches; No. 106, 5x8 inches; No. 107, 6x8½ inches; No. 108, 8x10 inches; No. 109, 8x12½ inches.

PARCHMENT COPYING BOOKS AND COPYING PAPER,

POSSESSING THE FOLLOWING ADVANTAGES OVER ALL OTHERS:

The paper is a Rich Lemon Color. Is stronger than any other. It is thick, and can be readily handled while damp. Can be written upon with pen and ink. Makes a perfect and instant copy. The paper being pure, and free from injurious chemicals, insures a permanence to all copies.

Regular Sizes of Books and Paper always on hand.

—ALSO, MANUFACTURERRS OF THE—

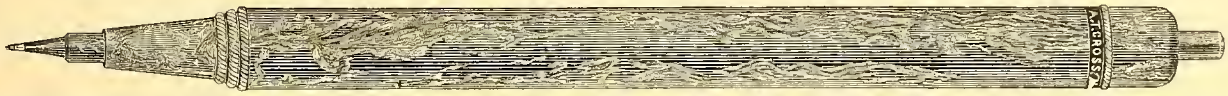
Celebrated Neutral Tint Papers,

For **PROFESSIONAL** and **EDUCATIONAL** Purposes.

☞ **For Price Lists and Discounts address as above.**

PERFECTED STYLOGRAFIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS**, the last, June 29, 1880, being the most important and giving the name **Perfected**. All cuts are exact size.



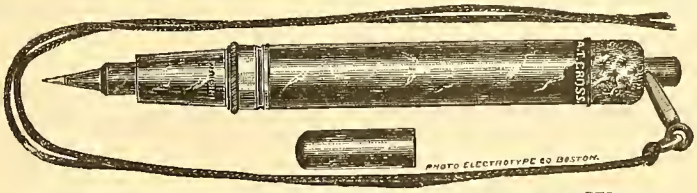
MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller oarrels. Fits Hambler's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra long. Holds most ink, except the **Maximum.**

SHORT.—Most widely known and sold heretofore; but Maximum is better for desk or Hambler's Pocket, Giant for Vest Pocket or Cord. So this will be largely superseded.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined.

☞See Descriptive Circulars.



GIANT, with Cord and Gold Ring, same price as Short.

Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, both of which will have all new improvements.

☞See Descriptive Circulars.

VEST GIANT, Plain, - - $2.50.

All Styles up to $4.00.

☞ **VEST GIANT.—The Cheapest PERFECTED Pen made.**

This Miniature Cut is for Agents' Cards, Newspaper Advertisements, &c., &c., &c.

Family, Pulpit & Reference Bibles

WITH FINE COLORED LITHOGRAPH MAPS,

Equal to the Best London and Oxford Editions, at Half Their Price.

PHOTOGRAPH ALBUMS,

Stronger Bindings, Handsomer Styles, Lower Prices than the flimsy Foreign Goods.

VELLUM-CLOTH GUARD JOINTS AND PATENT CHAIN-BACK BINDINGS for BOUDOIR, CABINET and CARTES-DE-VISITE PICTURES.

We have adopted new designs, selecting the most desirable and artistic patterns. Our Albums are made in the strongest manner possible, with vellum-cloth guard joints, and when open lie perfectly flat. They are greatly superior to foreign manufactured Albums, both as to style and prices, and are adapted for the best retail trade. ☞ New Catalogues mailed on application.

TWO WORKS

OF

Great Value

TO

STATIONERS.

The Stationers' Price Book and Illustrated and Descriptive Catalogue, . . $2.00

Lockwood's Directory of the Paper Trade, . . . $2.00

EVERY STATIONER wants the above Works for the

FOLLOWING REASONS:

The **Price Book and Catalogue** furnishes Stationers information which, if they have at all, is usually scattered and never right at hand when wanted. As a book of immediate reference it will be found invaluable.

The **Directory** of Paper Manufacturers and Jobbers is a guide to **First Hands** in the Paper Trade. Any one who uses it intelligently can save many times its cost at once.

THE PRICE BOOK is deliverable in the cities of New York, Boston, Philadelphia, Chicago, Detroit and St. Louis, where purchasers can have it packed with any goods they may be buying.

THE DIRECTORY is sent post-paid.

All Stationers who wish to keep

ABREAST WITH THE TIMES,

must own these two books.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

F. H. Morgan (agt.), publisher, Meadville, O., has sold out.

E. B. Nichols, dealer in notions, New Lisbon, Wis., has sold out.

C. G. Shedd, news dealer, &c., Medford, Mass., has sold out to Wm. C. Morse.

Hubley & Co., paper stock dealers, Worcester, Mass., have dissolved partnership.

Edward Bauer, dealer in paper hangings, Cincinnati, O., has made an assignment.

W. H. Mills & Co., printers, Lowell, Mass., have sold out to the Franklin Printing Company.

Darr & Osteen, publishers of the *True Southern*, Sumpter, S. C., have sold out to Anderson & Blanding.

Kirschner & Craig, printers, New Haven, Conn., have dissolved partnership. John Kirschner continues.

G. L. Holliday has retired from the firm of George W. Reed & Co., stationers, &c., Pittsburg, Pa. Style remains unchanged.

C. H. Rogers' paper box factory, at Binghamton, N. Y., was burned out on Sunday night. Loss, $1,500; insurance, $1.000.

Stationers, paper dealers and paper makers will find in Lockwood's Directory of the Paper Trade, edition of 1881, a most invaluable guide to business. This work is now ready and deliveries will be made in regular order.

J. H. Hamburger has begun to take orders for Christmas and New Year's cards, and as they are coming in far in excess of those received at the same time last year it is evident that the line which the firm handles is in much favor with the trade.

Copying presses made by Samuel C. Tatum & Co., of Cincinnati, may now be found in almost any city west of the Delaware River, and from the lakes to the interior of Texas. Customers who buy them say they want more of the same kind.

Buyers of hammocks will do well, before placing their orders, to see the large stock of R. Fideau, No. 16 Beekman street. Mr. Fideau claims to have the largest assortment and the best and cheapest goods in this line. Catalogues, prices and discount furnished on application. See his advertisement in another page.

J. H. Bufford's Sons have placed on the market several new designs in folders. They are 5 by 7½ inches, and have the appearance of steel. The general line of these is goods meeting with a great sale. Among the other new things shown are two new series in colors, known as the "Seven Wonders," and "Japanese Street Scenes."

Carter, Rice & Co., wholesale paper dealers, Boston, are having a large trade in their card department, in advertising cards, card albums, imitation autumn leaves, &c., in addition to regular business. Their stock of fancy cards includes the more desirable lines of nearly every American manufacturer, and new styles are being constantly received. Their new extension card albums and scrap books are meeting with universal favor among stationers and fancy goods dealers, and are a decided and successful innovation.

The U. S. Treasury mucilage and black and colored writing inks, manufactured by William A. Davis, Boston, Mass., have secured a remarkable hold, among the best and largest dealers in this and foreign countries, strictly on the merits and exceedingly low prices of the goods. Mr. Davis' reputation for first class goods and square dealing is thoroughly established, and he assures dealers that they can always rely on receiving goods just as represented. The increasing business has forced him to look for more commodious quarters, which he has obtained in the same building with his salesroom, where he will add printing presses and material for the printing of his labels, catalogues, circulars, &c., pertaining to the business. As many dealers say "A man will blow his own horn," Mr. Davis requests dealers to try his goods in their own offices and judge for themselves as regards the quality of the various goods offered. Send to him for his new illustrated catalogue.

T. Shriver & Co., the well known copying press manufacturers of this city, report trade as being active, the demand being good for their large presses, such as railroad, express and transportation companies use in making copies of waybills, manifests, &c. Messrs. Shriver make their large presses of every required size. All are finished in the most careful manner as to workmanship, and of selected materials. The ornamental finish varies from plain and inexpensive japanning to elaborate work in color. The catalogue of T. Shriver & Co. embraces a very great variety of sizes and styles, the outgrowth of their many years' experience in the manufacture of copying presses.

Hover's patent manuscript paper, made of linen stock, and possessing great strength, is particularly adapted for use with Arnold's or other writing fluid, as the writing becomes blacker at once, and comfort and expedition is thus secured. Clergymen and authors appreciate the sermon papers, and the principal banks have ordered bank deposit books made of manuscript paper, for which it is especially useful. Mr. Lipman, 51 South Fourth street, Philadelphia, is now meeting inquiries from all parts of the United States for it, and desires an active agent in each city.

Liebenroth, Von Auw & Co. have added two floors, each 100 by 25 feet, to their already capacious warerooms. The addition, which is entirely used as a photograph album department, was much needed, owing to the rapid increase of this branch of the business. The house handles all of the leading styles of albums manufactured in Europe, as well as a very large, varied and excellent line of its own productions. The firm is now engaged in getting up novelties in its regular lines for the summer season.

File bands have steadily grown in public favor as being among the very best devices for strapping up papers, and having space on the back for the indorsement. Their capacity may be increased or diminished at will by the hook and eyelet attachment. They are very durable, being made of tough tag board, and cost less than rubber bands. They are made in three sizes and are manufactured by R. G. Hutchinson, 44 Maiden lane. See advertisement in another column.

The Springfield Rubber Type Company Springfield, Mass., which has increased its facilities for the manufacture of rubber hand and dating stamps of every description, has also added a steam printing establishment, and will give estimates for printiug and rubber stamps on large or small orders, and invites the favors of the trade.

Geo. W. Wissenger, dealer in notions, Webster, O., has made an assignment.

Wm. A. Smith, of Smith & McLeod, stationers, &c.. Philadelphia, Pa., is dead.

E. Beal, dealer in fancy goods and notions, Sandusky, O., has sold out to Kugel Brothers.

T. W. H. Leavitt, printer, Brockville, Ont., Can., is about to be succeeded by David Wylie.

George Harrison, of the firm of Turner & Harrison, Philadelphia, visited this city last week.

Henry Levy & Son have received a new line of Easter goods in which they are doing a good trade.

Ketcham & Moore, booksellers and stationers, Monongahela City, Pa., have sold out to Cypher Brothers, who will take possession on May 1.

McCarty & Hasberg will soon place on the market their line of school bags, for which they anticipate large sales. Quotations will appear in a future issue.

Geo. W. Cross, 104 Nassau street, reports a good demand for his specialties in blank books. He has reorganized his establishment and is running up to his full capacity on orders.

The London *Cuckoo*, of Saturday afternoon, says: "It is rumored that the negotiations for a copyright treaty with the United States are likely to stop until the United States government take some distinct action in Congress in the matter."

Lockwood's Directory of the Paper Trade for 1881 is an enlarged edition, and directory of the stationery trade as well. It contains the names and addresses of several thousand stationers, besides the usual reports of mills and classification of manufacturers. It is ready for delivery.

Hard & Parsons have just introduced a new and neat line of raised illuminated dinner cards, which are designed after the choicest patterns of Vienna goods of the same class. A line of dinner cards suspended from imitations of natural fruit is also among the latest introductions. A new line of ream goods styled the "Owl" brand is shown. These goods, which are in cream and white, are in five, six and seven pound reams, and in commercial and octavo sizes, and have high cut envelopes to match.

Jos. Eichbaum & Co., 48 Fifth avenue, Pittsburg, Pa., have just opened their printing, blank book making and stationery establishment. The firm is composed of S. Reed Johnston, Jos. Eichbaum and Geo. P. Balmain, who have all been connected for more than twenty years with the house of W. G. Johnston & Co., of the same city. Mr. Eichbaum is an expert in blank book manufacturing; S. Reed Johnston, as manager of the printing department, brings into the firm the influence of his taste and experience; and Geo. P. Balmain is the most popular buyer and salesman in Pittsburg. With these combined elements the success of the firm seems to be assured in advance.

George Raisbeck is now very busy at Ph. Hake's in getting up novelties for the fall trade. The samples shown thus far are very unique, and embrace quite a large number entirely original in design. Charles H. Wright has just returned from a Western and Southern trip for Mr. Hake, and says he did a splendid business, and found the prospects for trade highly satisfactory everywhere he visited. On the railway to St. Paul in January he was snowed up and had nothing to eat for forty-eight hours. The passengers had no fuel to burn except the baggage car and the backs of car seats, both of which were used. He

says there were "lots of fun," but he doesn't want to try it over again.

W. Stanley, Sr., stationer, Montreal, P. Q., Can., is dead.

A. A. McLean, printer, San Francisco, Cal., has had his stock attached.

Samuel Oppenheimer, dealer in paper hangings, Montreal, P. Q., Can., is dead.

F. Dewing & Co., book publishers, San Francisco, Cal., have dissolved partnership.

Newland & Crosson, publishers, Idaho Springs, Col., have dissolved partnership. Crosson continues.

John W. Adams has succeeded Brown & Adams, publishers of the *City Post*, Columbia City, Ind.

A first class salesman is offered a good chance in a well established house by an advertisement to be found in another column.

Charles M. Cornwell and Milton C. Johnson, stationers of this city, have consolidated under the style of Cornwell & Johnson.

George L. Pease, of Boorum & Pease, was unwell during last week, and for a day or two was confined to his house, receiving the attention of his physician.

J. K. Levy & Son, wholesale dealers in fancy goods, New Orleans, La., have dissolved partnership. L. R. Levy has withdrawn, and Charles J. Levy has been admitted under same style.

The Forbes Lithograph Manufacturing Company, 181 Devonshire street, Boston, has been getting out some new designs for fancy advertising cards and has issued a price list of its different series. Send for samples.

Stationers, paper dealers and paper makers will find in Lockwood's Directory of the Paper Trade, edition of 1881, a most invaluable guide to business. This work is now ready and deliveries will be made in regular order.

Fleming, Miller & Ussing, paper dealers, will remove on or about May 1 from 71 John street to 103 William street, where the business will be continued as formerly. The change in location is made in consequence of an insufficiency of room. In their new location they will have three floors.

Henry Hoe, agent for Joseph Gillott & Sons' pens, reports that his immediate trade is somewhat better than at this time last year. His trade is a steady one, and as his goods are recognized all over the world as among the standards, it is perhaps not so much affected by disturbing causes as many other lines in the stationery trade.

Brown & Sanson report that they are now in the midst of their spring trade and have all they can do, and, although business with them this season has been a little backward, from the present prospects they expect to realize a fair average of trade. Their steel-plate hand illuminated goods are in about a dozen various designs, and are quite original with this firm. They have a large sale.

W. H. Hill, Worcester, Mass., has enlarged the capacity of his factory for building envelope machinery, and is turning out new machines right along. He is also producing envelopes in larger quantity than ever before, and has added a printing office, which is kept busy. The advance made by this house in the development of envelope making is very great; a cut in its advertisement in another column shows the old and the new way of folding. The house is one of the oldest in the country in its line of manufacture, having been established in 1846.

A meeting of the creditors of L. F. Lawrence, Adams & Co., dealers in stationery, &c., 169 Devonshire street and 30 Arch street, Boston, was held on Friday, April 1, Mr. Wilson, of Pulsifer, Jordan & Wilson, acting as chairman, and Henry R. Brigham (representing the New York Stationers' Board of Trade) as secretary. Upon being called upon for an exhibit of its financial status, the firm made a showing of its affairs, as follows: The liabilities aggregate $30,748.28, of which $15,671.95 is notes payable and $15,076.33 accounts payable. The assets consist of $7,440.01 in bills receivable, $10,000 in printing office plant, and $14,559.50 in stock and store furniture and fixtures, making a total of $31,999.51, and showing a nominal excess of $1,251.23 over the liabilities. The plant of the printing office cost $30,000, but Mr. Lawrence said that $10,000 is now all it is worth, and even more in case it should be necessary to remove it. The store fixtures, which, in the statement of assets, were reckoned at $1,000, cost $5,000. Mr. Lawrence stated that the stock was figured at its present market value, without reference to cost, and that the accounts included in the assets are all good. In answer to inquiries as to whether the debtors had any proposition by way of settlement to submit to the meeting, Mr. Lawrence said that they had not, but that they desired a week in which to come to a conclusion as to what they could offer by way of compromise. There is an attachment upon the firm's establishment, but arrangements will be made so that no judgment will be obtained before an adjustment is arrived at. It was voted to give the firm time to prepare an offer, and that matters should be put into the hands of a committee for investigation, Henry R. Brigham, J. P. Jordan, A. Storrs, C. S. Kendall, M. F. Dickinson, Jr., and E. D. Dresser being chosen as the committee. The first five committeemen above mentioned were the committee which investigated the firm's affairs when it failed in June last.

Wiltshire & Clement, engravers, 78 Nassau street, this city, show a beautiful and very fine line of birthday cards. This embraces a very large number of designs, with fringed borders, and, taken all through, is claimed to be as extensive as shown by any other house in the city. In the way of stamped goods they show new conceits in papeteries, and have added a number of new styles of wedding cards, of which samples can be had upon application. They supply to the trade ordering engraving a sample card, giving the different styles of general lettering and sizes of card; also sizes of border for mourning cards, which is to be very complete and most useful in facilitating a selection. These sample cards are mounted in *passe partouts*, and are intended to rest on an easel. The firm employs some of the most skilled designers and engravers in the city, and courts the most critical examination of its work.

Lockwood's Directory of the Paper Trade for 1881 is an enlarged edition, and directory of the stationery trade as well. It contains the names and addresses of several thousand stationers, besides the usual reports of mills and classification of manufacturers. It is ready for delivery.

F. G. Hancock, Atlanta, Ga., has got up an envelope which has an illustration of his big factory and warehouse. This, with other things, covers the whole face of the envelope and is very striking; but the puzzle is to tell where to put on an address if it is used to carry a letter.

L. Prang & Co.'s new factory building is progressing rapidly. This addition to the manufacturing facilities was badly needed, as is evident by the great rush for the firm's products.

George A. Tomlinson, Ansonia, Conn., was in town on Wednesday.

J. D. Goodrich & Co., publishers, Chicago, Ill., have dissolved partnership.

Scott Graham, publisher, Battle Creek, Iowa, has sold out to J. L. Kroesen.

Norris A. Butler, fancy goods dealer, South Berwick, Me., has sold out to Nellie Crane.

Floto & Minnenger, booksellers and stationers, Chicago, Ill., have dissolved partnership. William Floto continues.

The highest point reached by any railroad is 16,646 feet, over the Andes. 853 gross of Esterbrook's bank pens would stretch the distance.

The firm of W. T. Barker, paper dealer, Boston, Mass., has been dissolved. W. T. Barker, James H. Wells and Duncan D. Dexter continues under old style.

Lockwood's Directory of the Paper Trade for 1881 is an enlarged edition, and directory of the stationery trade as well. It contains the names and addresses of several thousand stationers, besides the usual reports of mills and classification of manufacturers. It is ready for delivery.

E. De Young reports no diminution in the quill pen business, and that it holds its own. Even with his limited trade he experiences some difficulty in procuring stock suitable to the market. Foreign quills have increased in value lately, but Mr. De Young still holds to his former price list.

G. P. Putnam's Sons, the well known publishing firm, have removed their place of business from No. 182 Fifth avenue to their new building, Nos. 27 and 29 West Twenty-third street, four doors from the Fifth Avenue Hotel. The building has a depth of 200 feet, running back to Twenty-fourth street.

E. P. Coby & Co., mercantile printers and stationers, at 95 William street, have now in progress the extension of their present building by adding to it a building in the rear of about sixty feet square, and four stories in height; they will take the third and fourth floors in the adjoining building next door, at No. 93 William street, in order to give them increased facilities in their printing department.

A reporter of THE STATIONER called in on Cyrus H. Loutrel yesterday and found him busy signing policies of insurance as acting president of the Knickerbocker Fire Insurance Company, of this city. Mr. Loutrel says that his company is the oldest in the fire insurance business in existence in this city, being established in 1787, and that during the whole of this time has never failed to pay a loss. Among its first directors were Alexander Hamilton, Dominick Lynch, Comfort Sands, Alexander Macomb, Thomas Randall, John Vanderhilt, Robert Lenox, and Robert L. Stuart, who has been a director for nearly forty-eight years. It was first organized as the Mutual Assurance Company.

Koch, Sons & Co. are very busy in filling orders at present and their packing department presents quite a marked contrast with other houses in their line of trade. F. W. Horn will sail for Europe by the White Star steamer Adriatic on Saturday to select additional novelties for the fall trade, which with their already extensive stock they expect will enable them to present the handsomest assortment ever shown in this country. They are also very actively at work in their manufacturing department, and are continually bringing out attractive novelties which they hope to present to the trade early at the opening of the fall season. Buyers will do well to examine their goods before making selec-

tions. William C. Horn will remain at home and will be happy to see his friends.

C. H. Rogers & Co., manufacturers of paper boxes, Binghamton, N. Y., have been partly burned out.

Allen & Pickett, dealers in fancy goods, Beverly, Mass., have dissolved partnership. M. A. Allen continues.

Wm. Irwin Martin, of Samuel Raynor & Co., is looking blooming and vigorous after his return from the South.

Stationers, paper dealers and paper makers will find in Lockwood's Directory of the Paper Trade, edition of 1881, a most invaluable guide to business. This work is now ready and deliveries will be made in regular order.

Among other arrivals in the city this week was J. G. Ditman of Philadelphia, the well known paper dealer of that city. He is paying a flying visit here to meet prominent manufacturers in reference to closing some negotiations for paper.

Among the visiting members of the stationery and paper trades in the city this week were: George A. Ogle, Baltimore; F. J. Wood, Georgetown, Col.; Mr. Metcalf, of S. O. Childs & Co., Chicago; D. Lothrop, Boston; Mr. Wilson, of Forsyth & Wilson, Kingston, N. Y.; W. O. Guilford, Waterbury, Conn.; Mr. Reid, of John Wannamaker, Philadelphia; O. H. Greenleaf, Holyoke; Charles Plunkett, Adams, Mass.; P. C. Baird, Lee, Mass., and Henry Dickinson, of Holyoke, who is here on his return from a short trip South.

J. Frank Harris, who started his career in the stationery business with F. G. Hancock, of Atlanta, Ga., some years ago, but who is now with the National Blank Book Company, of 66 and 68 Duane street, has just returned to New York after a very successful spring trip, accompanied by his handsome, cultivated, elegant and accomplished bride. Mr. Harris was married on March 24 at Columbus, Miss., to M. Corine Orr, a daughter of ex-Judge Orr, of the Supreme Court of Mississippi. The new married couple were in Atlanta for a few days, and it is said that the trade there all agree that "Frank" is as much of a success getting married as he is at selling blank books, and they all "wish him a safe and pleasant trip to New York, and great peace, joy and happiness in his journey through life."

Geo. Waterston & Sons have in preparation a splendid folio volume on "Ancient Scottish Weapons." It will be illustrated with fifty chromo-lithographed plates, from a collection of water-color drawings by the late James Drummond, now in the library of the Scottish Society of Antiquarians. Two or three sample plates, issued with the prospectus, exhibit some of the finest chromo work we remember to have seen employed in book illustrations. An effort has been made, with great success, to represent not the form only, but the texture and present condition of the various objects delineated. An introduction and a series of notices of the plates will be from the pen of Joseph Anderson, custodian of the National Museum of the Scottish Antiquaries. The edition is to be limited to 500 copies, nearly the whole of which have already been subscribed for.

Brentano is about to remove to No. 5 Union Square, Springler Building, where he will extend all of his departments. The basement will be devoted to keeping a larger stock of stationery on hand to meet the requirements of customers. He will, as usual, make a specialty of the "London Exchequer" jet black ink in all sizes. Gold pens and Russia leather goods have been added in this department.

Langfeld, Turner & Andrews, Philadelphia, are represented in this issue with a full page of cuts, showing new and useful articles in their line. Cut "R" is an entirely new style of portemonnaie, with a new catch to fasten it securely. (Both frame and catch are secured by letters patent, bearing date February 25, 1879.) This article has gold and silver compartments, and is very roomy; it is made in Russia, calf, seal and other desirable stock, from the cheapest to the best. But "B" is a round purse for holding coin and is sufficiently large to hold $20 gold pieces, trade dollars and smaller coin; it is a very durable purse and is said to be meeting with great success where it has been introduced. Cuts "G" and "H" represent the side-handle pocketbooks, with handle closed and open. It is claimed that these books have met with more success with the trade than any books brought before the American people, there having been sold during the past season over six thousand dozen, and mostly in fine goods. Langfeld, Turner & Andrews are the sole manufacturers of these books, they being secured by letters patent dated May 18, 1880. They have many new styles of these books to show the trade during the coming season. If any lady desires a pocketbook, with or without a handle, this book will please her, as it is self-closing and can be carried in the pocket, muff or hand, the handle not being in the way when the book is not in use. Cuts "M" and "N" represent the new tablet card-case, which can be worn suspended to belt or chatelaine, or can be carried in the hand or pocket; the compartments for holding the cards are in tablet form, and will hold a package of cards. It has an erasive tablet and pencil attached. The cases are made of the best material, and are much more convenient than the old style. These cases are also secured by letters patent, dated May 18, 1880. There are also made, under this patent, pocket photo cases, holding from two pictures to as many as are desired. This firm is a live one in the pocketbook business, and claims that it is the only firm in the country which manufactures a complete line of wallets, embracing sheep and calf goods, side-books, letter and card cases, gentlemen's pocketbooks and ladies' portemonnaies, in every conceivable kind of leather.

Max Griebel, of L. Prang & Co., reports an immense trade in Easter cards, and says that the manufacturing facilities are entirely inadequate to meet the demand for these goods. Several editions of some of the numbers are now sold out. The "Easter Dove" has proved a great success, and it has been found impossible to fill half the orders received for it. A new edition of these goods has just been finished and will be put on the market this week. The new birthday cards published by the house this season have, to a great extent, been delayed by the great demand for Easter goods; it is, therefore, not to be expected that orders for them can be filled promptly until after Easter.

Obpacher Brothers, 338 Broadway, are offering novelties in the fancy card line. Among them are wedding congratulation cards in appropriate designs, with congratulatory inscriptions. Some of the cards have blank lines for original expressions, and which could be very handsomely utilized to write a check, than which, perhaps, no happier inscription could be given. These goods all come from the firm's own factory in Munich. See advertisement.

Silas F. Manson, fancy goods dealer, Hudson, Mass., has sold out to F. B. Holden.

Hamilton & Chamberlain, booksellers and stationers, Oswego, N. Y., have dissolved partnership. William H. Chamberlain continues.

Loeb & Brother are working with full force for the summer season as well as for fall. They promise a great many novelties, which will surprise their customers.

Lockwood's Directory of the Paper Trade for 1881 is an enlarged edition, and directory of the stationery trade as well. It contains the names and addresses of several thousand stationers, besides the usual reports of mills and classification of manufacturers. It is ready for delivery.

Samuel L. Clemmens (Mark Twain) will soon bring out another new book, the title of which is yet undecided. James R. Osgood & Co. will be the publishers.

Edward Lovejoy, 88 State street, Chicago, among his large and constantly increasing stock of tasteful and artistic goods, keeps sets of cabinet photos which every dealer ought to see, and which every one that sees them buys. One set comprises two photos, entitled "Good Night!" and "Good Morning!" One shows the "household blossoms"—forty of them—sorrowing at the "Sand-man's" naughty pranks. The other shows the darlings washed and dressed, and "bidding the sun good morrow." Mr. Lovejoy will send the first or sample lot, however small, post paid at the wholesale rate. Catalogues will be sent free.

Ivison, Blakeman, Taylor & Co. have introduced in connection with the celebrated Spencerian steel pens a new brand of black lead pencils stamped and known as the "Spencerian." The firm claims the following for these pencils, viz.: The finest graphite, freedom from grit, uniformity of grades, soft wood free from cross grain, perfect mechanical construction, beauty of finish, adaptability for school, drawing and commercial use. The pencils are manufactured only round in shape, and in three degrees of lead. Instead of the old method of packing in dozens and grosses, the firm has adopted the plan of putting these pencils in packages of one hundred, and in boxes of ten, which it is confident will meet with the approval of dealers and consumers. A sample box, containing ten pencils, of one grade or assorted grades, will be sent for trial by mail on receipt of fifty cents.

One of the largest and oldest stationery houses in Cincinnati is that of W. B. Carpenter & Co. It has been established for ten years and is well and favorably known. Besides its general goods, it is agent for McDonald's stylograph, or rapid letter-copying book; the Hektograph Company's goods, Cameron & Amberg's bill and letter files, and L. H. Thomas' inks. The house makes a specialty of first class blank books for banks, steamboats and corporations. During the decade of its existence it has been constantly extending its business and reputation, until it now ranks among the foremost houses of the West, not only as regards extent and character, but for enterprise as well. Mr. Carpenter, the head of the firm, stands high in the social as well as the business circles of his city, and his name is sufficient recommendation for the house.

Sir Julius Benedict, the famous London composer who, as pianist and director, accompanied Jenny Lind in her American tour in 1850, has written a biographical and critical paper on "The Swedish Nightingale" for the May Scribner. The article is said to contain interesting comparisons of her with Malibran and other contemporary artists. The accompanying portrait of Jenny Lind, engraved by Closson from an old daguerreotype, taken while she was in America, will be a striking feature of the number. At the end of his article, Sir Julius hints that he may follow this paper with another upon the subject of musical conservatories in this country.

Single Copies - - - - 10 Cents

NEW YORK, THURSDAY, APRIL 7, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

IN this issue of THE STATIONER will be found a number of new announcements from advertisers. We, therefore, invite special attention to our advertising columns.

STORMS have had the effect of retarding business, but have not depressed the spirits of the trade. Merchants generally seem to think that they can wait until traveling and transportation facilities are easy. There is a solid feeling of confidence in the spring movement.

REFERRING to our reports from all sections, whether by private advice or regular correspondence, we are struck by the invariably satisfactory expressions which come to us. There is an exceedingly good trade for the time of the year, despite the obstacles to its transaction, and the promise is more than fair. No one seems to question that, as soon as trade is let loose from the confinement of the weather, there will be an active demand for goods. There is a rush for the fancies which go to enliven the Easter season, and this alone indicates the readiness of buyers and consumers to enter the market.

LOCKWOOD'S Directory for 1881 is off the press and will be ready for delivery ere this reaches most of our subscribers. The recognized value of this work has been enhanced in the present edition by a very large list of stationers throughout the conntry. This list comprises several thousand names and addresses, and is the first directory to the stationery trade, that we know of, which has been published. The compilation contains the usual very complete list of paper mills throughout the United States and Canadas, with details of their products and classifications under the different branches of manufacture. Notwithstanding that many paper mills were burned or abandoned during 1880, there are a larger number reported than last year, the total being 957 mills. When to this we add the statement that many of the old mills have been enlarged or otherwise increased their facilities for manufacturing, it will easily be understood that paper making in America is a progressive industry, not only in its extent but in the character of the products. The Directory is an invaluable reference book to every person whose business interests are allied with the paper and stationery trades. It is as complete as the most thorough and painstaking care within the scope of its purpose can make it, and it is printed and published at the office of the Lockwood Press. Our readers know what that means.

"SCRUPULOUS honesty." Such are the words publicly used in commenting on the character of a man well known in the paper trade and who has died only this week. When we consider the full force of the expression, which is not, we believe, used unadvisedly, we are led to ask what nobler title, what more exalted honor, or lofty encomium, could be given to any of the sons of earth, no matter how high his lineage or proud his ancestry. To the young men of the trade, who are getting their first lessons in that encounter with the world out of which they are to make or miss their fortune, we commend the example of the man who, in every transaction, was scrupulously honest. This merit lies deeper than the surface. It is an inner manliness, rising above the accidents of position, the chances of life and the conventionalities of society. When we think of the multifold temptations which beset us and the opportunities for swerving from the strict line of conscientiousness which do not subject us to punishment or contempt, even if we take advantage of them, we can gain a conception of what the words "scrupulously honest" mean. Yet, we do not say that this man stood all alone, nor that those who read this need the incentive or example to bring them to the line of duty; but we do know that there is room for improvement, and that commercial abuses could be reformed if all who admit the value of scrupulous honesty should combine to make it a common coin in trade.

CHATTEL MORTGAGES.

[In the appended list R. signifies a renewal of a pre-existing mortgage; B. S., bill of sale; and Real, a mortgage on real estate.]

OBITUARY.

JOHN B. AYRES.

John B. Ayres, a well known paper dealer of this city, died on Monday night at 8:50 o'clock, of apoplexy. Mr. Ayres, when a boy, learned the trade of paper making in the mill owned and managed by his father and Governor Rice, of Massachusetts. He was afterward engaged in paper manufacturing in different mills until 1862, when he opened a store at No. 117 Nassau street, this city, and soon established a large business as paper dealer. Under the firm name of J. B. Ayres & Co., he, with Theodore Conrow, removed his business to 33 Beekman street, where it is still carried on. His home was at Pittsfield, Mass., where his funeral will take place to-day.

Mr. Ayres was noted for his kindly feeling and scrupulous honesty.

THE LONDON 1881 EXHIBITION.

Successful as was last year's exhibition of printing and paper making machinery and stationery products, the forthcoming show will undoubtedly surpass its predecessor both in extent and variety. One guarantee of this is the influential list of names of patrons, which will include the firms of Spottiswoode & Co.; Eyre & Spottiswoode; Truscott & Son; Clowes; Waterlow & Sons; Waterlow Brothers & Layton; McCorquodale & Co.; Bemrose; Collins, Son & Co.; W. & A. K. Johnston; Collingridge; John Walter, M. P.; W. J. Ingram, M. P.; Edward Lloyd; Dr. Cameron, M. P.; and the Right Hon. Thomas T. Boyd, Lord Provost of Edinburgh. Another guarantee for success is the number of applications for space already sent in. We are pleased to note the statement that "it is intended that this exhibition and market shall be of a purely trade character, affording makers and manufacturers the best means of bringing their articles under the notice of the traders immediately interested." And further, "the exhibition being of a purely business character, it is not intended to examine exhibits for the purpose of making awards." The practical tone of this will increase the value of the idea, and exhibitors will realize the importance of promptness in securing eligible positions for the effective display of their material. There is surely no need to point out the immense advantage of these periodical bazaars, which bring together not only the products but the producers of every sort of article related to the paper making, the printing, and allied interests. A real impetus is given to invention, to enterprise, and to trade, by these exhibitions; and we anticipate with every confidence that the display, which will open in July and continue for a fortnight, will make its mark, both as a technical triumph and a popular attraction. The indefatigable secretary, Robert Dale, will furnish the necessary information on application to him at the Agricultural Hall. We shall ourselves prepare to see our many friends at the exhibition, and shall be glad of any suggestions that may help us to be of service to them during the show.—*British and Colonial Printer and Stationer.*

ANOTHER ELECTRIC LAMP.—A Russian inventor has contrived a new electric lamp, simple in construction and uninvolved with any clock work mechanism, springs or electrical contacts. According to the principle followed in this device, the problem of the divisibility of the electric light, by means of lamps having a voltaic arc, can be solved only with the lamps based on the system of the derivation of the current. It is claimed for this new lamp that it does not require preliminary regulation nor any manipulation before or during its working; that several of such lamps may be arranged in series in a circuit, and they are always in due relation with the intensity and the tension of the current which is to act upon them; the lamp can also work with comparatively weak current, and produce a very powerful light when the power of the current is augmented.

Several additions to the series of "English Men of Letters," published by Messrs. Macmillan, are announced. Professor A. W. Ward will write the notice of Dickens, and Professor Masson that of De Quincey. Other volumes in preparation are Swift, by John Morley; Adam Smith, by L. H. Courtney; Landor, by Professor S. Colvin; Lamb, by Rev. A. Ainger; Sterne, by H. D. Traill; and Berkeley, by Professor Huxley.

WELDING BY ELECTRICITY.

It is well known that great strength, with proportionally little weight, may be obtained in wrought-iron structures by employing the tubular form of making up. The great Victoria bridge, the Menai Straits bridge, the hull of the Great Eastern, and many other modern constructions of wrought iron are cases in point. But the cellular structure also has its advantages. The comb of the honey bee has been often quoted as a specimen of the utilization of space. It is fully as instructive as an illustration of the judicious employment of material for strength. It will appear reasonable to suppose that a rectangular sectioned beam of wrought iron would be much stronger if its interior was a series of transverse braces formed of sections of a circular or angular form, and making a part of the structure itself. The difficulty in the way of such an achievement is the impossibility of forming these transverse braces and the longitudinal plates into a solid and homogeneous whole.

Claim has recently been made by a bright mechanic that he can, by electrical action, really weld iron in place, and he exhibits a piece of his handiwork that appears to be perfectly welded, and done, as he says, by the heat of electricity. He says that he has filled a rectangular beam of wrought iron plate with short sections of wrought iron pipe, placed side by side, or at distances apart, but at their ends meeting the top and bottom plates of the beam, and welding them *in situ*, so that they form a honeycombed structure making a homogeneous beam. He insists that this welding is done by means of dynamic electricity, inducing a welding heat on the inner surfaces of the longitudinal plates and the ends of the engaging tubes. The claim, at present, rests solely on the inventor's statement and his exhibit of a small specimen, not large enough to give a practical value to his reputed discovery. If his sanguine claim could be made a practical possibility, its value in increasing the usefulness of iron in permanent structures would be immense, and his discovery would greatly modify some of the present methods of working fibrous iron.—*Design and Work.*

BINDINGS FOR HAND-PAINTING.—The prevailing taste for amateur decoration is offered a new channel for display by means of a series of presentation books just issued by Nimmo and Bain. The subjects of the volumes will readily suggest pictorial symbolisation to amateur painters, such as "Flowers of Contemplation," "Flowers of Christian Graces," &c. The books are bound in parchment, or in fine smooth cloth of neutral shades, on which may be painted designs in oil or water colors, and the end papers also admit of similar decorations, heavy drawing-paper having been employed to adapt them to that use. The idea will certainly commend itself to ladies. A book tastefully decorated by the hand of the giver must always possess special value on that account, apart from any other claim it may have.—*Bookseller.*

THE TELEPHONE.—According to an English paper, the author of the telephone was a poor mechanic of Aosta, Italy, named Manzetti. On November 22, 1865, under the title "Curiosities de la Science," the following notice of this wonderful discovery appeared in the *Petit Journal*, of Paris: "Discovery of sound and of speech by the telegraph.—A new discovery which will have immense results by the applications which may be made of it in the arts and in industry has lately augmented the number of the wonders of this century, and it is the transmission of the voice and of sound by the telegraph. Manzetti transmits speech by the simple means of a telegraphic wire, with an apparatus simpler than that in use for dispatches. Henceforward two merchants may treat instantaneously of their affairs from London to Calcutta, be kept informed of their speculations, agree together, &c. Various experiments have been made. They have completely succeeded in confirming the practical possibility of this discovery. Music, &c., is perfectly transmitted by it." Unfortunately for himself, Manzetti was too poor to profit by his invention.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, April 6, 1881.

THE MONEY MARKET.—The monetary situation was characterized by ease throughout the greater part of the week, and the bulk of the business in call loans, on pledge of stock collateral, was effected at rates ranging from 4 to 6 per cent. Toward the close, however, the market exhibited a hardening tendency, and in some instances a commission was paid, in addition to legal interest, for accommodation. Some transactions in time loans were reported at 4@5 per cent. In the disconnt market prime mercantile paper, for which the demand was light, sold at 5@6 per cent. The government bond market was strong and active throughout the week, and with the exception of 6's, which continued unchanged, a general advance in prices was recorded, 5's selling up ⅜@½, 4½'s ⅞, and 4's ⅞@1 per cent. Railroad mortgages were strong and active, the leading issues having been in good demand at advancing quotations. The speculation in stocks during the week has been tame, and the temper of the market for the most part bearish. Sterling exchange is steady, French weak, German firm, and the market generally dull. The actual rates at the close for prime bankers' sterling were 4.80½@4.81 and 4.82¾@4.83¼. Cable transfers were 4.83@4.83⅛. Prime commercial bills were 4.79@4.79¼.

THE PAPER MARKET.—The movement of paper at the hands of dealers is fairly good, and will compare favorably with any other line of goods at the present time. The general markets betray a lack of animation usual at this time of the year; but this is accounted for, owing to the prolonged stormy weather, which has delayed the spring trade at least a month beyond its usual time. An improvement in general trade cannot now be delayed much longer, and with it the paper trade will come in for its full share. Although dealers do not report business as active as they had reason to expect earlier in the year, yet trade will compare very favorably with the same time last year, the demand being free from all speculative influences and prices being on a steadier basis. Manufacturers everywhere appear well contented with the business on hand, some of them having more orders than they can conveniently fill, and very few are disposed to cut prices to secure further business. There is no new feature attaching to any particular grade, all lines remaining very much as noted last week.

THE STATIONERY MARKET.—Spring trade continues remarkably backward. The temperature of the weather during the past few days, in this vicinity, has been more suitable to the first week in March than April, while a large area of the Northwest is still covered with snow. The spring thus far has been phenomenal in severity of weather, and it is not surprising that trade has fallen below the expectations of business men, and that, though we have entered upon the second month of the spring season, much difficulty is still experienced in the distribution of goods in a large part of the country in which they are most largely consumed. Owing to the interruption to transportation, stocks of goods at the West and Northwest have become very much depleted, and many country dealers in the interior are said to be without good assortments; and where the roads are opened, replenishment of stock is the order of the day. With a return to good weather, it is the general belief that business will so increase during the remainder of the season as to make full amends for the falling off to date. No changes have been reported in prices, but the tendency is to some advance in prices of some of the staples, such as envelopes and blank books.

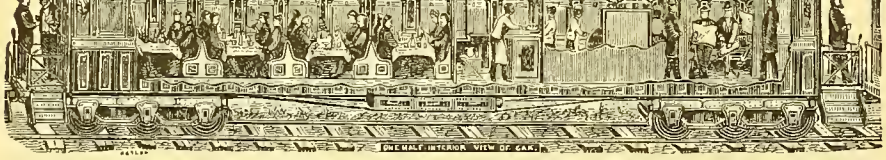
"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.



That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,
Vice-Pres't and Gen'l Man'gr, Chicago.

E. ST. JOHN,

GLASS CEMENTS AND GLUES.

At a recent meeting of the Polytechnic Club of the American Institute, the paper of the evening was upon glass cements, by Dr. John Phin, of the *American Journal of Microscopy*.

Cements are to be divided into four classes, according as they dry, congeal by oxidization, harden by cooling, or "set" by other chemical changes. First are those which harden by evaporation. Under this head may be classed paste, mucilage, and their varieties. Glues, to a certain extent, dry.

The second class includes the oils. These are said to dry, but it is not by evaporation. They lose nothing, but absorb oxygen from the air. The cement weighs more after hardening than when first applied. Cements which congeal by oxidization cannot be treated in the same way as those of the first class. They require a longer time to handle. The hardening goes on from the outside inward. For example, mend a piece of porcelain with one of these cements. Test it in a few days, and althongh the outside will be hard the inside will not appear to have dried in the least, and will have no tenacity. Leave it for six months, and it will be very strong.

Thirdly, we have those cements which harden by cooling. These, instead of gaining their strength slowly, like those of the second class, become hard at once. Shellac is a good example of a cement of this kind. China put together with melted shellac is extremely strong.

A fourth class of cements may be represented by plaster of paris. This is the type of an extensive class, including the whole line of mortars and hydraulic cements on which depend our great engineering works, and even the houses in which we live. It forms a chemical combination with water first, and then more slowly hardens by drying—a part of the water evaporating.

In order to use a cement successfully we must know to what class it belongs, and treat it accordingly. Next, we must know how to put it on. In no case should it be used in a large quantity. The less the better is a good rule to follow. In mortar we mingle sand, which makes the actual thickness of the lime between the stony surfaces in all cases very slight, however much mortar we may employ. In the use of glue this is not practiced or necessary. The joints made by the carpenters are good examples of the minute quantity of a cement which is necessary. Place a well made glued joint on the edge, and it is almost impossible to find the lines of glue. Its position is mainly discovered by the direction of the grain of the wood. Intimate contact between the cement and the edges is necessary. This is not easy, on account of the layer of air which adheres to all bodies. This layer of air is what causes needles to float when carefully placed upon the surface of water. When an object is warmed the film of air is easily moved, and the hot needle sinks. So to the hot body the cement will adhere easily. It is plain, for this reason, that in gluing it is needful to have the work warmed. The rubbing of the surfaces together gets rid of the air, and then, not only with glue, but with all cements, the surfaces must be pressed closely together. Common glue has most enormous strength and adhesive powers if it is good. But to be good it must not have been injured in the making by decomposition, to which the material and the glue itself are peculiarly subject. Here the lecturer detailed at some length the process of glue making, and said that if glue was not pleasant to both taste and smell it would not be strong.

If not offensive, it could be trusted to hold wood more strongly than its own fibres.

The strongest known glue is that made from the skins and sounds of fishes, and the strongest of this class is made in Lapland from the skin of a perch. The Laplanders use it in making their bows, which are both strong and durable. In making it their cold climate is greatly in their favor; here a fish skin will begin to undergo decomposition before it can be dried. In making it the skins are put into a bladder which answers for a water bath, and heated in water until a sort of glue results. This glue is, as may be imagined, very elastic. Isinglass is a very strong glue, made from skins, sounds, etc., of fishes; it is very liable to be spoiled in making by overheating.

The pastes are all made from starch in some of its forms. Gluten is also used for a paste, but starch is the best. All additions of resin, etc., commonly recommended are a damage to paste.

Dextrine, or "British gum," is of immense value in the arts as a cement. It is derived from starch by roasting or by the action of nitric acid. It was discovered by accidental overheating of starch, and its process of manufacture was for a long time kept secret. Its chief use for a long time was in the cotton manufacture. It is the standard gum for postage stamps, though it is said that gum-arabic and cheaper substitutes are used in this country.

No cement can be fire-proof which contains organic matter, since this is decomposed at a temperature about that of melting lead, or, say, 600° F. Cements containing oils will not be fire-proof. Silicate of soda mixed with asbestos is the nearest to a fire-proof cement. It will stand a low, red heat. It is decomposed at a bright red.

Waterproof glues are made in two ways. Glue and linseed oil are recommended, but I have had better success with the mixture. The chromates may be used with glue. These, when exposed to the light, render the compound insoluble.

Aquarium cement is the best waterproof cement I know. The formula is:

Litharge	3
White sand	3
Plaster of paris	3
Resin	1
Boiled linseed oil	

The solids are to be taken by measure in powder and mixed. As it sets rapidly, the oil must not be added until it is wanted for use. It is better for being put into a mortar and pounded. It hardens in three days. It will hold glass firmly and with it glass tanks may be made without frames, if the angles are well filled with cement. It is a kind of mastic, and could be used on brick. What is technically known as marine glue stands almost by itself. Where it can be put on hot it is admirable. It is composed of india rubber and shellac, dissolved in naphtha. Some kinds are hard, some almost liquid. I have seen this glue adhere to glass so firmly as to tear the glass when plates were separated.

In the discussion which followed, Dr. Parmalee gave some interesting experiences in the manufacture of marine glue. He said its melting point was about 230 degrees, and in making it was injured if the heat was carried above this point. In applying it care should be taken not to go above this heat, as the melting point would be raised and the strength diminished. In applying it the soldering iron may be used, but its heat must be regulated.

In answer to Dr. Parmalee, Dr. Phin said that Jeffries, the inventor, put three kinds of marine glue in the market; that the kind he himself had used was that known as "D. H. K.," and he had had no difficulty in making it adhere to glass—a point which caused some surprise.

PORCELAIN PHOTOGRAPHY.

As photography on porcelain bids fair to become a component element of the present system of decorating on china, we give our readers some of the processes employed up to this time.

There are three formulæ given in Mr. Solomon's little work on "Vitrified Photographs on Enamel," for a sensitive hygroscopic compound, which, when poured upon glass and exposed to light under a positive transparency, is hardened where the light penetrates, and becomes more or less susceptible to moisture according to the strength of the actinic rays acting through the various degrees of density in the transparency. One of these compounds, composed (say) of dextrine, grape sugar and gum arabic, sensitized by bichromate of ammonia, is poured upon a clean glass plate and allowed to dry in the dark; when perfectly dry, this is exposed under a transparent positive in a printing frame to the action of the light; when sufficiently exposed, it is taken into a room lighted by yellow light, and the oxide color, ground to an impalpable powder, is dusted upon the plate; as the film attracts moisture gradually from the atmosphere the color begins to adhere to the deep shadows, and finally the picture is developed in a color that can be burned into porcelain or earthenware.

The picture, having been developed, is coated with a thick collodion, which, when dry, holds the picture thoroughly; the bichromate is removed by immersion in weak nitric or muriatic acid, which floats off the film from the glass; and it is now ready for the delicate operation of transferring to the piece of which it is destined to form a portion as indestructible as the porcelain itself.

There are certain conditions peculiar to the nature of the work which all experimenters in this direction well know cannot be overlooked. In the first place, colors with a large amount of flux are quite inadmissible, as, although it is possible to mix them into a gelatine or a similar vehicle, the amount of lead in the flux will interfere in a most remarkable manner with the sensibility of the tissue, by combining with the chromic acid, and forming a chromate of lead, at the same time making a yellow stain on the material when it is fired. There is also another difficulty: the pigment is diluted, so to speak, by the flux, and gives a poor, weak image, instead of a bold and vigorous one. But, it will be asked, why employ a color with flux in it at all? For this reason: that if a pure color is employed, it is necessary to raise the temperature of the porcelain in firing to a heat sufficient to fuse or melt the glaze of the porcelain itself, and, in melting, incorporate the color into the original glaze, while the fluxed color melts at a much lower and more convenient heat, and is fused on the top of the original glaze.

It will now be understood what is meant by under-glaze and over-glaze colors, the former having to be incorporated with the glaze already on the ware by means of intense heat, the latter being fused upon the glaze at a much lower temperature, on account of the easy fusible material with which the color is mixed; but this material, unfortunately, interferes with the success of the operations, by making the tissues insensitive of the action of the light, and if this is overcome, as it may be, by immersing a second time in the bichromate solution, then by giving a poor, weak image, instead of a bold and vigorous one.

Thus it comes about that colors as nearly pure as possible must be employed to secure success in any efforts in the direction of printing by means of pigmented tissue upon porcelain. But then crops up this other difficulty: the firing—or, rather, the fusing—points of different colors, such as black, red, blue, are by no means the same; and they can only be brought into agreement by the admixture of some material—the flux, in fact—that gives way at a lower temperature.

The best plan to pursue until experience has been gained, is to take some simple colors, such as black, brown, blue and red, being careful that they are what are called under-glaze colors. These are sold by the ceramic color makers in the form of fine powder. Take a little of each of the colors and rub them up separately with a glass muller and a little fat oil of turpentine. Now take a small piece of the porcelain upon which it is proposed to operate; make a rubbing of the colors and have it fired. This preliminary experiment will give an idea what shade the colors will be when fired, and how far they agree or differ as to the temperature to which they must go.

Having settled upon the color, the next thing is to get it into gelatine; but gelatine is an awkward substance to manipulate, as, if it is in sufficient quantity to hold the heavy color, it will be very likely to "frizzle" on the porcelain when it begins to feel the heat. This frizzling is a great nuisance. It means the entire ruin of the picture; for as soon as the heat of the muffle begins to tell upon the plaque the gelatine contracts, bursts up and brings picture and all with it.

The hard, strong gelatines seem to be useless in this respect; but the weaker forms—such as the soup gelatine of Cox, and the weaker sorts of Nelson—promise most hopefully. Having selected the gelatine, make a solution of twenty-five per cent., adding to this about ten per cent. of white sugar. Now, with a slab and marble muller, grind up the color selected, in water, to the finest possible state of division. The quantity of color to be added to the gelatine must be determined by experiment, as it will vary with the strength of the color and the strength of the gelatine into which it is to be put. The color itself being heavy, it will not be possible to get any very large quantity into the rather weak gelatine that must necessarily be employed. The color being well ground, must now be stirred into the warm gelatine, and if some arrangement can be made for agitating or churning it vigorously for an hour or more, the result is more likely to be successful. The gelatine and color must now be strained, and after standing some little time will be ready for use. To make the tissue, procure some pieces of plate glass, cut some sheets of Rive paper a little smaller than the glasses, damp them thoroughly, blot them off, and lay them down upon the glasses, smoothing out the creases, and attach them round the edge with a little gum; when dry, pour upon them sufficient of the prepared gelatine to give a thickness of about one-eighth of an inch, having previously leveled them carefully. When the gelatine is set they may be reared up to dry, and when dry they will be ready for sensitizing.

To make the tissue sensitive, put into a tin dish a little larger than the sheets a five per cent. solution of bichromate of potash, and immerse each sheet for about three minutes in summer, and five minutes in winter. These should be treated very carefully to avoid air bubbles. The sheets should be hung up in a room made dark, or illuminated with non-actinic light, and, when dry, should be taken down, and kept from light and atmosphere in a tin case.

The printing must be conducted in exactly the same manner as ordinary carbon printing, and with the aid of an actinometer. The pictures must be printed very deeply, and if the negative is at all hard, a little exposure of the print to daylight (say from four to five seconds) after the sheet is taken from the printing frame, will improve it, by conferring a certain amount of softness. If the print is from a reversed negative, it may be laid down direct upon the surface which it is proposed to decorate, and in that case no substratum will be necessary. If the print is from an ordinary negative, it must be developed in the first instance upon a provisional or temporary support.

As the porcelain has frequently a curved surface, and even a plaque or tile has an uneven surface, it necessarily follows that the temporary support must be flexible. There are two kinds open to the experimentalist, viz., the india rubber paper of Mr. Swan, and the flexible support introduced by the author. At the Autotype Works the latter alone is used, as it answers the purpose, and is much more simple and economical than any other kind. Pieces of flexible support a little larger than the pictures are rubbed over with the proper waxing compound; this is applied with a light circular sweep of the hand, as if the object were to polish the surface of the support, in the same way that a French polisher treats the articles he manipulates. The sheets are laid aside for the spirit to evaporate, and are then ready for use. The printed tissue is placed in clean and very cold water, and, as soon as it is softened, its surface is brought into contact with the polished surface of the support. Both sheets being under water, they are lifted together, and absolute contact secured by a few strokes of the squeegee; they are allowed to rest a few minutes, then placed in warm water, the tissue paper skimmed off, and the picture very carefully developed. Considerable care is necessary in this part of the process, as the gelatine employed being necessarily weak the color will be so loosely held as to be easily washed away if the water be too warm, or the action of development too vigorous. The picture, being developed, should have a much darker appearance than is desired in the finished work; if not, it will burn away to a mere shadow.

The picture developed upon the temporary support should be allowed to dry before transferring it to the surface upon which it is proposed to finally place it; when dry, the picture on the support is immersed with the plaque, tile or piece of ware on which it is to finally rest, in a solution of gelatine to which sufficient chrome alum has been added to slightly thicken it; the two are squeezed together, and when dry the support will leave the picture firmly attached to the porcelain. Pictures printed from reversed negatives can be put down at once on the surface to be decorated, and developed at once upon it.

The next question, of course, is the firing or burning in, but this is a matter which nothing but the practical skill of the potter can effect successfully; it must be done in a regularly constructed fire-clay muffle or kiln, heated by a furnace which will raise the whole to something like a white heat, so as to remelt the original glaze of the ware, and in doing so put the photograph under the glaze.

This branch of the photographic art is at the present moment quite in its infancy. If a demand arises, facilities will doubtless appear to enable the potter and the photographer to work together; and probably the reproduction of original designs, too elaborate to be done cheaply by hand, might be made a new development of photographic business. The best way to overcome difficulties is first of all to know clearly what they are. The author of these articles has painfully worked his way to some small measure of success, but this success depends so greatly upon the experience acquired by careful observation of results that it is next to impossible to do more than indicate the rocks ahead, and to save other experimentalists some amount of shipwreck.—*Photographic News.*

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U.S.A.

These Papers, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

REGULAR QUALITY.

In handsome Light Blue Packages containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In a separate Package of uniform size, is one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

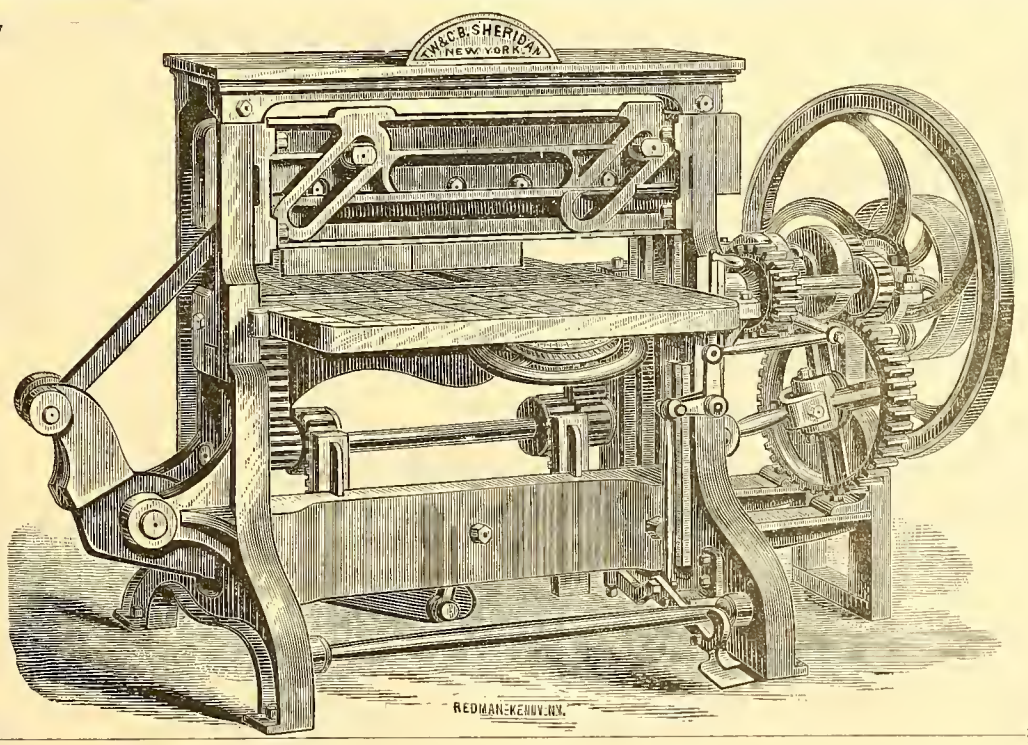
EXTRA QUALITY.

In attractive Lavender Colored Boxes containing one-quarter of a ream of Superb Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or New York Office, *47 Beekman Street.* GEO. B. HURD, Gen'l Agent.

SHERIDAN'S AUTO.



SHERIDAN'S AUTO.

THIS is **the only Self-Clamping Cutter** in which the knife is operated from above, and in which the pressure of the Clamp upon the paper is always greater than the resistance against the knife, **without the aid of Springs, Weights, or Friction of any kind, POSITIVELY AUTOMATIC.** ☞ Send for Price List; also of our Hand-Clamp Cutter, "THE SHERIDAN," the old reliable.

T. W. & C. B. SHERIDAN, 25 Centre St., New York.

IMPORT ORDERS.

M & H BLOTTER TABLET PATENTED

PADS OF PAPER WITH BLOTTER ATTACHED.

ELEGANCE. ECONOMY. CONVENIENCE. CLEANLINESS.

THE paper is tableted, so that each sheet may be freely removed, leaving a perfectly clean, smooth edge. No paper is wasted. The sheet on which you write is always clean, being protected by the blotter. The blotter, of the full size of the paper, is so attached at the top of the pad that both sides of it may be used, and will last out the entire contents of the pad, being always at hand, and perfectly clean.

The blotter is kept clean, and also from wearing, by the card board cover, which is made of a highly polished stock, perfectly smooth, and that will not catch dust or dirt from the desk. The cover is richly ornamented on every pad, giving the whole a neat and elegant appearance. All kinds of paper and printed blanks are put up in this form at prices as low as if loose; making the most complete line of staple and elegant stationery ever offered to the trade.

HASBROUCK & WATSON,

SOLE MANUFACTURERS. 51 NASSAU ST. NEW YORK.

DRIVING NAILS BY MACHINERY.

Nails are now driven by machinery in most box factories where sufficient system and repetition exist to make it profitable, one machine doing the work of ten or fifteen men. The general idea of these machines is as follows: The nails are fed by hand into bell-shaped holes in a revolving disk. These holes are arranged in radial lines, each line with as many holes as there are nails wanted along the side of a box. This disk revolves and delivers the nails into bent tubes, each nail to a separate tube, which delivers it to a kind of pair of nippers arranged in a row with others. Upon receiving their nails, the nippers advance simultaneously, so as to bring each its nail under a kind of stationary hammer, the point of the nail protruding below the embrace of the nippers. At this point in the operation, the box upon a sliding platform rises until the points of the nails penetrate it to a certain extent, when the nippers relax their hold and recede, the box still rising to receive the entire penetration of the released nails, the stationary hammer acting upon the heads of them meantime. This nails one edge of the box; but all the edges having the same arrangement of nails are finished by a repetition of the above movements. Then, to do the ends, the boxes are transferred to other machines, or the same one can be readjusted when a sufficient number of boxes have been passed. These machines work with rapidity and precision, not one nail in many thousands failing to enter properly.

Self-feeding nail machines are beginning to occupy the attention of inventors with some degree of success. What are technically known as nails range from 1⅛ to 6 inches in length, and from 800 down to 10 nails to a pound. But the genus extends upward, under the special name of spikes, to two feet or more in length, a single one of which will weigh from 6 to 15 pounds, and downward, under the name of brads, to one-quarter of an inch in length, and to 10,000 to a pound.

THE STRONGEST OF THE BRONZES.

Professor Robert R. Thurston, of the Stevens Institute of Technology, has contributed an important paper to the American Society of Civil Engineers, on a newly discovered alloy of maximum strength. By an ingenious method of planning his research and recording the data obtained, he showed strikingly the remarkable variations of quality in various bronzes. He proved that the alloys of copper, tin and zinc of maximum strength are grouped about one not far from—copper, 55; zinc, 43; and tin, 2. Professor Thurston made this alloy, finding that it was close-grained, of rich color, fine surface and capable of taking a fine polish. It oxidizes with difficulty, and the surface then takes on a pleasant shade of statuary bronze green. Testing it, it was found to have considerable hardness, but moderate ductility, though tough and ductile enough for most purposes. It would forge if handled skillfully and carefully, and not too long or too highly heated. It had immense strength, and seemed unusually well adapted for general use as a working quality of bronze. In composition, however, it is seen to be a brass, with a small dose of tin.

The alloy made, as representing the best alloy for purposes demanding toughness as well as strength, contains more tin than the above composition, having 55 of copper, 2.5 parts of tin, and 445 parts of zinc. It had a tenacity of 68,900 pounds per square inch of original section and 92,136 pounds on fractured area, and elongated 47 to 51 per cent., with a reduction to from 0.67 to

0.73 of its original diameter. The alloy was very homogeneons. The fractured surface was in color pinkish yellow, and was dotted with minute crystals of alloy produced by cooling too slowly. Professor Thurston expresses the opinion that there should be no trouble in securing copper, tin and zinc alloys of tenacities between 75,000 and 100,000 ponnds per square inch by intelligent and skillful working.

CARBON POINTS FOR SPLITTING GLASS.

Gum arabic	drachms.	10
Water	ounces.	3
Tragacanth, powdered	drachms.	4
Hot water	ounces.	8
Storax	drachms.	2
Benzoin	drachms.	2
Alcohol of 91°	drachms.	9
Powdered charcoal	ouuces.	3 to 3½

Dissolve the gum arabic in the cold water, and mix it with the paste made from the tragacanth and hot water. To the mucilage add the resins dissolved in the alcohol, and enough finely powdered charcoal to form a mass to be rolled into cylinders of suitable length and about fourtenths of an inch in diameter. While rolling the sticks, powdered charcoal is employed to prevent adhesion. When thoroughly dry, the pencils are ready for use, and are managed as fallows: one end is sharpened like a lead pencil, and ignited, and the glass having been scratched with a file or diamond, the heated and glowing end of the pencil is carried close to the glass in the direction in which it is intended to split it.

The following receipts produce a pencil burning more rapidly than the above:

I. Gum tragacanth	drachms.	1
Hot water		10
Acetate of lead		3
Finely powdered charcoal		6

Proceed as formerly.

II. Sticks of willow or poplar, or any soft wood of about the thickness of a finger, are thoroughly dried, and immersed for some seven days into a concentrated solution of sugar of lead. When dry they are ready for use, and burn quite readily and evenly.

PERAZOTIC ACID.

The discovery of a new compound of oxygen and nitrogen has been announced by MM. Hautefenille and Chapuis. It contains more oxygen than azotic acid, and has been named by the French chemists perazotic acid. It is well known that on passing an electric current through oxygen a portion of the oxygen is transformed into ozone. If the ozone be mixed with nitrogen, the spectrum indicates the presence of a body characterized by black bands. The bands disappear when the gaseous compound is mixed with water, and the latter is acidified. The application of red heat to the gaseous mixture also causes the black bands to disappear. The experimenters are now endeavoring to isolate the new acid in order to study its properties. M. Berthelot some time since suspected the existence of the body in question during some experiments which he has not published. Its presence was indicated to him, however, merely by phenomena of coloration which appeared and disappeared during the passage of an electric current through a mixture of oxygen and hypoazotic acid. His observations were communicated to Messrs. Hautefeuille and Chapuis, who, by obtaining the spectrum, have placed the existence of the new acid beyond doubt. The discovery is the more surprising, as oxygen and nitrogen, being constituntents of the atmosphere, have so long been the objects of what might have been considered exhaustive study.—*Design and Work.*

IF YOU WANT THE BEST STYLOGRAPHIC PEN,

The Latest and the Best.

Circulars on application.

Examination Solicited and Satisfaction Guaranteed.

The attention of the Trade is called to the improvements made and advantages offered in Livermore's New Stylographic Pen.

Patented July 15, 1879, and March 9, 1880.

FIRST—**A Smaller Air Tube**, allowing more space for the ink, and rendering the operation of filling easier and less frequent.

SECOND—**The Manner of Fastening the Needle**, not to the air tube, where it would be in danger of being bent or injured every time the pen was filled, but in the point, where it is not so exposed.

THIRD—**The Protection of the Spring** by a silver casing, preventing the ink from clogging its action.

FOURTH—**The Duplex Interchangeable Point Section**, furnishing great facility in cleaning the pen.

FIFTH—**The Ease with which Repairs can be Made.** The needle being in the point, it is not necessary to send the whole pen to the factory, but any dealer can supply a new point.

SIXTH—**Freedom from Legal Difficulties.** The New Stylographic Pen is manufactured under the patent controlling the use of an air tube in a Fountain Pen, and it is therefore free from legal complications.

The Chicago & Northwestern Railway

Is the OLDEST ! BEST CONSTRUCTED ! BEST EQUIPPED ! and hence the

Leading Railway of the West and Northwest !

It is the short and best route between Chicago and all points in Northern Illinois, Iowa, Dakota, Wyoming, Nebraska, California, Oregon, Arizona, Utah, Colorado, Idaho, Montana, Nevada, and for **Council Bluffs, Omaha, Denver, Leadville, Salt Lake, San Francisco, Deadwood, Sioux City**, Cedar Rapids, Des Moines, Columbus, and all Points in the Territories, and the West. Also, for Milwaukee, Green Bay, Oshkosh, Sheboygan, Marquette, Fond du Lac, Watertown, Houghton, Neenah, Menasha, St. Paul, Minneapolis, Huron, Volga, Fargo, Bismarck, Winona, La Crosse, Owatonna, and all points in Minnesota, Dakota, Wisconsin and the Northwest.

At Council Bluffs the Trains of the Chicago and Northwestern and the U. P. Railways depart from, arrive at and use the same joint Union Depot.

At Chicago, close connections are made with the Lake Shore, Michigan Central, Baltimore and Ohio, Ft. Wayne and Pennsylvania, and Chicago and Grand Trunk Railways, and the Kankakee and Pan Handle Routes. Close connections made at Junction Points.

It is the **Only Line** running PULLMAN HOTEL DINING CARS between **Chicago and Council Bluffs.** Pullman Sleepers on all Night Trains.

Insist upon Ticket Agents selling you Tickets via this road. Examine your Tickets, and refuse to buy if they do not read over the Chicago and Northwestern Railway.

If you wish the Best Traveling Accommodations you will buy your Tickets by this route, ☞ AND WILL TAKE NONE OTHER.

All Ticket Agents sell Tickets by this Line.

MARVIN HUGHITT, 2d V. P. & Gen. Man., Chicago.

GILDING.

There are two divisions in this branch of ornamentation, *bright* and *dead* gilding. The surface of the article to be decorated must be made as bright and as smooth as possible, as the gold size is to be applied directly to it. For "bright gilding," boil a few shreds of isinglass in a pint of water; let this cool, and with it paint over all those parts of the work intended to be gilded; while the surface is still moist, take up one of the pieces of gold upon a "tip," using care not to blow the breath upon it, and deftly transfer it to the place it is to ornament, laying it smoothly out, and pressing it upon the moist surface with the "dabber." If any cracks or defects appear, wet first the ends of a tracing point with the lips, and tear off from a leaf of gold a piece just large enough, lay it over the crack and press it down carefully. Should the gold size become too dry, it may be moistened by breathing on it. When it is all perfectly dry, the superfluous gold must be lightly blown off. Usually five or six hours may intervene between the application and burnishing of the gold, and with the smooth surface the rubbing may be done with ease and rapidity. The dead or "oil gilding" process is accomplished by using gold size prepared with oil, etc., applying the leaf upon a dry ground "Dead gilding" is very effective in combination with bright, when executed in the different shades of gold. Japanese gold leaf has two shades of color, "deep" and "pale;" the first has a reddish tint from copper alloy, the latter mixed with silver has a yellowish white hue. In "dead gilding" the size is made with a proportion of chrome yellow added, and there are two reasons therefor; gold size being nearly transparent, would not show upon a black background, and the yellow of the chrome does much towards concealing flaws or cracks in the leaf laid upon it. A small portion of fine, clear linseed oil is added to prevent the work drying too rapidly. After applying this size to the surface, allow it to dry until it is merely "sticky," when the gold leaf is laid on; then press down firmly with a soft pad, and smooth and brush off the edges. By these methods furniture, picture frames, brackets and other fancy articles may be made very handsome.

A NEW COPYING METHOD.

The pad is prepared with glue, glycerine and water, in the same manner as for the well known hectograph, but with a larger proportion of glue. For writiug or drawing, a concentrated solution of alum is used, colored with a little aniline to render the writing visible. Before using, the pad is dampened by means of a wet sponge, and the moisture is permitted to remain a few minutes. The writing may now be applied and upon removing it, after a short time, the lines will be transferred to the pad. A small quantity of printer's ink is applied with a rubber roller, and will be taken up by the etched lines only. An impression is obtained by pressing moistened paper over the lines with the palm of the hand. The pad must be inked for each copy, but a great number may be made from the same etching or transfer.

This method is the invention of Adler, of the Vienna Photographic Society, and is not patented.—*Pharm. Centralhalle, No.* 49.

SOREL'S CEMENT.—Mix commercial zinc white with one half its bulk of fine sand, adding a solution of chloride of zinc of 1.26 specific gravity, and rub the whole thoroughly together in a mortar. The mixture must be applied at once, as it hardens very quickly.

A PATENT SUIT.

Following is a report of proceedings in the English Chancery Court, in the case of the "McGill Patent Single-Stroke Staple Press" vs. The Philadelphia Novelty Company's "Novelty Paper Fastener," taken from the *London Daily News*:

HIGH COURT OF JUSTICE—CHANCERY DIVISION.
FEBRUARY 12.

[Before the Master of the Rolls.]

MCGILL VS GUITERMAN.—This was a motion by the plaintiff in this action against Messrs. Wyman, the printers of *The Printing Times and Lithographer*. It appeared that on the 17th of December last a motion was made in the action for an interlocutory injunction restraining the defendant from selling the "Novelty Paper Fastener," as being an infringement of the plaintiff's patent, and at the request of the defendant the motion stood over until these sittings, the defendant undertaking to keep an account in the meantime. In *The Printing Times and Lithographer* of the 15th of January, 1881, there appeared under the heading of "Legal Intelligence" what purported to be a report of the motion in the action in which the Master of the Rolls was stated to have said that he did not see that there was any patent in this paper fastener, as he had seen plenty similar ones on many occasions, and the report went on: "The Master of the Rolls did not see that the plaintiff had any right to such an order. So far as he could see at present, he would not make any order on the motion, and the costs would be costs in the cause." The plaintiff gave Messrs Wyman notice of motion to restrain them from printing further copies of the paper. Messrs. Wyman, on being informed of the inaccuracy of their report, expressed themselves as being very sorry, stated that they had copied the report from the *City Press*, and offered to insert an apology. The plaintiff now offered to accept the apology, and asked that Messrs. Wyman should pay the costs of the motion Mr. Aston, Q. C., Mr. Chitty, Q. C., and Mr. Grosvenor Woods appeared for the plaintiff; and Mr. A. T. Watson for Messrs. Wyman.—The Master of the Rolls said that, in his opinion, Messrs. Wyman were both legally and morally in the wrong. They admitted that the report was copied from another paper, but they gave it to the public as their own "Legal Intelligence." It was absurd to suppose that he had used the words imputed to him It was very material to say that he had decided against the plaintiff when he had done nothing of the sort. The respondents, Messrs. Wyman, must pay the costs of the motion, and they would, of course, insert an apology.

It is stated that the plaintiff in the above action, George W. McGill, of New York city, who has been for time past in Europe, has instructed his counsel here to take the necessary legal measures to enjoin the manufacture and sale of the "Novelty Paper Fastener" in this country, as being an infringement of his "patent single-stroke staple press," for the manufacture and sale of which Holmes, Booth & Haydens, of 49 Chambers street, New York, are his sole licensees and agents.

The Alissoff machine, for hand printing, is being rapidly adopted in Russia, the native land of its inventor. It is larger than the type writer, and it does not do its work so fast. Both hands and feet are employed in operating it. The hands turn a handle round a dial on which the letters are spaced, and the feet move a treadle. When the handle is stopped opposite a letter on the dial, that letter is ready to make its impression on the paper, which is pressed upon the type by the action of the treadle. The peculiar advantages of this Russian device are thus summed up by the engineer: It can be made to print in six complete alphabets, or in four alphabets and the necessary signs and figures. Moreover, the impression is made in printer's ink, and if it is dusted with bronze powder, from twenty to twenty-five proofs can be obtained from it in an ordinary copying press.

THE COMMERCIAL PEN FOR THE AGE.

The Only Successful Reservoir Pen in the Market.

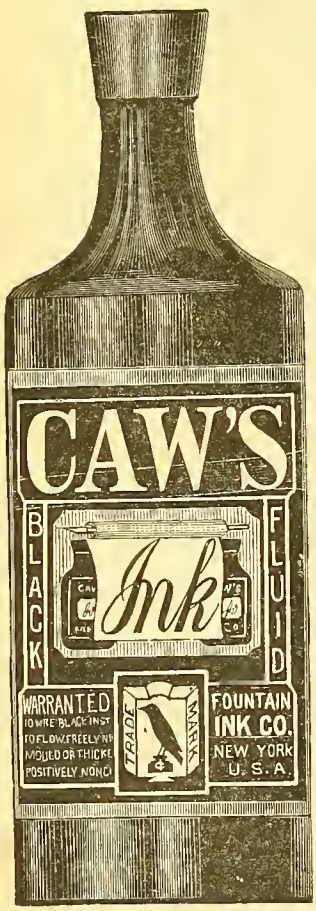
THE ONLY PEN ever made with a CIRCLE OF IRIDIUM (DIAMOND) around the Point.

THE ONLY PEN accompanied by a WRITTEN GUARANTEE from the Manufacturers.

THE ONLY RESERVOIR PEN supplied with a GRAVITATING VALVE. Others substitute a SPRING, which soon gets out of order.

THE ONLY PEN that will stand the Test of Time.

The above are FACTS which it behooves every man in the trade to know. Enough said.



Bottle for Quarts, Pints, 8 oz. Packed One Dozen, in cases.

CAW'S BLACK FLUID

Is the only known Ink that is

Positively Non-Corrosive to Steel Pens.

Flows freely; does not thicken by exposure, and has the decided advantage of writing **BLACK AT FIRST.**

— WARRANTED —

To Write Black Instantly.

To Flow Freely.

Not to Fade.

Not to Mould.

Not to Thicken.

Not to Corrode Steel Pens.

☞ A Copy of the above is printed on all labels for **Caw's Black Writing Fluid** for the purpose of attracting attention to each especial feature claimed. This is done to facilitate its introduction, and that the consumer, when using, may notice its merits, and thereafter use it in preference to the unsatisfactory thick, black inks, or pale, green writing fluids of the past.

NEW STYLE OF STANDS.

Packed 3 dozen in Case.

The above is the exact size of No. 1 Stand. No. 2 being twice this size.

FOUNTAIN INKS.

These Inks are expressly prepared for use in Fountain Pens. Put up in two sizes of bottles. No. 1 containing the same as cones or other styles of bottles generally sold as 3 oz., the Stopper arrangement being very convenient for both Fountain and other pens. No. 2 is twice the size of No. 1, and has a new device for filling Pens that keeps the Bottle always corked and free from dust, even while open ready for use.

THE TRADE is respectfully notified that from and after this date all our designs for Stationery will be *copyrighted*, and any infringement thereon will be prosecuted to the full extent of the law.

We are compelled to protect ourselves in the above manner, as certain persons have, to a large extent, copied designs original with ourselves, and are now offering them to the trade throughout the country.

CHEAP ELECTRIC LIGHT.

The distinguished Tynesider, Sir Wm. Armstrong, began to use the Swan electric lamps some six or seven weeks ago at his country residence, at Cragside, Rothbury, near Newcastle, and one of the most remarkable facts in his experience with it is that he obtained the motor or mechanical force, which is in due course converted into electricity and eventually into light of brilliant whiteness, without the use of a steam engine, or gas engine, or anything of the sort. Of course, he must employ a dynamo-electric machine, so as to generate the requisite electricity, but that is set in motion by a six-horse power turbine used as the motor, and which is so disposed close by a neighboring brook as to take advantage of that natural source of power. The turbine and generator are situated about 1,500 yards from the mansion, and therefore as the electric circuit has to be completed, a stretch of copper wire of twice that length, or 3,000 yards, has to be used. But after that has been done, and all the lamps are in position and put in circuit, the light for the whole of the house is got for nothing.

Now, let us see what the light amounts to. Sir William Armstrong has 45 lamps distributed through his house, but, as he can switch off the current from room to room, he never requires to have more than 37 in light at once, and for that number of lamps six horse-power proves to be amply sufficient, notwithstanding the great length of the conducting wire used, and the dissipation of energy consequent thereon. His library, a room of 33 ft. by 20 ft., with a large recess on one side, is well lighted by eight lamps, four of which are clustered in one globe of ground glass suspended from the ceiling in the recess, while the remainder are distributed singly and in globes in various parts of the room upon vases which were previously used as stands for duplex kerosene lamps. The lighting of the dining room is also effected by the use of eight lamps, six of which are grouped together in one glass shade suspended over the centre of the table, the other two being used singly as bracket lamps, one at each side of the room. Twelve overhead lamps are employed to light a picture gallery, which is also used as a drawing-room; but when the eight lamps in the dining room are no longer wanted the current supplying them is switched off to the gallery for lighting eight additional lamps, making twenty in all. Sir William remarks that the gallery is agreeably lighted even with the twelve lamps, while with the full illumination the pictures are seen as distinctly as in daylight. In the passages and stairs the lamps are, for the most part, used without glass shades, and present a very beautiful star-like appearance, not so bright as to pain the eye in passing, and very efficient for lighting the way. The turbine and generator at Cragside are occasionally used in the daytime for the transmission of motive power to a second dynamo-electric machine acting as a motor to drive a sawing machine. It does so with good effect, but Sir William Armstrong is not prepared to say how much of the original power is realized, or what should be the proportions between the generator and the motor to give the best effect.—*Engineering and Building Times.*

It is probably not generally known, that the great Pyramid of Cheops, in Egypt, is not the largest structure of the kind in the world. The Pyramid of Cheops covers only fourteen acres, while the Pyramid of Pueblo, in Mexico, covers forty acres of ground, and was originally 600 feet high. It is estimated to have been built at least 7,000 years ago. Sun-dried brick is the material of which it is made.

CEMENTINE.

WE desire to call attention to a new article which we are just now introducing to the trade. It is a liquid glue, cement and mucilage combined. In our own business we experienced so much difficulty in finding an adhesive that would make our labels adhere to the tin cover of the Hektograph, that we gave a commission to one of our most distinguished chemists to compound for us an article which would answer our purpose. After months of labor the result has been the production of an adhesive so far superior to anything heretofore made, that we have decided to manufacture and offer it for sale, and are now ready to supply it in any quantity. It is without doubt the best article of the kind for family and general use ever offered to the public. For repairing China, Glassware, Furniture, Rubber, Leather, Books, Billiard Cues, or pasting labels upon tin or other metal or for any use where glue, cement or mucilage is required, it is unrivaled. For warm climates we make an article expressly adapted for use there. We supply it by the gallon or barrel, and for family use it is put up in bottles, with brush, at 25 cents. Samples will be sent free to large consumers.

LIBERAL DISCOUNT TO THE TRADE.

NEW PLASTIC MATERIAL.

A valuable plastic material has been introduced in Germany for ornamental and other purposes. Five parts of sifted whiting are mixed with a solution of one part of glue, and, on these two being well worked up into a paste, a proportionate quantity of Venetian turpentine is added, in order to prevent brittleness; a small amount of linseed oil is also put with the mixture, to obviate its clinging to the hands, and the mass may be colored by kneading in any color that may be desired. The substance thus formed may be pressed into shapes, and used for the production of bas-reliefs and other figures, and may be likewise worked by hand into models—the hands to be rubbed with linseed oil, and the mass to be kept warm during the process. On becoming cool and dry, which takes place in a few hours, it is as hard as stone.

POISONED BY A PENCIL.—Samuel Clarke, of Vassalborough, has been in the habit of carrying a copying pencil in his coat pocket. One day last week Mr. Clarke came to Augusta and while in the city he purchased some troches for a cold, which he put loose in the pocket, where they were coming constantly in contact with the lead. While returning to Vassalborough on the cars he felt a tickling in his throat, and to allay the irritation partook of several troches. His tongue at once began to swell and turn black, and by the time he arrived home he was deadly sick. A physician was summoned, who promptly administered antidotes for the poison. It is said that a piece of the lead of one of these pencils, half the size of a pea, will cause the death of a robust man.—*Kennebec (Me.) Journal.*

Moncure D. Conway, writing of international copyright, fails to see that the proposed limit of three or six months within which works written in one country must appear in the other will prove in practice hostile to the interests of young authors. Famous authors could, of course, obtain a publisher in the foreign country, even before finishing a work. "A young author," he says, "who has written one successful book is apt to write another, and if there were an international copyright he would always have the power of giving that next volume to some rival of the house that had not paid him for the first. No trade custom would then interfere with his freedom of selection. The young author would thus be virtually protected if his book repaid the foreign publisher; if not, he would be no better off whatever the time limit."

During the winter months, storms, while crossing the United States, frequently advance during a part of their course from northwest to southeast. This course is followed most frequently in the region between the Rocky Mountains and the Mississippi, is seldom continued as far south as latitude thirty degrees, and the storm centre, after reaching its most southernly point, often changes its course towards the northeast. Storms which cross the United Statss north of latitude thirty-eight degrees generally pursue a course a little to the north of east; while those which come from south of that latitude pursue a course nearly northeast. During the summer months, however, few storms travel south of latitude thirty-eight degrees; and during this part of the year the average course of storms is almost exactly towards the east.

The best rules for a young man to form are: To talk little, to hear much, to reflect alone upon what has passed in company, to distrust one's own opinion, and value others that deserve it.

STRUCTURE OF METALS.

The following observations on the minute structure of metals, which have been hammered into thin leaves, are instructive. Notwithstanding the great opacity of metals, it is quite possible to procure, by chemical means, metallic leaves sufficiently thin to examine beneath the microscope by transmitted light. Silver leaf, for instance, when mounted upon a glass slip and immersed for a short time in a solution of potassium cyanide, perchloride of iron, or iron-alum, becomes reduced in thickness to any required extent. The structure of silver leaf may also be conveniently examined by converting it into a transparent salt by the action upon it of chlorine, iodine, or bromine. Similar suitable means may also be found for rendering more or less transparent most of the other metals which can be obtained in leaf.

An examination of such metallic sections will show two principal types of structure, one being essentially granular, and the other fibrous.

The granular metals, of which tin may be taken as an example, present the appearance of exceedingly minute grains, each one being perfectly isolated from its neighbors by still smaller interspaces. The cohesion of such leaves is very small.

The fibrous metals, on the other hand, such as silver and gold, have a very marked structure. Silver, especially, has the appearance of a mass of fine, elongated fibres, which are matted and interlaced in a manner which very much resembles hair. In gold this fibrous structure, although present, is far less marked. The influence of extreme pressure upon gold and silver seems to be, therefore, to develop a definite internal structure. Gold and silver, in fact, appear to behave in some respects like plastic bodies. When forced to spread out in the direction of least resistance their molecules do not move uniformly, but neighboring molecules, having different velocities, glide over one another, causing a pronounced arrangement of particles in straight lines.

This development of a fibrous structure, by means of pressure, in a homogeneous substance like silver, is an interesting lesson in experimental geology, which may serve to illustrate the probable origin of the fibrous structure of the comparatively homogeneous limestone of the Pyrenees, Scotland, and the Tyrol.—*Nature.*

CEMENT FOR LABELS.—1. Macerate 5 parts of glue in 18 parts of water. Boil and add 9 parts rock candy and 5 parts gum arabic. 2. Mix dextrine with water and add a drop or two of glycerine. 3. A mixture of 1 part of dry chloride of calcium, or 2 parts of the same salt in the crystallized form, and 36 parts of gum arabic, dissolved in water to a proper consistency, forms a mucilage which holds well, does not crack by drying, and yet does not attract sufficient moisture from the air to become wet in damp weather. 4. For attaching labels to tin and other bright metallic surfaces, first rub the surface with a mixture of muriatic acid and alcohol, then apply the label with a very thin coating of the paste, and it will adhere almost as well as on glass. 5. To make cement for attaching labels to metals, take 10 parts tragacanth mucilage, 10 parts of honey, and 1 part flour. The flour appears to hasten the drying and renders it less susceptible to damp. Another cement that will resist the damp still better, but will not adhere if the surface is greasy, is made by boiling together 2 parts shellac, 1 part borax and 16 parts water. Flour paste, to which a certain proportion of nitric acid has been added, and heat applied,

makes a lasting cement, but the acid often acts upon the metals. The acid converts the starch into dextrine.

The ashes for anthracite coal have been found to furnish a good substitute for emery in polishing. An experimenter took the ashes and saturated them with water, the liquid being poured off again, and so on until he obtained several grades, down to a substitute for emery flour. When dried the deposit cuts readily and leaves a satisfactory surface.

VALLAURIS WARE.

Every article of Vallauris ware is uniform in color, and thus the beauty of hue in no way interferes with enjoyment of beauty of form. The olive green is, however, shot with wavy lines of black, which greatly increase the beauty of the glaze. These lines are produced by a trick discovered by the merest accident, as so many other artistic and mechanical innovations and improvements have been. This "shooting" of the glaze is a trade secret; but a writer in the *Cornhill Magazine* declares that the Japanese visitors who saw the Vallauris ware in the Paris Exhibition of 1878 knew the secret, and told the supposed discoverer at once how it was done.

The same writer gives some information on the nature of Vallauris clay. "It is very tractable and plastic, and is mixed in varying proportions of material, according to the work in hand. Many of the patterns are produced on the potter's wheel—that most primitive of all human machines. The workman who fashions an imitation Trojan vase to-day works exactly as the maker of the original model worked in the ancient and prehistoric city which lies in ruins far beneath even the half-mythical relics of Priam's palace itself. The clay is well kneaded with the hand till it looks like a lump of dough, and is then placed on the rotating wheel. As it turns, the potter models the plastic mass in his hands, coaxing it out here and pressing it in there. The moldings on the vases are done by the simple use of the finger-nail—a more sensitive and thus more trustworthy implement than any other. During the modeling the material is kept very moist, and it answers so wonderfully to the manipulation of the workman that one can readily understand the meaning of the Hebrew phrase, 'as clay to the hands of the potter.' When the modeling is finished the superfluous moisture is scraped off by means of a simple instrument of horn—cost, one cent."

The more ambitions pieces are fashioned first in plaster of paris casts, and afterward have the marks of the cast removed by hand and the delicate points of the design retouched by a graving knife. As to the color, that is put on as a mineral enamel, which vitrifies in the firing, and so forms a glaze. But some of the most beautiful specimens are only partially glazed, and produce a pretty, dulled surface, somewhat like that of "flatted" paint, thus affording a pleasing variation from the finished surface of the ordinary ware.—*Art Amateur.*

The main figure of Bastien Lepage's "Joan of Arc," which was one of the leading attractions in the last Paris Salon, and is now the most important picture in the exhibition of the Society of American Artists, will be reproduced in Scribner for June, in a full page engraving by Cole. In reducing the whole picture to the limits of the magazine page, it was found that the figure would be too small to have the proper effect. A mere outline or scheme of the general design will be given on a separate page.

The "Longfellow Birthday Book" has already reached its fourth thousand. In addition to this a large edition has been purchased for the English market by Mr. Routledge, the well known London publisher. This fact is very emphatic testimony to the excellence of this "Birthday Book," for Routledge himself publishes a Longfellow birthday book; but Houghton, Mifflin & Co.'s volume was so strikingly superior every way that he ordered a large edition immediately on seeing it.

DANGER OF LIGHTNING FROM TELEPHONE CONNECTIONS.

The cantonal government of Zurich, having been applied to by a telephone company for permission to fix the supports of insulators on the tops of certain public buildings, applied to Professor Kleiner for an opinion. The following is a summary of the chief points in his report:

1. The danger of lightning in houses over which telephone wires are stretched is not increased, but lessened, if the total conductivity of a wire is approximately equal to that of a lightning conductor. This condition is not always fulfilled under existing arrangements. It may be insured by very simple arrangements, such as the introduction of a special wire for the conduction of lightning wherever the number of wires of two millimeters in thickness running in the same direction is less than sixty. This should be insisted upon in all cases. Single connections running along the houses should be stronger than at present—at least, as strong as telegraph wires.

2. As the properties of a telephonic plexus for attracting and conducting lightning extend over far wider tracts than those of a lightning rod, a strict regulation of their make and condition is necessary.

The use of telephones should be suspended during thunderstorms.—*Neue Zurich Zeitung.*

TOY BOOKS, PAST AND PRESENT.

In the course of a lengthy paper on the "Study of the Beautiful" recently read at the London Institution, by G. A. Storey, A.R.A., the lecturer referred in highly complimentary terms to the excellent get up of modern toy books, some of which he showed to the audience, describing them as fine of their kind as anything that was ever produced. "The Mad Dog," "The Three Jovial Huntsmen," "Sing a Song for Sixpence," by Mr. Caldecot, said Mr. Storey, "are full of fun, of action, and of real humor, and are founded, every stroke of them, on nature. The drawing is exquisite, whether it be of the figures, the landscape, the horses, the birds, or the dogs and other animals; and every composition in them, however slight, is in conformity with the laws of art. These books cost but a shilling each, yet may be of countless value to the country, if we calculate the amount of delight and improvement in taste that they may impart to the rising generation. Think of the toy books that were supposed to delight many of us when we were childern, with their smudges of gamboge, sap green, Prussian blue and staring crimson lake, and then let us be thankful to Mr. Caldecot and to Kate Greenaway, with her many books, especially 'Under the Window,' not forgetting Walter Crane and Henry Stacey Marks, who was, I believe, the founder of this delightful and important branch of art. When I am told that there is nothing new under the sun, these pleasant books make me almost doubt that assertion."

Various articles and instruments made of rubber are apt, with time, to become dry, to crack, grow brittle, and lose their elasticity. Dr. Pol recommends the following simple mixture: Water of ammonia, one part; water, two parts; in which the articles should be immersed for a length of time varying from a few minutes to half an hour, until they resume their former elasticity, smoothness and softness.

Those who have resources within themselves and dare to live alone want friends the least, but know how to prize them the most.

THE ENGLISH NEWSPAPER PRESS.

Just a century and a half ago, in 1731, Edward Cave, the well known printer, of St. John's Gate, started his *Gentleman's Magazine*, as a *raison d'être* for which publication he stated in his prospectus that "newspapers are of late so multiplied as to render it impossible, unless a man make it a business, to consult them all. Upon calculating the number of newspapers it is found that, besides divers written accounts, no less than 200 half-sheets per month are thrown from the press only in London, and about as many printed elsewhere in the three kingdoms." This does not, of course, mean that there were 200 newspapers in the metropolis at the time, but rather refers to the number of independent issues during the month; the actual journals then in existence being 22, and the provincial ones numbering 23. These figures become interesting when placed side by side with those for the present year as given in the "Newspaper Press Directory." It appears that there are now published in the United Kingdom 1,986 newspapers, distributed as follows: In London, 378; in the provinces, 1,087, giving a total for England of 1,465; in Wales, 66; Scotland, 181; Ireland, 154; British Isles, 20. Of these there are: 123 daily papers published in England, 4 in Wales, 21 in Scotland, 18 in Ireland, 2 in British Isles. The magazines now in course of publication, including the quarterly reviews, number 1,097, of which 319 are of a religious character. Facts like these vividly illustrate that the power wielded by the Fourth Estate is second to no other agency in the British commonwealth.—*Printing Times.*

CATALOGUE OF THE BRITISH MUSEUM.

The *Printing Times and Lithographer* says: "Arrangements seem to be at last completing for printing the catalogue of books in the library of the British Museum. The cost of 'composition' alone is estimated at £70,000. The special government grant set apart to defray the cost of printing is for the present limited to £1,600 a year. This, in turn, limits the annual issue to five volumes, at which rate of production it is computed that it will take forty years to complete the work. The number of entries to be embodied is roughly estimated at 3,000,000. The price of a complete set of the catalogue will be about £200. It is worth mentioning here that the desirability of printing the Museum catalogue was strongly urged before the Select Committee that inquired into the management of the British Museum some thirty years ago, and no one was more persistent in his advocacy than the late Thomas Carlyle. What is no less noteworthy is that one of the witnesses examined before the committee, Mr. Cooley, the then secretary of the Hackluyt Society, stated that a printed catalogue of the Museum library would extend to forty volumes. Let us hope that government may see its way to double the annual grant, so that the period of completion of this much desired work may be correspondingly shortened."

The ancient temples of Egypt are supposed to contain the oldest timber in the world, in the shape of dowel pins, which are incorporated with stone work, known to be not less than 4,000 years old. These dowel pins are thought to have been made from the tamarisk or shittim wood, in ancient times, a sacred tree in Egypt, and now occasionally found in the Valley of the Nile.

Want of punctuality is a species of falsehood.

ACME CUTTER.

The cut shows still another improvement added to the Acme Self-Clamping Paper Cutter. It is a combination of self clamping and foot clamping, either of which can be operated independently of the other without any adjustment. This is said to be one of the most valuable improvements ever put on a paper-cutting machine, as it enables the operator to bring the clamp down to a mark, or to hold unstable piles, quicker and easier than it can be done on any hand-clamping machine made, or to instantly add to the pressure put on the work. It leaves the self-clamping part entirely free to clamp the work, relieving the operator of all the hard work and adding to the speed with which work can be cut, even on a self-clamping machine. When not wanted, the treadle stays up out of the way and does not interfere with the self clamping.

The Acme self-clamping cutters are made in several styles and sizes, to all of which this device can be added. The same idea and principle are made in connection with the self-clamping Acme cutters where a screw is used, fulcrumed on the top cap, instead of the treadle. This (the screw) adaptation of the principle is designed more especially for label work.

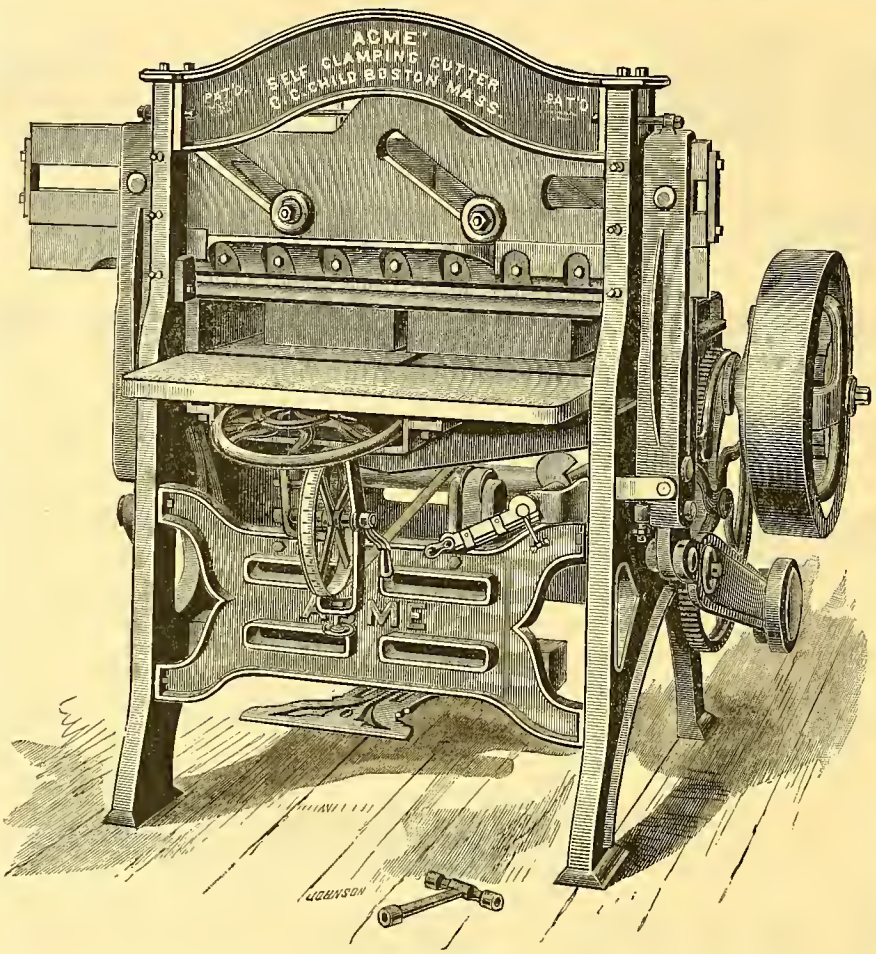
The Acme cutters, of all styles, are claimed to have more points of advantage than all other cutting machines combined.

The cut also shows a new arrangement of the band for moving the back gauge. This feature is patented exclusively to the Acme cutter manufacturer, and is a very valuable improvement.

The round cutting strip, by means of which more than fifty cutting surfaces can be obtained, and a smooth surface for the table obtained, is economical and convenient. Having these points of excellence exclusively, the manufacturer has determined that there should be no failure in minor points of adjustment or construction to insure the greatest accuracy, strength and durability; all parts are thoroughly made; steel shafts are used and, in all of the higher priced machines, cut-gears and everything requisite for a perfect machine.

The manufacturer has recently added to his list a special machine for paper mills, which is said to be giving the best satisfaction, and for which he has many orders ahead.

For further particulars parties can address C. C. Child, 64 Federal street, Boston, Mass.



ACME CUTTER.

The meanest man lives in Audubon County, Mo. He pleaded in a breach of promise suit that a contract entered into on Sunday night was not binding. He won his case, but his defence will have a most discouraging effect upon Sunday courtship.

DISCOVERY OF A BURIED CITY.

The London *Pall Mall Gazette* has a letter from Algiers, which says that great excitement has been caused there among archæologists and the learned generally, by the discovery of an Oriental Pompeii, an ancient Moorish city, with its mosques and monuments, buried for ages in the sand of the desert. The discovery is due to M. Tarry, Inspector of Finance, who immediately communicated the fact to the Algerian government, begging for the necessary help in excavation, and also for a concession of the desired space in which to carry on the work. The request, it is needless to say, has been accorded. "The city disinterred" lies in the environs of Ouargla, in the Sahara desert. M. Tarry identifies it with the ancient city of Cedrata, spoken of by Largeau in his work on Biskra. Historians describe these wastes of sand as peopled centuries ago with flourishing cities, having gardens and artificial water systems, all long since destroyed in tribal wars, or buried in the sand, and of which, up to this time, no visible trace has remained. M. Tarry describes the site as precisely resembling Pompeii; it is buried in the sand to the extent of from six to ten meters. A mosque aud nine houses have already been excavated, and the discoverer speaks enthusiastically of the richly sculptured marble arches, columns, inscriptions, &c., abounding on every side. He intends, however, to reserve a full account of his excavations for the Science Congress to be held in Algiers this spring; and meantime the works are being strenuously pushed on. It is noteworthy that the Inspector General of Mines some time since drew attention to the fact of artesian "nappes" or basins existing here, and M. Tarry's first efforts have been to experiment in this direction. After many unsuccessful attempts, he was at last rewarded by finding water, and the commencement of an aqueduct. A fête was given to the workmen in celebration of this discovery. As the works of excavation are carried on at a distance of several miles from the oasis of Ouargla, this find has greatly facilitated matters.

MICROPHONIC TIME.

The microphone of Professor Hughes has been introduced by Dr. Wilhelm Meyer into the Geneva Observatory for the purpose of transmitting the beats of the standard clock to different rooms, in order that the staff may time their observations on the heavenly bodies by the same pendulum. A pencil microphone of the form originally illustrated by us, is placed near the pendulum and connected in circuit with the telephone running to the several rooms. The arrangement is especially useful in working with the grand equatorial, for the traveling of a star sometimes obliges the observer with this instrument to move out of distinct earshot of the pendulum beat itself, but this is avoided by reproducing the beat in a telephone, which can be readily shifted, or, in fact, attached to the ears of the observer. By a similar microphonic line, too, the clock of the Hotel Municipal at Geneva is corrected every day from the Observatory, and thus all the city clocks in electric connection with the hotel clock keep standard time. The method is also applicable to finding longitudes by telegraph, for a microphone sending clock beats has some advantages in determining local time over the usual plan of sending signals by a key and chronograph. In the chronograph and relay, for instance, the time of magnetization is not always constant, whereas, with the microphone, the only magnetic effect involved is the very feeble one in the telephone itself.—*Engineering.*

A remarkable discovery of Russo-Byzantine antiquities was made near Kiew some weeks ago when a canal for the waterworks of the city was being excavated. They consist principally of twenty gold and enameled lockets, three buttons of the same materials with heads of saints upon them, gold rings, agraffes, and studs, all dating from the fifteenth or sixteenth century; they doubtless served as ornaments upon the costumes of the grand princes. Besides these, some thirty-four silver coins were found, also a highly original bronze vessel in the shape of a fabulous quadruped. The metal value of all the antiquities is estimated at 1000 rubles ($750). The Archæological Commission has taken possession of them.

FOLEY'S

Celebrated Gold Pens and Pencils

THE FINEST AND BEST.

CIRCULAR.—To those engaged in mercantile pursuits, any invention that will facilitate their labor is highly worthy of notice, as well as of extensive patronage. One of the most important inventions of the present age is that of a pen that possesses the necessary qualities of firmness in mark and durability in use. Pre-eminently such are those of JOHN FOLEY, Manufacturer of Fine Gold Pens and Pencils, No. 2 Astor House. Their superior value is tested by the long time he has been engaged in our city in their manufacture. We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

BYRON WESTON

DALTON, MASS.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST and ONLY AWARD** given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition*, *Massachusetts Charitable Mechanics' Association*, *Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission*, *Medal of Progress American Institute*, *1877*, *and Medal of Improvement and Progress, Boston*, *1878*. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the forcgoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Rccorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.
Each sheet is water-marked with name and date.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS, 8 LAKESIDE BUILDING, CHICAGO, Ill., April 9.

For the past week our people have been luxuriating in the benignant sunshine of spring. I would like to dwell upon the word—it is so welcome after the "long and cruel winter,"—but hasten to say that trade feels the season before the trees.

By the time this letter returns printed to Chicago, Easter will be here. The approach of the season is very apparent in the fine display of tasteful cards—every year improving,—displayed on counters and in windows. Among such tokens—one of Prang's finest—the large fringed dove card is probably the most exquisite memorial card ever placed on sale. All of the dealers keep it.

I hasten to apologize for omitting in my correspondence of last week to express the obligations of this office to W. B. Carpenter, of W. B. Carpenter & Co.; Charles Stewart, of the Stewart Paper Company; Hinckle, of Van Antwerp, Bragg & Co., and J. R. Mills & Co., for the marked courtesies by them extended to our manager, Mr. Monroe, during his recent visit to the city of Cincinnati.

As "moving day" approaches, fresh changes are announced. Among the latest are the following: W. C. Green, news and general agent for variety goods, has removed from 65 State street, to 55 Washington street, just west of State. His new quarters are much roomier and more convenient than the old, and he anticipates, very justly, an increase in trade. Mr. Green is an excellent person to handle the goods of Eastern manufacturers.

H. Hartt & Co., sole agents here for the Potter presses, will remove on May 1 from their present offices, 172 Clark street, to larger quarters in the rear of 162 Clark street. The now famous Scott's rotary printing, folding and perfecting machine, built by C. Potter, Jr., & Co., is handled by this firm, and has had a great success here and in the West. The Kansas City *Journal*, in whose office the first was placed, gives the press a page of description and encomium, and the Chicago *Telegraph*, the latest to adopt it here, fairly bubbles over with self-praise and congratulation at its marvelous success.

B. Loewenthal, dealer in paper stock and rags, will remove about May 1 from 51 West Lake street to 12 North Canal street.

W. E. Longley, bookseller and stationer, 337 West Madison street, contemplates removing his quarters about May 1 to 346 West Madison.

E. P. Donnell and F. J. Montagne have formed a partnership and leased one-half of the first floor 180 and 182 Monroe street, where they will carry a full line of bookbinders' materials and machinery.

A slight fire, which occurred on the 6th inst., at Cameron, Amberg & Co.'s building, was extinguished by the employees before the patrol arrived. No loss.

Frank E. James, of this city, formerly with Marder, Luse & Co., in which firm his father is a partner, and more recently with Schniedewend & Lee, committed suicide last Friday morning. No certain cause is given.

Mr. Huke, of Huke, Spencer & Co., printers' and electrotypers' machinery, had a severe fall not long ago, which confined him to the house for several days; but Mr. Spencer being in Kansas City, filling a large order for the *Evening Star*, the old proverb that "Necessity knows no law" was illustrated by Mr. Huke, who hobbled down to the shop soon after the accident and took the "reins of office." The necessity was illustrated during my visit by the arrival of a telegram from Mr. Spencer containing new and urgent orders. The firm has had no break in business during eight years—a remarkable fact when we remember that this includes the great panic.

Rhetoric must be a difficult as well as an amusing study, judging from the following statement of an exchange: "It is said that James R. Osgood & Co. have engaged Mark Twain to prepare a "Cyclopædia of Humor," *who* is to be assisted by the leading humorists of America." The italics are mine.

I clip the following—which speaks for itself—from a recent *Tribune:* "A. H. Andrews & Co., 195 Wabash avenue, report 75,000 school desks made; several opera houses seated here and elsewhere, such as the Greene Opera House, New Academy, &c.; also large government orders, such as the elegant mahogany furniture of the new custom house in this city, conceded the finest in any public building in the country."

Mr. Abbott, of A. H. Abbott & Co., artists' materials, quotes the demand for his goods as very fair. He says that there is an increasing sale for the finer qualities of fancy articles for decoration, &c.; such goods as white porcelain, ebony finished and gilt edged plaques and panels, taking the place, in a great measure, of the cheaper materials for the same purpose. The white holly easels, &c., are also giving way to a finer class of goods, although there is still a very fair demand for fancy decorating articles in general. He also notes an increasing demand, especially from country buyers, for "chromo-photography," or "oil cameo"—as it is variously styled—materials.

Brown & Kelly announce their intention to make a specialty of "odd" and "regular" brands of steel pens; so that, when a particular style of pen is preferred, the customer can be almost certain of finding it at their store. They have a complete assortment of all kinds and descriptions of pens including gold pens and the favorite Livermore stylographic pen.

The large spring STATIONER is at hand, and is voted worthy, as ever, of its publisher.

Finally, I wish to call especial notice to a Chicago advertisement in these columns. To any manufacturer of a staple specialty, not yet established in the West, I would earnestly recommend your advertiser "M. F." as a thorough, competent and experienced agent. His facilities for the introduction of a good article are excellent, and some one will "hit a good thing" by corresponding. G. B. H.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, O., April 11, 1881.

Some of our manufacturing stationers complain of an invasion from Chicago. They accuse the Lake City of actually bringing goods from Chicago here and selling them to Cincinnati consumers—that is, to retail dealers. Isn't that very wicked of Chicago? Doesn't it indicate the prevalence of a hardness of heart and of a spirit of cruelty among Chicago manufacturers. They certainly must know that such doings make their fellow beings who are Cincinnati manufacturers feel badly. With this full knowledge they persist on selling to the retail trade here. But strange to say there are actually some business men here who approve of this proceeding—and they are retail dealers who encourage Chicago manufacturers to come here and keep coming by buying of them as often as they come. For the life of me I cannot see how this state of affairs is going to be changed. It is barely possible that returning the compliment might restore peace of mind to the Cincinnati manufacturers. I would recommend to them to try the experiment of carrying the war into the enemy's camp—of slipping in at the back door of Chicago when the mercantile minions of that wind-swept city are down here on their mercenary missions and glutting the retail trade of that city with Cincinnati goods.

And, come to think of it, the Cincinnati troops would have the advantage in this sort of a warfare. If the late census can be depended upon there are more consumers of goods in Chi-

cago than in Cincinnati. A little of "a Roland for an Oliver" would tend to restore the equilibrium, or, perhaps, even make the other scale kick the beam. Just now it occurs to me that people who don't like that sort of competition would find a paradise in Mexico, where—if I am not misinformed—each town levies a tax on all goods that pass through it, and where the manufacturer and dealer has time plenty to sit under somebody's vine or fig tree with no invading competitor to molest or make him afraid. Perhaps it is to the enforcement of some such regulations as these that mercantile life in Mexico owes its paradisaical serenity and quietude. If it's rest we want in business, and if it's to be let alone by others, I don't see how in the world we are to secure it unless we adopt the Mexican system. We might have each State levy a tariff on goods sent to it from another State and each city in a State put a duty on all goods imported from other cities in that State. This would certainly soothe business and bring it much repose. It would deprive it entirely of the many asperities of that jostle, bustle, drive, dash and brilliancy which characterizes it now. I don't want to be misunderstood. I am only stating a complaint, and that one not my own. It is the duty of the watchman on the tower when he hears a cry of danger or a wail of woe to repeat the shout. Having stated the case, I now leave the subject with the doctors, only premising that it must be distinctly understood that there is no such thing as a general howl from the Cincinnati manufacturers against incursionists from ice-bound and snow-vexed Chicago.

It is the manifest destiny of Cincinnati to perform creative functions. Her central position geographically, and her location in the very heart of an area which includes within its limits, in easy reach, a great variety, and an almost inexhaustible supply of material for the manufacturer, make manufacturing a natural necessity for her. It is a notable fact that manufacturing communities exhibit more varied, intense and general intellectual activity than those exclusively engaged in commerce. Our immense endowments for schools of art and means of culture, coming, as they have done, with steady recurrence at short intervals, have their root and impulse in the creative spirit (that is, the manufacturing spirit) of the city. Dealers sell the best of goods here. Manufacturers of papers and fancy goods abroad will testify to that, and they will also testify that the taste of Cincinnati people is exacting. In the matter of Easter cards and other decorations for the festive season in all their ingenious variety—and they come to us white and sweet in candy, yellow and shining in gold, pure and pearly in silver,—favor is found not so much for their costliness as for their compliance with the conditions of cultivated taste and a delicate sense of the beautiful. Manufacturers and dealers say that the demand for superior stationery goods is increasing in the surrounding country, and that the requirements of a healthful taste for the beautiful are to be met in the country villages nestling in the far off valleys among the hills. I have told readers of THE STATIONER that the Dennison Tag Company can get better flowers wrought from paper here than anywhere else.

Robert Clarke & Co. have taken the storeroom adjoining them on the east, and are fitting it up for occupancy. This will give them nearly sixty feet front for salesrooms. They will occupy two floors of the building east of them. This house has just published Frederick Pollock's "Principles of Contract at Law and in Equity," edited by G. H. Wald, of the Cincinnati bar. They are also publishing the third edition of "Four Years Among the Spanish-Americans," by Hon. Fred. Hassaurek, late United States Minister to Ecuador and author of the "Heart of the Andes," 12mo, 401 pages.

Fred. G. Sellers, so well known in the blank book and stationery business, has severed his connection with J. R. Mills & Co., and is now with W. B. Carpenter & Co.

E. M. John, late in the stationery business on Fourth street, in P. B. Smith & Co.'s picture frame establishment, has gone out of business within the last three weeks, and within that period has made a jaunt through Kansas, Colorado, New Mexico and Texas.

The following named representatives of the trade have been here within the last fortnight: Mr. Marks, Dixon Pencil Company; Mr. Murray, with H. G. Judd & Co.; Mr. James, with Daniel Slote & Co.; Mr. Adams, with Readers and Writers Economy Company; Mr. Stix; J. B. Gunn, of Eberhard Faber, and Mr. Phillips—all of New York.

I fail upon inquiry to find any misgivings or timidity among dealers or manufacturers. All report the prospects cheerful, trade healthy, sales satisfactory, and collections easy. I hear no forebodings from any quarter.

The sale of book and news papers is increasing, and for all descriptions of staple and fancy stationery there is a good, uniform, confident, steady demand.

In every respect the outlook is beautiful. There is no cutting, and very little variation in the prices of material, nor can I hear of cutting in the sales of manufactured goods.

PRINCE WILLIAM.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BOSTON, Mass., April 12, 1881.

Under the influence of pleasant skies and with improved roads, trade among the stationers has been excellent during the past week; yet there are no special features to notice, the run being for the most part on miscellaneous goods, with reference to keeping up assortments. The Easter trade has passed its culminating point.

A hurried visit among the leading dealers in stationery and paper goods showed that orders have come in more freely of late, and that a better feeling prevails in the country trade, which, by the way, has been in very poor condition for some time, incident to the bad weather and worse roads. Special inquiry into the financial position of the city trade shows a continued measure of prosperity.

The trade in stylographic pens has been decidedly active of late, especially for the Cross and Livermore makes. The Readers and Writers Economy Company, 25 and 33 Franklin street, is agent for the former, and L. E. Dunlap, 290 Washington street sells the latter.

C. C. Child, manufacturer of the "Acme" self-clamping paper cutter, No. 64 Federal street, is selling a good many of those machines. This cutter is represented to be perfect in its execution, however rapidly the machine may be worked.

Probably one of the best appointed binderies in the city is that connected with the stationery and blank book establishment of Winkley, Thorp & Dresser, No. 111 Devonshire street. Their new and novel card album is becoming popularized, and it seems to meet a want long felt. It not only fully meets the requirements of such a book, but recommends itself as a durable and elegant card album. This album is produced in full cloth gilt, half russia and full russia.

Lockwood's Directory for 1881 will be in demand by those of our business men who expect to be correctly posted in the paper trade of the country. Stationers as well will also find the work a most invaluable guide to business.

Touching the market, there is a tendency to an advance in prices of some staples, such as envelopes and blank books; but where no advance has yet been made prices are unyielding. This feature certainly shows a growing demand for such goods incident to the replenishing of stocks in the interior.

The manifold order and letter books of Samuel Hano & Co. continue in steady demand. The little or no trouble which the use of this book involves, besides insuring an avoidance of mistakes, constitutes its chief recommendation—which is an important desideratum in these days of rush and push in business.

The Atlantic Works, at East Boston, not only make immense shafts and engines for ocean steamers and all other kinds of iron or machinery work, but the concern is also engaged in manufacturing some of the smaller but not less useful inventions of the day. Among other things in this latter line is the Dooley paper cutter, one of the best machines of its kind now in use. It is in use in many large establishments, and gives complete satisfaction.

The Boston Business Directory for 1881 is just published. It is a volume of 600 pages this year, and, like all reliable and useful directories, it is worth a good deal more than its price.

The death of Hon. Stephen N. Stockwell, one of the editors of the Boston *Journal*, removes from the newspaper guild one of its most conscientious and able members. Mr. Stockwell connected himself with the paper forty years ago, at which time the *Journal* was printed on a single cylinder press. To-day a Hoe perfecting press is used in printing the paper.

Both Prang & Co. and Bufford's Sons are still pressed with business in filling orders for all kinds of work executed at these two leading manufactories of art novelties. Each, also, is engaged upon novelties for the next card holidays. Why not have Fourth of July cards as well as Christmas, valentine and Easter cards. "The day we celebrate" offers a splendid opportunity for the display of unique design and artistic execution, and the day itself would insure the sale of millions of such pasteboard.

Easter cards executed on birch bark are shown at the rooms of the Women's Industrial Union, Tremont street, and some circular cards fringed with silk and decorated in water color, are also attractive.

Harvard University has come into possession of the books used by Thomas Carlyle in writing the lives of Oliver Cromwell and Frederick the Great.

Hooper, Lewis & Co., Milk street, are among the few Boston stationery houses which advertise conspicuously and continuously—and Hooper, Lewis & Co. do a splendid business. L.

PHILADELPHIA NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA, Pa., April 11, 1881.

My friend "W. P. M.," your Baltimore correspondent, comments upon the departure made by Bailey, Banks & Biddle, the jewelers of Philadelphia, in introducing stationery as a leading feature in connection with their business. It may be surprising to Baltimoreans as well as others to learn that this firm, although having been engaged in the stationery line only one year and a half, is now said to produce the

finest illuminated and heraldic work that has ever been done in this country.

So thoroughly has this been appreciated that it now does a large business in almost every city in the Union, both retail and wholesale. When "W. P. M." comes to Philadelphia, I will take him with me to the store of Bailey, Banks & Biddle, where he will be received with the usual courtesy of the firm, and it will demonstrate the above to his satisfaction.

The types created a new firm in my last letter, viz., Mason, Ward & Co., although, probably, every one connected with the trade knew that Marcus Ward & Co. were meant. This firm has as much as it can do to fill its Easter cards orders which are large and numerous.

J. VIENNOT.

MICHIGAN NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

DETROIT, Mich., April 11, 1881.

The compilation of the laws of Michigan is at present occupying considerable time and attention of two or more of our leading wholesale and retail blank book manufacturers of this city. The question now before the Legislature is one of great importance to the people of the State, and in reality involves the whole question of the compilation of the laws. If the State cannot secure by purchase a satisfactory compilation of the general laws at reasonable cost, a reprint becomes necessary, with the appointment of a compiler and the publication of an edition of compiled laws by the State. These laws go into the hands of 9,000 public officers of this State, and upon a right understanding of the laws and rulings of the Supreme Court upon the laws depends to a great extent the character of official action, because for the next ten years the State, county and township officers will depend for advice and direction upon the compilation now about to be purchased, or ordered printed. The majority of the committee reported against purchasing the Howell bill for the sake of paying Chicago lobbyists an extravagant price for work that could be done much more cheaply within the constitutional requirement by our own Michigan firms. The following named firms have offered to do the work at the figures named: Callahan & Co., or Howell bill, per set, $6, reduced to $5 per set; Thorndike Nourse, Detroit, unlimited number of volumes, per set, $5; H. W. Derby & Co., Columbus, O., for 12,000 sets, per set, $4; Richmond, Backus & Co., Detroit (Legislature to elect compiler), per set, $3.60; Chas. Draper & Co., Pontiac, Mich., unlimited number, per set, $4; J. F. Hadger & Co., Detroit, per set, $3.50; State Printer, W. S. George & Co., Lansing, 9,000 sets, to which must be added compiler and stereotyping, per set, $3.36.

These figures show that the Howell bill as it originally passed the Senate would have involved a swindle upon the taxpayers of thousands of dollars, as competent and responsible bidders in Michigan offer to do such work for from $45,000 to $48,000, while others were charging from $60,000 to $70,000. The reports of the majority and minority committees are very carefully watched by those who are interested and in the lobbies, and considerable eloquence is often stirred up by those who are thought "dodos" outside of the capitol. Some think they see a hole through it, but where they see the hole others see a solid stone wall. At the closing of the session, before adjournment, the Board of State Auditors was instructed to advertise for printing the compiled laws separately from other printing.

Some Detroit parties are just suffering for this contract.

Several weeks ago, charges of non-fulfillment of contract were laid before the House of Representatives at Lansing, against Richmond, Backus & Co., of Detroit, who supply the State stationery. Immediately the firm heard of the news it demanded a speedy investigation, and has sent a communication to the House of Representatives, complaining that the charges against it had not been investigated, also declaring that it had examined their contract with the aid of experienced counsel, and is perfectly satisfied that it has been unjustly arraigned, and expressing the feeling that it is due to the reputation of the firm that the charges be made and sustained. The special committee of the House, appointed to investigate the stationery contract, reported that the contract was taken by A. Richmond, the senior partner of the firm of Richmond, Backus & Co., his sureties being other members of that firm. The committee makes an extended report, asserting lapses and failures to comply with the terms of the contract and the withdrawal of bills by an agent of the firm shortly after the resolution of investigation was adopted, the withdrawal being presumably for rectification of the bills. Richmond, Backus & Co. are now kicking under this suspicion and stand ready, at a moment's notice, night or day, to show that they have done everything required of them by their contract, and more, too, in behalf of the State.

A. A. Dwight, who intended erecting a paper mill near his saw mill, at Meridian, Mich., has now abandoned the idea and moved to Blanchard's, Mich.

The J. W. French Manufacturing Company, Three Rivers, Mich., is about to enlarge its paper mill, as it cannot fill all orders with its present capacity. It will immediately erect a very extensive straw pulp mill on the site of the one lately burned.

L. S. Butterfield, of the Detroit Paper Company, has increased his business in paper stock to such an extent that his present quarters are altogether too small; so he has rented the basement under the adjoining store, and will have arches cut through, making his present store more roomy and convenient both for buyers and employees. Mr. Butterfield has built up a large and successful business in blank, wrapping and wall papers, as well as other miscellaneous stock.

Thorndike Nourse says that his travelers on the road are sending in numerous orders for Webster's new dictionary. As there are twelve thousand new words in the revised edition, writers of publications and correspondents will have but little difficulty now in making themselves understood when reporting on matters of interest. This work is finely printed by the enterprising Philadelphia house of Lippincott. No one should blunder who has such a work in his possession.

The many friends of John Macfarlane, the well known salesman for Thorndike Nourse (successor to E. B. Smith & Co.), Detroit, will regret to learn of his leaving that house last Thursday, having been in the employ some twelve years. It is reported Mr. Macfarlane will go into business for himself in this city.

The firm of Freedman Brothers, which failed some time ago, having completed its inventory, the stock was recently sold to New York parties by agreement of the assignee, of this city.

The snow blockade seems to have prevented many remittances from coming to hand at the proper time, but there is always a way out of these difficulties, if the men have any business ability. It seems so in this case.

Commercial travelers are informed that the Russell House hotel will probably be closed on May 1 for very extensive alterations and rebuilding, costing $84,000. A new hotel on the opposite corner will be opened on May 1, under the management of Commodore Howell, well known to travelers

The Brunswick Hotel is closed. Everything will be sold at auction this week, and Colonel Wise, of Virginia, and E. R. Egnew, of Indianapolis, will open it in a few weeks.

All of the stores show great activity these fine days, and Easter cards are having a steady demand.

The following named representatives have visited Detroit since my last: Mr. Clogston, with Powers Paper Company; Mr. Spinney, of D. Lathrop & Co.; W. B. Robertson, with Anderson & Cameron; F. A. Stokes, of Dodd, Mead & Co.

CITY OF THE STRAITS.

A SUBSTITUTE FOR SHELLAC.

For many reasons shellac is, among woodworkers, a favorite material for finishes of all kinds, more especially for indoor work. While its faults are almost innumerable, and the difficulty of putting a smooth coat of it upon any surface is so great that no one except an expert is able to obtain a glossy surface, shellac has many good properties, on account of which it has held its place so long as a finish for wood. All who have attempted to use shellac experimentally will bear out the assertion that the work of obtaining a sufficient body to polish is very tedious and quite uncertain. After the desired finish has been obtained it is easily damaged by water or hot applications. A material, intended to take the place of shellac, is called "hard oil finish," and is adapted to use in a variety of places. It is not a new article, for it has been in the market for several years.

Among other instances of its employment may be mentioned two of the new Vanderbilt residences in this city, and the new Union League Club House, in each of which it was employed. One of the most notable characteristics of this material is its behavior under the action of heat and hot and cold water. When hot or even boiling water is poured upon a surface finished with it, there are none of the white "plague" spots produced which are usual to varnish and shellac under similar treatment. The resistance to scratching is greater with this material than with any other known finish, while the lustre of the surface is much better. When applied over any good filler it is like well rubbed varnish. Cold water does not appear to have any effect upon it, even after several hours' immersion. This finish is made in four colors—"walnut," "light," "white" and "ebony"—and has the recommendation of being much cheaper than shellac, even when that material is made from wood spirit. As an inside finish it is especially desirable, whether for furniture or woodwork.

WATERPROOF BRANDING INK.—Shellac, 2 oz.; borax, 2 oz.; water, 25 oz.; gum arabic, 2 oz.; lampblack, sufficient. Boil the borax and shellac in water till they are dissolved and withdraw from the fire. When the solution has become cold, complete twenty-five ounces with water, and add lampblack enough to bring the preparation to a suitable consistence. When it is to be used with a stencil it must be made thicker than when it is to be applied with a marking brush. The above gives a black ink. For red ink, substitute Venetian red for lampblack. For blue, ultramarine; and for green, a mixture of ultramarine and chrome yellow.

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: 'The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD BERKSHIRE MILLS

LINEN LEDGER PAPER

Will stand the severest test of COLOR, CLIMATE, INK OR WEAR.

Being **Triple Sized** (a process entirely our own) and **Loft Dried**, can be erased and written upon the fifth time distinctly. None genuine without the water-mark and date, thus—**Old Berkshire Mills Linen Ledger, 1881.**

No. 219 OLIVE STREET, ST. LOUIS.

IF YOU WANT THE BEST STYLOGRAPHIC PEN,

☞ The Latest and the Best.

Circulars on application.

☞ Examination Solicited and Satisfaction Guaranteed.

The attention of the Trade is called to the improvements made and advantages offered in Livermore's New Stylographic Pen.

Patented July 15, 1879, and March 9, 1880.

FIRST—**A Smaller Air Tube**, allowing more space for the ink, and rendering the operation of filling easier and less frequent.

SECOND—**The Manner of Fastening the Needle**, not to the air tube, where it would be in danger of being bent or injured every time the pen was filled, but in the point, where it is not so exposed.

THIRD—**The Protection of the Spring** by a silver casing, preventing the ink from clogging its action.

FOURTH—**The Duplex Interchangeable Point Section**, furnishing great facility in cleaning the pen.

FIFTH—**The Ease with which Repairs can be Made.** The needle being in the point, it is not necessary to send the whole pen to the factory, but any dealer can supply a new point.

SIXTH—**Freedom from Legal Difficulties.** The New Stylographic Pen is manufactured under the patent controlling the use of an air tube in a Fountain Pen, and it is therefore free from legal complications.

L. PRANG & CO.'S

BIRTHDAY CARDS.

We take pleasure in herewith presenting to the Trade our Price List of Birthday Cards, which has been greatly enlarged by a number of very elegant and novel sets:

ASSORTMENT.—They are made up in sets of one dozen, except No. 7, and are put up in a box or envelope. Each set contains all the designs of the series, and as no series, except Nos. 3 and 14, has more than eight designs, some of the designs are more or less repeated in the set.

ENVELOPES.—Fine Cream-Tinted Envelopes are furnished with the more elegant series, without extra charge.

SILK FRINGES.—Encouraged by the very great success with our Silk-Fringed Easter Cards, we have made up a number of our Birthday Cards with the best quality heavy silk fringe, made expressly for us. All fringed cards are furnished with Protectors and Envelopes, and are put up with assorted colors of fringes.

LIST OF PRANG'S BIRTHDAY CARDS.

39 DF	4	Same Designs, with silk fringe and tassels	12 Cards, with Protectors and Envelopes	7.20

USUAL DISCOUNTS TO THE TRADE.

TO THE TRADE.—We have to ask the generous indulgence of our friends in the Trade, for what may have seemed a want of proper consideration for their interests on our part during the past Easter season. The sales of our Easter Cards have largely exceeded our anticipations, and these sales following so closely upon the large sales of our Valentine Cards, made a demand upon us greater than our facilities for production enabled us to supply. Under these circumstances we have been unable, in many cases, to fill orders as fully and as promptly as we have desired, and our not being able to do so has been a cause of as great regret to ourselves as it has been to our customers. We are now enlarging our building and making extensive additions to our machinery, not only for the purpose of increasing our facilities for production, but also for the purpose of improving the character and excellence of our work, and we trust, with our increased facilities, to be able in the future to meet all demands for our publications with the utmost promptness.

Our samples for Christmas season are in a forward condition, and we have the pleasure of announcing that we intend to start our travelers with them in the later part of May, and we shall endeavor to have these samples submitted to our customers throughout the United States and Canada as early in the season as possible. We trust to be favored with the same consideration, on the part of the Trade, in the placing of advanced orders, which has been extended to us in the past.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 239,603. Apparatus for Drying Wall Paper.—Culver S. Clark, New York, N. Y.

No. 239,643. Paper Watch Dial.—Abraham Bitner, Lancaster, Pa.

No. 239,677. Combined Ticket Case and Whistle.—Theodore W. Schwamb, Sacramento, Cal.

No. 239,691. Dividing Scale.—Leonard Appleton, Brecknock Crescent, county of Middlesex, England.

A scale or lineal measure consisting of a series of equal graduations numbered consecutively from end to end, in combination with two series of graduations, each of which is one-half the length of one of the former, the latter being numbered, respectively, to the right and left from the middle of the scale.

No. 239,779.—Hand Stamp.—Benjamin B. Hill, Springfield, Mass.

In a self-inking hand stamp, the combination of a fixed vertically slotted frame, a vibrating bar pivoted midway its length to said frame and provided with a stud in its lower end, a yoke having a stud in its upper part and a pin in its lower end, to operate against the edge of the vibrating bar, and a die plate pivoted to the lower end of said yoke and provided with a slotted ear, to receive and engage with the stud on the vibrating bar, whereby the said die plate is operated in being supplied with ink, and in making the imprint.

No. 239,808. Copying Press.—Paul Lehmann, Berlin, Germany.

No. 239,813. Printing Machine.—Charles Machris, Detroit, Mich., assignor to himself and George M. Savage, same place.

In a machine for printing slips from a roll of paper, the combination of a vertically reciprocating plunger containing the type holder, a feed for advancing the paper, and a shear automatically producing a complete and a partial cutting of the printed paper.

No. 239,879. Game Card.—Walter Stranders, New York, N. Y., assignor to Edward R. Ives, Bridgeport, Conn., and Cornelius Blakeslee and Edward G. Williams, Brooklyn, N. Y.

1. The combination of a number of cards or analogous devices, bearing figures representing human beings or other bipeds, and composed of separable sections, whose meeting edges extend lengthwise of the figures and transversely of the figures at about the waist, limbs on different sides of the figure being delineated upon different sections. 2. The combination of a number of cards or analogous devices, bearing figures representing human beings or other bipeds, and composed of separable sections, whose meeting edges extend lengthwise of the figures and transversely at about the waist, certain sections having representations of legs so delineated that the legs may be fitted in different positions to sections having representations of bodies. 3. The combination of a number of cards or analogous devices, bearing figures representing living creatures, extending toward opposite corners, and composed of triangular separable sections, which are interchangeable, and have the living creatures so disposed on them that, when certain cards or devices are placed above or below and to one side of other cards or devices, they will make an apparent connection between figures on different cards or devices, and hence an effective grouping of the figures.

PARCHMENT COPYING BOOKS AND COPYING PAPER,

POSSESSING THE FOLLOWING ADVANTAGES OVER ALL OTHERS:

The paper is a Rich Lemon Color. Is stronger than any other. It is thick, and can be readily handled while damp. Can be written upon with pen and ink. Makes a perfect and instant copy. The paper being pure, and free from injurious chemicals, insnres a permanence to all copies.

Regular Sizes of Books and Paper always on hand.

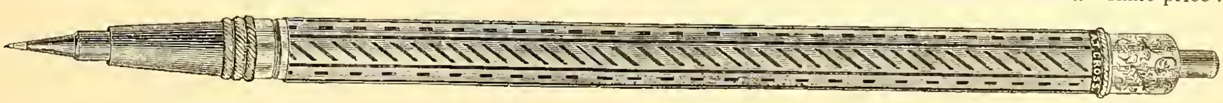
—ALSO, MANUFACTURERRS OF THE—
Celebrated Neutral Tint Papers,
For PROFESSIONAL and EDUCATIONAL Purposes.

☞ **For Price Lists and Discounts address as above.**

PERFECTED STYLOGRAFIC.

The original and gennine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS,** the last, June 29, 1880, being the most important and giving the name **Perfected.** All cuts are exact size

MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambler's Pocket. Same price as Long.



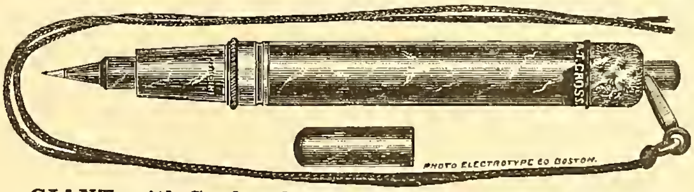
LONG.—The famous Desk Pen. Extra long. Holds most ink, except the **Maximum.**

SHORT.—Most widely known and sold heretofore; but Maximnm is better for desk

or Hambler's Pocket Giant for Vest Pocket or Cord. So this will be largely superseded.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined.

☞ See Descriptive Circulars.



GIANT, with Cord and Gold Ring, same price as Short.

Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, both of which will have all new improvements.

☞ See Descriptive Circulars.

VEST GIANT, Plain, - - $2.50.

All Styles up to $4.00.

☞ **VEST GIANT.—The Cheapest PERFECTED Pen made.**

This Miniature Cut is for Agents' Cards,

McCARTY & HASBERG, No. 444 BROADWAY, NEW YORK.

A Letter addressed to our Office will place those who wish to see our line in DIRECT COMMUNICATION WITH OUR REPRESENTATIVE, who is now on the road with a Complete line of Samples.

BRADSTREET'S

A JOURNAL OF

Trade, Finance and Political Economy.

THIS JOURNAL covers a ground the extent of which is occupied by no other publication, and forms an invaluable work of reference to the merchant and manufacturer.

REGULAR AND TRUSTWORTHY CORRESPONDENCE, furnished by experts, expressly for this journal, from all the principal trade centres of this country, is embraced in its columns.

THE CONDITION AND PROSPECTS of the various markets are carefully recorded, and the possibilities and opportunities for trade are demonstrated as by no other medium extant.

QUESTIONS OF COMMERCIAL INTEREST and importance are fully and ably discussed editorially, without prejudice, by some of the most responsible writers and statisticians of the time.

THE BUSINESS CHANGES occurring in the United States and Canada—such as failures, dissolutions of partnerships, chattel mortgages, etc., etc.—are printed in each issue, and the list is more complete and comprehensive than can be obtained through any other source.

THE CIRCULATION OF THIS JOURNAL being among the best merchants, manufacturers, and banking institutions of not only this country but many foreign, it presents an excellent advertising opportunity to a limited number of first-class banks, corporations, and business firms.

THE BRADSTREET COMPANY,

279, 281, 283 BROADWAY, NEW YORK.

Five Dollars per year.

THOS. DE LA RUE & CO.'S

Fine · Art · Publications.

CHRISTMAS AND NEW YEAR CARDS,

Valentines, Birthday Cards, Easter Cards,

In a profusion of new and elegant patterns, chromo-lithographed in the highest style of art, after original designs by eminent artists. Pattern Books are shown by the principal Jobbers in the States.

☞NOW READY☜

Thos. De La Rue & Co.'s Birthday Cards

FOR THE NEW SEASON

In a great variety of rich and attractive Patterns, among which may be mentioned the **EMBROIDERY SERIES,** chromo-lithographed on the finest White Satin, and specially adapted for the embellishment of all kinds of Fancy Neeedlework.

No. 174¼.—"Cupid's Gambols," in three varieties, on Satin,

No. 379¼.—"Home Delights," in three varieties, on Satin,

No. 424¼.—"Sportive Maidens," in three varieties, on Satin,

No. 265¼.—"The Hope of the House," in three varieties, on Satin,

No. 438¼.—"Water Nymphs," in three varieties, on Satin.

Myra's Journal says: "The Chromo-Lithographs upon Satin offer a wide field to lovers of art needlework, and also to those of less artistic tendency who yet delight in novelties and in adorning their *salons* with things of beauty."

The above designs, as well as an immense assortment of other attractive patterns, may also be had on card board, mounted or unmounted.

☞ Pattern Books, showing full display of specimens, are now in the hands of the principal jobbers in the States.

THOS. DE LA RUE & CO.,

Wholesale Manufacturing Stationers, Printers, Publishers, Card Makers, &c.,

BUNHILL ROW, LONDON, ENGLAND.

☞ Letters may be addressed to their American Representative, **Mr. A. J. PULSFORD** (P. O. Box 1590), **New York.**

N. B.—To prevent delay, all applications for Pattern Books should be made to Mr. Pulsford, as above.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

John Henry Camp, lithographer, Philadelphia, Pa., is dead.

A. H. Goetting is at present doing a very lively business.

W. H. Boynton, printer, Boston, Mass., has sold out to A. J. Boynton.

Taylor & Nevin, printers, San Francisco, Cal., have dissolved partnership.

Edward Bauer, dealer in paper hangings, Cincinnati, O., has made an assignment.

Charles A. Clapp, of E. P. Dutton & Co., sailed for Europe on Saturday in the Scythia.

H. B. Thistle has bought out the stationery business of A. S. D. Demarest, of Orange, N. J.

Brown Brothers, paper stock dealers, Portland, Me., have dissolved partnership. E. Brown continues.

Wm. R. Janeway, Sr., of the firm of Janeway & Co., manufacturer of paper hangings, New Brunswick, N. J., is dead.

The young and energetic house of Hard & Parsons is making extensive preparations for the fall trade, and is at present very busy.

The stock of W. A. Waterhouse, late of W. A. Waterhouse & Co., publisher of the *Maine Standard*, Augusta, Me., has been attached.

Bailey, Banks & Biddle, Philadelphia, say that if the regular stationery trade do not display more enterprise, it will remain for the jewelry houses to do the stationery business.

The J. G. Shaw Blank Book Company, of which J. G. Shaw is president, 83 and 85 Duane street, is very busy, and the increased business will soon force it to increase its manufacturing facilities.

Among other visiting members of the trade in the city this week were Augustus Maxwell, of Maxwell & Co., Bloomington, Ill.; H. E. Seaman, Council Bluffs, Iowa; A. G. Carley, Northampton, Mass., and E. Whitney, Worcester, Mass.

Lockwood's Directory of the Paper and Stationery Trades is now ready for delivery. This invaluable guide to first hands should be in the possession of every person who is interested in the paper and stationery trades. Orders should be sent in at once.

Reference was made last week in THE STATIONER to Cyrus H. Loutrel, acting as president of the Knickerbocker Fire Insurance Company, during the severe illness of its regular president, Peter V. King. This latter named gentleman died on Monday. He was formerly a director of the Atlantic Mutual Marine Insurance Company and of the Bank of New York.

A number of representative New York clergymen, including Dr. John Hall, the Rev. H. C. Potter, D. D., Robert Collyer, Father Thos. S. Preston, Drs. Chapman, Armitage and Crosby and Henry Ward Beecher, contribute to the *Christian Union* for April 6, their views upon the alleged decline in church attendance and church work. All of them concur in the opinion that these have not declined, and their comments upon the religious situation will be found interesting reading.

Myers Brothers are launching out very extensively in the De La Rue card business, and are manufacturing the most beautiful goods from the hand-painted satin pieces which the latter firm produces. Among the latest novelties which the enterprising house of Myers Brothers has introduced are their embroidery series of handsome bannerets and sachets, each having a centre piece of white satin illuminated with a handsome painting. These centre pieces are in seventy-two designs. Both sachets and bannerets are offered at very low rates, the price of the former being $9 per dozen, or $2.70 per set of three, while the bannerets are offered at $21 per dozen. The firm has now ready for inspection sample books of De La Rue's birthday cards, which are in seventy-five varieties, each having three designs.

Lyman & Curtiss have a wonderfully attractive line of lawn tenis, on which they offer extraordinary inducements to close buyers. This game is growing more and more popular each year, and they expect a large sale for it. In addition, they are selling car loads of field croquet, of which they have always made a great specialty. They are also sole Eastern agents for A. G. Spalding & Brothers' celebrated line of base ball goods, than which they claim there are no better made. In the line of fishing rods, they have goods at prices ranging from 25 cents to $5. In children's carriages their trade is very large, and they find it exceedingly difficult to supply the demand. This is not to be wondered at, as the goods are excellent both in design and finish.

Charles J. Cohen, Philadelphia, has just issued a new and very complete catalogue and price list of envelopes and papers. A great variety of styles and qualities is shown, and the classification renders it very valuable to dealers. Attention is called to the new advertisement of the firm, to be found in another column.

Lockwood's Directory of the Paper and Stationery Trades is now ready for delivery. This invaluable guide to first hands should be in the possession of every person who is interested in the paper and stationery trades. Orders should be sent in at once.

The Sheridan automatic cutter has just been put in the establishments of Boorum & Pease, Liebenroth, Von Auw & Co., Koch, Sons & Co., and Kiggins & Tooker. T. W. & C. B. Sheridan are having a large run on this machine.

Owing to the rapidly increasing extent of its business, the MacKinnon Pen Company is compelled to seek larger quarters, and will on May 1 remove to 192 Broadway, corner of John street.

The MacKinnon Pen Company has been awarded the highest prize at the Melbourne International Exhibition for stylographic pens.

J. H. Bufford's Sons have an attractive signboard at Broadway and White street. It is one of the enterprises in advertising.

Wellman Brothers' Publishing Company, Cincinnati, O., has been incorporated. Authorized capital, $20,000.

Fahnstock & Fuller, booksellers and stationers, Galesburg, Ill., have dissolved partnership.

The Louisville Star Paper Mill Company, Louisville, Ky., is advertised to close out.

W. P. Lesser, printer, State Centre, Ia., has sold out to J. W. Miller.

R. G. Watson, publisher of the *Monitor*, West Salem, O., is dead.

The *Commercial Reporter*, Portland, Oregon, has sold out.

William Fuller, publisher, Alleytown, Mich., is dead.

John Hoeckel, dealer in notions, Philadelphia, Pa., is dead.

A. F. Cohen, dealer in notions, Elmira, N. Y., has moved to Buffalo, N. Y.

Whitlock & Patterson, printers, St. Mary's, Ontario, Can., have sold out.

J. Wyman, fancy goods dealer, Kansas City, Mo., is closing out at auction.

B. Rauch, publisher of the *Journal*, Sedalia, Mo., has sold out to A. J. Snyder & Co.

James J. Knowlton, ink manufacturer, San Francisco, Cal., has filed a petition in insolvency.

Haynes & Roll, dealers in wall paper, Indianapolis, Ind., have dissolved partnership. W. H. Roll continues.

D. R. B. Nevins, publisher of the *Delaware County Gazette*, Chester, Pa., has sold out to Augustus Donath.

James Mitchell, printer, Little Rock, Ark., has admitted —— Bettis to partnership. Style is now Mitchell & Bettis.

The Western and Pacific News Company, Louisville, Ky., has been incorporated. Authorized capital, $100,000.

Gordon & Toby, booksellers & stationers, Manchester, N. H., have dissolved partnership. J. Frank Gordon continues.

S. D. King, dealer in fancy goods, Newark, N. J., has removed to Orange, same State, and is doing business under the style of King & Dennis.

Anna L. Beeding has been admitted to the firm of E. L. Beeding & Co., wholesale dealers in fancy goods, St. Louis, Mo. The style remains unchanged.

Grosvenor & Harger, Dubuque, Ia., have got out a traveling salesman's notice card which is a novelty in its way. They will forward samples for a consideration.

William A. Smith, of Smith & McLeod, stationers, 1036 Market street, Philadelphia, died a few days ago, and his affairs are in the hands of his administrators.

Rufus Adams has bought J. D. Freeman's interest in the firm of Adams & Co., stationers and engravers at 292 Fifth avenue, New York, and will continue the business under the same style.

The "Le Counts" crib, for which Henry Levy & Son are agents, is daily increasing in demand. The new plush and satin covered albums, handled by this house, make handsome birthday and Easter presents.

J. H. Bufford's Sons report business as being "imminse." The firm has had perpetual motion in its factory since January 1, two sets of hands being employed—one working by day and the other by night.

The firm of Jas. M. Fitzgerald & Co., paper stock dealers, 137 South Fifth avenue, New York, has been dissolved by mutual consent, A. J. Herkins retiring. Jas. M. Fitzgerald will liquidate and continue.

Lockwood's Directory of the Paper and Stationery Trades is now ready for delivery. This invaluable guide to first hands should be in the possession of every person who is interested in the paper and stationery trades. Orders should be sent in at once.

E. E. Bliss, late of Bliss & Trowbridge, has again entered into business as a manufacturer of stationers' hardware and glass inkstands, at 58 Fulton street, New York. He has the same

pattern as kept by the late firm. Write for prices.

C. P. Jackson, stationer, &c., Portville, N. Y., has sold out to E. S. Jackson.

R. W. Waterman, publisher, Athol, Mass., has been burned out. Insured.

Otte Brothers, fancy goods dealers, Cincinnati, Ohio, have made an assignment.

John Edgell, importer of aniline dyes, New York city, has made an assignment.

John F. Moses, publisher of the *Republican*, Rushville, Ind., has sold out to U. D. Cole.

Blunck & Moore, newsdealers and stationers, Albany, N. Y., have dissolved partnership.

John S. Dye, publisher of the *Counterfeit Detector and Coin Directory*, Philadelphia, Pa., is dead.

The New England Trade Supply Company, dealer in notions, Providence, R. I., has made an assignment.

W. H. De Mott, manufacturer of paper boxes, Utica, N. Y., has been burned out. Loss, $3,000; insured for $1,000.

Munday & Bransford, publishers of the Owensboro (Ky.) *Messenger*, have dissolved partnership. C. W. Bransford continues.

James MacKinnon, dealer in wrapping paper, &c., Montreal, Can., has admitted B. S. Sharing to partnership, under the style of MacKinnon & Sharing.

E. P. Coby & Co., printers, New York city, have formed a limited partnership, under same style, with special capital of $10,000, to April 1, 1891.

Wm. H. Woglom, 239 Greenwich street, is the proprietor of the well known Van Horn's patented letter clips, files and binders. Woglom's inks are having a large sale, as they are of excellent quality. He manufactures jet black, blue, violet and carmine.

Thomas Nelson & Sons, 42 Bleecker street, New York, forward specimen sheets intended to exhibit the type and size of the page of the several editions of the revised version of the New Testament which will soon be issued. The trade are invited to send for these specimens.

Obpacher Brothers, 338 Broadway, show a full line of birthday cards, both plain and fringed. Some of them are in plate design, which is something new in the market. The house also shows a beautiful line of satin souvenirs. The firm's samples of Christmas and New Year cards will be ready on June 1.

Fowler & Wells, New York, have just published "How We Feed the Baby," a treatise which heralds a new departure in the alimentation of infants, and gives every evidence of conscientious and intelligent study on the part of an author of broad experience, familiar with all the details of the nursery.

The popular portfolio tablets made by the Acme Stationery and Paper Company are just the thing for tourists' use, and the sale for them this summer is expected to be immense. The trade will do well to get in their orders early, as the manufacturers say that they are already finding it difficult to keep up with the demand for the tablets.

N. S. Otis, of the Acme Statiouery and Paper Company, has just returned from quite an extended trip to the West and Northwest, and like most who return from those sections reports trade very much demoralized on account of the snow blockades. This concern expects to have a large trade this summer for its portfolio tablets for tourists' use. At present its establishment is very much pushed to fill its orders.

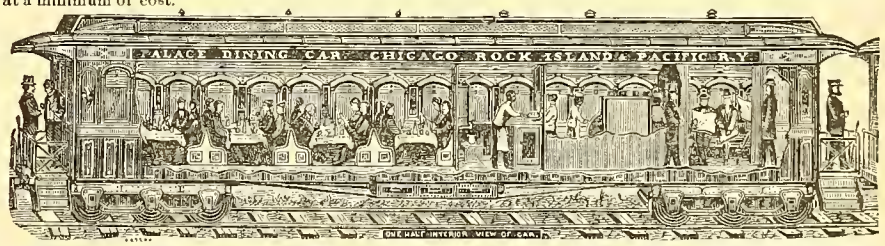
"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.



That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE, Vice-Pres't and Gen'l Man'gr, Chicago.

E. ST. JOHN, Gen'l Ticket and Pass'r Agent, Chicago.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, APRIL 14, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

LOOK out for a movement in envelopes. It may not come, but we have reason to know that the manufacturers have become tired of fighting each other and restive under present competitive prices. There is an attempt in progress to make an advance.

ADVICES just received from Melbourne state that the Lockwood Press has received four awards of the first order of merit, viz., in Art, Printing, Engraving and Newspapers. This is something more than the "double event" referred to in a late report from our correspondent. Score another big one for America.

BLANK books also seem to have a tendency to an advance. It is asserted that there is no profit and that the stiffer prices of paper will compel a revision of price lists and bring about higher quotations. Whether this feeling will be carried into effective action is yet uncertain. There is no reason why the blank book trade should sell goods at a loss or merely to reimburse the cost of production; but it is nevertheless true that they do many inexplicable things, and perhaps this may be one of them.

LOCKWOOD'S Directory is ready. It is the handsomest edition yet published. The pages are red lined, the information is very exhaustive, and the general typographical appearance and presswork are models of fine printing. The list of stationers extends over every State in the Union, embracing several thousand names, and the classification of paper manufacturers, with other features of the work, make the Directory a most important text book for the tradesman. Every stationer and paper maker should have a copy.

IN a letter addressed to the United States Trade Mark Association, a well known foreign manufacturer offers the suggestion that provision ought to be made by law to refund to persons who registered their trade marks under the law declared unconstitutional all expenses incident to such registration. This proposition is made in view of the fact that the new trade mark law declares that applicants for registration under it shall be credited with the fees heretofore paid into the United States Treasury for the purpose of securing protection for the same trade marks. The manufacturer referred to thinks that in justice he should be allowed all his expenses for the employment of a solicitor or lawyer in securing registration which was afterward declared invalid. Entertaining the highest respect for the gentleman who submits this proposition, we cannot concede the correctness of his position. If he chose to employ counsel, it was a matter with which the government has really no concern, for he certainly could have secured protection without the intervention of a lawyer. If no obstruction to public business or no violation of law or expense to the government should follow upon the simple mandate from the head of the Interior Department to give all prior entered trade marks new registration under the latest statute, we confess that we do not see what objection could be made to the transfer; but when it is asserted that of right all lawyer's expenses should be allowed, we certainly do not see it.

AGAIN we call attention to our advertisers' notices. There are many strong points in advertising which should be noted by our readers, and no wide-awake stationer can afford to take this paper and read it without going over its advertising pages as religiously as he would his Bible. We are sometimes called upon to reply to an inquiry which shows that close attention has not been paid to this rule; but we are glad to be able to say that such an occurrence is rare, but that we frequently are addressed with the remark that the thing asked for is not advertised in THE STATIONER; and then this is followed by suggestion, sometimes objurgatory, that people ought to put their names in these columns where they can be seen, and so save delay and trouble to the trade. We also want to call particular attention to our foreign advertisements. Many of these invite business in the way of taking up and introducing American novelties abroad, while others call attention to special lines of goods which find a ready market here. So, in all of their aspects, our advertising columns are full of information and suggestion, and deserve the closest scrutiny and study every week.

ANSWERS TO CORRESPONDENTS.

J. C. B. asks: 1. Where will I get first class German gilt slate pencils? 2. How is the paste used by envelope manufacturers made, and what prevents the edge of the envelope, where the paste is applied, from turning up?

Ans.—1. Henry Bainbridge & Co., Oscar Strasburger & Co., C. F. A. Hinrichs. 2. Gum arabic, of the first or third picked quality, is used, the first for the sealing flap, and the third on the other edges. It is bought in cases or bales, and then mixed with water and either alcohol or sugar, with other ingredients, in a machine prepared for the purpose. We do not know that there is any peculiar way of keeping the flaps from curling, but are told that when gummed by hand they are brushed down to and from the edge and do not curl.

F. C. N. asks where can Goodall's playing cards be had.

Ans.—We don't know. They seem to be out of the market. Myers Brothers handled them later than any house in this city and they are sold out of them.

L. S. says he sends sample of plate paper, and wants to know who makes it.

Ans.—Sample has not come to hand. Tileston & Hollingsworth, Boston, and Seymour Paper Company, New York, make plate paper.

O. O. W. wants address of manufacturers of specialties in blank books, particularly such as are used for advertising purposes.

Ans.—S. E. & M. Vernon, 10 College place, and George W. Cross, 35 Ann street, New York.

O. & H. want to find Haines' Interlinear Interest Tables, published in Philadelphia, but now out of print.

Ans.—The work is very little known in this city. E. P. Coby & Co. have one copy left. This appears to have been printed by R. C.

Haines, 723 Sansom street, Philadelphia, and, it is thought that orders might be filled at that address.

A. & V. want to know who manufactures yellow copying paper.

Ans.—J. C. Weeden & Co., Lambertville, N. J.; G. & G. A. Robertson, Hinsdale, N. H., and Ivanhoe Manufacturing Company, Paterson, N. J.

C. F. A. Hinrichs has bought the patent for tightening gut on rackets, lawn tennis bats, &c., by means of screws, pegs or in any other way. He has recently imported several popular English games, which although quite commonly played in England, are entirely new on this side of the Atlantic. A summer curling game is one of his novelties. It is played on a surface prepared to imitate ice. He has imported from Canada a fresh lot of la crosse sticks with which to play the game of la crosse. He shows a number of new mechanical toys made to imitate the movements of birds, pigs, &c., and which are the latest novelties in this line of goods. Innumerable puzzles are among his recent importations, most of which he says are entirely new in this country. There is also to be found in his stock a large assortment of articles of various kinds embracing the most popular out-door games. A large line of disjointed dolls, with lambs wool hair is to be seen; also a line of cheap water colors, which are said to be free from poison. He makes a specialty of porcelain drawingroom lamps, which are displayed in many beautiful designs. Other new goods are in Japanese ware, ornamented with silver and gold stems and wax leaves and flowers, and moss ware with raised flowers.

E. P. Coby & Co. are about publishing a new ready wages tables, for the use of manufacturers and those employing a large number of hands. It makes the calculation by days or hours, and from $1 to $50 per week. It is titled the "American Ready Wages Calculator," and they will be ready to supply the trade with it on or about May 1.

A LUMINOUS LIQUID.

It is well known that certain metallic salts, especially if previously heated, when exposed to direct sunlight, to the electric or the magnesium light, and then brought into a dark place, give off a yellow or bluish-white light. Especially the sulphurets of magnesium, strontium, and calcium possess this property in a greater or less degree. Balmein has recently patented a mixture which possesses this property in a remarkable extent. Thus, if the dial plates of watches are coated with this composition and then with a colorless varnish, the figures may be seen in the dark at some distance, if they have been previously exposed to diffuse daylight. According to my experiments the organic compounds of these metals possess the same property, especially rosin oil lime soaps. If 100 parts of rosin oil are boiled in a suitable pan with 30 parts of freshly slaked lime, raising the heat by degrees, the mass which is at first lumpy becomes tougher, and finally passes into a thin liquid. As soon as this stage is reached, say at 320 degrees Fahr., the entire surface of the liquid becomes luminous in the dark, which is still more intense at a greater heat. At 380 degrees Fahr., the bluish-white light is very strong in the dark. Objects dipped in the liquid remain luminous for some time.—*B. Hoffmann, in Chemiker Zeitung.*

A new use for photography in connection with the higher arts has been found in the discovery that it may be relied upon to detect any restoration or tampering with old paintings. On recently examining the first proof of a well known Madonna, in the British National Gallery, the photographer observed a disfiguring blur over the forehead. No such blur was discernible in the original, except upon close inspection with the aid of a magnifying glass. The microscopic examination showed that the restorer had repaired some casual damage with a skill that reproduced the color and the texture of the painter; but he had not used the same pigments, and this was instantly detected by the subtle chemistry of light.

A prominent envelope maker of this city, a day or two ago, addressed a letter of inquiry to all of the envelope manufacturers, asking how they liked the present condition of the envelope trade as compared with the time when they were all working harmoniously together. He informed a reporter for THE STATIONER, that some of the Eastern envelope concerns were actually selling certain grades of goods below the cost of manufacture, and, as a general thing, prices had been so badly cut that, to use his own expression, prices were "way down in the cellar." It is probable that another effort will be made to effect another combination among the manufacturers.

S. S. Stafford's commercial ink, the violet black copying ink and the universal writing inks, are said to be becoming standard inks in every section of this country. Abroad, they are used in the offices of the English government in London, and Mr. Stafford has received a recent notification from the clerk of the Canadian House of Commons, at Ottawa, that his inks will hereafter be exclusively used by him. It is asserted that Stafford's commercial ink is the only ink which has successfully and rapidly driven out of the market the English fluids, which were at one time so extensively in use.

The Treasury Department bids are out, calling for furnishing some six millions of envelopes. The proposals are to be opened early in May, and considerable competition is anticipated.

CEMENT FOR MOUNTING ELECTROS.

A German master printer, G. Pischke, writes to the *Journal für Buchdruckerkunst* that he has succeeded in compounding a cement for attaching metal to metal or to wood. He alleges that the new cement is in every respect well adapted for securing stereotype plates to their wooden base. He hopes to be able to apply the composition in question to the surface of linen or canvas, so that in mounting a plate it shall only be necessary to cut a piece of the fabric or plaster to the size of the block and insert it between the wood and the metal. It is alleged that after the surface has been weighted for a short time with a piece of warm iron, the adhesion of the two substances, the one to the other, will be complete.

The *Homeopathic Times* has changed its title to the *New York Medical Times*, and has adopted a new dress. It is edited by Dr. Egbert Guernsey and Alfred K. Hills, and published at 18 West Twenty-third street. E. P. Coby & Co. are the publishers.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, April 13, 1881.

THE MONEY MARKET.—The money market worked somewhat closer this week, and the rates for call loans were firmer. Brokers paid 5@6 per cent. for accommodation where the collateral pledged was stocks, and 4 per cent on United States bonds. At the close a hardening tendency was developed, and Stock Exchange loans ruled at sharp 6 per cent. Time loans and prime discounts are unchanged. The government bond market was fairly active, but was irregular in tone, 6s and 5s advancing ½ per cent., while 4½s and 4s declined ½ per cent. Railroad mortgages were inactive, and the fluctuations in prices were generally confined within narrow limits; the general tendency, however, was in the direction of higher prices. The dealings in stocks have been light, and the "bears" have had things pretty much their own way. Sterling exchange is a fraction lower, with which exception the market is unchanged, and business is dull and the market rather heavy in tone. The actual closing rates for prime bankers' sterling were $4.80¾@4.81¼ and $4.83¾@4.83½. Cables are $4.83¼@4.84. Prime commercial bills are $4.79@4.79½.

THE PAPER MARKET.—Dealers, as a general thing, report some improvement in the demand over a week ago. The West and Northwest have been cut off from the great distributing centres of trade for so long a time, owing to the severity of the weather, that stocks of all kinds of goods had become very much reduced; and since the railroads and other means of communication have begun to open up, the East has been drawn upon to replenish the stocks of paper in those sections. We hear of several good orders having been received here during the week from that section of the country; these are principally for fine writings and super-calendered book papers at full current prices. Some buyers, who have been holding off looking for lower prices, believing this the natural result of a full production, have become impressed with the stability of prices and are beginning to order goods with more confidence. All grades of paper hold their own very fairly, prices remaining steady.

THE STATIONERY MARKET.—Business has undergone very little if any change since last week, and remains almost at a stand. A great many points in the interior are yet snowed under, and trade is almost entirely suspended in consequence, many goods ordered from here several weeks ago not yet having reached their destination. With the disappearance of the difficulties which have for many weeks attended transportation throughout the interior, a brisker distributive movement is looked for. Some of the fancy goods houses are taking import orders for the fall trade, and several card houses and manufacturing stationers are utilizing the opportunity of the present dull time for getting up novelties for the next season. There were very few out of town buyers visiting the city this week. No changes in prices have been reported that we can learn of.

The J. W. Stoakes Automatic Shading

PEN.

FOR PLAIN, FANCY AND ORNAMENTAL

LETTERING.

WASHINGTON, D. C., March, 1880.

I desire to say that the "Shading Pen" invented by Mr. STOAKES meets a want long felt by penmen. The work done by it is perfect in line and shade. The rapidity with which lettering is done, aside from the beauty of the work, is enough to recommend it for general use.

H. A. WHITNEY, Ass't Cashier, U. S. Treasury.

U. S. ENGINEER'S OFFICE, ST. LOUIS, Mo., February 11, 1880.

I have tried the PEN, and it gives great satisfaction. It is worth twice the price asked. It is valuable for headings, etc. JNO. R. BALLINGER.

CHICAGO, April 21, 1880.

Indispensable for the execution of neat, attractive lettering, etc. RAND, MCNALLY & CO.

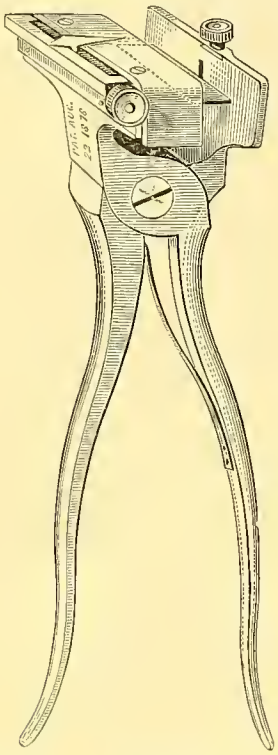
SIMONS' PATENT INDEX CUTTER.

This very useful tool for binders makes a round corner, and is durable and powerful; cutting any size of index neatly, very quickly, and with the greatest ease; saving time, money and trouble, and making a stronger index than can be done by any other method. A large number have been sold since it was first brought before



the public. Samuel M. Simons, No. 32 South Fourth street, Philadelphia, Pa., is the inventor and patentee.

POLYTECHNIC ASSOCIATION OF THE AMERICAN INSTITUTE.

The regular weekly meeting was held upon the 7th of April, the president, T. D. Stetson, presiding.

Mr. Hudson said it was desirable in all cases to keep before the association particulars of inventions which had been discussed previously. In relation to woven glass he wished to call attention to the statement made by the *Crockery and Glass Journal* that a dress of spun glass was being made for Fanny Davenport at Pittsburg. It is to be trimmed with glass lace.

Mr. Rudish: More than a year since I glued together fifteen films of glass, each about two inches square. The pile made a thickness of from 1-20 to 1-30 of an inch. The pile was put into a press. When dry, the compound plate was opaque, but flexible and tough. The solution used was common white glue and glycerine. The films were coated by dipping. I do not know whether the plate became brittle by age, as I lost it.

Mr. Durroughs called attention to a new method of forming designs in glass by means of air bubbles in the substance of the glass. The pattern is formed by double molding. The first mold indents the glass to form the bubbles; it is then quickly dipped, and air is inclosed in each dent. The article is then finished by a second molding. Striking designs are thus produced.

The president wished to continue the discussion upon learning a trade. There were two parties who held opposite opinions on the subject.

Mr. Partridge: The old style of learning a trade is obsolete and useless in a vast number of cases. There is no need for the boy to work for years at any of those trades that can be learned in three months or a year. Those trades, moreover, do not deserve high wages. There are many positions now which are supposed to be parts of trades which are practically trades by themselves, though perhaps of a low grade. For example, the drill pressman of to-day would have been a day laborer of thirty years ago. The lower man has been brought up higher, and the machinist must go up or else come down to the level of the other. The effects of machinery in lifting the lower classes and pushing workmen either up into higher or down into lower ranks was then noticed. The machinist of the day was really the man who was making the machines, not the man who was using them. Girls took the place of the watchmaker in the factories, and the watchmaker was the man who constructed or designed the tools. The importance of selecting a trade that could not be easily supplanted by machinery was urged.

The President: How shall we teach our boys a trade? Some young men may be able to make a way for themselves in any position, like Joseph of old, but it is a saying, often too true, "A self-made man, spoiled in the making." We must seek ways of teaching them. We must find ways of giving them the hand skill.

How great this skill may be was shown by a vivid description of the work of drawing down steel rods under the hammer. Entirely done by the eye at the rate of some five hammer strokes per minute, the bars are turned out, to all appearance, as perfect as from rolls, and yet not a hammer stroke is lost.

Mr. Hudson: Trades may be stepping stones. A young man in an Eastern town astonished his wealthy mother and aunt by bringing home a suit of overalls, and saying he would learn a trade. Despite tears, entreaties and offers of money, he went into the mill and step by step worked his way up. In a few years he was at the top, and is now agent of the mill with a salary of $8,000 per year.

The importance of thorough work, the advantages of moving from shop to shop, and the duty of the employer to teach, were mentioned by different speakers.

Mr. Skelly and Mr. Hudson, and several others, spoke of the piece work system, its evil effect upon the men, and the fact that it was ruinous to good workmanship; at the same time its tendency is to keep the men down.

Too many young men, when getting along well in the trade, stop growing mentally. On the other hand, the well educated boy does not wish to learn a trade. The trade and the education must go together hand in hand. In Europe there are more abundant technical schools and there is more opportunity to become an educated mechanic.

The president gave an outline of how Peter Cooper, in whose magnificent donation to the working men and women of America these meetings are held, and George H. Corliss, who stands at the head of American steam engineers, learned their trades.

Mr. Cooper pulled fur for hats and corded it when he was only high enough to get his arms upon a table. He drove a wagon and delivered goods when a little older, and later served a four years' regular apprenticeship at coach making, which he never practiced. His aunt allowed him to work evenings in his room on other departments of the mechanic arts, and he became familiar with the use of glue. When twenty-one he hired out to assist in making cloth shearing machines, bought the right, invented an improvement, and made and sold the improved machines. He went suddenly into the glue manufacture, in which he afterward became so famous, by purchasing a neglected factory, and devoted himself to it with enthusiasm. That fall he exhibited in the American Institute Fair, and drew a first premium for superior glue of American manufacture. His glue would sell ahead of common American, but brought only half the price of Irish glue. In two or three years he made it bring twice the price of Irish glue.

Mr. Corliss was a country store keeper. He invented a machine, sold out his store, went to a centre of mechanical skill, Providence, to get his machine built. They hired him to assist in drawing parts of steam engines and other machinery while waiting. His sewing machine was a failure, but he imbibed the steam engineering so rapidly that in about a year he went to the proprietors with the scheme of the present Corliss engine and asked them to adopt it.

It is desirable to have a school in which the young man or boy may work for a portion of the day, and then devote the remainder to study of such a character as may be needed.

In reply to questions from the president, some particulars were given of several such schools. One at South Bend, Ind., is conducted on this principle. It is the Catholic school of Notre Dame, and has about one thousand pupils. About half of the hours are devoted to the trade and the remainder to study. In the United States Naval Academy, practical mechanics are taught. Though nothing is made for sale, each man is expected to become proficient, and to make his own tools. In the morning the hour from 9 to 10 is devoted to study, from 10 to 11 to mechanics, the forges, &c. From 11 to 12 study. Drill and dinner take the hour of noon. Study and work take up the time alternately till 4.

The President: The evening schools of our city may be taken advantage of by the mechanics' sons. We have many schools in which various useful things are taught. Besides the evening schools of the city, the Mechanics' and Tradesmen's Society have a school in Sixteenth street, near Broadway, and Cooper Union has evening classes. These are free to all, and the boy, by a little self-denial, can avail himself of them. It would be a great advantage if the boy could work seven hours per day and then have two or three hours of instruction. In Europe there are many places where there are Sunday classes of mechanics and apprentices. These classes are generally in the forenoon, and there are lectures given to the students upon physics and other kindred subjects.

The subject announced for consideration was joints in wood, but as the miscellaneous discussion had, on account of its interest, been greatly prolonged, this subject was considered somewhat briefly.

Mr. Moran described a joint with lead dovetails, which had the advantage of making very close work, while requiring only carpenter's tools. It could be tightened at pleasure.

The president illustrated a long fish joint, formed by toothed iron plates let into the wood, which nearly equaled the solid timber in strength.

The celebrated pamphlet by Rev. Stephen H. Tyng, Jr., entitled "Life Assurance Does Assure," and published by E. P. Coby & Co., is said to have had a circulation of 250,000 copies already.

PAPER FROM THE WASTE PULP OF GLUCOSE FACTORIES.

An intelligent correspondent, H. Studneczka, superintendent of the Leavenworth Sugar Company, of Leavenworth, Kan., has called our attention to the possibility of utilizing the immense quantities of pulp remaining from the corn after the extraction of the starch. This pulp, which is at present a waste product, consists almost wholly of cellulose, or woody fibre, and in the opinion of Mr. Studneczka would be found to be an excellent material from which to manufacture the commoner grades of paper, suitable for wrapping and newspaper purposes. He points out that in India very fine paper is manufactured from the refuse of the sugar cane, which is similar in its character to corn pulp.

In view of these suggestions, it may prove to be of special interest to paper manufacturers to turn their attention to experimenting upon the adaptability of this at present useless product, to serve as a new raw material in the manufacture of paper; and if the opinion of Mr. Studneczka is found to be verified, the result would be the establishment of a new industry equally important to the manufacturers of paper and of glucose. The immense and constantly growing proportions of the glucose manufacture would afford the assurance of an abundant supply of the material should its adaptability for the purposes of the paper maker once be demonstrated. We esteem this subject to be worthy the special attention of the manufacturers of paper.—*Manufacturer and Builder.*

E. M. Taylor, Middletown, Conn., was in town during the week.

UNIQUE PAPER WEIGHT.

A correspondent of the *Growing World* owns a very curious paper weight, which he describes as follows: "My paper weight is considered a great curiosity. A skillful mechanic, a molder, on working over his sand, on a bitterly cold morning, found what he thought to be a dead toad. As he was to cast that day, he thought it would be an excellent model, and more perfect than any pattern maker could furnish. He carefully packed the toad in his mold, working the sand around carefully, so as not to hurt it, and then taking his unique model out, he put it in a warm place, and it was soon hopping about, and became a great pet with the workmen. My paper weight is a perfect toad, the eyes, mouth, folds of skin, legs, and even a diminutive tail, are all as exact as the original, which came from the Maker's hand. It is greatly coveted."

AN ITALIAN TYPOGRAPHER.

Some fifteen years ago as a number of Milanese printers satisfied themselves, if no one else, that one of their own townsmen, Panfilo Castaldi, had been the inventor of Typography, and, with a view to set their seal to this conviction, they erected in 1868 a monument to his memory. But despite all this, the typographic world at large has continued sceptical; believers in the Castaldi legend are, therefore, all the more intent upon establishing their pet theory, and they have been reanimated with hope by the announcement that Signor Cantu has lately discovered in the local archives certain documents proving that Castaldi was in Milan in the year 1472, when he was 74 years of age, and that in the same year he received a patent from Duke Galeazzo Maria Sforza to open a printing office in that town. This evidence is held to establish the fact that Castaldi was the first local printer; and it is hoped that further research may throw more light upon his career.

THE BRITISH MUSEUM LIBRARY.

Until about the middle of the last century, the Bodleian at Oxford remained the great British library; but at that period Sir Hans Sloane offered by will his private library of 50,000 volumes to the British government, on condition of a certain provision for his three daughters. If the offer was neglected at home it was to be renewed to the Emperor of Russia. The sum demanded to be paid to his family by Parliament was £20,000. Parliament, taking advantage of the opportunity, passed an act, in 1753, for the purchase of Sir Hans Sloane's collection, and of the Harleian collection of MSS., and for procuring one general repository for their reception, along with the Cottonian collection. Montague House, in Russell street, Bloomsbury, was purchased as the repository. This library was increased, in 1767, by the gift from George II. of the library of the Kings of England. It now took rank among the first libraries in Europe, and two years after was opened for the public under the name of "The British Museum," statutes and rules having been formed for the use of the collection and proper officers appointed.

In 1823, it received from George IV. the fine collections of George III., whose queen had been especially successful in gathering German and Danish works. Then came, within the last forty years, the magnificent bequest of the Right Honorable Thomas Grenville, of his magnificent library, the result of a continued and unwearied pursuit of nearly fifty years, guided by a very extensive knowledge of ancient and modern literature, and by a familiar acquaintance with rare and curious books. The entire library, enriched from the successive sales of the valuable libraries of Count MacCarthy, Mr. Bindley, Sir Mark Sykes, Mr. Hibbert, and Mr. Heber, consists of about twenty thousand volumes, among which are many of the earliest and most curious specimens of typography; first and best editions of the Classics, including an unrivaled collection of Homers; the sacred Spanish and Italian poems and romances; the most complete series existing of the early editions of Ariosto; many books printed on vellum of extreme beauty; a range of English, and more especially Irish history, perhaps unrivaled, among which will be found the rarest works on the Spanish Armada and the Divorce of Henry VIII.; an assemblage of early voyages and discoveries, from the original editions of Marco Polo and Contarini, Columbus and Vespucius, to the collections of De Bry, Hulsius, Hakluyt and Purchas, forming such a complete chain of uninterrupted information on the subject as no other library can furnish.

Other bequests, gifts and purchases have increased the British Museum to stupendous proportions, and these, being assisted every year by large grants from the government, the library now claims to stand by itself in the world as possessing the greatest variety of works, in the greatest number of languages, from the earthen cylinder of the Assyrian kings down to the last Irish newspapers.—*Paper and Print.*

Polished steel may be beautiful gilded by means of the etheral solution of gold. Dissolve pure gold in *aqua regia*, evaporate gently to dryness, so as to drive of the superfluous acid, redissolve in water, and add three times its bulk of sulphuric ether. Allow to stand for twenty-four hours in a stoppered bottle, and the etheral solution of gold will float at top. Polished steel dipped in this is at once beautifully gilded, and by tracing patterns on the surface of the metal with any kind of varnish, beautiful designs may be secured.

INLAYING WOOD.

Some novel features are claimed for the following process: A veneer of the same wood as that of which the design to be inlaid consists—say sycamore—is glued entirely over the surface of any hard wood, such as walnut, and allowed to dry thoroughly. The design is then cut out of a zinc plate, about one-twentieth of an inch in thickness, and placed upon the veneer. The whole is now subjected to the action of steam, and made to travel between two powerful cast-iron rollers of eight inches in diameter, two feet long, two above and two below, which may be brought within any distance of each other by screws. The enormous pressure to which the zinc plate is subjected forces it completely into the veneer, and the veneer into the solid wood beneath it, while the zinc curls up out of the matrix it has thus formed, and comes away easily. All that now remains to be done is to plane down the veneer left untouched by the zinc, until a thin shaving is taken off the portion forced into the walnut, when, the surface being perfectly smooth, the operation will be completed. The result of this forcible compression of the two woods does not leave a ragged edge, the joint being so perfect as to be inappreciable to the touch.

STENOGRAPHIC MACHINE.

A new stenographic machine is a small instrument, about 1½ feet long and 1 foot wide, placed on a staud 2½ feet high, on which it is easy to play with both hands. The number of elementary signs is only six; which, by mutual combination, give 74 phonetic letters. It has been worked with an astonishing velocity, reproducing the words pronounced by a man reading from a book. The limit of velocity is stated to be 200 words in a minute, which is more than sufficient, no speaker having ever uttered more than 180. The signs are very neatly printed on a paper band passing automatically under the types. They can be read by any person conversant with the peculiarities of the system, which requires the teaching of a very few months. The work of the stenographer is more difficult, but in little more than a year he can be educated. Women and persons who have an acute and a correct hearing can practice it with success. Blind people who generally have very delicate hearing, will be most useful, the reading and translation being done by other people. The same machinery is available for every language in existence. The system is so perfect that it can be used for reproducing a language that is neither spoken nor understood by the operator. But, under such circumstances, the orator must speak slowly and in a very distinct manner.—*Paper and Print.*

BLOTTER TABLET PATENTED

PADS OF PAPER WITH BLOTTER ATTACHED.

ELEGANCE. ECONOMY. CONVENIENCE. CLEANLINESS.

THE paper is tableted, so that each sheet may be freely removed, leaving a perfectly clean, smooth edge. No paper is wasted. The sheet on which you write is always clean, being protected by the blotter. The blotter, of the full size of the paper, is so attached at the top of the pad that both sides of it may be used, and will last out the entire contents of the pad, being always at hand, and perfectly clean.

The blotter is kept clean, and also from wearing, by the card board cover, which is made of a highly polished stock, perfectly smooth, and that will not catch dust or dirt from the desk. The cover is richly ornamented on every pad, giving the whole a neat and elegant appearance. All kinds of paper and printed blanks are put up in this form at prices as low as if loose; making the most complete line of staple and elegant stationery ever offered to the trade.

CARTER, DINSMORE & CO., Boston and New York

BYRON WESTON

DALTON, MASS.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST** and **ONLY AWARD** given for

LINEN RECORD and LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878.* Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

☞ **Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.**

Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 74 Duane Street, New York.

The American Stationer

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—$2.00 Per Annum.

VOL. IX.—NO. 16. NEW YORK, APRIL 21, 1881. WHOLE NO. 304.

Correspondence.

BALTIMORE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, Md., April 19, 1881.

The "ethereal mildness" is here at last, but trade continues somewhat slow. A feeling, however, pervades on all sides that there is a good time coming.

H. P. Guyton & Co., stationers, No. 9 South Charles street, have made an assignment to Abraham Sharp, lawyer. Mr. Guyton was a partner of D. K. Osborn & Co., and about four years ago he bought Mr. Osborn out. The liabilities of the house are supposed to be about $4,000 or $5,000, of which about one-fourth is to Baltimore houses and the remainder in New York. Mr. Guyton's father is, it is said, interested financially in the business.

Charles Pratt is rotating between Baltimore and Washington, with thirteen large trunks of samples of fancy and stationery goods. His rival, A. C. Veiller, of Henry Levy & Son, New York, is also here, with about the same line of samples, as well as the same number of trunks. Both gentlemen have many friends hereabout and as both are, like the circus men, advertising largely—though only with their tongues—interest is felt as to the result of their labors. Mr. Pratt opened his samples first in Washington, and then, coming to Baltimore, extended an invitation to the trade to see him in the capital.

John B. Piet has just issued his new premium catalogue. The cover is beautifully illuminated, and taken altogether, the catalogue surpasses anything of the kind I have yet seen.

The rush for Easter cards in this city was simply enormous. In reply to the question of a reporter a few days ago as to how they were selling, one dealer remarked: "They are not selling at all, for the reason that there are none left to be sold." This speaks well for the growing popularity of the productions of Prang, De La Rue and Marcus Ward. The greater portion of those sold were from the establishment of Prang.

Mr. Strauss and B. Marcuse, of the same firm, are now in the city, Mr. Strauss taking import orders on albums and his agent selling cards.

John B. Piet, Jr., is in New York this week attending the trade sales.

The following named members of the trade have been here since I last wrote you: F. Miller, of Palm & Fechteler, manufacturers and importers of transfer ornaments, &c., New York; G. O. Freeman, of G. O. Freeman & Co., importers of European novelties, Washington, D. C.; John D. Wheeler, of Brown & Sanson's, New York, and Will F. Park, representing Hasbrouck & Watson, of the same city. W. P. M.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BOSTON, Mass., April 19, 1881.

Stationers report an excellent trade in all departments during the past week, and the tide promises to continue to set in for some time to come. With settled weather, improved traveling and an active demand in the interior, the stationers say they will be very busy. Stocks are ample in view of this new impetus to the trade.

Charles K. Darling, No. 15 Exchange street, one of our oldest stationers, has recently had his picture published in one of the secret benefit society papers. Mr. Darling is not only a prominent man in the stationery trade, but is also prominent among the secret societies, belonging to the I. O. O. F., the Masons, the Knights Templars, the K. of H., Royal Arcanum, and the American Legion of Honor. He has been treasurer of all these societies, and has taken all the Masonic degrees. At the age of fourteen he went to learn the stationery and blank book business with Oliver Holman, at 124 State street. He remained thirteen years, and then started in business at No. 20 State street, in the firm of Oakes & Darling. Three years after, Mr. Oakes died and Mr. Darling continued the business in his own name, which had developed into that of a manufacturing stationer and publisher of law blanks. In 1854 he removed to No. 15 Exchange street, where he has since held forth.

Joseph T. Brown, who for fifty years has sold fancy goods and some kinds of stationery, as well as drugs, at the corner of Washington and Winter streets, completed his business semi-centennial April 10.

It is reported that the unpublished manuscripts of Theodore Parker which have been in Mrs. Parker's possession, recently deceased, will be collected and issued in book form.

Estes & Lauriet, 301–305 Washington street, have come to the front among our booksellers and stationers as a leading firm in the business.

H. O. Houghton, of the Riverside Press, with his family, sail for Europe on the 21st.

The English Easter cards, with simple colored lithographs mounted on ribbon, have sold well. These lithographs are treated as respectfully as American dealers treat choice hand painting.

One of the funniest of Easter tokens was a vegetable ivory egg mounted with a real bird's head and claws; the small fowl wore a satin cap and standing collar, presenting an inexpressibly pert appearance.

The Franklin Typographical Society is about to replenish its almost empty treasury by a concert of vocal and instrumental music. Many an unfortunate but worthy printer has realized the angelic work of this charitable organization.

Letter paper of a different color for every day in the week, a Paris notion, has been introduced here.

Dealers are of the opinion that envelopes and blank books will be sold at advanced prices a few weeks hence. There is a scarcity of the raw material from which these goods are made. So it is reported.

Something new and unique in the counting house line makes its appearance almost every week, and dealers "tumble" to it unhesitatingly. The æsthetic germs have become a part and parcel of the improved taste of the mercantile portion of the community.

There have been no changes nor failures in the trade since my last letter was written. The settlement of Lawrence & Co.'s accounts with creditors is progressing satisfactorily.

Dealers in pocketbooks and other leather goods report a good business for the season of the year. There is quite a demand for nice russia goods.

Our leading stationers and dealers in heavy fancy goods are not importing to any great extent this season, finding about all they want in these lines in the New York market at satisfactory prices.

I find nothing special to say with reference to individual firms this week, the trade generally moving along in the even tenor of its way.

There have been the usual number of gentlemen agents from New York, who have not returned orderless. Boston stationers always buy when they see a good thing. L.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, Ill., April 15.

The love of the beautiful is as old as the human heart; and the human heart loves to create occasions for adoration of the beautiful. This ingredient of our nature manifests itself on all occasions of mourning or rejoicing. Our love of flowers and sunshine is our reason for celebrating Easter in the spring. For the moment I wish this could be a moralizing instead of a trade letter—the day is so beautiful and the lovely mementos of the season are so profuse about us.

However, I check my pen in the interests of the waiting trade. Beauty, though, is not altogether alien to the trade; as witness Mr. Kings-

ley's paper decorations at Lea's large store on State street. The novelty and beauty of these decorations will be a nine days' wonder to afternoon promenaders, and their fine effects ought to do Mr. Kingsley a great deal of benefit; although I fear those who see them will not recognize the art unless some one tells them that the flowers and vines and foliage so fresh and beautiful to look upon are made of paper!

What more than I have said can I say regarding the beauty of this season's holiday goods? I am out of adjectives. One thing I may add, however, and that is that E. Lovejoy's Easter cards make only a single feature of the many beautiful articles he keeps for the gratification of a cultivated taste. The two touching and amusing photos, "Good Night" and "Good Morning," sell as well as ever. Everybody ought to have a pair, seeing they cost but forty-eight cents.

New announcements of removal are as follows: Kingsbury & Wilson, blank book makers and bookbinders, will remove about May 1 from their present location, 202 Clark street, to larger quarters at 105, 107 and 109 Madison street, where they intend to pay especial attention to publishers' work and "edition binding." Lautry & Finnegan, Catholic booksellers and dealers in church goods, announce their intention to remove about May 1 from 178 Wabash avenue to their new store at 237 State street.

I have also to note an important change in the late firm of Brown, Kelly & Co. P. Y. Pettibone, for the past eighteen years connected with Culver, Page, Hoyne & Co., has severed that connection and cast in his fortunes with those of the younger firm, which is to be known hereafter as Browne, Pettibone & Kelly. While with the older firm Mr. Pettibone had especial charge of the county and public offices department, and therefore brings a large and intimate experience into his new relations. The new firm intends to increase its facilities and enlarge its capacities, so that it shall be able to prosecute a more extensive trade than before the change it would have thought of attempting.

Since announcing last week the appearance of the new firm of E. P. Donnell & Co., I have paid the house a personal visit. The firm is composed of E. P. Donnell and F. L. Montague. The former gentleman has been connected with the firm of Snider & Hoole, bookbinders' materials, Cincinnati, representing them in the capacity of manager, at Chicago. Mr. Montague has been connected for the past ten years with C. C. Child, Boston, the well known manufacturer of the "Acme" paper cutter; and the favor with which these cutters are known throughout the West is due solely to the enterprise of Mr. Montague. Both gentlemen are therefore well and favorably known to the trade. They intend manufacturing some staple bookbinders' machinery themselves, are sole agents here for the "Acme" cutters, and intend to handle, as agents, the most approved classes of machinery used by bookbinders and paper box makers, constituting a Chicago headquarters for such goods—the only establishment of the kind in the city. Their outlook from the start is excellent. Mr. Montague being well known to Eastern people, no doubt they will join THE STATIONER correspondent in wishing the firm success in their new enterprise.

Mr. Kimball, with the Economy Company, has returned from a long and successful jaunt, looking well contented.

Tuerk Brothers & Johnston report themselves thirty days behind on their orders from printers alone. They are building one of their largest sized motors for the *Tribune*, of South Bend, Ind., besides several others for printers and lithographers throughout the country.

"Miller's Cheap Book Store" has been removed, after six years of success at 102 Madison street, to larger and more comfortable quarters at 152 Dearborn street.

J. A. Crane, of Crane Brothers, Westfield, Mass., has been in town, and gave me this firm's invariable reply when I asked respecting business.

The U. S. Ticket and Tablet Company, original as ever, is now manufacturing an attractively tinted blank card for printers in the shape of a match scratch for the wall or desk. The trade ought to see them.

Henry Cassidy reports excellent success with Appleton's latest art serial, "Picturesque Palestine," proving that our people appreciate beauty as well as business.

I glean from an exchange that W. B. Carpenter & Co., Cincinnati, O., have purchased of Van Antwerp, Bragg & Co. the proprietorship of the Oxford and Hope mills writing papers.

The followiug from the official circular of the Pennsylvania Company, issued on April 1, cannot but be pleasing to the trade as well as to the traveling public in general:

OFFICE OF THE GENERAL PASSENGER AND TICKET AGENT, PITTSBURG, Pa., April 1, 1881.

The following appointments have been made for this company, to take effect from date: Henry Monett, Chief Assistant General Passenger Agent, Pittsburg; C. C. Cobb, Assistant General Passenger Agent, Cincinnati; C. W. Adams, Assistant General Passenger Agent, Chicago.

* * * * * * * *

C. W. Adams, Assistant General Passenger Agent, Chicago, will have immediate charge of the various matters pertaining to passenger business west and northwest of Chicago, including Chicago and Fort Wayne and all territory tributary to this company's lines via Chicago or via Fort Wayne.

The selection of Mr. Adams for this position is certainly a most judicious one. As general Western passenger agent of the Chicago and Erie line during the past five years, Mr. Adams has won universal favor, and the prominence attained by that route is largely due to his management and courtesy. The enlarged scope given him by his present position will quickly demonstrate this appointment to be one of the many wise changes made by the Pennsylvania Company.

It is well understood that Mr. Hosford will succeed Mr. Adams as general Western passenger agent of the Chicago and Erie line. As Mr. Adams' ticket agent and assistant during his connection with that line, this gentleman has won golden opinions from all with whom he has come in contact, and the universal opinion is that Chicago's model ticket agent will prove one of her most valuable passenger agents.

G. H. B.

TORONTO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., April 16, 1881.

It is estimated that the value of business for the first quarter of this year shows an increase of 10 per cent. over the corresponding months of last year. This cannot be said to be the case in every line. The average advance, however, will hold good. In January and February there was but little change, but all through March there was a regular rush, and a very large amount of business was done. Wholesale dealers have considerably increased their importations, but not beyond what is warranted by the great improvement in every branch of trade, and country buyers so far have purchased with caution. Altogether the spring is opening with brighter prospects than for many years.

One of the busiest places we have in the city is the Methodist Book and Publishing House. There seems to be a continuous boom about the place. It has just brought out two new books, "A Summer in Prairie Land," by Dr. A. Sutherland, and "Voices from the Throne," by the Rev. James Cook Seymour. In a few days it will publish a life of the late Judge Wilmott and Jas. B. Morrowl, of Nova Scotia. The latter was for a long time connected with the Cunard Steamship Company.

E. W. Blackhall, the well known inventor and patentee of the Eclipse Perforator, is starting a large bindery here, and will be in full working order in a few days.

W. I. Gage & Co., in addition to their business, are going into the manufacture of envelopes and are now putting in the machinery.

A very useful book has recently been published by L. J. Boivin & Co., Montreal, entitled "The Dominion Manufacturers' Directory," containing a full list of all the manufacturers and lumber dealers in the Dominion. It contains, beside the customs and excise tariff, lists of warehousing ports, exchange tables, &c.; price, 75 cents.

The ocean service between Canada and Europe is to be still further augmented by a line from Montreal to France, and from Annapolis, N. S., to Liverpool.

Anent Prang's great Easter Dove card. A rustic called at one of our city book stores the other day and asked for one of them cards that had a goose flyin' on it. This is rather rough on the great card publishers, and any one examining the card closely will see there is some point in it.

The Christmas card trade promises to be lively this season. City houses have already made arrangements with Tuck, De La Rue and others, and sample books are on their way; but it is hardly necessary to remind buyers that it is too early for months yet to get the new things that will be published.

The enterprising firm of Rolph Smith & Co. is going into the publishing of Christmas cards, and are offering prizes to artists and art amateurs for designs. They must be either illustrations of Canada or symbolic of the season. This is a move in the right direction, and I have no doubt we shall see some very attractive and popular cards from this house. I am not an artist nor the son of one, and yet I have my ideas. I do not question the merit, as works of art, of hundreds—and I might say thousands—of Christmas cards sold in this country; but I do say that very few are either appropriate to the season or the day they are designed to celebrate.

Yesterday, being Good Friday, was observed as a holiday. The bright, warm day brought out large numbers of people. There was a boom with the livery men and hack drivers, and the day, judging from the cheerful throngs on the streets, was one of real enjoyment.

April, which has a reputation for moisture, has gone back on us so far—we have reached the middle of the month and no rain—the large amount of snowfall during the winter has vanished, and one would fancy that there would be plenty of moisture to start vegetation, and yet there is but little sign. A few warm showers would change the whole thing like magic. The dust, notwithstanding the corporation water carts, is rolling down the streets to-day in dense clouds.

Our harbor is clear of ice and we have had a few arrivals, but navigation cannot be said to be open until the Welland and St. Lawrence canals

are free, which will not be until about the first of next month.

Horace Greeley's advice, "Go West, young man," is being acted on by a great many of our people. Large numbers are going to our new territory in the Northwest, and a much larger number from the old country. Long trains of emigrants are passing through here every few days. C. H.

OHIO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, O., April 18, 1881.

Warmer weather seems assured, but we do not feel sanguine that it has come to stay. Trade is fair; it might be said to be first rate, considering the lateness of spring. If we had been favored with our usual early springs there would be no limit to the amount of business done. As it is, building and all out-door work is a month in arrears. In no former season has the prospect of a large amount of building been so good in Dayton. Money being cheap—six per cent. on good short time paper, all that it will bring—turns the attention of capitalists to a new channel for investment, and real estate seems to offer the best return on an investment.

Paper mills are being projected at about every place where there is a railroad or a straw stack. Any one who wishes to invest in this species of property had better wait a year or two and buy a mill at their own figures. The writer of this has received letters nearly every week from parties who are anxious to try their hand at paper making, asking his advice as to the profit in the business, best kind of paper to make, &c. To all such I have uniformly answered, "Don't."

Representatives of Eastern houses have not been very numerous in the last week or two. Allen, of the National Papeterie Company, put in an appearance. Every one likes Allen, although he is always in a hurry—got up somewhat on a steam-engine plan—aud he wants to push things. Gunn, of E. Faber; Heymann, of the Eagle Pencil Company, and others, have been here, aud all seem pleased with their trade this season.

Among goods selling well are the new Monitor pencils of Faber's, advertising cards, &c. There seems to be a rivalry among the blank-book men to see who can get out the cheapest line of goods in the market. Houses that heretofore have sneered at this line of goods are now getting out lines at prices never before known in the trade. The new canvas-covered butcher books are selling well, the price being much below the all-leather goods gives them the preference.

The use of duck and canvas in the manufacture of pocketbooks has lessened prices in that class of goods. A good bellows, all-calf book, that would cost about $4.50 per dozen, with duck pockets costs about $3, makes a better looking book, and is said to wear equally well.

The paper mills are all full of orders as yet. The Piqua wrapping mill that was damaged last fall by an explosion is again in operation; the Republic mills, destroyed by fire, are also running again, and this market will soon be full of wrapping papers. The Springfield Pulp and Paper Company, of Springfield, Ill., has been closed up under a mortgage and is for sale. The mill has been losing money for several reasons. It seems to have been run by amateurs, and has spent a great deal of money in experimenting on the use of the fibre of what is commonly known as iron weed. The property, I understand, can be bought cheap, and is considered a good investment.

There has been no material change in prices throughout the valley. White news, book and manillas cannot be said to be very fair; yet there is not much disposition to cut, all of the mills being strong financially do not need to force sales. Very little news or manillas of Eastern makes come in competition with the product of the MIAMI VALLEY.

L. PRANG & CO.'S

BIRTHDAY CARDS.

We take pleasure in herewith presenting to the Trade our Price List of Birthday Cards, which has been greatly enlarged by a number of very elegant and novel sets:

ASSORTMENT.—They are made up in sets of one dozen, except No. 7, and are put up in a box or envelope. Each set contains all the designs of the series, and as no series, except Nos. 3 and 14, has more than eight designs, some of the designs are more or less repeated in the set.

ENVELOPES.—Fine Cream-Tinted Envelopes are furnished with the more elegant series, without extra charge.

SILK FRINGES.—Encouraged by the very great success with our Silk-Fringed Easter Cards, we have made up a number of our Birthday Cards with the best quality heavy silk fringe, made expressly for us. All fringed cards are furnished with Protectors and Envelopes, and are put up with assorted colors of fringes.

LIST OF PRANG'S BIRTHDAY CARDS.

USUAL DISCOUNTS TO THE TRADE.

TO THE TRADE.—We have to ask the generous indulgence of our friends in the Trade, for what may have seemed a want of proper consideration for their interests on our part during the past Easter season. The sales of our Easter Cards have largely exceeded our anticipations, and these sales following so closely upon the large sales of our Valentine Cards, made a demand upon us greater than our facilities for production enabled us to supply. Under these circumstances we have been unable, in many cases, to fill orders as fully and as promptly as we have desired, and our not being able to do so has been a cause of as great regret to ourselves as it has been to our customers. We are now enlarging our building and making extensive additions to our machinery, not only for the purpose of increasing our facilities for production, but also for the purpose of improving the character and excellence of our work, and we trust, with our increased facilities, to be able in the future to meet all demands for our publications with the utmost promptness.

Our samples for Christmas season are in a forward condition, and we have the pleasure of announcing that we intend to start our travelers with them in the later part of May, and we shall endeavor to have these samples submitted to our customers throughout the United States and Canada as early in the season as possible. We trust to be favored with the same consideration, on the part of the Trade, in the placing of advanced orders, which has been extended to us in the past.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

INTERNATIONAL LETTER SCALE.

Eberhard Faber has just placed on the market a new and very desirable article styled the "International Letter Scale." This novelty is of the greatest utility in showing the weights of letters, samples and printed matter, and their postage rates both in the United States and to the countries included in the Universal Postal Union. It consists of a scale, a dial and a pointer connected in machine-like form, and is handsomely nickel plated, and rests on an elegant stand. The dial is about nine inches long by two and a half inches wide and faces outwards, its upper and lower edges being concave and convex respectively. Through the centre runs a table showing rates of postage, and in three columns on one side are shown the weights and rates of postage for which letters, samples and printed matter can be carried throughout the United States, while on the other side are similarly shown the rates and weights to the International Postal Union, the one line of rates being made to suit in both instances. When the package is placed on the scale the pointer indicates its weight and rate of postage at the same time. It is a very useful article for a banker's or broker's office, and is something which should be seen to be appreciated. It is easily adjusted and it is said can never get out of order. The firm mentioned has the sole right to handle it.

NEW PATENTS.

No. 239,823. Type-Writing Machine.—George McKittrick, Brooklyn, N. Y.

No. 239,859. Railroad Ticket.—William B. Shattuc, Cincinnati, Ohio.

No. 239,867. Calendar Inkstand.—James G. Smith, Alliance, Ohio.

No. 239,927. Binding Books.—Hugo Brehmer, Philadelphia, Pa., assignor to William C. Stevensou, same place.

The combination, in a book, of a number of folded signatures or sections with a strip or strips of open fabric, the signatures or sections being united at their backs to the open fabric and to each other by stitches or staples passing through their folds, and the glue, which permeates the open fabric and insures a proper juncture or union of the signatures or sections to each other, and to the strip or strips.

No. 239,942. Mechanism for Making, Finishing and Packing Type.—Peter Dillon, Sherbrooke, Quebec, Canada.

No. 239,954. Base for Safety Lithographic Inks.—John Hendrichs, Brooklyn, N. Y.

"Black union dye," which is the commercial name of one of the ingredients claimed, is composed of extract of logwood dissolved in alcohol or hot water, or both, and three ounces of this, thoroughly ground, are added to seven ounces of drop white, two ounces of copperas, two ounces of bichromate of potash, and two ounces of flowers of sulphur. A tablespoonful of muriatic acid may be added to give the ink a bright black color. The composition is added to any ordinary printer's or lithographer's varnish, to form an ink. Notes, &c., printed with this ink change from deep black to a dirty red when acid is applied thereto.

DESIGNS.

No. 12,221. Font of Printing Type.—Charles E. Heyer, Chicago, Ill , assignor to Arthur M. Barnhart, Alson E. Barnhart, Charles E. Spindler and Simon G. Stein. Term of patent 14 years.

NEW PROCESS OF ENGRAVING AND PRINTING.

COPPER PLATES vs. LITHOGRAPHY.

Advantages of this Process over Stone Work:

A CLEAR SHARP IMPRESSION—AS METAL IS HARDER THAN STONE.
THE PAPER RETAINS ITS GLOSS—NO DAMPING REQUIRED.
WE PERFORATE EVERY BLANK WE PRINT BY OUR ROTARY MACHINE.
OUR NEW DESIGNS ARE ALL ORIGINAL AND FINELY EXECUTED.
WE USE NOTHING BUT HEAVY TUB-SIZED FIRST-CLASS PAPER.
EACH BOOK IS STRONGLY BOUND AND EVERY HALF DOZEN PUT UP IN BOXES.
OUR PRICE IS MUCH LESS THAN LITHOGRAPHIC WORK.

NOTES, DRAFTS, RECEIPTS, ORDERS, CHECKS, &c., by the above Process, and also from STEEL PLATES.
Designed and Manufactured especially for Stationers.

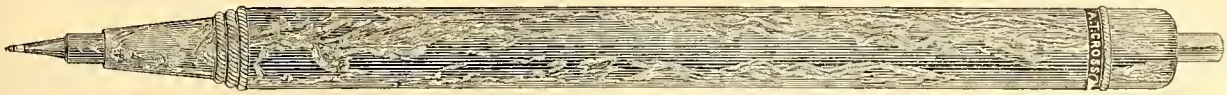
—— No. 18 High Street, Boston, Mass. ——

PERFECTED STYLOGRAFIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS,** the last, June 29, 1880, being the most important and giving the name **Perfected.** All cuts are exact size



MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambler's Pocket. Same price as Long.

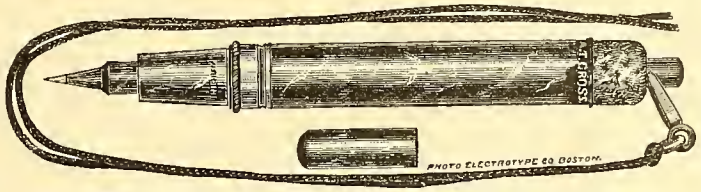
LONG.—The famous Desk Pen. Extra long. Holds most ink, except the **Maximum.**

SHORT.—Most widely known and sold heretofore; but Maximum is better for desk

or Hambler's Pocket Giant for Vest Pocket or Cord. So this will be largely superseded.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined.

☞See Descriptive Circulars.



GIANT, with Cord and Gold Ring, same price as Short.

Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, both of which will have all new improvements.

☞See Descriptive Circulars.

VEST GIANT, Plain, - - $2.50.
All Styles up to $4.00.

☞ **VEST GIANT.—The Cheapest PERFECTED Pen made.**

This Miniature Cut is for Agents' Cards, Newspaper Advertisements, &c., &c., &c.

Extra Fine Papers

Manufactured by

Z. CRANE, JR., & BRO.,

DALTON, MASS., U.S.A.

These Papers, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

REGULAR QUALITY.

In handsome Light Blue Packages containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In a separate Package of uniform size, is one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or New York Office, *47 Beekman Street.* GEO. B. HURD, Gen'l Agent.

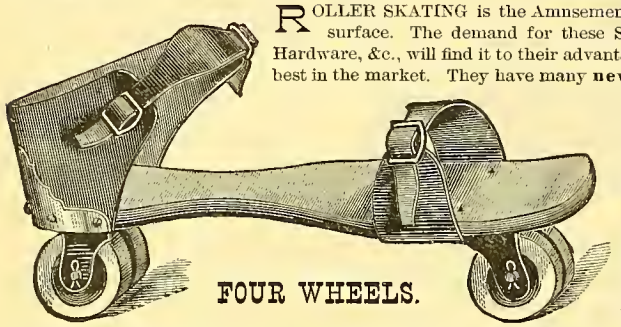
IMPORT ORDERS.

Parties intending to place IMPORT ORDERS will find advantages (not to be had elsewhere) by communicating with

McCARTY & HASBERG, No. 444 BROADWAY, NEW YORK.

A Letter addressed to our Office will place those who wish to see our line in DIRECT COMMUNICATION WITH OUR REPRESENTATIVE, who is now on the road with a Complete line of Samples.

IMPROVED PARLOR ROLLER SKATES.



FOUR WHEELS.

ROLLER SKATING is the Amusement of the day. They can be used all seasons of the year in doors or out and on any smoot surface. The demand for these Skates is constantly on the increase, and dealers in Toys, Fancy Goods, Notions, Fancy Hardware, &c., will find it to their advantage to add them to their stock at once. The make of these goods which we offer is the best in the market. They have many **new and desirable improvements** not before had on any Roller Skate, and in all respects are superior to any in the market, while the **price is the lowest.** Nine sizes: 7, 7½, 8, 8½, 9, 9½, 10, 10½, and 11 inches. Scale of sizes of Roller Skates as adapted to shoes worn by ladies and children.

Number of Shoe.....	12 or 12½	13 or 13½	1 or 1½	2 or 2½	3 or 3½	4 or 4½	5	6	7
Roller Skate, inches..	7	7½	8	8½	9	9½	10	10½	11

Polished Beech Woods, with Toe Spurs to prevent slipping; Mountain Rock Maple Wheels; Solid Steel Trucks, having Adjustable Axles that will admit of the wheels being exchanged when worn or broken, trimmed with Black Embossed Leather, having wide Toe Straps; Patent Buckles. **Price Reduced. Price, per pair, only $1.50 net.** Price of wheels, only three cents each; or per set of eight, twenty cents. Sample skates mailed, post paid, on receipt of $1.85. *Please send Cash with order for sample.*

SOLE AGENTS FOR THE UNITED STATES OF

Aug. Leonhardi's (Dresden) Celebrated Alizarine Writing and Copying Ink.

THIS Ink combines the qualities of a Writing and Copying Ink in a manner unsurpassed by any other make in the market. As a Copying Ink it will make a distinct copy even several days after, and if required two clear copies can be taken. As a Writing Ink it excels for its intense blackness. It never fades, nor does it blur. **It is used in all Government Offices on the Continent of Europe**

We are enabled to quote this Ink far below the prices of other Copying Inks.

☞ Publishers of **SOUVENIR ALBUMS**, of all the larger cities of the Union, of Places of Summer Resort, and of Celebrated Sceneries.

ELEVENTH YEAR OF PUBLICATION.

THE PRINTING TIMES AND LITHOGRAPHER,

An Illustrated Technical and Fine-Art Journal of *Typography, Lithography, Paper-Making, and the Auxiliary Trades.*

THE NEW SERIES COMMENCED JANUARY, 1875.

THE PRINTING TIMES AND LITHOGRAPHER is a high class journal, devoted to the Printing and Graphic Arts, in all their various forms. It derives its information from, and circulates in, all parts of the world. No pains are spared to insure the accuracy of its intelligence and to render it in every respect worthy of the support of Letterpress Printers and Lithographers, as well as Artists, Antiquaries, and Literary Men generally.

Published on the 15th of each month, 4to. in wrapper, price 6d. Annual subscription (payable in advance), 7s. 6d., post free. Rates of Subscriptions for foreign countries on application. Post-office orders to be made payable at the West Central District Post Office, High Holborn, to **WYMAN & SONS**, 74 and 75 Great Queen Street, London, W. C.

The Chicago & Northwestern Railway

Is the OLDEST! BEST CONSTRUCTED! BEST EQUIPPED! and hence the

Leading Railway of the West and Northwest!

It is the short and best route between Chicago and all points in Northern Illinois, Iowa, Dakota, Wyoming, Nebraska, California, Oregon, Arizona, Utah, Colorado, Idaho, Montana, Nevada, and for **Council Bluffs, Omaha, Denver, Leadville, Salt Lake, San Francisco, Deadwood, Sioux City,** Cedar Rapids, Des Moines, Columbus, and all Points in the Territories, and the West. Also, for Milwaukee, Green Bay, Oshkosh, Sheboygan, Marquette, Fond du Lac, Watertown, Houghton, Neenah, Menasha, St. Paul, Minneapolis, Huron, Volga, Fargo, Bismarck, Winona, La Crosse, Owatonna, and all points in Minnesota, Dakota, Wisconsin and the Northwest.

At Council Bluffs the Trains of the Chicago and Northwestern and the U. P. Railways depart from, arrive at and use the same joint Union Depot.

At Chicago, close connections are made with the Lake Shore, Michigan Central, Baltimore and Ohio, Ft. Wayne and Pennsylvania, and Chicago and Grand Trunk Railways, and the Kankakee and Pan Handle Routes. Close connections made at Junction Points.

It is the **Only Line** running PULLMAN HOTEL DINING CARS between **Chicago and Council Bluffs.** Pullman Sleepers on all Night Trains.

Insist upon Ticket Agents selling you Tickets via this road. Examine your Tickets, and refuse to buy if they do not read over the Chicago and Northwestern Railway.

If you wish the Best Traveling Accommodations you will buy your Tickets by this route, ☞ AND WILL TAKE NONE OTHER.

All Ticket Agents sell Tickets by this Line.

MARVIN HUGHITT, 2d V. P. & Gen. Man., Chicago.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Louis W. Brandt, printer, Rochester, N. Y., is dead.

Hallock & Cambell, publishers, Exira, Iowa, have sold out.

Henry Wagner, bookseller and stationer, Marysville, Cal., is dead.

Frank E. Holden, fancy goods dealer, Hudson, Mass., has sold out to Silas F. Manson.

E. H. Hyde & Co., fancy goods dealers, Oakland, Cal., have dissolved partnership.

S. Brainard's Sons, publishers, Cleveland, O., have renewed special capital to January 1, 1884.

Ferguson & Shaw, job printers, Coshocton, O., have been burned out. Loss, $100; no insurance.

Zapp & Bradford, printers, Chicago, Ill., have dissolved partnership. James E. Bradford continues.

J. W. Stookey & Co., booksellers and stationers, Decatur, Ill., have been succeeded by A. J. Wallace.

William Steele & Co., manufacturers of paper boxes, Derby (Ansonia), Conn., have been burned out.

The stock of Samuel Seymour, paper dealer, San Rafael, Cal., has been attached. He is offering to compromise.

The Springfield Pulp and Paper Manufacturing Company, Springfield, Ill., has been closed up under a chattel mortgage.

Smith, Hill & Co., printers, Athol, Mass., have dissolved partnership, and formed a new partnership under the style of the Athol Transcript Company.

A. H. Goetting has received his first importation of photograph albums, which are now open for inspection. This house has also added several new designs to its line of papeteries.

Royal Japanesque and Japanesque Acrobats comprise the new chromos of Potsdamer & Co., 321 Chestnut street, Philadelphia, samples of which can now be had of A. M. Collins, Cope & Co., 171 William street, New York.

Potsdamer & Co., lithographic art publishers, 321 Chestnut street, Philadelphia, have made arrangements with A. M. Collins, Cope & Co., 171 William street, New York, for the exclusive sale of all their productions in chromo and black folding and single cards. See advertisement.

Charles J. Cohen, 505 Chestnut street, Philadelphia, has just received from Europe a large and well assorted invoice of scrap books. It is claimed that these goods are equal in quality and finish to the best American make, and very much lower in price. Samples will be sent on application to the house.

Thos. S. Daudo & Co., Philadelphia, who make a specialty of the manufacture of novelties, are preparing their samples for next season so as to lay them before the trade as soon as possible. Their new goods, it is said, will be some of the handsomest ever seen. Their first invoice of French advertising and scrap book cards, lately received, is being disposed of rapidly. They are said to be the prettiest French samples ever offered in this country.

"Xenie's Inheritance, a Tale of Russian Life," by Henry Greville, just published by T. B. Peterson & Brothers, Philadelphia, is an exquisitely told story, the latest and decidedly the best of Henry Greville's many charming pictures of Russian life, and it cannot fail to win fresh laurels for its author, and to receive the unqualified approval of lovers of pure and healthful fiction. It is unexceptionable in its tone and inculcations, and the plot is fresh and unhackneyed. The different characters that figure in this delightful love story are drawn with that spirited and delicate touch for which this author is especially noted; and the piquant conversation and amusing incidents in which it abounds, and which impart such wonderful vivacity to the book, reveal Henry Greville's talent in a new light, and prove her to be the possessor of a sense of humor as keen as it is refined. Nor is the work wanting in touching pathos. Xenie, the brave, beautiful and gifted heroine, cannot fail to excite the intense admiration and profound sympathy of all readers.

Wiltshire & Clement have lately brought out some new designs in embossed papeteries, and are already having good success in the receipt of orders. The new and original styles of birthday cards previously mentioned are also meeting with attention. In the line of wedding engraving, visiting cards, monograms, and in fact everything required by a stationer in engraved work, this firm has the best facilities for supplying.

W. Waters & Son, bookbinders, 103 Fulton street, New York, have patented their attachment to go on standing presses, to act as guides for filling the press evenly. Those who have used them pronounce them "the most useful thing out." There has been a great need for such a device, and this is said to fill the bill perfectly.

The Carson & Brown Company, Dalton, Mass., are making an excellent ledger and record paper, triple-sized, finely finished, and capable of taking the ink after five erasures. This permits it to be written on six times.

B. E. Pike, with M. A. Reay & Co., returned on Tuesday from a rather exhaustive trip through the Eastern States, where he found business in general good.

Henry Levy & Son have just received a neat line of ruby and blue glass goods, which comprises a great variety of paper weights, thermometers and inkstands.

Marcus Schumann, Dresden, Germany, manufactures oleographs and festal cards in great variety, and proposes to introduce his goods in this country.

Lininger & Turner, booksellers and stationers, Greenville, Pa., have dissolved partnership. The style is now Turner & Co.

Mark J. F. Doyle, lately superintendent of the firm of Adolphus W. Stuart, Philadelphia, has left that house.

E. A. Bigelow, dealer in fancy goods, Waltham, Mass., is offering twenty cents on the dollar.

E. Crannell, manufacturer of paper boxes, Albany, N. Y., has been burned out. No insurance.

Shannon & Powell, publishers of the *Southern Homestead*, Meridian, Miss., have been burned out.

Watson Brothers, publishers of the *State Line Herald*, Lake View, Oregon, have sold out.

H. P. Guyton & Co., stationers, &c., Baltimore, Md., have made an assignment.

Greend & Bishop, lithographers, Philadelphia, Pa., have been sold out by the sheriff.

H. E. Sladen, dealer in fancy goods, Lowell, Mass., has sold out to George H. Blanchard.

John W. Gladding, of J. Gladding & Son, blank book manufacturers, Philadelphia, Pa., is dead.

Flora E. Boardman, dealer in fancy goods, Fairhaven, Vt., has removed to Ludlow, same State.

The stock of John W. Pittock, deceased, bookseller, &c., Pittsburg, Pa., has been sold to R. S. Davis.

Lydia A. Dimond, dealer in periodicals and fancy goods, Somerville, Mass., has been burned out. Insured.

Richardson, McLaurin & Co., publishers of the *Sumter Watchman*, Sumter, S. C., have sold out to Brown & Osteen.

Vallandigham & Clark, publishers of the *Vindicator*, Youngstown, O., have dissolved partnership. Thoman & Clark succeed.

Lewis & Greene, printers and blank book manufacturers, Philadelphia, Pa., have dissolved partnership. Stephen Greene continues.

Charles W. Davies, formerly of the firm of W. B. Wilcox, Utica, N. Y., is in the city buying stock preparatory to starting in the engraving business at Syracuse.

"Ariel" is the last chromo ready this week from Potsdamer & Co., 321 Chestnut street, Philadelphia. Samples at A. M. Collins, Cope & Co.'s, 171 William street.

Bids are invited for supplying the Treasury and Interior Department and House of Representatives with all classes of stationery for one year. The bids will be opened early in May.

Among the visiting members of the trade is J. A. Chain, of the firm of Chain & Hardy, Denver, Col. Mr. Chain will remain in the city for some little time, making his headquarters at 224 East Twelfth street.

Potsdamer & Co.'s new folders—No. 20, size 7¼x5⅝, five designs; No. 21, size 6¼x8, four designs; No. 22, size 5x5½, four designs (three folds)—are now ready and for sale by A. M. Collins, Cope & Co., 171 William street, New York.

Myers Brothers are doing up their warerooms in elegant style with new paper and paint and other renovations. This is only one of many preparations the house is making for the coming season, as its new lines will show when exhibited.

J. H. Bufford's Sons have in course of preparation several series of new cards. The firm reports large sales of goods that are not usually bought at this season of the year. The growing popularity of chromo cards is said to be the cause of this demand.

Sealed proposals will be received by the Postmaster General at Washington until Wednesday, May 4, for furnishing postal cards for a period of four years, commencing July 1 next. The number of one cent cards required during the contract term will probably reach 2,000,000,000, but the number of two cent cards will probably not exceed 500,000.

The new firm of Cornwell & Johnson, 243 and 247 Pearl street, New York, successors to Charles M. Cornwell and Milton C. Johnson, has become an unusually strong combination by the union of two well known houses. It has been obliged to provide additional room and enlarged facilities for the immense business thus brought under one control. This house does a large print-

ing, lithographing and blank book trade with railway and insurance companies, banks, &c.

Thomas B. Breare, bookbinder, Lynn, Mass., is dead.

Sproule & Davis, publishers, Battle Mountain, Nev., have dissolved partnership.

Clum, Sorin & Reppy, publishers, Tombstone, Arizona, have dissolved partnership.

C. H. Pierce, fancy goods dealer, North Berwick, Me., has sold out to William H. Tibbets.

Joseph Abrahams, paper manufacturer, Bentley Springs, has advertised his property to be sold.

Howbert & Reynolds, booksellers and stationers, Bellefontaine, O., have sold out to G. Sill & Co.

Hyer & Shinn, publishers of the *Lassen Advocate*, Susanville, Cal., have dissolved partnership.

S. J. Oldfield, dealer in books, stationery and notions, Mitchellville, Iowa, has sold out to B. Battles.

Geo. A. Nelson & Co., stationers and news dealers, Lawrence, Mass., have sold out to Close & Cheever.

Charles O. Brown, of the Carson & Brown Company, Dalton, Mass., was in this city during the past week.

Samuel Baker, publisher of the *Record* and printer, New Britain, Conn., has sold out to Francis Baker.

J. H. Hamburger received this week a large lot of new French advertising cards, which are all in original, elegant and attractive designs.

S. E. & M. Vernon, blank book manufacturers at 20 College Place, this city, will remove on or about May 1 to Pearl street, corner of Elm street.

The Riverside Paper Company, Holyoke, Mass., is making a very excellent article of ledger paper, which deserves the attention of buyers.

Law, Leavens & Co., printers, London, Ont., Can., have dissoved partnership. John R. Law and Thomas Maddocks having retired, business will be conducted under the style of J. H. Leavens & Co.

The Hulbert Manufacturing Company, paper manufacturers, Manchester, Conn., has given notice of its intention to apply to the Superior Court to change its corporate name to the Oakland Paper Company.

C. M. Crandall & Co., Montrose, Pa., are offering "lawn tennis" sets at prices ranging from $8 to $50, according to style and finish. These, with other seasonable goods offered by this firm, deserve attention.

A prominent John street stationer is putting up a handsome summer residence at Bridgehampton, Long Island, N. Y. The gentleman referred to is of such a modest and unassuming disposition that his name is omitted.

William Mann, the well known Philadelphia stationer, has opened a branch house in this city at 51 Liberty street, under the firm name of William Mann & Son and management of Joseph H. Mann.

The latest thing out in the line of albums is christened the Card album. It is designed to preserve and display chromo cards. It shows the cards in panoramic shape and folds up. The paper used is linen lined on both sides; consequently is very strong. They come in three sizes, and each one is neatly boxed, and sold at $1, $1.50 and $2 at retail, with a discount to the trade.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, APRIL 21, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

WITH each new fashion comes something to meet some newly created requirement. Card albums are now in order, and the trade may expect to have a run on them. We have an idea of one ourselves; and if we were not too lazy, would elaborate it and go into the business of selling albums. But we have too much to do in looking after our friends in the stationery business, and must perforce leave all idea of glory to be derived through such sources to the active and enterprising minds who do so much to keep trade stirring and lively.

"CRAZE" is no name for the card mania. It is not a bad thing for the manufacturer and the stationer, and it is a really good thing for the people. One of the elements of popular education can be detected in this demand for fancy cards, and the refining and refined nature of the demand is becoming more and more apparent every season. Time was when even the coarsest color work with its glaring tones did not provoke a feeling of dissatisfaction, but was pleasing to the popular eye. That day has gone by, and a greatly more critical taste is shown, even by children, in the selection of delicate and harmonious design, the blending of color and in all of the features which bear artistic treatment.

SHALL the taste for cards, oleographs, &c., die out? There is no reason why it should, and we are sure that the public would regret at any time to be deprived of the opportunity for making selections of these charming yet cheap fancies. They will even submit to higher prices for goods really worth their money; but there will, we think, be a lasting demand for nice cards—not costly, nor yet too cheap. We are told that one leading American firm sold more goods prior to Easter than it did during the week in anticipation of Christmas, and many of the trade agree that the sales of Easter cards were unprecedented in the history of such articles. This is a new feature, and it shows that the people are ready to take to all new fancies apropos to any special occasion. For this reason suggestions that have been made as to the production of festal cards suited to all holidays are not out of the way. The manufacturer ought to take some of them up and experiment with them.

LICENSE has its features. Some of these are hidden, but not the less important. A word to commercial travelers will be as a word to the wise we are sure. Those who are not posted will quickly "take" and those who are initiated into the peculiar method will not be so cruel as to find fault with us for giving the cue. The point, therefore, is this. When you go into a town where license fees are exacted, be sure to provide a modicum of what is familiarly and slangily known as "palm oil." Find out the detective who is intrusted with the business of "spotting" the unlicensed drummer and "grease" him. Now that we have made this suggestion, we must confess that it is of doubtful morality; but then, why should one be better posted than another? We have been told of an instance (we may say there are instances) where the gentlemanly tourist representing a well known stationery house, on entering a certain city (it may be said cities), sought out the placable gentlemen on whom devolved the duty of "taking in" the wary and unposted traveler. Presenting his card, he expressed his pleasure at forming the acquaintance of the official. This satisfaction and card had a peculiar adjunct in the shape of a strip of paper on which, printed in green ink, were some extremely satisfactory references from the Treasury Department at Washington. It is needless to say that recommendations from so high an official source had their influence and weight with the minor official, and that he knew what is what is evident from the fact that the traveler referred to made a stay of ten weeks in the town, sold his goods, and was not brought up short or required to take a license. This saving of something near to $100 is an important item, but, after all, it is degrading. Isn't this a chance for the Stationers' Board of Trade to inculcate morality. Ought it not to notify to the authorities of the different cities where license laws are in force that their servants sell them out, and ought not the board to put its condemnation upon such bribery or seek to remove the cause for it?

Communications.

[Correspondents are requested to write on only one side of their paper. No responsibility for the opinions of correspondents attaches to this paper.]

The Novelty Paper Fastener.

PHILADELPHIA, Pa., April 16, 1881.

To the Editor of The Stationer:

We have observed at different times a notice in THE AMERICAN STATIONER that Geo. W. McGill has instructed his counsel "to take the necessary legal measures to enjoin the manufacture and sale of the 'Novelty' paper fastener in this country," but we have vainly waited to have such suit begin.

We desire to say that we are advised by counsel that we do not infringe any claim of any patent of McGill, and we challenge him to bring suit against us immediately. We say further, that we will protect our customers to the fullest extent against the pretensions of McGill or his agents. We have been advised by our representatives in London, the well known house of John G. Rollins & Co., that McGill's application for an injunction against the "Novelty" paper fastener has been refused.

Further information will be gladly given by ourselves or our counsel, Joshua Pusey, counsellor in patent causes, 903 Walnut street, Philadelphia. Respectfully,

PHILADELPHIA NOVELTY MFG. CO.

Among the visiting members of the trade in the city during the week were: Charles W. Davies, formerly of W. B. Wilcox, Utica, New York; William H. Dempsey, Washington, D. C.; Mr. Tucker, J. L. Fairbanks & Co., Boston; T. H. Hall, St. John, N. B.

ANSWERS TO CORRESPONDENTS.

S. C. W. wants to know where to buy combs, brushes, soaps, perfumery, and like goods for jobbing purposes.

Ans.—Howard Brothers & Read, Broadway and White street, New York. This firm does not, however, handle domestic perfumery. A. H. Goetting does.

G. M. D. & Co. want to know where to get the anti-nervous pen holders.

Ans.—Willy Wallach controls them.

J. C. B. wants to buy cedar pen holders by the 1,000 gross at bottom prices, and wants to know manufacturers.

Ans.—Eberhard Faber, American Lead Pencil Company, Eagle Pencil Company.

OBITUARY.

JOHN W. GLADDING.

John W. Gladding, of Philadelphia, died of heart disease on Friday last, after only a brief illness.

His death is a shock to many friends, who keenly feel their loss, and will be regretted by the trade, among whom he was generally well liked.

R. G. Hutchinson, 44 Maiden lane, has lately been appointed manufacturer's agent for the sale of the Perfection student lamps. It is claimed for this pattern of student's lamp that it combines many advantages over lamps of its kind. As a matter of convenience and safety, the inverted oil reservoirs are made of glass instead of metal, and has inclosed transparent oil reservoirs. The great convenience of this reservoir in enabling to see when it is full, and at a glance when it needs filling, or whether your dealer is furnishing you good or poor oil, is apparent to all, besides rendering the lamp absolutely safe. Heretofore, this only part of a student lamp absolutely necessary to be made of material that cannot be decomposed by oxidation, has been made of common tin with soldered joints, which sooner or later spring aleak sufficiently to admit air, allowing the oil to immediately overflow the wick tube at the burning point. The principal feature claimed for this style of lamp and differing from all others is the removable inverted fount or oil reservoir, which keeps the oil in the wick tube at precisely the same level without regard to the quantity of oil in the reservoir, the oil being delivered to the wick just as fast and no faster than it is consumed. These lamps, besides being made to raise, lower or revolve with greater ease, are far handier to carry and keep straight than the old, awkward standard, consisting of an iron rod covered with brass.

Reynolds' new "Always Level" writing table is manufactured by Reynolds & Reynolds, Dayton, Ohio. The sheets of paper in this pad are so arranged that the hand of the writer is always on a level with the sheet written on. The sheets are as easily detached as either the perforated or regular pad, but at the same time are as solid as a stitched book. Consumers cannot fail to appreciate the convenience of this pad, which, while it combines all the advantages of the ordinary pad, gives a level surface for writing, even down to the bottom of the page and a perfect hand rest.

A. M. Collins, Cope & Co. are very busy in the line of chromo advertising cards, and have just added thirty new numbers in folding cards in colors and in fine black etchings. They now have in press about twelve new sets of advertising cards.

G. W. Leman & Brother, 116 William street, desires to announce to the trade in general that they are now prepared to fill all orders for the M. L. Leman Attorney pen, having received an extra supply per steamer Erin. The finish and quality of these goods are still maintained, and the trade price is arranged to guarantee a positive protection and a liberal profit to jobbers and stationers. They report trade active. The unceasing activity of the members of this firm to introduce new articles and supply the many requirements of its customers for novelties, &c., invites the notice of the trade. This has been the characterizing feature of this house since its first establishment in America in 1830, and the immense field for labor in the United States and South America brings it trade at every season of the year. It is offering some old stock at a remarkably low figure to make room for new goods.

The summer months and the heated term are close at hand, and many people are preparing to carry out the old adage, to "keep cool under all circumstances." Feather beds and blankets will shortly be at a discount, and with the thermometer at 90 degrees will be looked upon with unutterable disgust. The height of ambition will be to conquer heat by day or night, and it is time now to prepare for the contest. Poets sing of the beauties of those climes where eternal summer reigns, and the orange flowers shed their sweet perfume, while bright-plumaged birds and perpetual verdure all unite to make home a paradise on earth. It is hot in those countries, and the poets omit to mention this fact. One other most important point they strangely forget to speak of, and that is really what we have to be grateful for to the tropical climes—they neglect to chant the praises of the hammock. R. Fideau, 16 Beekman street, claims to be the leading manufacturer and dealer in these goods in this city. Mr. Fideau has a large and growing trade with all parts of the country, and exports heavily. His terms are reasonable, and he fills all orders promptly.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, April 20, 1881.

THE MONEY MARKET.—The money market worked smoothly throughout the week, and borrowers on call on pledge of acceptable stock collateral found ready accommodation at rates ranging from 4 to 6 per cent. The requirements of the government bond dealers were supplied at 3@4 per cent. In the discount market, prime mercantile paper, which was in good supply, sold at 5@5½ per cent., according to date of maturity. There were some transactions in time loans effected at 4@4½ per cent. The stock market was unsettled throughout the week, and the dealings were generally characterized by a weak and feverish tone. Occasionally prices rallied under purchases to realize profits, but, invariably, every advance was followed by a fresh decline. The government bond market was quite active throughout the week, and prices advanced steadily up to the close, when the improvement in prices ranged from ¼ per cent. in 4½s to 1⅜ per cent. in 6s, 4s and 5s, each selling up ⅝ per cent. The buoyancy of the market was chiefly due to the general approval which has been accorded to the policy of the Secretary of the Treasury in allowing the holders of the 6 per cent. bonds to have them extended after July 1 at the rate of 3½ per cent. per annum in case they should prefer not to have them redeemed. Railroad mortgages were irregular and unsettled on generally narrow fluctuations. Foreign Exchange has been dull, but closed firm in tone. The actual rates for prime bankers' sterling at the close were $4.80¾@4.81¼ and $4.83@4.83½; cables, $4.83½@4.84, and prime commercial bills, $4.79½@4.79¾.

THE PAPER MARKET.—Although business has undergone no decided change since last week, with the disappearance of the difficulties which have for several weeks attended transportation throughout the interior of the country there is a better feeling among the trade, and dealers are hopeful that a brisker distributive movement will set in very soon. While there is nothing to hinder the full production of the mills in almost every part of the country, they are generally said to have all the orders to work on that they can well attend to, and some buyers experience difficulty in getting their contracts filled at short notice. The jobbing trade, although not pressed with business, are not accumulating stock, and prices throughout show very little variation. We note the presence in the city this week of several Western dealers who are drawn here by an inducement of lower prices and a scarcity of goods in their own section. There is no new feature attaching to any particular grade.

THE STATIONERY MARKET.—Business has continued very dull since our last, and there has been no improvement in trade with the West and Northwest, which is naturally looked for at this time of the year, and which is still held in abeyance, for the reasons which have been fully given in previous issues. With the South, where there has not been so much interruption to business as in the West and Northwest, there is a moderate trade doing, and the season is now so far gone that, for the remainder of the time, business is expected to be very slack. Both in the importing and manufacturing line preparations are now going on for fall goods, the season for which is expected to begin in June. Whatever may be the conjectures as to an advance of prices in any staple goods, wherein paper enters into the manufacture, if we should have a dull trade during the summer months and the production of paper continues as it is at present, an advance in prices would not be among the probabilities.

COLORED FIRES.

The following are several recipes for making colored fires, but, unless the greatest caution is exercised in the mixture of the ingredients, an accident from the explosion or ignition of the mass may take place. To avoid this, observe the following precautions: These fires should never be made until they are wanted for use, as from their ready combustibility they are liable to give rise to accidents. The ingredients should first be *separately* reduced to the state of a fine powder. The mixture should be made with small quantities at a time—best on a piece of white paper, with a wooden spoon or spatula, and by turning the mass over and over, *not* by friction or rubbing. As an extra precaution, an amateur should in every case dampen the ingredients slightly, before mixing, with a little strong alcohol. By observing these rules, the operator will avoid the liabilty to accident which is to be feared with such highly combustible mixtures as these. The following recipes give characteristic colors:

RED FIRE.

	a	*b*	*c*	*d*	*e*	*f*	*g*	
Chlorate of potassium..	24	32	20	40	16	10	..	parts.
Nitrate of strontium...	30	48	20	39	60	68	..	"
Sulphur.....	18	18	20	18	21	22	4	"
Nitrate of potassium...	8	..	10	..	..	..	..	"
Sulphide of antimony..	8	6	6	..	..	..	..	"
Charcoal.....	4	2	1	3	1½	¾	..	"
Sugar.....	..	..	2	..	..	..	..	"
Shellac (powdered)....	..	..	..	..	..	..	1	"

Of the above, *a* is brilliant and moderately quick burning; *b* gives the most intense red, and burus quickly; *c* and *f* burn slowly; *d* burns quickly; *e* less quickly; and *g* burns slowly, but brilliantly.

BLUE FIRE.

	a	*b*	*c*	
Chlorate of potassium.....	50	25	30	parts.
Nitrate of potassium.....	..	50	40	"
Ammonia-sulphate of copper.....	25	..	..	"
Ammonia-nitrate of copper.....	..	..	20	"
Carbonate of copper.....	..	12	..	"
Sulphur.....	12	16	16	"
Charcoal.....	16	12	16	"
Alum (burnt).....	..	..	10	"

The first of these gives a much darker blue than the others.

GREEN FIRE.

	a	*b*	*c*	*d*	
Chlorate of potassium.....	35	20	36	9	parts.
Nitrate of barium.....	45	20	20	70	"
Sulphur.....	10	8	24	21	"
Charcoal.....	6	5	..	..	"
Calomel.....	..	10	..	..	"
Sulphide of antimony.....	..	5	..	..	"
Nitrate of potassium.....	..	20	..	..	"
Rosin.....	..	5	..	..	"

Mixture *a* gives the most brilliant green; *a*, *b* and c burn quickly, and *d* slowly.

VIOLET FIRE.

	a	*b*	*c*	*d*	*e*	
Chlorate of potassium.....	30	50	40	52	51	parts.
Nitrate of potassium.....	..	20	30	..	..	"
Nitrate of strontium.....	20	..	20	..	..	"
Precipitated chalk.....	..	..	..	29	10	"
Carbonate of potassium.....	..	10	..	..	..	"
Sulphide of copper.....	..	..	20	4	..	"
Carbonate of copper.....	..	..	..	..	24	"
Calomel.....	2	..	8	..	..	"
Sulphur.....	30	15	12	15	15	"
Charcoal.....	5	4	6	..	..	"
Ammonia-nitrate of copper...	15	..	..	..	..	"

Mixture *a* burns moderately quick, and gives the deepest violet; *b* burns quickly; c less so; *d* rapidly; and *e* slowly.

WHITE FIRE.

	a	*b*	*c*	
Nitrate of potassium.....	100	63	75	parts.
Sulphur.....	30	21	15	"
Realgar.....	9	..	..	"
Sulphide of antimony.....	..	6	..	"
Gunpowder flour.....	..	36	200	"
Carbonate of potassium.....	..	5	..	"
Charcoal.....	..	..	120	"

Of these, *a* is only suited to be used in the open

air, because of the poisonous arsenical fumes which it evolves. The mixture c can be made to burn slower by slightly increasing the proportion of charcoal.

MAKING PLASTER CASTS IMPERVIOUS TO WATER.

Some time ago the Prussian Minister of Commerce and Industry offered a prize for the best method of treating plaster casts so as to render them impervious to the action of water. It is well known that at present plaster casts, when exposed to the action of the atmosphere, speedily lose their sharpness of outline by the solvent action of rain water, besides in a short time becoming soiled by the lodgment of dust in the pores of the plaster. For these reasons, this material, otherwise excellently adapted for the multiplication of the costliest and most finished artistic objects, is quite unfitted for exposure to the atmosphere in the parks, gardens and public places where it would be exposed to the action of the weather.

The object of the offer of the Prussian Minister above alluded to, was to obtain a process that would do away with these objectionable qualities that at present limit the utility of plaster, and to develop if possible a procedure of method of treatment which would render objects of plaster practically independent of atmospheric influences of deterioration. This desirable object, it appears, has been attained by Dr. Reissig, to whom the prize offered by the above named official was lately awarded.

Dr. Reissig's procedure has for its object the twofold purpose of providing a surface upon the plaster which should not wash away, and which at the same time should prevent the entrance of dust, so that the objects could be readily cleaned from time to time by washing. He proposed two methods by which these objects may be accomplished: First, by converting the plaster surface into sulphate of baryta and carbonate of lime by treatment with baryta water; or, secoud, by converting it into silicate of lime by treatment with silicate of soda or potassa. The first process is described as being the simpler and cheaper one. It depends on the fact that plaster of paris, a hydrous sulphate of lime, is converted by the action of baryta water into the sulphate of baryta—a totally insoluble substance—and caustic lime, which last is speedily changed, by contact with the air, into carbonate of lime.

In carrying out the process, the author recommends the immersion of the plaster objects, which should be quite clean, in a tolerably concentrated bath of baryta water, in which they should be permitted to remain for from one to ten days, according to the thickness of the water-proofed surface that it is desired to obtain. After removal, washing off with lime water, and wiping off with white cotton or linen rags, the objects are to be left to dry. They are then thoroughly water-proofed. They are still, however, porous, and therefore liable to speedy deterioration on exposure from the lodgment and absorption of dust, etc. To remedy this, Dr. Reissig coats the water-proofed articles with an alcoholic soap solution. This penetrates readily into the pores of the plaster, and the evaporation of the alcohol leaves behind a layer of soap which fills up the pores, and when washed the soap is converted to suds, with which the dust is readily washed off.

A cheerful face is nearly as good for an invalid as healthy weather. To make a sick man think he is dying, all that is necessary is to look half dead yourself.

WE desire to call attention to a new article which we are just now introducing to the trade. It is a liquid glue, cement and mucilage combined. In our own business we experienced so much difficulty in finding an adhesive that would make our labels adhere to the tin cover of the Hektograph, that we gave a commission to one of our most distinguished chemists to compound for us an article which would answer our purpose. After months of labor the result has been the production of an adhesive so far superior to anything heretofore made, that we have decided to manufacture and offer it for sale, and are now ready to supply it in any quantity. It is without doubt the best article of the kind for family and general use ever offered to the public. For repairing China, Glassware, Furniture, Rubber, Leather, Books, Billiard Cues, or pasting labels upon tin or other metal or for any use where glue, cement or mucilage is required, it is unrivaled. For warm climates we make an article expressly adapted for use there. We supply it by the gallon or barrel, and for family use it is put up in bottles, with brush, at 25 cents. Samples will be sent free to large consumers.

LIBERAL DISCOUNT TO THE TRADE.

FOLEY'S

Celebrated Gold Pens and Pencils

THE FINEST AND BEST.

CIRCULAR.—To those engaged in mercantile pursuits, any invention that will facilitate their labor is highly worthy of notice, as well as of extensive patronage. One of the most important inventions of the present age is that of a pen that possesses the necessary qualities of firmness in mark and durability in use. Pre-eminently such are those of JOHN FOLEY, Manufacturer of Fine Gold Pens and Pencils, No. 2 Astor House. Their superior value is tested by the long time he has been engaged in our city in their manufacture. We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most pertect Gold Pen ever made.

Agency for a Specialty Wanted.

I would like to take exclusive Western Agency for a Staple Specialty. Having both the experience and facilities necessary for pushing such an article successfully, manufacturers wishing to establish a depot for their goods in the West will do well to correspond with me. Refer by permission to WESTERN OFFICE, LOCKWOOD PRESS. Address M. F., 156 Madison Street, Chicago.

OXIDIZING SILVER.

The appearance, technically called oxidation, on a silver (or silver-plated) surface, may be obtained by any one of the following methods. The effect is often very pleasing on silver work when the process is artistically done. Dissolve about a gramme (or pennyweight) of platinum in aqua regia (a mixture of three parts of muriatic with one of nitric acid), and evaporate the acid off completely upon the water bath. Dissolve the resulting reddish mass—bichoride of platinum—in a little sulphuric ether or alcohol. Apply the solution with a camel's hair brush to the parts that require to be oxidized, and as soon as the ether or spirit has evaporated, the film of platinum remaining will give the required appearance to the silver surface. The acid solution, before evaporation, may be used instead of the above; or an aqueous solution of platinum chloride, but the first named method gives the most satisfactory results. Another method is as follows: Take sulphate of copper (blue stone), two pennyweights; nitrate of potassa (saltpetre), one pennyweight; chloride of ammonium (sal ammoniac), two pennyweights; dissolve in acetic acid, and apply with a camel's hair brush, first warming the object before making the application. A simpler process than either of the foregoing, though its effects are not so permanent, consists in simply applying to the parts to be oxidized a solution of sulphide of ammonium. Sulphur fumes will give a silver surface a beautiful steel blue color. The operation should be done in a close box, and all parts of the silver article not to be affected should be protected from the fumes of the burning sulphur by a suitable coating of wax.

MAILABLE MERCHANDISE SAMPLES.

Postmaster Pearson has received the following order from Postmaster General James:

"Tags or labels attached to samples of merchandise may have the price and width of the goods printed thereon, either by the original impression or by a hand stamp, filling in blanks left by the original print. This will not authorize such use of a hand stamp for any other purpose than as description of the thing attached. It cannot be used to convey information personal in its nature, or disconnected from the thing to which the matter so stamped is attached, except at rates for first class matter. The width of the article, of which a sample is given, may be stated in writing, but when so written the purpose of identification being held to have been accomplished, as authorized by the statute, the price of the article cannot be added, either in writing or in print, without changing the classification of the matter to letter rates."

Selchow & Righter, 41 John street, this city, are headquarters in the line of roller skates, which have become so immensely popular this season and for which the demand extends to every section of the country. The great demand for these goods has started up a large number of parties in making them, and the consequence is that many skates of an inferior quality are being put upon the market. This firm claims to be first hands in the handling of these goods, and offers an article of very superior make, both as regards finish and the durability of all the parts of the skate, at as low prices as those at which the inferior quality are offered. This firm is also doing a large business in spring goods, embracing hammocks, croquet, base ball goods, lawn tennis, archery, &c.

He that goes borrowing goes a sorrowing.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,
Vice-Pres't and Gen'l Man'gr, Chicago.

THE PAPER TRADE IN THE CITY OF NEW YORK.

[Continued.]

One of the most remarkable men in the trade is Peter Adams; remarkable as well for the vigor of mind and body he retains after passing the allotted three score years and ten as for the length of time he has been in the trade and the success he has achieved. Mr. Adams is seventy-five years old, and yet he is as strong, active and clearheaded as a man of forty. Between his two mills, one at Newburg, in this State, the other at Manchester, Conn., and this city, he is constantly on the go, and according to his own statement holds himself ready when here to start for either at a moment's notice. He is a man of peculiar notions, in some respects; is not much of a talker, except in transacting business, when he is fluent enough as to essential matters, and is unflinchingly opposed to anything like puffery. For these reasons few persons know anything of his history, and when the writer of this article applied to him for the material for a sketch he intrenched himself in caution and from behind the ramparts of reticence replied: "I don't like to have anything said about me, and besides it won't interest anybody." No artifice could avail to get anything more out of him.

Mr. Adams was born near Glasgow, in Scotland. He came to this country between 1820 and 1830, while paper making here was, comparatively speaking, in its infancy, and, while New York was hardly yet worth to be called a city, and the State of New Jersey was scarcely more than a wilderness fringed, with settlements along its borders. He was a practical paper maker, and, as such were scarce and in demand here at that time, doubtless obtained employment at once, but where and from whom I have not been able to ascertain. For some time previous to 1836 he was foreman for Beach, Hommerken & Kearney, at their mill at Saugerties, on the Hudson, which was then making printing paper. About 1836 he went with H. V. Butler as foreman of the Passaic mill at Paterson, N. J., and remained in his employ for nearly twenty-five years.

In 1860, or possibly a year or two before that, he bought a mill at Manchester, Conn., and began to manufacture paper in company with a Mr. Ramage, who had been under-foreman of the Passaic mill. The firm was Adams & Ramage. After two or three years Ramage left, and went back to the employ of H. V. Butler. Mr. Adams continued to manufacture on his own account and prospered. In 1866 he connected himself with Mr. Prince, under the firm name of Adams & Prince, and purchased the Grove mill at Newburg, N. Y., where he began the manufacture of fine book and silk paper.

In April, 1866, William Bishop, a nephew of Mr. Adams, formed a copartnership with a Mr. Flynn, and started, under the firm name of Bishop & Flynn, a paper and paper stock business, at 87 Frankfort street, in this city. The paper business of the new firm consisted principally in selling the product of the Grove mill. This firm was dissolved by limitation in April, 1872, and then Mr. Adams united with Mr. Bishop, and formed the firm of Adams & Bishop, which has continued to the present time. It may be mentioned, in passing, that Mr. Flynn started a paper mill in Glasgow, Conn., which was burned out in 1873. As the mill was not fully insured, he fell thereby into financial difficulties.

The character of the business done by Adams & Bishop has not changed since the formation of

the firm, except in magnitude. Like the business of many other houses, it has greatly increased. An idea of the increase may be gathered from the fact that the Grove mill, when bought by Mr. Adams, was producing only about 1,000 pounds of paper per day. Now the daily product is about 6,000 pounds. White card paper has been one of the products of this mill nearly ever since it has been owned by Mr. Adams, and about two years ago colored card paper was added. Both kinds have attained a high reputation in the market. The mill at Manchester, Conn., is run chiefly on super-calendered book and other fine papers. It may be added that Mr. Adams is one of the most progressive of paper makers, and is noted for constantly making improvements in his mills.

It should be noted also that he was connected with the setting up of the first Fourdrinier machine used in this country. This machine was put up by Henry Barclay, a retired New York merchant, at Saugerties, in 1827, and Peter Adams and Thomas Lindsay worked on it as machine men.

William Bishop is a son of Thomas Bishop, who was for a great many years superintendent of D. & J. Ames' paper works, in Springfield, Mass. Mr. Adams married his mother's sister.

Prior to entering the paper trade he was in the fancy goods or "Yankee Notions" business with Edwin T. Butler & Co., of this city, first as bookkeeper and afterwards as member of the firm. He is now fifty-four years old.

[To be Continued.]

AN ELECTRICAL THERMOMETER.

A thermometer for indicating the temperature at a distant place by means of electricity has been devised by J. Hicks, of Hatton Garden. A series of platinum contact wires are fused into the stem at equal intervals of 3 degrees Fahrenheit for any range of scale which may be desired. The bore of the tube above the mercury column and a bulb at the top of the stem are partly filled with glycerine. A platinum wire, fused into the mercury bulb, is connected to one pole of a voltaic battery, the other pole of which is connected to "earth." If, now, we suppose a wire, in circuit with an electric bell and "earth," to be rapidly drawn across the contact wires fused into the stem, the bell will ring if the circuit be completed by the mercury column. If, however, the column has not risen sufficiently high for this, the bell will remain silent. This passage of the bell wire over the series of platinum contacts is effected by means of a dial and a revolving arm. The contacts are connected to a row of studs round the rim of the dial, and the bell to the arm, which revolves by clockwork. As soon as an observation of temperature is required the arm is started, and passing rapidly in succession over the studs the bell indicates what stud the mercury column has failed to reach and hence the temperature.

The best plan to repolish old mahogany work is to put into a bottle half a pint of alcohol, quarter of a pint of vinegar, quarter of a pint of linseed oil, and one ounce of butter of antimony; shake them well together. Wash the work well with warm water, in which a little soda has been dissolved, and thoroughly dry it. Now roll up a piece of cotton wool into a rubber, moisten it well with the mixture, and rub this briskly over the work until dry. This is a French polish reviver, and may be used by any one with good effect where there is a moderate body of polish still remaining on the furniture.

MH
BLOTTER TABLET
PATENTED
PADS OF PAPER WITH BLOTTER ATTACHED.
ELEGANCE. ECONOMY. CONVENIENCE. CLEANLINESS.

THE paper is tableted, so that each sheet may be freely removed, leaving a perfectly clean, smooth edge. No paper is wasted. The sheet on which you write is always clean, being protected by the blotter. The blotter, of the full size of the paper, is so attached at the top of the pad that both sides of it may be used, and will last out the entire contents of the pad, being always at hand, and perfectly clean.

The blotter is kept clean, and also from wearing, by the card board cover, which is made of a highly polished stock, perfectly smooth, and that will not catch dust or dirt from the desk. The cover is richly ornamented on every pad, giving the whole a neat and elegant appearance. All kinds of paper and printed blanks are put up in this form at prices as low as if loose; making the most complete line of staple and elegant stationery ever offered to the trade.

☞ The Latest and the Best.

Circulars on application.

☞ Examination Solicited and Satisfaction Guaranteed.

The attention of the Trade is called to the improvements made and advantages offered in Livermore's New Stylographic Pen.

Patented July 15, 1879, and March 9, 1880.

FIRST—**A Smaller Air Tube**, allowing more space for the ink, and rendering the operation of filling easier and less frequent.

SECOND—**The Manner of Fastening the Needle**, not to the air tube, where it would be in danger of being bent or injured every time the pen was filled, but in the point, where it is not so exposed.

THIRD—**The Protection of the Spring** by a silver casing, preventing the ink from clogging its action.

FOURTH—**The Duplex Interchangeable Point Section**, furnishing great facility in cleaning the pen.

FIFTH—**The Ease with which Repairs can be Made.** The needle being in the point, it is not necessary to send the whole pen to the factory, but any dealer can supply a new point.

SIXTH—**Freedom from Legal Difficulties.** The New Stylographic Pen is manufactured under the patent controlling the use of an air tube in a Fountain Pen, and it is therefore free from legal complications.

CARTER, DINSMORE & CO., Boston and New York.

BYRON WESTON

DALTON, MASS.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST and ONLY AWARD** given for

LINEN RECORD and LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition*, *Massachusetts Charitable Mechanics' Association*, *Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission*, *Medal of Progress American Institute*, *1877*, *and Medal of Improvement and Progress*, *Boston*, *1878*. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.

Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 74 Duane Street, New York.

The American Stationer

A Journal Devoted To the Interests of the Stationery & Fancy Goods Trades

"The Stationer"—Every Thursday—$2.00 Per Annum.

VOL. IX.---NO. 17. NEW YORK, APRIL 28, 1881. WHOLE NO. 305.

Correspondence.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BOSTON, Mass., April 26, 1881.

Stationers report a good trade during the past week. The weather has been perfect; sufficiently compensating for the "dull and drear" of the first part of the month. Great crowds have flocked the stores, but although the average purchase has been correspondingly small, still the aggregates have made a large volume.

Warm weather having finally come to stay, the next thing in order is the preparation on the part of those who leave the city for the summer months. This exodus is not without its compensations. It has proved, in past years, to create a good trade in certain lines of stationers' goods. Country dealers at the seashore and among the mountains years ago did not pretend to keep assortments of fancy stationery, but, of late years, on account of the wonderful increase of visitors, dealers have found it necessary to provide themselves with just such a stock that city trade calls for, during the warm season of the year. The large majority of summerers are people who indulge in much epistolary work; and, as a general thing, such people want the best and the most fashionable kinds of letter paper, envelopes, &c., besides unique or novel kinds of stationery and certain lines of fancy goods.

Although the regular spring trade has been broken up, to a certain extent, perforce the heavy rains, bad roads and other meteorological drawbacks, it is yet possible that the summer business may exceed its accustomed volume this year; at least, this is the impression prevalent among some dealers. Stocks are still small in some localities of New England, where a year ago they were large and business fair.

I have thus generalized in the absence of any special features in the trade to notice this week. A visit among the leading dealers gives the cue to the single fact that trade is in a satisfactory condition for this season of the year—and this is saying a good deal, considering the lull that now exists in almost all departments of business consequent upon the high pressure speed at which things have been moving during the past eighteen months.

Inquiries fail to show that there has been any over production in stationers' merchandise; in fact, there is more likely to be a scarcity in some lines than otherwise. The spirit of conservatism which has characterized the trade for several years past is now producing good fruit, as every first class leading stationer in the country knows. These are the views of men engaged in the business in this part of the country.

The sale of Easter goods has been immense—nothing like it before. Prang & Co., not satisfied with their success in the card line this year, now propose to astonish the trade with still finer and more artistic work for the next season. I do not see how this is possible—but nothing is impossible nowadays.

The penitential season having passed, exquisitely executed wedding cards, by Brett, have been variously issued.

A new note paper has arrived. In the upper corner is a crescent, with a profile of George Eliot and a gilt owl with white eyes. Another style presents a spinning wheel of gentility, with a quantity of silver yarn clinging to it.

The Boston Public Library has come into possession of a sort of treasure trove, in the shape of a full translation of "Plutarch's Lives," published in London in 1603.

It is reported here that the publishers of *Scribner's Monthly Magazine* and Osgood & Co., Boston, are soon to become intimate in their business relations. L.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS.
8 LAKESIDE BUILDING, CHICAGO, Ill., April 23, 1881.

The sunny streets, filled with gay and laughing promenaders, are almost sufficient temptation to lure your correspondent from his desk and duty. But consequent upon the propitious heavens there is a stir in business that deserves reporting; so let the sun wax as it will, my pen shall do its duty.

First and best, then, is the news just received, that M. W. Smith, who lately started in very delicate health for the South, is now sojourning at Savannah, Ga., very much improved, and feeling, as he expresses it, like a man reborn. At his store, 122 Dearborn street, business also is vigorous, the newspaper trade for the present season being nearly double that of last year for the same period. The house is also doing a good trade in Boosey's, Stoddart's, and Monroe's cheap editions of music.

Geo. H. Taylor & Co. are in the midst of "house cleaning" for the spring trade—somewhat delayed this season, as you know. They report as notable the heavy demand they have been receiving for paper napkins, sales reaching the almost incredible amount of millions per year. Mr. Taylor says that single orders for 100,000 to 150,000 are by no means rare.

Mr. Butler, of the J. W. Butler Paper Company, notes a rapidly increasing demand from New Mexico, incident upon the opening of the new railroad. The calls from that section have been principally for prints and fine writing papers. The demand is likely to increase indefinitely with the progress of the country.

J. J. Spalding & Co., 158 Clark street, specialty agricultural printing, report the most successful winter past within their memory. They had orders for larger and more numerous editions than ever before, evidenced by the fact that they have been running constantly on night work, a necessity never experienced hitherto.

The "Hecla bicycle" for boys is the latest thing in the line of sport announced by A. G. Spalding & Co., 108 Madison street, the recognized Western headquarters for all kinds of sporting goods. The machine is controlled by them, and they say it is one of the most durable as well as one of the best selling machines on the market. Judging from the large number shipped daily from their store, I am persuaded that bicycling is the feature of the day, and that the "Hecla" is receiving its share of appreciation.

Brown, Pettibone & Kelly are enlarging their quarters as well as their facilities, by the extension of their salesroom, and the introduction of new shelving and additional showcases. It is their aim to keep supplied with neat and convenient specialties, and it will be interesting to know that they intend to keep on hand as far as they can be procured every odd or particular brand of ink made.

Among new removal announcements are the following: L. Newton, paper, will remove on May 1 from 143 Monroe street to 148 East Madison street; John J. Hanlon, patent hinge back blank books, will remove on May 1 from 57 Washington street to 40 La Salle street, where he will have twice the space afforded by his present quarters. The patent hinge back is growing, deservedly, in favor, and there is no reason why every blank book manufactured should not be supplied with it, as it makes a half bound cheap book, equal in durability (so far as the back is concerned) to the spring back book, while added to the latter it greatly augments its durability.

H. H. Hoffman, blank books, intends closing out entirely his retail business, and will henceforth devote himself to manufacturing exclusively, at 104 and 106 Madison street. Snider & Hoole, Cincinnati, will share Mr. Hoffman's office, with full lines of binders' stock.

George E. Cole & Co., 86 Dearborn street, report an excellent season.

Clark & Edwards, 162 and 164 Clark street, are having a good trade in their "Society cards." As the cards are tastefully printed in correct

colors, there is no reason why they should not be sold to all secret societies.

This office is in receipt of a copy of the Hoe Printing Company's new illustrated catalogue of stop-cylinder printing presses. The book contains four large and beautifully executed chromo-lithographs of as many different styles of presses; is printed (text and figures) on fine, heavy-sized and calendered paper, and is more than a credit to the company. I have seen nothing to equal it this season.

Jungblut, Henrichs & Co., electrotypers, 154 and 156 Clark street, show evidence of success that needs no "boosting." They are putting in a new 30 horse-power Erie boiler and engine. The second number of their new catalogue of electrotyping is almost ready. G. B. H.

POLYTECHNIC ASSOCIATION OF THE AMERICAN INSTITUTE.

At the regular weekly meeting, April 21, the president, T. D. Stetson, opened the general discussion of scientific topics by reading a short account of the steps which are being taken to introduce the Westinghouse brake into France.

Mr. Hudson announced that since the last meeting Charles H. Neiman, one of the oldest and most constant attendants of the association, had died, and he offered the following:

Resolved, That we sincerely mourn the decease of one who has so long been our companion and associate here; and that we desire hereby to express our sympathy for the loss sustained by his relatives and personal friends.

The resolution was adopted, and the secretary was directed to forward copies to the friends of Mr. Neiman.

The regular subject of the evening was electro-metallurgy, which was taken up by N. S. Keith.

The term electro-metallurgy is a little indefinite. It was first applied by Smee, who was at the time the leading investigator in this line. The true definition of the term would be the production of different metals from the earth or from their ores by electricity; but, in the common acceptation of the term, it means their production from ready formed salts. More recently electricity has been used to reduce metals from their ores, as in the case of copper. Electro-metallurgy, in its strictest meaning, is used by the chemist to assist him in his work.

In order to make his remarks clearly intelligible, and to demonstrate before the audience the principles upon which some of the most important and valuable recent applications of electricity have been made in the separation of metals, the speaker was obliged to be somewhat elementary in his remarks, while at the same time he also demonstrated, by means of a battery and solutions of various metals, the leading facts involved.

Smee's well known form of battery, though easily standing at the head of the list and still in use for a great many purposes, had the fault of a constantly diminishing electro motive force. It is still the stand-by for those who do not use the machine in electro-plating. The Daniel battery, in which the copper and zinc were placed in different liquids, was invented to avoid the defects of Smee's form. This had been modified in the gravity battery, as it is called. The principles of operation, however, remained the same.

Daniel observed that the copper deposited upon the poles of his battery by the electric action peeled off from the original surface, and, in doing so, retained the impression of the metal, which, in one case, was a coin. This was the beginning of the art of electro-plating. It was thought at first that a reguline and adherent coating could not be obtained by this method. The early experimenters tried all the metals, and under every variety of circumstance which they could devise. It was not long before it was found that by proper modifications certain metals could be made to form a coherent coat. Metal after metal was tried; the last one commercially used is nickel. Electro-plating is a modern art, and it is only a little while since it came into use.

Matter and energy, in one sense, may be said to be the foundation of the art. It is even supposed by some that matter does not exist except as energy. The specific energy of matter was at one time called specific heat. Light, heat and electricity are commensurable and interconvertible; that is, a certain amount of energy in one form may be made to produce a definite amount of energy in some other form. The old phlogiston theory supposed that heat was a something.

The dynamic effect produced by the union of oxygen with the various metals was placed upon the board in the form of a table. For 108 grains of silver 2,000 foot pounds could be obtained; for 31¾ grains of copper, 7,000 foot pounds; 28 grains of iron, 7,500 foot pounds; 59 grains of tin, 8,000 foot pounds; 103½ grains of lead, 8,800 foot pounds; 1 grain of hydrogen, 8,900 foot pounds, and for 32.6 grains of zinc, 10,000 foot pounds.

While in burning coal under a steam boiler and using the steam obtained in a steam engine, we utilize about one-tenth of the energy; in the battery we are able to utilize about one-half of the energy. Practically, we can reach 46 per per cent. Unfortunately, the materials cost much more than coal, so that we cannot produce power as cheaply as by means of coal, in spite of the wastefulness of that method. Tables similar to this are found in every book, showing the relative places of the metals, but it is only recently that the dynamic values have been known.

Experiments were then made to demonstrate the reducing powers of the metals, and the effects of lead in reduction particularly exhibited, as this had a material bearing upon an important invention to be spoken of.

The early silver-platers, among whom Elkington, of England, was one of the first, tried to find solutions in which the baser metals should not exercise their greater affinities. These were found in the cyanides, which formed the basis of the early patents. That electro-deposition gives us the means of separating metals from each other was shown by experiment. In practice this was of the greatest value. By means of suitable solutions the speaker had been able, on a commercial scale, to remove tin from the scraps of tin plate and obtain the pure metal, while the iron was left behind fit for use. By this means many tons of tin were saved. The process was only abandoned a few years ago, when the price of tin fell to an unprecedentedly low figure. Elkington applied the same principle to the production of pure copper, and took out a patent for it. At that time it was not practicable, because batteries had to be used for the production of electricity. Now there is a large establishment at Swansea where it is done on a commercial scale. Silver is separated from the copper, and many tons are treated annually.

In this country there is a very heavy production of what is called "base bullion." Last year it amounted to 75,000 tons. This is lead which contains very small quantities of silver and gold. The usual method employed for refining is costly, and no inconsiderable amount of the silver and gold is wasted. The speaker's invention consists in making the lead one of the poles of a battery, and, by means of a suitable solution, depositing the lead upon the other pole, while the silver, gold and other metals are left behind.

The lead is cast into thin sheets, which are used to form the anodes; these are inclosed in twilled muslin, in order to prevent the impurities in the lead from falling down as the corrosion of the anode advances, and mixing with the crystalline lead which is deposited on the cathode, and which finds its way to the bottom of the tank. The solution used is preferably an acetate. This process gives lead of remarkable purity, while the amount of silver lost is too small for mention. This invention would have been entirely impracticable had it been necessary to use a battery and obtain each 103.5 pounds of lead by an expenditure of 32.6 pounds of zinc. The dynamo machine produces electricity at about one-twentieth the cost by a battery.

By increasing the number of vats, dividing the currents and keeping the resistances constant, the amount of lead deposited can be increased almost indefinitely. The limit is reached only when the size of the plant becomes too extensive and the time too great for economy.

A LOST PEOPLE.

America, as well as Italy, has its Herculaneum and Pompeii, if we may believe the reports of Messrs. Patterson and Mackley, two gentlemen engaged in mining in New Mexico, who have just arrived in St. Louis with remarkable specimens and more remarkable statements. Some stupendous ruins have been discovered at Abo City, in the Manzana or Apple mountains, in Valencia county, about twenty miles west of the Rio Grande, and nearly the same distance from the Atchison, Topeka and Santa Fe Railroad. The district was once very populous, but has now no inhabitants. We learn, from a long report in the *Republican*, that there is evidence of vast volcanic eruptions in the vicinity, which overwhelmed large cities and buried them and their inhabitants in hot ashes. There are lava beds fifty miles in extent, and at one time the crater of one of the mountains must have been sixty miles long and from fifteen to twenty miles across. The remains of a temple, with walls sixty feet high and ten feet thick, and covering an acre of ground, were found. The timber, which is pinon wood, was as sound as when first cut.

There are on one side of the piece of timber some rude figures, one of the All-Seeing Eye, representing probably the sun. Other figures are deeply indented in the wood, as if made by anything but a sharp-edged tool. Mr. Patterson says that he found stone hammers, but nothing in the shape of the sharp-edged or steel tools. There are small furrows seen in the wood, as if plowed out with a stone gouge. The building evidently belonged to a style of architecture anterior to the adobe and dried brick period. Mr. Patterson inclines to the opinion that the locality was the site of one of the seven cities mentioned by the Spanish chronicles, the author of which traversed the country after the conquest of Mexico, among which were the cities of Camelone, Grand Cavra, Santa Cruz, Puerto de Abo, the Abo and the old Pecos, and another situated a few miles west of Abo, in the lava beds.

Another specimen is a human skull, evidently that of a young female, as shown by the teeth, which was exhumed about half a mile from the church. Skulls are quite plentiful among the old ruins in the vicinity. About five miles from

the Abo spring they have discovered some ancient silver diggings.

The smelters were built of adobe or sun-dried bricks, and were elevated some twenty or thirty feet above the surface of the ground. In digging down they found the remains of an aqueduct, in which water was conveyed from a spring three-fourths of a mile distant, to a dam which diverted the water into the smelting works. About five acres was found covered with slag, which Mr. Patterson has taken up for a mill site. From the old furnaces a trail was found, after considerable exploration, leading directly from the smelting works to the mine in the mountains, which here rise in peaks to a height of 10,000 feet. The ancient trail pursues a zig-zag course, having a length of some five miles, while, in an air line, the distance is not much exceeding one mile. Everything was transported in those old mining days on men's shoulders to and from the mountains. There are now trees of the "pinon" growing on the trail larger than a man's body, showing the antiquity of the path. Mr. Patterson said he was two weeks in discovering the mines after finding the smelting works.

The mine from which the silver was taken was concealed by fallen timber, some of which had taken root. It took nearly a fortnight to clear it away. It was found to be seventy feet deep, with several horizontal shafts. A lot of pottery was also discovered, and also a rich turquoise mine which bore evidence of former working. The pottery consists of drinking vessels used by these old inhabitants of the country. The vessels are of various designs, representing several species of birds and antelopes. Some of the specimens are striped and spotted with a black coloring. An old miner named Baxter found, in digging down, a chamber about ten feet square, having on one side a fireplace across which hung a crane having a clay hook, and at the end of the hook was a bone. On the opposite side of the fireplace was found the skeleton of a man in a sitting position, who was evidently watching the bone roasting for his meal, when he and his habitation were overwhelmed in ruin by a sudden discharge of lava from the mountain.—*N. O. Times.*

COPYING FROM THE MICROSCOPE.

Dr. Beale gives the following as the simplest method of copying an object magnified in the microscope: Arrange the paper on a piece of stiff cardboard, so that it may be upon the same level as the stage upon which the object is situated, on the left side, if the right eye is the one used for observation. If we now look steadily at the object with the right eye, it will be found that the object appears to be thrown, as it were, upon the paper, and it may be clearly seen by the left, and its outline be very readily traced, the movements of the pencil being executed by the right hand, if the observer is not able to use the left. By far the best course, however, is for the observer to acquire the habit of observing with the left eye, in which case the paper can be placed on the right hand of the stage, and the right hand used for drawing. With a little practice the relative position and correct size of objects may be insured in this manner.

According to the *Moniteur des Produits Chimiques*, corrosion in steel pens can be prevented by placing them for half an hour in a solution of sulphate of copper, and then letting them dry slowly. Of course, the process simply gives the steel a thin coating of copper, which is not likely to be affected by any of the inks in ordinary use.

L. PRANG & CO.'S

BIRTHDAY CARDS.

We take pleasure in herewith presenting to the Trade our Price List of Birthday Cards, which has been greatly enlarged by a number of very elegant and novel sets:

ASSORTMENT.—They are made up in sets of one dozen, except No. 7, and are put up in a box or envelope. Each set contains all the designs of the series, and as no series, except Nos. 3 and 14, has more than eight designs, some of the designs are more or less repeated in the set.

ENVELOPES.—Fine Cream-Tinted Envelopes are furnished with the more elegant series, without extra charge.

SILK FRINGES.—Encouraged by the very great success with our Silk-Fringed Easter Cards, we have made up a number of our Birthday Cards with the best quality heavy silk fringe, made expressly for us. All fringed cards are furnished with Protectors and Envelopes, and are put up with assorted colors of fringes.

LIST OF PRANG'S BIRTHDAY CARDS.

No. of Series.	No. of Designs.	DESCRIPTION.	HOW PUT UP.	Retail Price per Set.
1	8	Floral Designs	12 Cards	$0.15

39 DF	4	Same Designs, with silk fringe and tassels	12 Cards, with Protectors and Envelopes	7.20

USUAL DISCOUNTS TO THE TRADE.

TO THE TRADE.—We have to ask the generous indulgence of our friends in the Trade, for what may have seemed a want of proper consideration for their interests on our part during the past Easter season. The sales of our Easter Cards have largely exceeded our anticipations, and these sales following so closely upon the large sales of our Valentine Cards, made a demand upon us greater than our facilities for production enabled us to supply. Under these circumstances we have been unable, in many cases, to fill orders as fully and as promptly as we have desired, and our not being able to do so has been a cause of as great regret to ourselves as it has been to our customers. We are now enlarging our building and making extensive additions to our machinery, not only for the purpose of increasing our facilities for production, but also for the purpose of improving the character and excellence of our work, and we trust, with our increased facilities, to be able in the future to meet all demands for our publications with the utmost promptness.

Our samples for Christmas season are in a forward condition, and we have the pleasure of announcing that we intend to start our travelers with them in the later part of May, and we shall endeavor to have these samples submitted to our customers throughout the United States and Canada as early in the season as possible. We trust to be favored with the same consideration, on the part of the Trade, in the placing of advanced orders, which has been extended to us in the past.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 239,965. Envelope.—Carl König, Jr., Annaberg, Saxony, Germany. Patented in Germany, February 21, 1880.

A postal envelope for coins, consisting of pasteboard provided with a series of recesses containing strips adapted to be removed for insertion of the coins, and also provided with a perforated front cover and back cover.

No. 239,974. Indelible Ink.—Aaron N. Morse, Milwaukee, Wis., assignor of one-half to Thos. Ballentine and G. Maxon, same place.

A compound consisting of pure soft water, caustic (stick) potash, seed-lac, permanganate of potassium, and lampblack.

No. 239,997. Game Box.—Charles H. Widger, Lynn, Mass.

No. 240,019. Coin-Holding Trinket.—Carl Gullberg, Jersey City, assignor of one-half to August Saltzman, Plainfield, N. J.

No. 240,023. Picture Nail.—Adolph G. Hofstatter, New York, N. Y.

No. 240,085. Book Stand.—Burnett V. Buffington, Marysville, Ohio.

No. 240,097. Lead and Crayon Holder.—Thomas S. Crane, Newark, N. J.

No. 240,099. Process of Manufacturing Calendars.—John Cussons, Glen Allen, Va.

A process of manufacturing calendar-tablets by printing sheets of tablet forms for each month, each sheet having a number of tablet pages for the same month, gathering the sheets in stacks or pads, each having one sheet for each month, sewing the sheets together on lines along the heads of the rows of pages, passing the stacks or pads between compression rollers, and finally slicing up the stacks or pads into separate tablets.

No. 240,141. Paper Box and Partition.—Gustav L. Jaeger, New York, N. Y.

1. In a paper box, the combination of a sheet of pasteboard forming the bottom and opposite sides of the box, and two series of intersecting parts having slots engaging each other, one series of these partitions having slots engaging the side portions of the sheet for retaining the whole in place, and the outer partitions of this series constituting the ends of the box. 2. In a paper box, the combination of a sheet of pasteboard forming the bottom and opposite sides of the box and having slots in the side portions thereof, and two series of intersecting partitions, having slots engaging each other, and one series having slots which engage the side portions of the sheet opposite the slots therein, thus bringing the upper edges of the partitions and of the side portions to a corresponding level or height. 3. In a paper box, the combination of a sheet of pasteboard forming the bottom, the opposite sides, and the top of the box, and a flap to the top portion having slots in its free edge, and two series of intersecting partitions having slots engaging each other, and one of the series having slots engaging the side portions of the sheet. 4. In a paper box, the combination of a sheet of pasteboard forming the bottom, the opposite sides, and the top of the box, and having a central hole in the top portion, and two series of intersecting partitions having slots engaging each other, and one of the series having slots engaging the side portions of the sheet.

No. 240,158. Bag.—Thomas H. Mayhew, Hyde Park, Mass.

No. 240,225. Book Clamp.—William E. Bradner, Newark, N. J.

No. 240,235. Folding Machine.—Luther C. Crowell, Brooklyn, assignor to R. Hoe & Co., New York, N. Y.

No. 240,246. Book Rest.—Louis F. Fuller, Beattie, Kan.

No. 240,255. Paper or Cloth Veneer.—Frederick Koskul, Grand Rapids, Mich.

No. 240,258. Manufacture of Toy Animals.—Louis Kyser and Alfred C. Rex, Philadelpia, Pa.

No. 240,262. Phototypography.—John N. Lutz, Portsmouth, Ohio.

A process for preparing wood to receive a photographic impression for engraving, which consists in first applying to the surface of the wood an enameling or whitening preparation, then a preparation consisting of chloride of ammonium, citric acid, gelatine and water, then a silver sensitizing preparation, and finally ammonia.

No. 240,291. Side Gauge for Paper Feeding Tables.—Dominick Weckerlin, Brooklyn, assignor to R. Hoe & Co., New York.

No. 240,314. Album Clasp.—Wm. J. Fitzgerald, New Haven, Conn., assignor to Gaynor & Fitzgerald, same place.

No. 240,376. Paper Cutting Machine.—Samuel Brown, Philadelphia, Pa., assignor to Cepbas R. Carver, same place.

No. 240,390. Folding Machine.—William C. Cross, Boston, Mass., and Edgar B. Stocking, Washington, D. C.

1. In a folding machine, the combination of conical folding and feeding rolls, arranged and operating to carry along the paper faster at one side than at the other, thereby partially turning the sheet, so that when the fold is completed what were the front and rear edges will have become the side edges of the sheet and means for tucking the paper to be folded into the bite of the rolls. 2. The combination of a vibratory tucker blade and conical folding rolls, arranged and operating to carry along the paper faster at one side than at the other, thereby partially turning the sheet, so that when the fold is completed what were the front and rear edges will have become the side edges of the sheet. 3. In combination with the endless power-driven tapes and transverse clamp bars, vibratory nippers or jaws, mounted independently of one another, one at each end of each clamp bar, so as to vibrate in a plane transverse to the line of movement of the bar, adjustable to and from each other, and arranged and operated to close and open at stated intervals. 4. In combination with the tapes and the transverse clamp bar carried by the same vibratory jaws, each hung on a pivot, adjustable in the clamp bar, laterally projecting slide rods, provided with pins, adjustable thereon, springs and cams. 5. In machinery for folding paper and other material, the combination, with folding mechanism, of conical rolls, which receive and partially turn the sheet before presenting it to the said folding mechanism.

No. 240,399. Lead and Crayon Holder.—Chas. Frederick, New York, N. Y., assignor to James Griffith, same place.

In combination with the outer casing, the inner tube, provided with a conical head at its lower end, the annulus secured within the outer casing, provided with spring fingers extending into said head, and the annulus carrying loosely pivoted clutches, setting through slots in the inner tube and adapted to grasp the lead, and the spring by which said inner tube is held and returned to a normal position.

No. 240,409. Canceling Stamp.—Frederick E. Grothaus, Boerne, Tex.

No. 240,469. Pen Holder. — Conrad H. Showaker, Philadelphia, Pa.

1. A pen holder consisting of a barrel and a spring-pressed head which moves therein, the parts holding the pen between them, in order that the forward movement of the head and pen may free the pen from the head as well as from the shell of the pen holder. 2. A sliding spring-pressed plug or head recessed and shouldered at its forward end, in combination with a barrel, the parts being constructed and arranged to hold the pen between them and against the shoulder of the plug or head, in order that the forward movement of the head may free the pen from all parts of the pen holder.

REISSUES.

No. 9,646. Card File.—Jacob Behel and William A. Talcott, Rockford, and William A. Amberg, Chicago, Ill.; said Amberg assignee, by mesne assignments, of Behel and Talcott aforesaid and Mary A. Prentice, administratrix of Miles S. Prentice, deceased. Original No., 158,390, dated January 5, 1875.

No. 9,653. Paper Perforating Machine.—Roswell T. Smith, Nashua, N. H. Original No., 223,866, dated January 27, 1880.

No. 9,667. Manufacture of Bronze Powder. — L. Brandeis.

GOLDEN BRICKS.

There is a certain brick building in Cheyenne, Wyoming, which is almost worth its weight in gold. The bricks in its walls are impregnated with this precious metal. The discovery was made accidentally by a gentleman who has an office near by. He frequently noticed shining yellow particles in the bricks, and imagining that the colors were gold, he took out a brick from the wall for the purpose of ascertaining the facts. This brick he first pulverized, and then "panned out" the colors. He could not get rid of all the dirt, and concluded to send the residuum to an assayer in Denver. In a few days the assay certificate arrived, and showed that there was 38c. worth of gold in the brick. The gentleman then took out two other bricks in different parts of the building and pulverized and panned them as he had done the first. The same assayer gave his certificate as follows: Sample No. 1, gold, 47c.; sample No. 2, gold, 24c. After considerable inquiry it was learned that the bricks had been made in a yard that was formerly situated on Crow Creek, near Cheyenne. Further investigation among the oldest residents showed that mining was at one time carried on along Crow Creek; but the miners thought that the pay wasn't big enough, and they therefore abandoned their claims. It was near these claims that the brickyard mentioned above was started.

STAINS FOR POTTERY.

In preparing these stains, the ingredients must be ground remarkably fine, and then so perfectly dried as not to leave the least humidity, after which they must be ground again with oil prepared for the purpose, composed of one part of balsam of sulphur, one part of amber oil, and as much turpentine as will render them of a proper consistency. They may then be used with ease for printing various devices on biscuit ware:—

Blue Stain—5 parts blue calx, 2 parts frit for glazes (without oxide of tin), 1 part flint glass, 1 part enamel blue.

Yellow Stain—3 parts yellow under glaze, 1 part frit for glazes, ¼ part chromate of iron.

Green Stain—3 parts blue stain, 1 part yellow stain, ½ part enamel blue green.—*Pottery and Glassware Reporter.*

NEW GOODS! Manufactured and Just Offered to the Trade by **NEW GOODS!**

ACME STATIONERY AND PAPER COMPANY,

117 Fulton and 52 Ann Sts., New York.

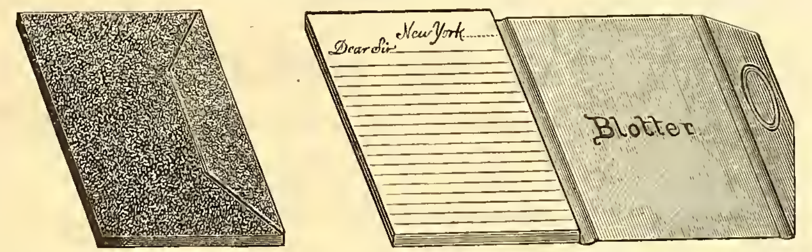
LAWYERS' BRIEF BOOKS.—(Copyrighted December, 1880.)

Made of our best Manilla writing paper in four sizes, bound in heavy paper covers, with an index printed on one side, and a filing blank on the other, so as to fold like a Lawyer's Brief. These have been highly approved by many prominent lawyers as meeting a want long felt by the profession, and will find a ready sale when brought to their attention. Size, 8x10 inches, oblong, 24, 40, 60 and 100 pages.

PORTFOLIO TABLETS.—(Patent Applied for.)

THE attention of the trade is particularly called to this **new line of Fine White Writing Papers** in Tablets, handsomely bound in PORTFOLIO STYLE, with a sheet of best blotting Paper attached.

Decidedly the BEST, MOST CONVENIENT and HANDSOMEST package of Writing Paper in the Market.



CLOSED. OPEN FOR USE.

THIS Portfolio Tablet has been highly approved by every one in the trade who has seen it, as an article that will sell at sight, and that will be needed in the stock of every stationer.

SIZES AND STYLES.
Billet, Octavo, Commercial, Packet Note, Bath and Congress Letter.

WHITE DESK OR SCRATCH PADS. (Unruled.)

No. 101, 2¼x4 inches; No. 102, 3x4¾ inches; No. 103, 3⅝x6 inches; No. 104, 4x6¾ inches; No. 105, 4½x7¼ inches; No. 106, 5x8 inches; No. 107, 6x8½ inches; No. 108, 8x10 inches; No. 109, 8x12½ inches.

PARCHMENT COPYING BOOKS AND COPYING PAPER,

POSSESSING THE FOLLOWING ADVANTAGES OVER ALL OTHERS:

The paper is a Rich Lemon Color. Is stronger than any other. It is thick, and can be readily handled while damp. Can be written upon with pen and ink. Makes a perfect and instant copy. The paper being pure, and free from injurious chemicals, insures a permanence to all copies.

Regular Sizes of Books and Paper always on hand.

—ALSO, MANUFACTURERRS OF THE—

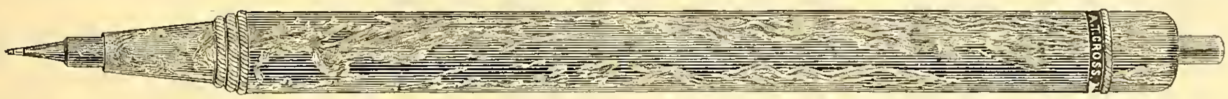
Celebrated Neutral Tint Papers,

For PROFESSIONAL and EDUCATIONAL Purposes.

☞ **For Price Lists and Discounts address as above.**

PERFECTED STYLOGRAFIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS**, the last, June 29, 1880, being the most important and giving the name **Perfected**. All cuts are exact size



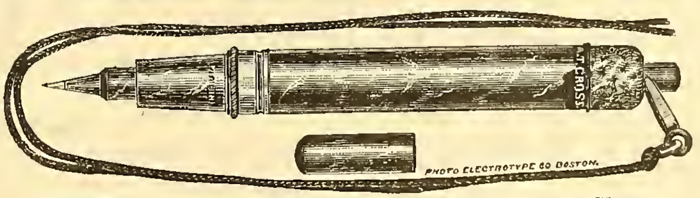
MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller oarrels. Fits Hambler's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra long. Holds most ink, except the **Maximum.**

SHORT.—Most widely known and sold heretofore; but Maximum is better for desk or Hambler's Pocket Giant for Vest Pocket or Cord. So this will be largely superseded.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined.

☞See Descriptive Circulars.



GIANT, with Cord and Gold Ring, same price as Short.

Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, both of which will have all new improvements.

☞See Descriptive Circulars.

VEST GIANT, Plain, - - $2.50.

All Styles up to $4.00.

☞ **VEST GIANT.—The Cheapest PERFECTED Pen made.**

This Miniature Cut is for Agents' Cards, Newspaper Advertisements, &c., &c., &c.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Warden Gay, of Boston, is agent in New England, for Obpacher Brothers' goods.

Victor E. Manger & Petrie are doing quite a business in the machinery line again.

S. Garre, with Obpacher Brothers, left for Boston this week with a line of birthday cards.

Iwan Von Auw, of Liebenroth, Von Auw & Co., sailed per steamship Westphalia for Europe on Thursday of last week.

Robertson Brothers, Holyoke, Mass., are manufacturing tissue manillas and toilet papers, and will quote prices on application.

J. H. Hamburger shows this week several new designs in panel goods. Among them are some excellent paintings representing fish.

Theodore E. Smith, with Ivison, Blakeman, Taylor & Co., is now in Washington for the purpose of advancing the Spencerian pen trade.

Aikin, Lambert & Co. have been awarded the honors of the Melbourne International Exhibition for their gold pens and pencils. This award is well bestowed.

It may, perhaps, be of interest to the trade to know that President Garfield taught school at one time with Mr. Spencer, of the Spencerian writing books and pens.

Frank C. Johnson, who was for several years with Nagle & Co., Philadelphia, has formed a connection with Liebenroth, Von Auw & Co., and will be in future one of their representatives on the road.

Barnicott & Son, 44 Fore street, Taunton, England, publish the "General Book Catalogue" of English books for the retail trade. This catalogue is said to be useful to booksellers in every country. It is supplied to subscribers only.

R. M. Cameron, 22 St. Giles street, Edinburgh, Scotland, forwards illustrated catalogues of educational apparatus, kindergarten materials, &c. His lists appear to be very full and complete, presenting features which deserve attention.

L. Prang & Co.'s new factory building in Boston is now roofed and work has been started on the interior. Every effort is being made to push matters as fast as possible, and it is expected to have the factory in running order by July 1.

Theo. Leonhardt & Son, Philadelphia, have received a large invoice of French cards in 35 series. This firm says that it has a larger variety of these cards than any other house, and that it was the first to import and make a market for French cards in the United States.

J. H. Bufford's Sons have in course of preparation ten new styles in chromo cards, each containing from four to six designs. As they are something new as well as attractive, the firm anticipates a large sale for them when placed on the market, which will be in about a week hence.

Max Griebel, of L. Prang & Co., will leave on Saturday, per steamship Cimbria, for Europe, for the benefit of his health. He intends to do all the principal centres in Germany and France, and expects to return about July 1. For a safe and pleasant voyage and a speedy convalescence he has the best wishes of a large circle of friends, among whom THE STATIONER is included.

C. Potter, Jr., & Co., New York, report that during the last month they have received fifty per cent. more orders for their patent lithograph and printing machines and Scott's patent web printing and folding machines, than they have received in any previous month since the existence of the company. The largest order received in any previous month was immediately after the Chicago fire of 1871, in which month they received orders for forty printing presses. Owing to the great pressure brought to bear on their extensive workshops, which cover five acres—and which are now running day and night, fitted up in every way to facilitate the work, and lighted by electricity—the company has concluded to double its capacity, and has purchased an adjoining tract of land for that purpose, and ordered machine tools to the value of $75,000.

C. Potter, Jr., & Co. report that they have purchased the exclusive right to manufacture the Hoe web perfecting press, and also the Bullock web perfecting press, for the large sum of $725,000. As C. Potter, Jr., & Co. have also the right to manufacture Scott's printing and folding machine, which they assert is decidedly the best newspaper machinery ever produced, it is quite evident that they intend that the Hoe and Bullock presses shall become things of the past, and that the Scott press will be the only one of its kind manufactured in the United States.

Henry Levy & Son show this week a neat line of silk Japanese panels. These goods consist of raised silk figures on handsomely decorated panels. This house also shows a line of caricature cat cards, which consists of cards containing pictures of cats dressed up like men and women. The demand for one design of the latter is said to be very great.

Charles J. Cohen, 505 Chestnut street, Philadelphia, has a new lot of oil board in work at his factory. This board is made under Mr. Cohen's personal supervision, on a plan originated by the late Henry Cohen, and it is stated to be superior in quality of finish and toughness to the best English makes.

George B. Hurd, 47 Beekman street, New York, general agent for Z. Crane, Jr., & Brother, carries a fine line of goods in a large variety. This firm incloses a handsome blotter with each box of its extra fine papers, a novel and useful idea. Its water-mark of a spinning wheel has been patented.

A. S. Alfred, for the past four years with Brown & Ganson and their predecessors, has resigned his position with that firm, and accepted a position with Hard & Parsons, 126 and 128 Duane street, New York, in whose interest he will call on his western friends regularly.

J. L. Shoemaker & Co., Sixth and Minor streets, Philadelphia, have started a leather factory at Brooklyn, giving particular attention to the manufacture of colored skivers. This factory is an adjunct to their bookbinders' warehouse at Philadelphia.

The demand for "Lockwood's Directory of the Paper and Stationery Trades" is rapidly exhausting the edition. Orders should not be delayed if copies are wanted.

James Arnold, blank book manufacturer, paper ruler and book binder, Philadelphia, has removed to 531 Chestnut street.

Emery & Forester, booksellers and stationers, Lansing, Mich., have dissolved partnership. Wesley Emery continues.

J. H. Cosgrove, publisher of the *Vindicator*, Natchitoches, La., has been burned out.

L. Miller & Co., dealers in notions, Galesburg, Ill., have failed.

J. W. Simpson, printer, Port Byron, Ill., has been burned out.

Chas. Maxwell, publisher of the Modesta (Cal.) *Herald*, has sold out.

J. A. Smith, printer, Spirit Lake, Ia., has sold out to A. B. Funk.

The stock of J. S. Gerard, stationer, &c., Woodbridge, Cal., has been attached.

I. A. Stevenson, publisher of the *Dawn*, Mount Pleasant, Pa., has sold out to J. McCurdy.

J. B. Neale, publisher of the *Union Free Press*, Kittanning, Pa., has sold out to G. S. Crosby.

Lyman Nangle, publisher of the *Republican*, Greencastle, Ind., has closed out. He has quit the business.

Ginns, Heath & Co., booksellers, Boston, Mass., have admitted to partnership George A. Plympton, of New York.

William P. Raynor, of Samuel Raynor & Co., will sail on Saturday in the Britannic for a trip to Europe, to be gone two or three months, for health and recreation. It would not be at all surprising if Mr. Raynor's friends received letters from him while away, dated from Rome, giving his experiences in the Holy City.

Max Griebel, of L. Prang & Co., has just returned from headquarters in Boston, and reports that great efforts are being made to get out the Christmas samples at the earliest time possible. The most of the line is in an advanced condition, and the house expects to start their travelers with these goods before the end of May.

The Springfield Pulp and Paper Manufacturing Company, of Springfield, Ill., has been closed upon a chattel mortgage. The company was incorporated in June, 1875, with an authorized capital of $100,000, of which $85,000 were paid in. It has been embarrassed for some time past, and never paid any dividends. The State National Bank held mortgages for $15,500 on the real estate and chattels.

The Woodsdale Paper Company, Woodsdale, Ohio, has made an assignment to Charles H. Wardlow for the purpose of a settlement and in order that the property may be sold to the highest bidder. The company was organized in 1867 with a capital of $150,000, and was owned principally by a Cincinnati firm of paper dealers. In June last the mills were destroyed by fire, involving a loss of $60,000; insured for $35,000, and they were not rebuilt.

Among the visiting members of the stationery and paper trades in the city this week were Julius Basinski, of Julius Basinski & Brother, Bozeman, Montana Territory; Charles G. Yohn, of Yohn Brothers, Indianapolis, Ind.; A. L. Bancroft, of A. L. Bancroft & Co., San Francisco; H. B. Nims, of H. B. Nims & Co., Troy, N. Y.: Edwin Dresser, of the Cambridgeport (Mass.) Diary Company; Alston Adams, Albany, N. Y.; John Keith, Turner's Falls, Mass., and Arthur Bott, Holyoke Glazed Paper Works.

At a meeting of the creditors of L. F. Lawrence, Adams & Co., manufacturers of stationery, etc., Arch street and 169 Devonshire street, Boston, held last week, the counsel for the firm said that the best offer it could make would be 55 cents on $1, and this only on condition that a settlement should be effected at once, so that there should be no more expense incurred. After a considerable time spent in a fruitless endeavor to reconcile all the elements represented at the meeting to a common basis of settlement, it was voted that the firm should immediately go into voluntary

insolvency, and this the debtors expressed their willingness to do.

W. M. Jackson, dealer in notions, Sharon, Pa., has been closed by the sheriff.

P. W. Boyd & Co., booksellers, Parker City, Pa., have sold out to W. H. Boyd.

E. Heffelfinger, publisher of the *Herald*, Shamokin, Pa., has been burned out.

Hayt & Joy, booksellers and stationers, Santa Fé, New Mexico, have dissolved partnership.

Shannon & Powell, publishers of the *Southern Homestead*, Meridian, Miss., have been burned out.

Hood & Chamberlain, manufacturers of notions, Cumberland (Valley Falls), R. I., have dissolved partnership; William J. Hood continues.

Geo. B. Kirkbride has retired from the firm of Kirkbride, Whital & Co., wholesale and retail booksellers and stationers, Minneapolis, Minn. The style is now Whital & Co.

J. R. Hope, representing the Philadelphia house of L. Prang & Co., sailed on the steamer Ethiopia for Glasgow on Saturday. He will make a run through Scotland and England, returning to Philadelphia by the end of June, when he will resume work.

R. Aaron, stationer, at 223½ Fulton street, Brooklyn, has made an assignment to his brother-in-law, preferring several of his relatives as creditors, from whom he claims to have borrowed money. One of his creditors asserts that he bought goods within a week of his assignment.

A. M. Collins, Cope & Co., 171 William street, New York, are the sole agents for the sale of Potsdamer & Co.'s (Philadelphia) productions in black folds and single cards, chromo cards, &c. The new numbers for spring in folds are 20, 21, 22 and 23. The new makes in chromos are 118, 119, 120, 121 and 122.

P. P. McHugh has got his card and cardboard establishment all in good working order again, and has placed in it an entire new stock of goods to work on. He has some job lots of damaged goods left over from his late fire which he offers at a bargain. The goods are only little damaged, and can be utilized for many purposes.

New chromo cards lately issued by A. M. Collins, Cope & Co., embrace No. 235, a series of four cards in thirteen colors, entitled "Courting in the Moonlight," No. 285 is Giroflé and Girofla, a system in four comic designs at $5 per M. Another quite pretty one is a set of actresses in eight designs, and titled "The Mirror." They are in eight colors.

Philip Hake has been renovating his sample room, situated on the second floor of his store. Hereafter the elegant samples of cards, papeteries and other fine stationery will be displayed in a number of large show cases arranged around the room, thus protecting them from being soiled. Mr. Raisbeck is supervising the work, and is displaying his usual good taste.

John C. Evins, of the firm of Evins & Robinson, "Atlanta Paper Box Factory," Atlanta, Ga., has sold out his interest to W. G. Robinson, Jr., W. J. Campbell and Ellison R. Cook. The new firm is to be known as Robinson, Campbell & Cook, the firm of Campbell & Cook, jobbing stationers, being merged therein. The new firm assumes the liabilities and collects the unpaid accounts of the late firms of Campbell & Cook and Evins & Robinson. It will continue the manufacture of paper boxes, and will carry a full stock of papers, stationery and printers' supplies.

L. Prang & Co.'s new birthday cards are far ahead of last season's goods, and meet with a large demand. Fringes are being used on them to a great extent, and most of the cards can be had single or double. Particular attention is invited to the tasty backs which this house has introduced. They are chaste and neat in design and much improve the appearance of the goods. Of the new series No. 35 is a large card, showing pansies and pelargoniums on a light green ground. This is a very brilliant card, and is sold single or double, with and without fringe. No. 36 is an expensive and rich card. It is in book form, and has designs both outside and inside, the two outside showing bits of ocean, and the inside bits of nature, all being in handsome mats, which are surrounded by fringe and incased in a cover of leatherette, with cord and tassels. This card is a very handsome birthday present, and is said to sell largely at $24 per dozen retail. A cheaper but very neat card is No. 37, which shows four floral designs on a gold and gray ground. This card is sold single or double and with or without fringe. It is a cheap card and sells well. No. 38 is a double card, containing two birch bark designs. The outside or cover is a conventionalized design of the birch tree and the inside shows violets and snowdrops on a birch bark ground. A handsomely lithographed poem adds much to the beauty of the card. It is only sold double, and with or without fringe. No. 39 is also a double card, and on a gold and silver ground shows either an aster, a daisy, a sunflower, or a water-lily of natural size. One side of the cover shows the open flower and the other its back. The inside contains poems suitable for the four seasons and very handsome conventionalized designs in colors. This card is also sold with or without fringe.

"The Woman in Black" has just been published by T. B. Peterson & Brothers, Philadelphia, in a large duodecimo volume, paper cover, price 75 cents, in uniform style with Peterson's editions of "Xenie's Inheritance," "Dosia," "Savelli's Expiation," "Lucie Rodey," "Marrying off a Daughter," "Philomene's Marriages," "The Trials of Raissa," "The Princess Ogherof," "Dournof," "Bonnie Marie," "Markof," "Pretty Little Countess Zina," "Sonia," "Gabrielle" and "A Friend," by Henry Greville.

F. C. Philbrick & Co., manufacturing stationers, 103 Devonshire street, Boston, have been succeeded by Lucien Sanderson & Co. The new firm has bought the stock, fixtures, &c., of the old house, and will continue business at the old stand.

A. W. Stuart, manufacturer of and wholesale and retail dealer in blank books, &c., Philadelphia, Pa., will be closed out on the 2d of May next.

The style of the Eagle Publishing Company, printer, Minneapolis, Minn., has been changed to Hennig & Kruckeberg.

It is currently reported that a change will take place in a prominent John street stationery house about May 1.

Jonas Johnston, of Link & Johnston, publisher of the *Baptist Herald*, Houston, Texas, is dead.

Thos. D. Warren (et ux.), dealers in fancy goods, Carthage, N. Y., are advertising to close out.

A. E. Willard, bookseller and stationer, Pittsfield, Mass., has been burned out. Insured.

The Fergus Falls (Minn.) *Advocate* has been sold out to Sawbridge & Brocklehurst.

I. C. Sheppard, stationery, &c., Grand Rapids, Mich., has made an assignment.

W. S. Sweet, printer, Taunton, Mass., has changed his style to Sweet & Simonds.

E. D. Upham & Co., printers, Randolph (West), Vt., have dissolved partnership.

M. C. Elliott, dealer in stationery, Okolona, Miss., has sold out to Walter Cain & Co.

Stephen Paxon, of Stephen Paxon & Co., publishers of Sunday school books, St. Louis, Mo., is dead.

Disbrow Brothers, dealers in twine and paper, New York city, have renewed limited partnership to May 1, 1884.

C. A. Arnold & Co., booksellers and stationers, Waxahachie, Texas, have dissolved partnership. C. A. Arnold continues.

ANTIQUE CARVING.

Among certain recent additions to the rich and varied collection in the Edinburgh Museum of Science and Art, there is a set of reproductions in plaster, about a hundred in number, of old German works of art, which has just been laid out in four cases on the ground floor of the great hall. Made by Herr Kreittmayer, Munich, they render available for educational purposes some of the choicest treasures in the great museum of that artistic capital. The most important piece is, perhaps, a cast of an ivory money cabinet, showing on the sides enriched panels filled in with figures in high relief, surmounted atop with an equestrian figure of an emperor, and having statuettes of dethroned kings at the four corners. In the admirable sharpness and precision of the copy, one can readily realize the character of the original, which is considered a fine specimen of the seventeenth century ivory carving. There are also several beautiful casts of carved ivory tankards and of silver goblets, elaborately enriched with battle subjects or mythological designs. Highly noteworthy, too, is a copy of a *martel de fer*, in chased silver, made for Pope Julius III., and which now ranks as one of the gems of the Bavarian national collection. Then there are casts of early bronzes, including some interesting candlesticks of the twelfth century; as, also copies of wood carving, in the form of caskets of a still earlier date. A number of copies of miscellaneous objects—carved panels, frames, plaques, and capitals, all of curious and interesting character—complete a series which, while full of suggestions for the art workman, possesses no small attractions for the amateur.—*Crockery Journal.*

COLORING DRAWINGS.

Use the best colors only; do not mix with too little water; if the first coat is not dark enough, wait till dry and give another coat. Make up your mind what portion you are going to color before applying a drop of paint; do not stop in the middle of a wash, but when once the brush touches the paper, go straight through with the portion you begin. If obliged to leave the job for a minute, paint up to a line (a dotted line will do if there is not a "full" one handy); this will hide the join between the two patches of color. Do not let your brush be too wet, nor yet too dry; a few trials will soon show you the right amount of color to take up. Use the best English drawing paper; if you then find any trouble, a little prepared ox gall mixed with the color will do wonders. Clouded drawings, as a rule, are caused by letting the work dry and going over the edges again when starting afresh. No piece of coloring should be left until finished.

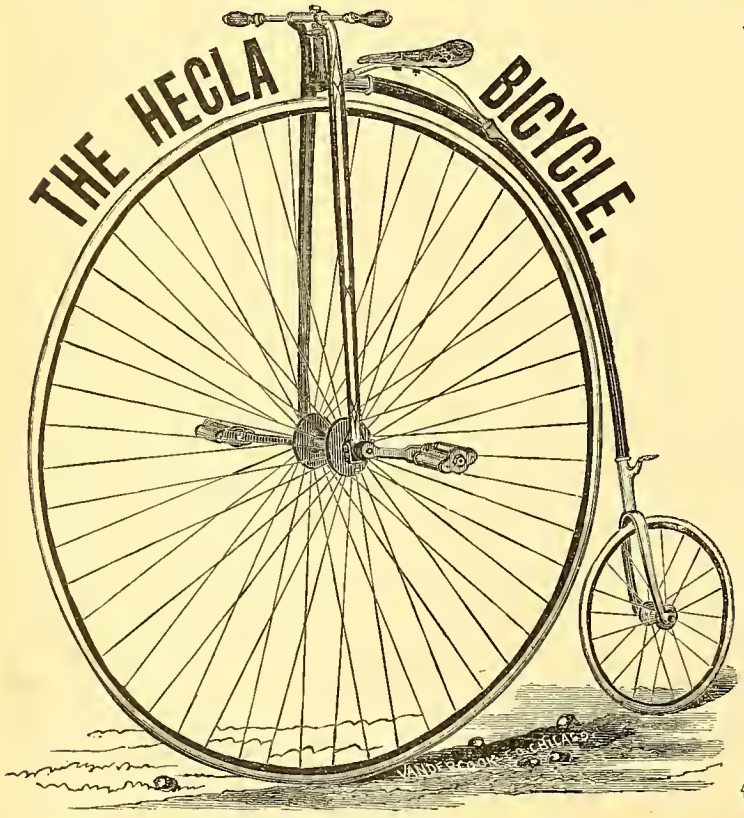
FOR BOYS. THE HECLA BICYCLE. FOR BOYS.



A. G. SPALDING & BROS., - Sole Agents,
108 Madison Street, Chicago.

THE HECLA BICYCLE is the latest and most approved Youth's Bicycle yet invented; and, in model and general appearance, it resembles the high-priced gentlemen's roadsters. The wheels are made with rubber tires, and also with flat iron tires. Front forks are made of solid malleable iron, with steel handle rods, hollow tapered backbone, malleable iron hub and steel axle, spring leather seat. All main bearings adjustable.

THE HECLA BICYCLE, WITHOUT RUBBER TIRE.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, APRIL 28, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

CONUNDRUMS are again "the rage." Several are propounded by our correspondents. We have been obliged to "give it up." If anybody knows, do tell us, or advertise—better advertise and then everybody will know.

SUMMER is at hand and spring has scarcely made its sign. Warm weather, the precursor of midsummer dullness, has followed so close upon the chills of winter that we are faiu to wonder what has become of the vernal season.

ALTOGETHER the season is abnormal. Not only in respect to the incidents of the weather, but also in the features of trade which are so largely dependent upon the couditions of travel and transportation, is this true. But despite the difficulties met with trade has not been bad, and it would seem that where business has been retarded it has not failed to assert its claims as soon as the opportunity was given it.

NEVERTHELESS, it may be safely said that there has been some loss occasioned by the set-backs to commerce. Prosperous as the year has been, it seems certain that the trade movement would have been much larger had not the extraordinary winter opposed obstacles which no human appliances could subvert. But, how shall it be with the coming season? People who, perforce, have had to tide over the spring season must be wanting to buy, and perhaps during the summer may add enough to the amount of business to be done to enlarge the usual summer's business. The promise for the fall and holiday trade is good, and what with the advances in wages to a large proportion of the laboring classes we look to see an enlarged demand from consumers.

IT is claimed that in many of the competitions for government contracts proposals are made to furnish at a loss, or, more properly speaking, under cost—if the bidders or contractors intend to deliver goods fully up to sample or in strict conformity to the specifications under which they make their proposals. Now, we are not disposed to think that any manufacturer is going to take a contract where he thinks he is going to be out of pocket by fulfilling it, and none of the trade will believe in such disinterestedness. It follows, then, if this view of bidding for contracts is correct, that somebody is to be cheated. Will it be the bidder who gets the contract at figures which make everybody else stand aghast? While the Washington correspondents are engaged in overhauling the public business, it would be well for them to find out how some of this stationery contract business works. There may be some fun in it. If there are officials who wink at violations of contracts and the deterioration of goods let us know who they are; and if there are contractors who agree and propose to furnish one thing, and who really give a cheap substitute therefor, let us know that, too. It is something in which the public as well as the trade are interested.

ON Wednesday next the proposals for furnishing postal cards for and during a period of four years from and after July 1, prox., will be opened by the Post Office Department. We devoutly hope that the new cards will be all that the public requires and not of a kind to give rise to complaints which we have noted in the past. We are aware, of course, that perfect uniformity is not invariably attainable in the manufacture of any grade of paper when quantities and the conditions of supply, such as are required in the postal cards, are considered; but we submit that deterioration should always be guarded against. It is not right that supplies should sometimes fail to come up to, but never exceed, the standard. We understand that the government intends to rigidly enforce the terms of the pending contract, and that the successful bidder will be required to keep up the quality of the cards. The exact character of the stock used at present is, we believe, known to the Post Office Department; and as a frequent inspection of the process of manufacture is one of the conditions of the contract, we may be reasonably certain that, if the government inspector does his duty, the successful contractors will be held closely to the specifications of the award. It must be noted that, in all of the calls for supplies of late the government has debarred the use of ground wood as a constituent of paper. Chemical fibre does not, we believe, come within the prohibition, and in making proposals the bidders would do well to bear in mind this feature. The contract for postal cards is, we believe, the largest single contract for paper which is given out by the government. It involves a product of six to seven thousand tons of postal card paper to satisfy this contract.

Trade Mark Registration.

NEW YORK, April 20, 1881.

To the Editor of The Stationer:

My attention has been called to an article in a recent issue of THE AMERICAN STATIONER concerning a letter addressed to the United States Trade Mark Association. Considering that the letter in question was never made public, there was no reason for any comment upon it, and certainly, if nevertheless comment was made, the letter itself should have been published.

The author of the article entirely mistakes the meaning of the letter, and he does not correctly state the suggestions made therein.

The word "refund" has a specific meaning, and it does not appear in the letter at all. Nor does the suggestion appear—that all expenses for the employment of a solicitor or lawyer, &c., should be allowed, although the employment of a solicitor is as proper and necessary in trade mark applications as in patent applications.

The plain meaning of the letter was that no renewed cost or trouble should be forced on par-

ties whose applications had been already accepted, and registration granted thereon, by the Commissioner of Patents; and that their papers already in the possession of the government should be used for new registration, without charge. Very respectfully yours,

THE WRITER OF THE LETTER.

Anti-Nervous Penholders.

NEW YORK, April 23, 1881.

To the Editor of The Stationer:

In your answer to correspondents we notice an error in the reply that a certain house controls anti-nervous holders.

There are over fifteen different kinds of anti-nervous penholders controlled by several jobbers and manufacturers, among whom we may mention A. W. Faber, Ivison, Blakeman, Taylor & Co., American Pencil Company, Tower Manufacturing Company, W. Wallach and G. W. Leman & Brother. Yours respectfully,

G. W. LEMAN & BROTHER.

NOTE.—The only penholder specifically known to us as the "anti-nervous" is that which we noted last week. We give the trade the benefit of the above statement. They can take their choice.—ED.

ANSWERS TO CORRESPONDENTS.

F. G. T. & Co.—Ask who makes or sells Baker's lead pencils?

Ans.—We do not know and inquiry availeth not.

W. G. J. & Co.—Want to know who makes the "Linwood Mills" and the "Ledger Mills" papers?

Ans.—Another hard one. They are special marks. We believe the "Linwood" is made at Holyoke, and the Tower Manufacturing Company sells it.

M. & Co.—Want the address of manufacturers of Cole's newspaper file?

Ans.—This is one of the hardest. We cannot tell.

CHATTEL MORTGAGES.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, O., April 26, 1881.

Sultry weather and booming business—winter has stepped out and summer has stepped in. Everybody is up to his eyes in work. All of the trade of spring and early summer is concentrating in this week, to extend into next week, and perhaps into the week following. Of course this is delightful. It's a little hard on the clerks and it brings weariness to all; but it brings also what is the object of business—profit. Employer and employee are alike interested in attaining that goal. It is the still pool that is befouled with stagnation, while the waters flowing from natural well springs and stirred by the breezes sparkle with their sweet purity and dance with delight. In business, activity is a condition and concomitant of life, while repose is death.

I saw one of Poundsford & Co.'s traveling men just in from a reconnoissance of southern Indiana and Illiuois. He said that the roads were indescribably bad. They must be good by this time. It was ten days ago when he saw them; and while they become horrible to behold upon very slight provocation, they recuperate and grow delightful almost as rapidly. Let us hope that they are good by this time; if they are not they soon will be, for it is not in the nature of that soil to remain long out of harmony with the present delightful weather. My informant furthermore bore testimony, that the country trade, in spite of the vile roads and pitiless winter, had flourished—had sold out—that their Christmas trade was beyond their expectations—that their stocks were pretty much exhausted.

I have been investigating with a view to ascertain how wide awake the village and country town stationers are, whether they keep abreast with the times. It is with regret that I write the record against them, the older ones especially. Dealers here tell me that orders from consumers from country places for finer goods are coming in from a wider range of country and with more frequency than ever before. They tell me, too, that in many small towns young men with enterprise, pluck and energy set up and, with a modern line of goods to suit all tastes, eclipse good men long in the business, with only the fault of being a little old fogyish and mistakingly supposing they can control or repress the taste of consumers.

The manufacturers here rejoice and are glad; J. R. Mills & Co., Bradford, Poundsford, W. B. Carpenter & Co., Woodrow, in fact, all of them, join in one general pæan of genuine calm—not exultant or passionate, but tempered—delight. Their lines are now cast in pleasant places. All of this is cheerful. Chatfield and Woods, Stewart, the Snider's Sons, and other wholesale dealers in the material, join their deep bass in the same happy chorus.

Russell, Morgan & Co. are manufacturing glowing pyrotechnic work in the way of colored show bills and labels. That is their specialty. You should see a resplendent calendar they printed this year.

John Holland has on hand forty new and original designs for charm pencils, samples of all of which he will have probably by August, turning them out meantime in rapid succession.

Payne & Co., envelope manufacturers, who were burned out on Home street, this city, recently, the only manufacturers here, will not set up again. W. B. Carpenter & Co. made a big strike by purchasing the whole stock of envelopes and papers belonging to that firm, and left uninjured by the fire. It comprised three million envelopes. They refused one thousand for the bargain in twenty-four hours after making it.

We have had visits during the past fortnight from the following named representatives of the trade, viz.: J. B. Gunn, from Eberhard Faber, New York; Wm. Clogston, from Powers Paper Company, Springfield, Mass.; Mr. Kutnow, from Kutnow Brothers & Co., New York; Mr. Dewey, from White, Corbin & Co., Rockville, Conn.; Mr. Freeman, from American Pencil Company, New York. Mr. Mundy is still in the city and says he thinks he could remain in Cincinnati and sell goods for the house he is representing every day in the year. PRINCE WILLIAM.

The glass works at St. Goblain, Chauny, Circy and Mountcluon, in France, and Mannheim and Stolberg, in Germany, have produced plain white and silver plates varying in weight from 500 to 1,600 pounds. Some of the mirrors for the new Grand Opera House at Paris are 45 by 52 feet. They also make glass tiles, pressed in imitation of the clay article; these tiles are used for roofing, and are molded in such a shape that they can be laid alongside of one another, making tight fitting joints without any cement or mortar. Another article produced in large quantities at these works is glass flooring, made of flags or slabs of rough cast glass; pavements of glass intended for carriage ways are likewise made in the same style as the slabs.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, April 27, 1881.

THE MONEY MARKET.—The money market continues to work easily. For call loans the ruling quotation has been 4@5 per cent., on government bonds 3 per cent., with 4 paid occasionally. On time loans the rate has been 3@4 per cent., according to collateral. Commercial paper quoted at 4½@5½ per cent. The "bull" movement in stocks hangs fire, the market since our last having been alternately weak and firm, with the undertone rather strong. The "bulls," however, show no lack of faith in an early rise. The government bond market has been active and generally steady, with the exception of new 4s, which have advanced ⅛ per cent. Railroad mortgages were in fair demand, but the market was irregular. Foreign exchange has further advanced on an increased demand and reduced supply of bills. The closing actual rates for prime bank sterling were $4.82½@4.83 and $4.85@4.85½. Cables closed at $4.85½@4.86, and prime commercial bills, which are not plenty, at $4.81¼@4.81¾.

THE PAPER MARKET.—There is very little that is new to add to our last report of the condition of the market. Manufacturers everywhere seem employed at fairly steady prices, while dealers, although not rushed with orders, are doing a respectable aggregate business. The trade, as a general thing, are not carrying very large stocks; in fact, some houses have a very light quantity of goods on hand. The only grade which shows any particular tendency to easing off in price is super-calendered book paper, which we quote at the range of 9@10c. Other grades are steady at quotations.

THE STATIONERY MARKET.—Although the market has become more genial, it does not seem to exert much influence upon business. The season is now so far advanced that there is little probability that the shortage thus far this year can be made good during the remainder of the spring. Notwithstanding that trade this year has fallen considerably below the estimates or expectations formed at the outset, its present condition is unquestionably healthful if disappointing to those who placed their estimates too high at the outset. There is no doubt that the principal distributive centres of the country became overstocked with many kinds of goods at high prices during the so called "boom" of last year, and the slow movement during the present season is accounted for by many for this reason. The work of preparation for the fall still goes on with considerable activity. Prices of most goods continue steady.

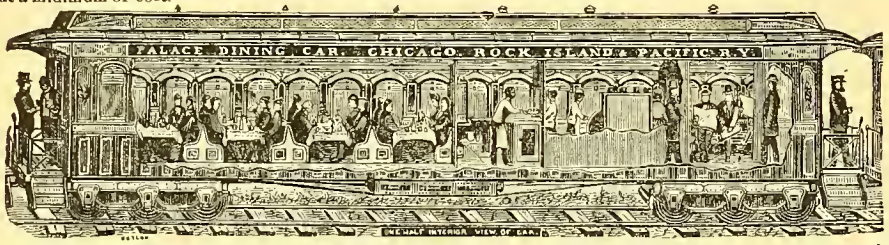
"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.



That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,

COLORING METALS.

Metals may be rapidly colored by covering their surfaces with a thin layer of sulphuric acid. According to the thickness of the layer and the duration of its action there may be obtained tints of gold, copper, carmine, chestnut brown, clear aniline blue and reddish white. These tints are all brilliant; and if care be taken to scour the metallic objects before treating them with the acid, the color will suffer nothing from the polishing. On making a solution of 640 grains of lead acetate in 3,450 grains of water, and warming the mixture to 88 or 90 degrees, it decomposes and gives a precipitate of sulphuret of lead or black flakes. If a metallic object be immersed in the bath, the precipitate is deposited upon it, and the color produced will depend on the thickness of the deposit. Care must be taken to warm the objects to be treated gradually, so that the coloration may be uniform. Iron treated in this way has the aspect of bluish steel; zinc, on the contrary, becomes brown. On using an equal quantity of sulphuric acid, instead of the lead acetate, and warming a little more than in the first case, common bronze may be colored of a magnificent red or green, which is very durable. Very beautiful imitations of marble may be obtained by covering the bronze objects, warmed up to 100 degrees, with a solution of lead thickened with gum tragacanth, and afterward submitting to the action of the precipitate spoken of above.

A CALL FOR A TRADE MEETING.

The following call for a convention of booksellers and stationers has been issued:

After consultation and correspondence with several leading members of the trade, it has been decided to call a convention of the booksellers and stationers of the Northwestern States, to be held in Chicago, at the Grand Pacific Hotel (where special rates have been secured), Wednesday, June 8, 1881, at 11 o'clock A. M., for the purpose of considering the general condition of the trade, and adopting such organization and taking such action as may seem advisable for the interest of all concerned. The demoralized condition—especially of the book trade—need not be stated, as it is sadly evident to every bookseller; and it is certain that nothing can be lost by the proposed convention, while the chances are that substantial benefits may be gained by it.

By individual action nothing can be done to stem the tide of ruin that has nearly overwhelmed this interest; united, the booksellers and stationers may wield an influence that will not only appeal forcibly to the publishing fraternity, but materially aid in checking the raids of "book butchers" and "pirates" upon our dominions.

Right here is given a very clear definition of our foes, taken from an editorial in the *Bookseller and Stationer*, of Chicago:

What is a book butcher? Briefly, he is the dealer who cuts prices, and who undersells on every book that passes through his hands. He sells books at a profit of three to ten cents above cost, without any reference to the fact that it costs 10 per cent. to run business and to meet all expenses. * * * The book butcher slaughters other goods as well, if so be that his stock is a miscellaneous one—as is often the case. His aim is to attract customers, and so goods of whatever grade, books or something else, with which he comes in competition with the regular trade, are sent to the wall at ruinously low prices. Failure to secure a living profit necessitates a failure in business, a suspension of payments, a compromise with creditors, the payment of fifty cents on the dollar, or even less.

The interests of publishers and booksellers are

identical and their trade should work together for the common good, combining to banish, as far as possible, disreputable dealers from the market; but without organization the booksellers cannot make known their needs and wishes. The bookseller is as necessary to the publisher as the publisher is to the bookseller, and it seems that a slight effort would bring them into harmonious working relations.

Trade organizations have been necessary to protect the interests of nearly every department of industry and business, and in nearly every instance they have been attended with good results. There is no reason why the booksellers and stationers should not avail themselves of such method of protection, and, as in union there is strength, it is to be hoped that the trade generally throughout the Northwest will be represented at this convention, and we would respectfully urge each person who may receive this circular not only to attend this gathering himself, but use his influence to secure the attendance of each and every member of the trade. All Eastern publishers, jobbers and manufacturers of books and stationery are invited to attend the convention.

Those who propose to attend the convention will confer a favor and facilitate the arrangements of the organization by notifying, as early as possible, W. H. Watson, Aurora, Ill.

Respectfully,

West & Co., Milwaukee, Wis.
W. H. Watson, Aurora, Ill.
Crew & Brother, Leavenworth, Kan.
Chain & Hardy, Denver, Col.

McNie & Co., Winona, Minn.
Ward & Brother, Jacksonville, Ill.
Jas. Sutherland, Janesville, Wis.
Grosvenor & Harger, Dubuque.
Maxwell & Co., Bloomington, Ill.

A LARGE REFRACTOR.

A short time ago the largest refractor in the world was successfully completed by Mr. Grubb, of Dublin, who has just had conferred upon him by the university of that city the honorary degree of Master of Engineering. This instrument has a steel tube 3½ feet in diameter at the centre, tapering toward each end, of course. In length this tube is 33.5 feet, and the aperture is 27 inches. At first it was thought that the disks could be finished in a year by M. Feil, of Paris, but it took him four years to produce perfect ones, and the difficulty he experienced was the main cause of the delay of the work. Although the entire moving parts weigh seven tons, through counterpoise and other expedients they can be operated at will by one man very easily. The circles are carefully and minutely divided, and the observer, while sitting in his chair can read any of them by means of a little telescope attached to the side of the tube of the main telescope. A single gas lamp hung by gimbals at the end of the declination axis serves to light up each vernier and circle that may be required to be read. The castings of which the frame is formed are about ten tons in weight. The clock-work is controlled by Mr. Grubb's frictional governor and his new electric control apparatus. There are two right ascension circles, each two feet in diameter, one of which can be read from the eye end of the telescope, and the other from the ground floor. The declination circle is five feet in diameter, and is read from the eye end of telescope. This fine refractor is to be placed in the magnificent observatory of Vienna.

OBITUARY.

JAMES THOMAS FIELDS.

James T. Fields, the veteran publisher, poet and lecturer, died suddenly at his home on Charles street, Boston, at half-past nine o'clock on Sunday evening. Mr. Fields had been in poor health for some time, although no immediate fears of his death were entertained. He felt conscious himself that his demise would be sudden, for he was afflicted with a chronic disease of the heart from which he never expected to recover.

Mr. Fields was for many years a leading member of a firm which, under various names, flourished at the "Old Corner Bookstore," on Washington and School streets, was the publisher of Emerson, Longfellow, Whittier, Holmes, Lowell and of other prominent New England authors' works, and as director of the *Atlantic Monthly*, during the greater part of its career, was brought into closer intimacy with men of letters at home and abroad than was ever enjoyed by any other American publisher. His own tastes were strongly literary, and he had devoted himself almost entirely to authorship and the lecture platform for several years. Mr. Fields was born at Portsmouth, N. H., on December 31, 1817. His father was a sea captain, who died when he was about four years of age. He received his early education at the Portsmouth High School, taking several prizes for Greek and Latin compositions and attracting the attention of the late Chief Justice Levi Woodbury, then Governor of New Hampshire, by an English poem in blank verse, written when about thirteen years of age. Governor Woodbury advised him to continue his studies at Harvard, but that course was not taken, probably for economical reasons. About 1831 he went to Boston and obtained a clerkship in the "Old Corner Bookstore," destined to be the scene of his later career, then kept by Carter & Hendee. He soon became associated with a number of other brilliant young men, among whom were Edwin P. Whipple, Daniel N. Haskell, late editor of the *Transcript;* Elliott C. Cowden, afterward of New York, and Thomas R. Gould, the sculptor. He soon gained a high reputation within his circle of acquaintances by his poetical productions, his vast acquaintance with English literature, and his excellent critical faculty. In 1836 he delivered the anniversary poem before the Boston Mercantile Library Association, Edward Everett being the orator for the occasion. Meanwhile the firm of Carter & Hendee had sold out to Allen & Ticknor, and subsequently William D. Ticknor became sole proprietor. While still a young man, Mr. Fields was admitted to the firm along with another clerk, John Reed, and the firm name became Ticknor, Reed & Fields. By the withdrawal of Mr. Reed, some years later, it became Ticknor & Fields, and so remained for many years, during the period when it was building up a vast reputation for the almost uniformly high character of its publications. Besides the eminent poets above named, Hawthorne, Thoreau and Whipple gave their books to the world through this firm, and the works of many leading English writers were reproduced. Mr. Fields is entitled to the credit of having been the discoverer of the literary merits of Thomas De Quincey, and of having personally brought together from scattered magazines the first collection of his "Essays." In 1848 Mr. Fields read his well known poem, "The Post of Honor," before the Mercantile Library Association, Daniel Webster being the orator of the occasion. In 1849 he printed a small volume of poems for private circulation. In 1848 he made his first European tour, visiting England, Scotland, France and Germany, forming the acquaintance of such men as Wordsworth, Leigh Hunt, Dickens, Moore, Landor, Talfourd and Rogers, and becoming particularly intimate with the latter, then in a venerable old age. On his return from this first visit to Europe he narrowly escaped shipwreck on the coast of Newfoundland. He was again in Europe in 1851-2; spent a winter chiefly in Rome; was at Paris during the *coup d'état* of December 2, 1851; became intimate at Edinburgh with De Quincey and "Kit North;" was chosen a member of several clubs and learned societies, and was toasted at a corporation dinner in London, on which occasion he made a happy response. In 1854 Mr. Fields privately printed another volume of verses, and in 1858 another entitled "A Few Verses for a Few Friends." He visited Europe a third time in 1859, and added to his gallery of personal friends several distinguished authors whose works his firm published in America. At this time, or earlier, he enjoyed the friendship of Tennyson, Robert Browning, Charles Reade, Thackeray, Bulwer and Harriet Martineau. In America he was similarly intimate with Bryant, Prescott, R. H. Dana, Everett, Agassiz, Halleck, Winthrop, and in fact with nearly all the best known authors and public men. Many anecdotes are told illustrating his marvelous knowledge of the works of contemporary authors, many of whom were indebted to him for their first introduction to publicity. He is said to have been instrumental by judicious encouragement in the production of Hawthorne's delightful romance, "The Scarlet Letter," which established the reputation of that modest and retiring man of letters. When the *Atlantic Monthly* fell into the hands of his firm Mr. Fields became its virtual editor and thus exercised for many years a kind of literary dictatorship over the world of New England literature. In this congenial task he was much aided by his accomplished wife, who is herself the authoress of a recent volume of pleasing poems. The famous "Blue and Gold" series of choice poetical authors was brought out under his auspices. In 1864 the firm acquired the well known *North American Review*, in 1865 it established *Our Young Folks*, and in 1866 *Every Saturday*. Meanwhile Mr. Ticknor retired in 1864 from the firm, which became Fields, Osgood & Co., and he died the same year. In 1871 Mr. Fields withdrew from the business, which remained in the hands of James R. Osgood & Co., and some years later took the name of Houghton, Osgood & Co., and is now known as Houghton, Mifflin & Co. Mr. Fields devoted himself largely to the lecture platform, being eminently successful in his reminiscences of European celebrities. In 1873 he issued a charming volume entitled, "Yesterdays with Authors." In November of that year he delivered a course of six lectures on English literature before the Lowell Institute at Boston. In 1858 he received from Harvard University the honorary degree of Master of Arts. In person he was strikingly handsome, possessed the most genial manners, and will be remembered as an honor to and benefactor of American letters.

BLACK STAIN FOR WHITE WOOD.

A dull, deep black stain may be imparted to white woods by the following process: Procure some logwood chips and boil them in water until a strong decoction of logwood is made; brush this over the wood with a soft brush, and allow the wood to dry. Treat it two or three times in this way, and then let it get thoroughly dry. While it is drying prepare a solution of acetate of iron by soaking some flakes of iron rust, or old rusty nails, in best white vinegar. It may even be best to prepare this solution first. This may be brushed over the wood in a similar manner to that for the logwood dye, when it will be found to turn the wood a deep, dull black. It has been said that a small quantity of nut galls, ground to powder and boiled with the logwood, improved the decoction. A solution of protosulphate of iron (green copperas) may also be used instead of the acetate of iron. When the stained surface is dry it may be varnished or polished with a rag smeared with a mixture of beeswax and turpentine, or polished with French polish darkened with a little indigo. The decoction of logwood should be used hot, the other solution may be used cold.

AN ALUMINUM BATTERY.—Liebig's *Annelen* describes a novel and curious voltaic cell, which has recently been devised by Herr Wohler. The chief peculiarity is that both plates are of the same metal—aluminum—and a tolerably strong current is supplied. The cell consists of a glass vessel six inches high, filled with very dilute hydrochloric acid, or caustic soda, and containing an inner porous pot filled with concentrated nitric acid. In each compartment is placed a cylinder of aluminum provided with a projecting lug, which passes through the cover of the vessel, and acts as a contact piece for the electrodes or conducting wires. As soon as the aluminum cylinders are plunged into the acids, a current is given off sufficiently powerful to heat a platinum wire red hot.

CEMENTING LABELS TO METALS.—For attaching labels to tin and other bright metallic surfaces, first rub the surface with a mixture of muriatic acid and alcohol; then apply the label with a very thin coating of the paste and it will adhere almost as well as on glass.

PAPER MILL FOR SALE.

A party now engaged in other business offers his Paper Mill, Houses and Land adjoining it, for sale. Product, One and one-half Tons per day. This will make a snug business for some one. Price, $20,000; one-half cash, ten years to pay the balance in at four per cent. interest. Address

DESOLATION OF HIGH ART.

We are living in a veneered age—that is, such of us as want to be æsthetic, correct, and intense. High art has taken the place of comfort, and has been substituted for pleasure in nearly all the walks of cultivated life. We have high art schools, high art churches, high art matinées, and high art individuals. We have men and women in this large metropolis of ours who have become so saturated with this abominable cant that they cannot look upon a canonized plaque without exclaiming, "How consummate! How utter! How utterly utter!" We have heard it said that here, in the midst of tens of thousands of sensible men and women, there are disciples of high art so superbly correct that they will not walk on the left-hand side of the street, because the walls do not harmonize with their complexion. This is stated as a severely classic fact, and is as bad as the droll incident recently cartooned by *Punch*, of the newly married high art celebrity who brought home to his gushing wife a highly artistic teapot. "Is it not exquisite?" he says, holding it up; to which the intense bride replies, as she clasps her hands in ecstasy, "Indeed it is! O! Algernon, let us try to live up to it!" There is no end to the desolation which these high art gentlefolks are bringing upon the community. Comfortable homes are being turned into mournful receptacles of art, and violent adjectives are used to profess senseless admiration for that which nobody really cares a button about. If the despoiler comes in the person of a house painter, he insists upon a Greek tile mantel, and talks largely of the Renaissance. He wishes the balustrade to be an architectural symphony, and suggests a sunset effect in the draperies to give certain lambent devices, as it were, and then protests, after the manner of Mrs. Micawber, that he will never Tudorize Greek ideas. If the high art personage is a woman, she wears her dresses after the manner of an overpowering responsibility, and speaks of a Dresden tête-a-tête set as "two awfully lovely!" never in "her wildest dreams having imagined such a triumph of art!" She has soulful hair, and her eyes have a pensive individuality. If the personage is literary, he will talk of protoplasm, and differentiation, and ascidians, and will, so to speak, roll them all about in a labyrinth of æsthetic harmonies. If he is musical he gives a high art concert, at which everybody goes to sleep. He speaks of Beethoven as "sublime but occasionally obscure." He attempts compositions barren of melody, and is gulled by flattering friends, who say it shows such culture! such progression! such severe and classic taste! We do not know how long this cant of art will flourish. We trust this will soon fade away, killed by its own insignificance. He who indulges in it is, to say the least, unwise; he is of that class who mistake the steps for the temple of Minerva; the shrine for the goddess herself. And although he may part his hair in the middle, and be the disciple of a "school," the world will write him down a donkey.—*Pottery Gazette.*

ZINC LABELS.

Sheet zinc, from its indestructibility, and the ease with which it may be cut and managed, is a favorite material for tree and shrub labels. If cut in the form of a very long tapering wedge, the smaller portion may be coiled around a twig, or small branch, thus avoiding the use of a wire, and where the small end of the label is coiled around a small branch, it will yield to the increase of that in size, and not cause strangula-

tion. The old method with zinc labels was to write upon them with an ink made of some salt of copper, and several have asked for the formula for preparing it. The original ink was made with verdigris and sal-ammoniac, of each 2 drams, lampblack 1 dram, water 4 ounces. As these need to be well rubbed together, it will be as well to let the apothecary mix them in a mortar. This is to be used with a quill pen upon the surface of zinc that has been made clean and bright by the use of emery paper. It is said that a strong solution of sulphate of copper—"blue vitriol" or "bluestone"—will answer the same purpose, adding a little gum water to the solution, if need be, to prevent the ink from spreading. The use of the lampblack in the ink first mentioned is only to make the ink visible while writing with it. In both these cases the copper is by chemical action deposited upon the zinc, and becoming oxidized makes a permanent and conspicuous writing. Another and much simpler method is simply to write upon a clean zinc surface with a common lead pencil. By the action of the air the zinc becomes tarnished and grayish, while the black lead prevents any such change where the writing is, and though not so conspicuous as that written with the ink is quite as permanent, and being much less trouble is preferable.

The problem of protecting the surface of iron from rust by chemical means has recently received another solution. The methods by which this object has hitherto been effected, other than by painting, are two, viz., by the application of superheated steam (the Barff process) and of heated air (the Bower process). The new process devised by Mr. Ward consists in the combined application of silicates and heat, and is termed the "inoxydizing" process. This is the basis of several subsequent processes for ornamenting the surface of the metal. The coating quickly dries upon the metal when laid on with a brush, or by dipping, and the objects are then passed through a furnace, which fuses the silicate composition, and incorporates it with the metal heated.

The MacKinnon Pen or Fluid Pencil,

HAS JUST BEEN GRANTED THE HIGHEST AWARD AT THE MELBOURNE INTERN'L EXHIBITION OF 1881.

FULL LENGTH, POCKET SIZE.

FULL LENGTH, DESK SIZE.

THE ONLY RESERVOIR PEN in the WORLD

— WITH A —

CIRCLE OF IRIDIUM AROUND THE POINT.

We Challenge Comparison with any other Stylographic Pen after a year's use.

OUR **"Sovereign" Pen** is the most popular Pen made, as it has greater strength, greater ink capacity, and is more convenient for the pocket than any other style now in use. Dealers should avoid cheap imitations which are offered at low prices. We guarantee our work, and the trade we cater to are willing to pay our prices.

MacKINNON PEN CO., Patentees and Manufacturers, **Broadway and John St., New York.**

☞ ***General Supply Depots in all principal Cities in America and in Europe.***

Bottle for Quarts, Pints, 8 oz. Packed One Dozen, in cases.

CAW'S BLACK FLUID

Is the only known Ink that is

Positively Non-Corrosive to Steel Pens.

Flows freely; does not thicken by exposure, and has the decided advantage of writing **BLACK AT FIRST.**

— WARRANTED —

To Write Black Instantly.

To Flow Freely.

Not to Fade.

Not to Mould.

Not to Thicken.

Not to Corrode Steel Pens.

☞ A Copy of the above is printed on all labels for **Caw's Black Writing Fluid,** for the purpose of attracting attention to each especial feature claimed. This is done to facilitate its introduction, and that the consumer, when using, may notice its merits, and thereafter use it in preference to the unsatisfactory thick, black inks, or pale, green writing fluids of the past.

NEW STYLE OF STANDS.

Packed 3 dozen in Case.

The above is the exact size of No. 1 Stand. No 2 being twice this size.

FOUNTAIN INKS.

These Inks are expressly prepared for use in Fountain Pens. Put up in two sizes of bottles. No. 1 containing the same as cones or other styles of bottles generally sold as 3 oz., the Stopper arrangement being very convenient for both Fountain and other pens. No 2 is twice the size of No. 1, and has a new device for filling Pens that keeps the Bottle always corked and free from dust, even while open ready for use.

FOUNTAIN INK CO., Manufacturers, 200 Broadway, New York.

PAPER IN PAINT.

A new adaptation of paper pulp is made in a process for treating ordinary paper pulp of rags, jute, straw, or other wet pulped vegetable fibre in such manner that the fibres will be made dry and separate from each other, and be thus brought into suitable condition to evenly and thoroughly mix with oils, copal varnish, or other gums for various purposes. The process consists in first drying the pulp of rags, jute, straw or other vegetable fibre which has been pulped wet, and then grinding or pulverizing it, when dry, to a fine powder. It consists, further, in the new article of manufacture produced by this, namely, a dry powdered cellulose of rag pulp or other vegetable wet pulped paper stock.

Any paper stock, such as rags, cotton, hemp, jute, straw, grass, or other similar or equivalent fibrous material, is taken and reduced to a pulp by any of the well known processes in common use for reducing such fibres to pulp for the manufacture of paper. Then the pulp is dried upon racks or wire cloth in the open air or a heated room; or it is preferably placed upon an apron and passed slowly through a long kiln heated by steam pipes or furnaces, or otherwise, whereby the drying is more rapidly effected. The pulp thus made thoroughly dry is then placed in a hopper and fed into a burr stone mill, or other mill that will grind it into a fine powder, and it is there so ground. The dry ground cellulose thus formed may be used as an ingredient in different compositions for various purposes.

For paints this dry powdered cellulose is mixed with linseed or other suitable oils, or with kerosene or other petroleum oils, with clay or slaked lime, in such proportions as to form a compound of a proper consistency to be applied with a brush.

For making a waterproof paint take twenty parts of the powdered cellulose, twenty parts of asbestos or mineral clay, and three parts glycerine to about two gallons of silicate of soda and one quart of sulphuric acid, all thoroughly mixed and incorporated together until the whole becomes a soft and pliable compound suitable for coating wood, paper, cloth or leather to be used for various purposes.

For making a coating to apply to cloth or paper to resemble leather, take a solution of guttapercha, caoutchouc, or india rubber, or copal mixed with soluble glass and glycerine and gum arabic, and mix with a sufficient quantity of dry ground cellulose and china clay to form a plastic composition. This composition is spread evenly upon and pressed firmly to the cloth or paper, dried, and embossed to imitate leather. Suitable pigments may be added to the composition to give it color. For making an elastic fibrous plastic composition to apply to canvas to form floor cloth, take two parts of this powdered cellulose and one part of mineral paint, and mix the same with a sufficient quantity of copal varnish and glycerine to form a composition of about the consistency of ordinary mortar. This composition, which may be colored by the addition of any suitable pigment, is applied to one or both sides of the canvas or burlaps.

CHEAP PAINT.—Three hundred parts washed and sieved white sand, forty parts of precipitated chalk, fifty parts of resin, and four parts of linseed oil are mixed and boiled in an iron kettle, and then one part of oxide of copper and one part of sulphuric acid are added. This mass is applied with an ordinary paint brush while warm. If too thick, it is diluted with linseed oil. This paint dries rapidly and gets very hard, but protects woodwork excellently.

M BLOTTER TABLET H

PATENTED

PADS OF PAPER WITH BLOTTER ATTACHED.

ELEGANCE. ECONOMY. CONVENIENCE. CLEANLINESS.

THE paper is tableted, so that each sheet may be freely removed, leaving a perfectly clean, smooth edge. No paper is wasted. The sheet on which you write is always clean, being protected by the blotter. The blotter, of the full size of the paper, is so attached at the top of the pad that both sides of it may be used, and will last out the entire contents of the pad, being always at hand, and perfectly clean.

The blotter is kept clean, and also from wearing, by the card board cover, which is made of a highly polished stock, perfectly smooth, and that will not catch dust or dirt from the desk. The cover is richly ornamented on every pad, giving the whole a neat and elegant appearance. All kinds of paper and printed blanks are put up in this form at prices as low as if loose; making the most complete line of staple and elegant stationery ever offered to the trade.

HASBROUCK & WATSON,

SOLE MANUFACTURERS. 51 NASSAU ST. NEW YORK.

OXIDIZING SILVER.

The appearance, technically called oxidation, on a silver (or silver-plated) surface, may be obtained by any one of the following methods. The effect is often very pleasing on silver work when the process is artistically done. Dissolve about a gramme (or pennyweight) of platinum in aqua regia (a mixture of three parts of muriatic with one of nitric acid), and evaporate the acid off completely upon the water bath. Dissolve the resulting reddish mass—bichloride of platinum—in a little sulphuric ether or alcohol. Apply the solution with a camel's hair brush to the parts that require to be oxidized, and as soon as the ether or spirit has evaporated, the film of platinum remaining will give the required appearance to the silver surface. The acid solution, before evaporation, may be used instead of the above, or an aqueous solution of platinum chloride; but the first named method gives the most satisfactory results. Another method is as follows: Take sulphate of copper (blue stone), two pennyweights; nitrate of potassa (saltpetre), one pennyweight; chloride of ammonium (sal ammoniac) two pennyweights; dissolve in acetic acid, and apply with a camel's hair brush, first warming the object before making the application. A simpler process than either of the foregoing, though its effects are not so permanent, consists in simply applying to the parts to be oxidized a solution of sulphide of ammonium. Sulphur fumes will give a silver surface a beautiful steel blue-color. The operation should be done in a close box, and all parts of the silver article not to be affected, should be protected from the fumes of the burning sulphur by a suitable coating of wax.

A remarkably skillful imitation of amber is now being manufactured in large quantities in Vienna. Its chief constituent is resin obtained from the decomposition of turpentine. While possessing the electric qualities of real amber, it liquifies at a much lower temperature and offers less resistance to the action of alcohol or ether. To complete the resemblance to true amber, the makers introduce insects and fragments of plants into specimens of the artificial product.

The Latest and the Best.

Circulars on application.

Examination Solicited and Satisfaction Guaranteed.

The attention of the Trade is called to the improvements made and advantages offered in Livermore's New Stylographic Pen.

Patented July 15, 1879, and March 9, 1880.

FIRST—**A Smaller Air Tube**, allowing more space for the ink, and rendering the operation of filling easier and less frequent.

SECOND—**The Manner of Fastening the Needle**, not to the air tube, where it would be in danger of being bent or injured every time the pen was filled, but in the point, where it is not so exposed.

THIRD—**The Protection of the Spring** by a silver casing, preventing the ink from clogging its action.

FOURTH—**The Duplex Interchangeable Point Section**, furnishing great facility in cleaning the pen.

FIFTH—**The Ease with which Repairs can be Made.** The needle being in the point, it is not necessary to send the whole pen to the factory, but any dealer can supply a new point.

SIXTH—**Freedom from Legal Difficulties.** The New Stylographic Pen is manufactured under the patent controlling the use of an air tube in a Fountain Pen, and it is therefore free from legal complications.

BRADSTREET'S

A JOURNAL OF

Trade, Finance and Political Economy.

THIS JOURNAL covers a ground the extent of which is occupied by no other publication, and forms an invaluable work of reference to the merchant and manufacturer.

REGULAR AND TRUSTWORTHY CORRESPONDENCE, furnished by experts, expressly for this journal, from all the principal trade centres of this country, is embraced in its columns.

THE CONDITION AND PROSPECTS of the various markets are carefully recorded, and the possibilities and opportunities for trade are demonstrated as by no other medium extant.

QUESTIONS OF COMMERCIAL INTEREST and importance are fully and ably discussed editorially, without prejudice, by some of the most responsible writers and statisticians of the time.

THE BUSINESS CHANGES occurring in the United States and Canada—such as failures, dissolutions of partnerships, chattel mortgages, etc., etc.—are printed in each issue, and the list is more complete and comprehensive than can be obtained through any other source.

THE CIRCULATION OF THIS JOURNAL being among the best merchants, manufacturers, and banking institutions of not only this country but many foreign, it presents an excellent advertising opportunity to a limited number of first-class banks, corporations, and business firms.

CARTER, DINSMORE & CO., Boston and New York.

BYRON WESTON

DALTON, MASS.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST and ONLY AWARD** given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition*, *Massachusetts Charitable Mechanics' Association*, *Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission*, *Medal of Progress American Institute*, *1877*, *and Medal of Improvement and Progress*, *Boston*, *1878*. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

☞ **Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.**

Each sheet is water-marked with name and date.

"The Stationer"—Every Thursday—$2.00 Per Annum.

VOL. IX.---NO. 18. NEW YORK, MAY 5, 1881. WHOLE NO. 306.

RECEIVED. LIBRARY. 1881 OFFICE

Correspondence.

BALTIMORE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, Md., May 3, 1881.

There has been no spurt in business here since the last Easter card sales, and trade shows no perceptible improvement since my last. The majority of the jobbers have their salesmen on the road, but the orders they are sending in are only fair. J. C. Moran has just started West on a two months' business trip with J. B. Piet.

The liabilities of H. P. Guyton & Co., who made an assignment some little time ago to George M. Sharp, a member of the Baltimore bar, turn out to be larger than I reported. They reach between $19,000 and $20,000, of which sum $7,000 are owing to Mr. Guyton's father, for money loaned the firm. The assets are a trifle over $5,000. Mr. Guyton has offered to pay twenty cents cash on the dollar, and it is thought his creditors will accept the compromise and that he will carry on business as usual.

A. C. Soper, agent of the publishing house of Iveson, Blakeman, Taylor & Co., Chicago, and son of W. Horace Soper, of this city, died on the 28th ult., at Macon, Ga., of consumption. He was a native of Baltimore, and had his office in the establishment of W. J. C. Dulaney & Co. His father is one of the agents here for D. Appleton & Co. of New York, and his brother fills a professorship in Baltimore City College.

John B. Piet has just published "an elementry grammar of the English language," from the pen of Henry E. Shepherd, M. A., Superintendent of Public Instruction in Baltimore. The name of the author is a guarantee of the excellence of the publication, Mr. Shepherd's previous works having met the approval of all interested in the subject of education. The new grammar is designed to meet the requirements of a course of instruction in English, such as is usually prescribed for schools of the grade of the ordinary grammar school. It presents in simple, perspicuous style the essential facts connected with the structure and the idiom of the English tongue; extraneous and irrelevant questions are rigidly excluded, and every part of speech is separately considered and abundantly illustrated by examples showing its varied uses. The work will doubtless hold its own under the candid scrutiny of teachers and others to whom it is submitted.

The following named New Yorkers have been in town during the past few days: Charles Sackersdorf, manufacturer of lead pencils; Hugo H. Plent, with J. H. Hamburger; H. P. Beach, with New York Blank Book Company, and Henry Phillips, with Daniel Slote & Co. Z. A. Devoll, of the Niscochaque Manufacturing Company, of Philadelphia, and H. G. Teele, with Morrison, Bare & Cass, paper manufacturers, of Pittsburg, Pa., have also been here.

W. P. M.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BOSTON, Mass., May 3, 1881.

The stationery trade offers little that is new this week. Trade has been steady, in a moderate way, and there is no fault to find with its drift, while the outlook is all that could be expected at this season of the year. Dealers report ample stocks, and that much of the jobbing trade is to meet present wants, or to anticipate orders. The roads in the interior are getting into better condition, and country dealers report a fair business.

While New York presents a nervous push in its manner of doing business, perforce its vast Western and Southern commercial relations, Boston trade is rather more conservative and quiet in course, and almost contented with its New England business relations, but occasionally stretching out toward the West. This is especially the case with its stationery trade. Buyers come and go, and duplicate their orders by telegraph or telephone.

Hooper, Lewis & Co., report a continued good demand for blank books of all descriptions.

Gay & Co., Devonshire street, are doing an immense business in note papers and envelopes and stationers' goods generally.

Sales of the Livermore pen are increasing rapidly, according to the reports of the agent here, Mr. Dunlop, who has a very convenient office on Washington street, near the Old South Church.

Bufford's Sons report that even with their enlarged facilities at Harrison square they are hardly equal to supplying the demand for their new specialties in cards. This concern has got fairly settled in its new city quarters.

Commercial travelers in the stationery business report it in a very healthy condition all around, and that competition does not seem to affect profits materially, that there is room enough for all, and that the man who can sell the most goods is the best fellow.

Knight, Adams & Co., Milk street, report an excellent trade this spring in the line of fancy stationery, which they carry. This firm is always among the first to present its customers with all there is novel or unique in the business.

Dennison & Co. continue to offer new designs in tags and colored papers, many of the latter being very artistic in their arrangement.

One Boston house which your correspondent has neglected to notice particularly is that of Geo. F. King & Merrill, No. 29 Hawley street, blank book manufacturers and stationers. The junior member of the firm is C. A. Merrill, who was formerly with Carter, Rice & Co. for nine years, and for four years their head salesman. The firm of King & Merrill was formed about four weeks ago. Among its specialties are King's celebrated bank, office and nonpareil pens and pencils. These are said to be among the best and finest articles of the kind now in use anywhere.

The only change in the stationers' business last month that has come to my knowledge is that of a change in the firm of F. C. Philbrick & Co., 103 Devonshire street, the business now being carried on by Lucien Sanderson & Co.

It is announced that Hon. Alex. H. Rice, the senior partner of a leading Boston paper firm, and ex-Governor of Massachusetts, and Mrs. D. W. Powell, of New York, are to be married soon.

M. M. Ballou, a veteran editor and publisher, has retired from the Sunday *Budget*. Mr. Ballou, Mr. Whipple, Mr. Aldrich and the late James T. Fields all used to meet at stated times at the Old Corner Book Store.

L.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, Ill., May 2, 1881.

The tenants have this year for once got ahead of the landlords; the first of May being Sunday, they have not moved until to-day, the second. The tenants' lot to-day is not a happy one, for biting breezes nip the jealous air, and makes moving a comfortless task. However, I have one new trade change to chronicle. McDonald Brothers, booksellers and bookbinders and dealers in special editions, are removing from 154 Madison street to their new store in Grannis Building, 113 Dearborn street.

The following telling letter has been handed me by the Sanford Manufacturing Company for publication:

CHICAGO, March 22, 1881.

DEAR SIR—After several years' experience in the manufacture of sealing wax, I am forced to admit that it has not proved profitable to me, and that with my limited knowledge of its manufacture and the facilities at my command I cannot successfully compete for my share of the trade. In consequence I have sold out my entire business to the Sanford Manufacturing Company, who with long experience and

large facilities can make better wax and for less money than I found it possible to do.

With thanks for your many favors,

Yours truly, THOMAS J. WROE.

Huke, Spencer & Co., printers, electrotypers and bookbinders' machinery, always ingenious, have shown me the drawings of a cylinder press made by them for the American Printing House for the Blind, at Louisville. A brief description may be of interest to your readers, as this is believed to be the only cylinder press ever built for the purpose. It is a double cylinder press, weighs about two tons, complete, and the feeder stands upon the ground. The mechanism is so arranged that all wrinkling of the sheet is obviated. The first impression is taken from the plate on one cylinder, against a rubber blanket placed at the point of contact with the second cylinder. The second page is printed in the same manner from the other cylinder, and the printed sheet is delivered to the fly at the back, as usual.

The printing is done from a sort of stereotype plate, produced as follows: The matter is set up in movable types, manufactured by John H. Rogers, of Boston—the only manufacturer of "American system" types in the world. From the form so made up, the impression is taken upon brass plates, which are afterward bent to fit the cylinders, and the back filled in with cement. The press is arranged to print from plates of various sizes, and it will print 4,000 pages per hour. It has been in successful operation since last November, and the work is very satisfactory.

The Queen City Printing Ink Company, Cincinnati, New York and Chicago, manufactures a line of printing inks of all grades and colors. Its goods give universal satisfaction; therefore, the success that has attended the enterprise is not surprising.

The Livermore pen is growing in favor.

G. B. H.

MICHIGAN NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

DETROIT, Mich., May 2, 1881.

The annual moving day anniversary has commenced, and Sunday observances were violated by some business men and their brethren moving into new quarters vacated by others, to do the same thing most likely again next season. The wholesale and retail stores in Detroit in our trade will not be changed this May, so that travelers and visitors to our fair city will find their friends at the same localities.

The week past has been marked by continued beautiful weather, which has had the effect to hasten the growth of vegetation and cause the ice in the lakes to move down, so that most of the ports along the shore will soon be open to shippers, and the numerous vessels now ready in this port to carry spring goods to the upper lakes will be let loose.

Wholesale houses report a decided increase in business over last week, which they attribute to the better condition of the roads throughout the country and the opening of navigation. Some travelers whom I saw during the last few days report the spring trade in some localities later than usual this year, although they have had good sales wherever they have "opened."

C. W. Jenks, of Langfeld, Turner & Andrews, visited our trade for a few days, and the jobbers and retailers in Detroit gave him orders for the present and coming season to the amount of $10,000. Mr. Jenks could have sold to many other houses who handle his goods, but was desirous of visiting others in different cities, as he was already several days behind on his time table. Some of our stores have already received their stock of leather goods ordered of him here, and are much pleased with the prompt attention to the orders which he sent in.

The paper trade and paper manufacturers in our State have nearly all received "Lockwood's Directory for 1881," and think it a valuable guide to their business, and much improved this year. Parties not having already received copies can be supplied from the Detroit office of this paper.

The Howell bill so called, for the compilation of the laws of Michigan, has at last been passed by the Senate at Lansing. Contrary to expectation there was no renewed discussion of the merits of the bill, and without a word of debate, it was put to a vote and carried. The figures stand 52 to 39. Thus is ended, as far as the Legislature is concerned, this famous compilation fight which has lasted since the openiug of the session. The price is $5 a set. Callahan & Co., of Chicago, will now go on with the work. It is hoped that the Governor will "veto" this bill, and that the firm of Richmond, Backus & Co., the State stationery contractors, will still be persistent, and fight this job through. They have a perfect right under the constitution to make bids on the compilation of the laws, and by such bids and action they would have saved the State $12,500 by forcing Callahan & Co., of Chicago, the lobbyists of the "Howell bill," to reduce their price. Mr. Ayres is the junior member of the Detroit firm, a live business man, and intends to make things warm before this matter is ended, and he has the wishes of most of the trade. The report of the committee appointed some weeks ago to investigate certain growling reports about the State stationery as supplied by Richmond, Backus & Co., shows that the grounds for making these charges were decidedly "thin," so they are acquitted of those flimsy complaints.

John Willyoung, bookseller and stationer, expects to start on a month's business and pleasure trip this week, visiting the largest publishing houses and others in his travels East.

A State telephone exchange, with a capital of $250,000, has been started in our city. It is the intention to connect the various cities of the State having mutual business relations with the trunk lines wires.

To mark the growth of Easter card sending, it is declared at the Detroit post office, that 60,000 cards passed through the office this year. Last year 5,000 covered them all. The prospect is that Easter will develop into a sort of spring Christmas; for, flowers, cards, bon bons, and pretty trifles generally are already exchanged, and more important and costly articles will doubtless follow in due time. Next to acquiring a good friend is a good book. A house without books is like a room without windows. New books are now so cheap that libraries can be furnished for a very small amount. The large bookstores of Thorndike Nourse and John Willyoung can supply almost any book that is wanted; both carry large stocks and are constantly receiving the latest works from the publishers.

J. A. Roys, the veteran bookseller here, carries a large and very full line of the Franklin Square Library, and sells for cash. Mr. Roys says he has no fancy prices at his store.

John A. Gebhard, wholesale printers' paper warehouse, is doing a very nice business, and the printers patronize him very largely. He has a complete stock of stationery, cards, flat papers, inks, &c.

A new edition, just out, has been seen by your correspondent, entitled "The Michigan University Book," 1881. It is well printed and handsomely bound in both paper and cloth bindings.

A new book, which is said will have a large sale, is entitled "King's Mountain and Its Heroes," being a history of the battle of King's Mountain and the events which led to it, by Lyman C. Draper, of Wisconsin. A book sold only by subscription.

Samantha's new book, "My Wayward Partner, or Trials with Josiah Allen," is out in the second edition, and has a growing sale as it becomes wider known and read by the reading public.

The retail stores make a handsome display of the new birthday cards, which find favor with the ladies of Detroit. CITY OF THE STRAITS.

OHIO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, O., May 2, 1881.

We are at last fairly in the midst of our spring trade, and there is a good deal of it.

Talking with several merchants in different lines of business, they all report April as a big month, and that they never sold so many goods before. Money is tolerably easy, but I presume you know that it never gets any too plenty.

Representatives of the Eastern manufacturers and jobbers continue to come. Classon from Plimpton Manufacturing Company was here last week and reports trade in his line good; he has been taking an enforced vacation, as the company was so far behind in filling orders that it was useless to go out soliciting orders. Eckstein, of S. Raynor & Co., put in his semi-annual appearance on Saturday and reports satisfactory trade. Walter Baldwin has the same to say. Wright, with Phil Hake, had a very nice line of goods, and reports the demand in his line fair for the time of year. M. Wolf, of Wolf Brothers, envelope makers, Philadelphia, and Mr. Weingartner, of S. Trier & Son, both appear satisfied with their sales.

I would call the especial attention of all makers of archery goods to the fact that the State Association of Archers will hold its annual meeting in Dayton about September 25, and that any prizes they might be disposed to offer would probably not be declined. The writer of this would be glad to arrange the particulars for any of them.

R. A. Rogers & Co., of this city, have started M. M. Benson, a new stationery salesman, on the road. He is meeting with very good success. Mr. Rogers told me the other day that he hoped business would slack up—he wanted to go trout fishing as soon as the season opened up; he usually goes to the River Jordan in Northern Michigan. Thanks to the Grand Rapids and Indiana Railroad, Jordan has ceased to be the proverbial "hard road to travel."

A new paper mill is being built at Piqua, O.; also one at Xenia, O.; both will make straw wrapping, I believe.

All of the mills throughout this section are busy, and prices I suppose are satisfactory.

MIAMI VALLEY.

VARNISH ON METAL SURFACES.—To make alcoholic lacquers or varnishes adhere more completely to polished metal surfaces, one part boracic acid should be added to 200 parts of varnish. This composition will adhere so firmly and become so completely glazed as to be removed only with difficulty. Be careful not to add too much of the boracic acid, as it injures the gloss in that case.

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD BERKSHIRE MILLS

LINEN LEDGER PAPER

Will stand the severest test of COLOR, CLIMATE, INK OR WEAR.

Being **Triple Sized** (a process entirely our own) and **Loft Dried**, can be erased and written upon the fifth time distinctly. None genuine without the water-mark and date, thus—**Old Berkshire Mills Linen Ledger, 1881.**

IF YOU WANT THE BEST STYLOGRAPHIC PEN,

The Latest and the Best.

Circulars on application.

Examination Solicited and Satisfaction Guaranteed.

The attention of the Trade is called to the improvements made and advantages offered in Livermore's New Stylographic Pen.

Patented July 15, 1879, and March 9, 1880.

FIRST—**A Smaller Air Tube**, allowing more space for the ink, and rendering the operation of filling easier and less frequent.

SECOND—**The Manner of Fastening the Needle**, not to the air tube, where it would be in danger of being bent or injured every time the pen was filled, but in the point, where it is not so exposed.

THIRD—**The Protection of the Spring** by a silver casing, preventing the ink from clogging its action.

FOURTH—**The Duplex Interchangeable Point Section**, furnishing great facility in cleaning the pen.

FIFTH—**The Ease with which Repairs can be Made.** The needle being in the point, it is not necessary to send the whole pen to the factory, but any dealer can supply a new point.

SIXTH—**Freedom from Legal Difficulties.** The New Stylographic Pen is manufactured under the patent controlling the use of an air tube in a Fountain Pen, and it is therefore free from legal complications.

BIRTHDAY CARDS.

We take pleasure in herewith presenting to the Trade our Price List of Birthday Cards, which has been greatly enlarged by a number of very elegant and novel sets:

ASSORTMENT.—They are made up in sets of one dozen, except No. 7, and are put up in a box or envelope. Each set contains all the designs of the series, and as no series, except Nos. 3 and 14, has more than eight designs, some of the designs are more or less repeated in the set.

ENVELOPES.—Fine Cream-Tinted Envelopes are furnished with the more elegant series, without extra charge.

SILK FRINGES.—Encouraged by the very great success with our Silk-Fringed Easter Cards, we have made up a number of our Birthday Cards with the best quality heavy silk fringe, made expressly for us. All fringed cards are furnished with Protectors and Envelopes, and are put up with assorted colors of fringes.

LIST OF PRANG'S BIRTHDAY CARDS.

No. of Series.	No. of Designs.	DESCRIPTION.	HOW PUT UP.	Retail Price per Set.
1	8	Floral Designs	12 Cards	$0.15

39 DF	4	Same Designs, with silk fringe and tassels	12 Cards, with Protectors and Envelopes	7.20

USUAL DISCOUNTS TO THE TRADE.

TO THE TRADE.—We have to ask the generous indulgence of our friends in the Trade, for what may have seemed a want of proper consideration for their interests on our part during the past Easter season. The sales of our Easter Cards have largely exceeded our anticipations, and these sales following so closely upon the large sales of our Valentine Cards, made a demand upon us greater than our facilities for production enabled us to supply. Under these circumstances we have been unable, in many cases, to fill orders as fully and as promptly as we have desired, and our not being able to do so has been a cause of as great regret to ourselves as it has been to our customers. We are now enlarging our building and making extensive additions to our machinery, not only for the purpose of increasing our facilities for production, but also for the purpose of improving the character and excellence of our work, and we trust, with our increased facilities, to be able in the future to meet all demands for our publications with the utmost promptness.

Our samples for Christmas season are in a forward condition, and we have the pleasure of announcing that we intend to start our travelers with them in the later part of May, and we shall endeavor to have these samples submitted to our customers throughout the United States and Canada as early in the season as possible. We trust to be favored with the same consideration, on the part of the Trade, in the placing of advanced orders, which has been extended to us in the past.

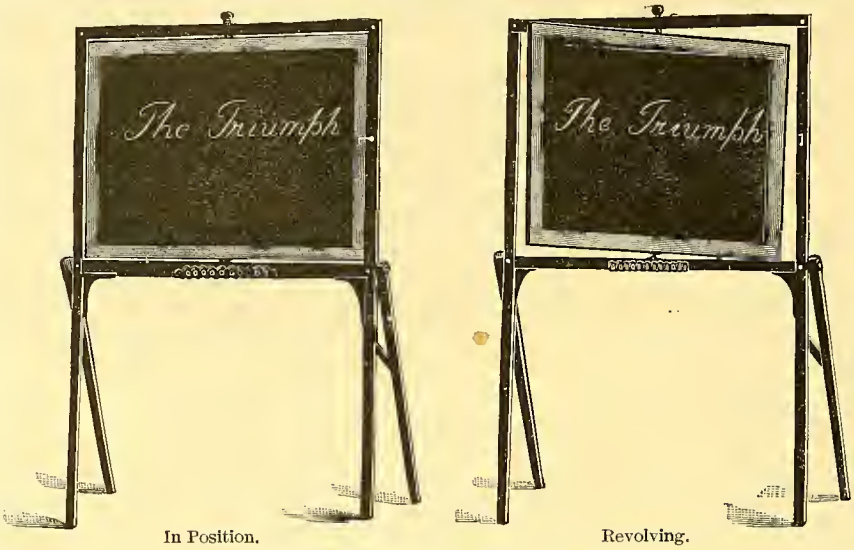
Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

REVOLVING BLACKBOARD AND EASEL.

Elsey's combined revolving blackboard and easel is illustrated in the engravings, which are explanatory of the style and purpose of the device. The marking surface on this blackboard is made on sheet metal, smooth and hard; it will not wear out, warp or check. The blackboard is reversible, so as to mark on both sides, and revolves horizontally without removal from the easel; it is very light and convenient; the height allows the child to sit or stand while marking. Size is 20 by 26; height, 46 inches. The board, with eraser, box of assorted crayon, and box of copy pictures for instruction in drawing, will be sent to any address, by express. The manufacturer is the American Crayon and Slate Company, No. 43 Dey street, New York.



In Position. Revolving.

REVOLVING BLACKBOARD AND EASEL.

—:o:—

PAMPHLET BOX.

R. G. Hutchinson shows a new patent pamphlet box, of which there are six sizes, suitable for filing nearly all the pamphlets or magazines published. The form is that of a large volume, and is well adapted for the bookcase. The frame is made of light, strong wood, top and sides covered with marble paper, cloth on the back, with gold lines running across, giving it the appearance of a well bound book. The advantage of not having to remove it from the shelf to select from will be appreciated by those who have used the old styles of pamphlet boxes. When the box is opened, the slide on which the pamphlets or magazines rest can be drawn out, the back is then held open by the slide, leaving both hands at liberty to select with. When the slide is returned to its place, the back closes by means of a concealed spring.

NEW PATENTS.

No. 240,510. Climbing Toy.—William C. Farnum, Hoosick Falls, N. Y.

As a means for securing propulsion of an automaton or other body along or upon a single cord, a body piece having at one end a grasping device for intermittently seizing and holding the cord, adapted to be controlled and regulated in its movements by the friction of the cord running through the same, provided at appropriate points with guide eyes or loops for governing the direction of the cord, and having pivoted thereto at a suitable distance below the grasping device a lever carrying at its outer or swinging end two pins or sheaves, disposed with reference to each other and to the pivotal attachment of the lever to the body, and armed with means for returning said lever to position to renew its hold or gripe on the cord, in combination with a cord running through the grasping device, around the pins or sheaves of the said lever, and through the several guide eyes or loops, the whole when so arranged being adapted to secure the result aimed at by alternately tightening and slackening the cord.

No. 240,520. Pencil Sharpener.—Henry M. Jones, Meriden, Conn.

A pencil sharpener consisting of a case, having slots, pressure spring, inclined bearing surface, and cutting blade, having roughened portion.

No. 240, 524. Art of Making Gelatine Relief Plates.—Philip H. Mandel, Boston, Mass, assignor, by mesne assignment, to the Mechanical Company, New York, N. Y.

1. An improvement in the art of making gelatine relief plates, the same consisting in applying to the collodion side of a photographic negative a tough, adhesive and transparent protecting coat composed of a film of india-rubber in contact with the negative, and a film of raw collodion and oil placed upon the first named film, placing the sensitized gelatine directly upon the coat and treating the gelatine by exposure to light to harden the portions not protected by the negative, and by washing to remove the soft portions of the gelatine, and thereby leave the hardened portions in relief upon the protecting coat. 2. A method of protecting or strengthening the collodion side of a photographic negative to prepare it for a coating of sensitized gelatine, and protect it from the action of warm water subsequently used to remove the unhardened portions of the gelatine, by applying to the collodion side of the negative a film of india-rubber, covering the same after it has partially hardened with a film of raw collodion and castor oil or its equivalent, and allowing the last film to become dry before applying the sensitized gelatine.

No. 240,525. Pantograph Plate.—Philip H. Mandel, Boston, Mass., assignor, by mesne assignment, to the Mechanical Company, New York, N. Y.

The process of producing pantographic pattern plates, which consists in coating a metal plate with a sensitized etching ground, then portraying, outlining or shadowing on the ground by or through the effect of light the design to be produced, then cutting through the ground to the plate with a suitable instrument, and etching the plate with acid, as set forth.

No. 240,526. Mixture for Preparing and Sensitizing Gelatinized Paper.—Philip H. Mandel, Boston, Mass., assignor to the Mechanical Company, New York, N. Y.

1. A mixture for preparing and sensitizing gelatinized paper, composed of water, bichromate of ammonia, alcohol, nitric silver, iodine, chloride of zinc, and tannin. 2. A method of preparing a piece of paper for a printing surface to apply color to vitreous, vegetable and fibrous substances, which consists in coating one face of the paper with a solution of gelatine in the presence of alcohol, drying the paper, and then subjecting the prepared face to the action of a sensitizing and hardening mixture, adapted to receive color and form a printing surface capable of transferring numerous impressions.

No. 240,554. Paper Delivering and Folding Machine.—Walter Scott, Plainfield, N. J.

No. 240,557. Dividers.—Edward Soetbeer, New Bremen, Ohio.

No. 240,646. Envelope.—John C. Blair, Huntingdon, Pa.

No. 240,648. Clasp for Books, &c.—Charles Blust, New York, N. Y., assignor to William Schimper, same place.

No. 240,665. Combined Match Box and Cigar Cutter.—Samuel J. Crockett, Boston, Mass., assignor to himself and Thomas F. Scanlan, same place.

No. 240,712. Lead and Crayon Holder.—Joseph Hoffman, New York, N. Y., assigner to Joseph Reckendorfer, same place.

1. In a lead and crayon holder, the combination, with the sheath, the lead clamp, lead clamp operating mechanism, and the reacting spring of a longitudinally sliding combined extension piece and pressure cap mounted in or on the sheath, adapted to move the lead clamp operating mechanism against the stress of the reacting spring, and also to be adjusted back and forth in or on the sheath, so as to lengthen or shorten the holder. 2. In an automatic lead and crayon holder, a telescopic extension sheath, the upper section of which contains the pressure cap, which acts upon the mechanism that operates the lead clamp to release the lead.

No. 240,739. Book Holder.—Philip Lohges, Pittston, Penn.

No. 240,751. Frame for Cards.—Robert Newell, Philadelphia, Penn.

A method of framing business cards or placards, consisting in forming an imitation frame by printing, then gumming or pasting the same to a coincident backing, and afterward gumming or pasting the placards to said backing within the imitation frame.

No. 240,752. Rest and Guide for Penmen.—Edward Nunan, San Francisco, Cal.

A rest and guide for penmen, consisting of a concaved plate provided on its under surface with one or more rollers.

No. 240,773. Hand Stamp.—Johann Schmidt, Vienna, Austria.

DESIGNS.

No. 12,235. Printing Type.—George L. Pierce, Alexander Phemister and Alfred C. Converse, Boston, Mass. Term of patent 7 years.

A CHEAP VARNISH.—The preparation called Olmstead's varnish, made by melting equal parts of resin and lard together, so as to make a soft, plastic mass, easily spread on metallic surfaces without lumps, is unsurpassed for preventing rust and oxidation. It is best when applied to warm metal surfaces, when this is practicable. It is very cheap, and should be used frequently, at least every three months, where injury from rust is derived. It is most excellent to apply to Russia iron surfaces.

PERFECTED STYLOGRAFIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS,** the last, June 29, 1880, being the most important and giving the name **Perfected.** All cuts are exact size

MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambler's Pocket. Same price as Long.

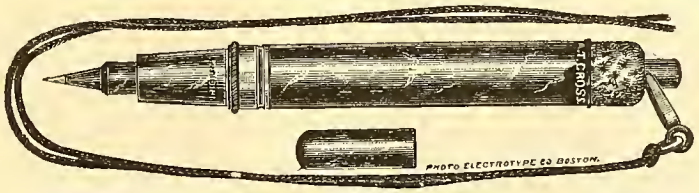
LONG.—The famous Desk Pen. Extra long. Holds most ink, except the **Maximum.**

SHORT.—Most widely known and sold heretofore; but Maximum is better for desk

or Hambler's Pocket Giant for Vest Pocket or Cord. So this will be largely superseded.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined.

☞See Descriptive Circulars.



GIANT, with Cord and Gold Ring, same price as Short.

Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, both of which will have all new improvements.

☞See Descriptive Circulars.

VEST GIANT, Plain, - - $2.50.
All Styles up to $4.00.

☞ **VEST GIANT.—The Cheapest PERFECTED Pen made.**

This Miniature Cut is for Agents' Cards, Newspaper Advertisements, &c., &c., &c.

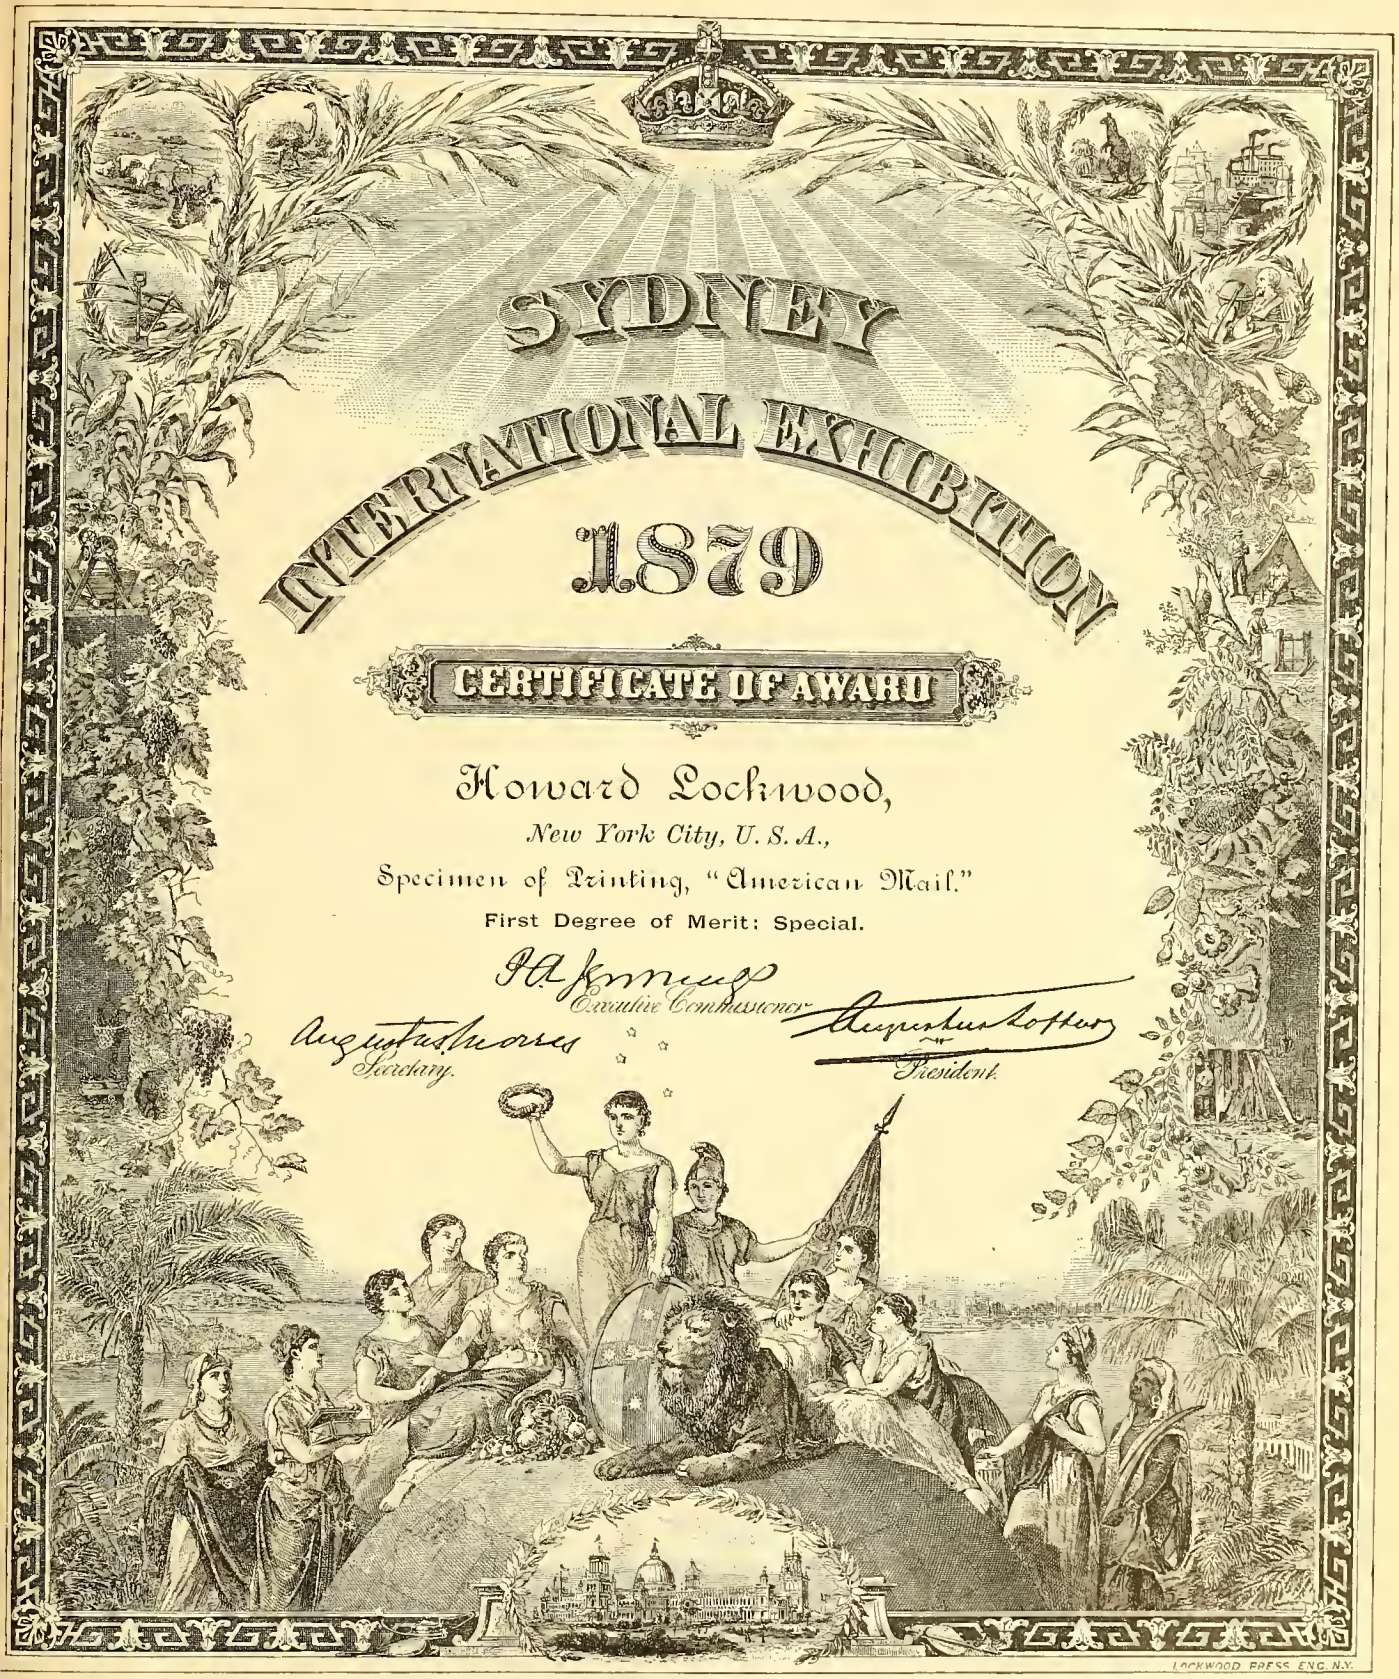
☞ *FOR DESCRIPTION OF CUTS SEE "TRADE GOSSIP."* ☜



IN AWARDING the **First Degree of Merit (Special)** to HOWARD LOCKWOOD, Proprietor of the LOCKWOOD PRESS, New York, the Jury at the SYDNEY INTERNATIONAL EXHIBITION used the following language: "This exhibit is equal to anything produced in London or indeed anywhere else. The type is sharp and distinct; the wood-cuts so artistically brought up and worked that they resemble steel engravings; the paper has a beautiful glazed surface, and the ink, which is a copy black, is distributed with perfect uniformity." This high and flattering indorsement is fully confirmed by the Juries at the INTERNATIONAL EXHIBITION now being held at MELBOURNE. Advices just received from Melbourne announce that the Lockwood Press has been

AWARDED FOUR FIRST-CLASS PRIZES, In Printing, Engraving, Art, and Periodicals.

THESE ARE THE HIGHEST HONORS AWARDED TO ANY EXHIBITOR FROM ANY PART OF THE WORLD.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

H. D. Brown, publisher, Lake City, Minn., has sold out.

Wm. Baker, paper stock dealer, San José, Cal., is dead.

J. L. Brockelhurst, publisher, Fergus Falls, Minn., has sold out.

H. C. Stivers, publisher of the *Transcript*, Little Falls, Minn., is closing out.

E. Emery, publisher of *Emery's Daily Peorian*, Peoria, Ill., is advertising to sell out.

E. Travers, newsdealer and stationer, Meriden, Conn., has sold out to W. G. Bancker.

Edward A. Weed, publisher of the *Bulletin*, Greenville, Cal., has been burned out. Insured.

Brown & Co., publishers of the *Leader*, Lake City, Minn., have sold out to Northrop & Leonard.

M. A. Ring, Jr., has retired from the firm of M. A. Ring & Sons, paper stock dealers, Boston, Mass.

Tupper & Getchell, stationers, &c., Boston, Mass., have dissolved partnership. Edwin P. Getchell continues.

The stock of Simeon D. Tobias, bookseller and stationer, Annapolis, Nova Scotia, is being sold out under bill of sale.

William Whiting left the city yesterday for Holyoke after a brief stay of a few days *en route* from his recent trip to North Carolina.

A book and stationery store in a large Western city is offered for sale in another column. This is said to be an excellent opportunity for anyone looking for such a chance.

Langfeld, Turner & Andrews, the Philadelphia pocketbook manufacturers, are putting up in their store 35,000 square feet of shelving to hold their samples. Business with this house is more active than ever.

The Rowley & Chew printing house, 712 Chestnut strset, Philadelphia, has got out some novel and attractive designs in advertising cards. Samples will be forwarded on receipt of price for sample sets. A descriptive catalogue and price list can be had on application.

Among the visiting members of the stationery, fancy goods and paper trades in the city this week were Mr. Wilson, of Forsyth & Wilson, Kingston, N. Y.; W. L. Stork, of W. L. Stork & Co., Baltimore; Mr. Reid, of Wannamaker & Co., Philadelphia; C. H. Codman, of Codman & Co., Boston; William Whiting, Holyoke; L. L. Brown, Adams, Mass.; Charles Hanmer, Burnside, Conn., and William A. Russell, Lawrence, Mass.

Charles J. Cohen, 505 Chestnut street, Philadelphia, forwards a copy of his new price list of envelopes (No. 32). This is a neatly printed and bound octavo pamphlet of 32 pages showing the prices of over one thousand varieties of envelopes with diagrams and measurements of every size. Accompanying this is a sample book (No. 33), and price list of flat papers controlled by him, as also a price list of black-bordered or mourning papers, which Mr. Cohen makes one of his specialties. The list is complete, indexed and well arranged, and will be found invaluable to the members of the trade.

The business of Samuel Hano & Co., manufacturers of manifold books, Boston, Mass., is reported to have wonderfully increased. The firm says that it has done as much business up to May 1 this year as it did the previous year up to August 1, and that trade last year was satisfactory. This firm is very enterprising and it is asserted that no concern has a better reputation for fair, upright and honorable dealing. It uses only the highest grades of stock and imports all of its manifold paper from the famous mill No. 39, England. The writing papers used are tub-sized and loft-dried, and only the very best qualities of Field & Tuer's carbon is used. Wherever Samuel Hano & Co. have sold their goods they have, it is said, been obliged to fill additional orders. They claim to be the only manufacturers who make a specialty of manifold goods, and in their large factory, No. 370 Atlantic avenue, Boston, nothing is made but this class of goods. They do all their work, including printing (having five large power presses, steam rulers, cutters, &c.). On their patent "triplicate order book" immense sales are reported from every section of the country, and they are also doing a large export business. All orders sent them will be promptly executed.

Theo. Leonhardt & Son, Philadelphia, have just received from France a very fine invoice of fancy cards for scrap books or advertising. The designs are altogether new and in good taste. The most remarkable are: No. 10,343, subjects in the costume of the Directory, on gold ground, six designs; No. 458, cupids, with national emblems, six designs, on gold ground; No. 10,286, the seasons (new), six designs; No. 10,181, Chinese subjects, on gold ground, six designs; No. 10,149, branches and birds, six designs; No. 10,-161, flowers personified, six designs; No. 1,136, geographical cards, with female in corner, eight designs; No. 432, representing a fan on gold ground, four designs; and lastly, playing cards, with mediæval designs on gold ground. These are altogether new and are very rich.

John A. Lowell & Co.'s steel engraved cards have secured the highest honor at the World's Fair at Melbourne. These goods have won the highest encomiums in all parts of the world, and are largely exported. M. A. Reay & Co., New York, are the agents for them.

The copartuership existing between M. A. Reay and S. C. Hubbard, under the style of M. A. Reay & Co., expired by limitation on May 1. A receiver has been appointed for purposes of liqnidation, and an account of stock is being taken. The name of the new firm has not yet been announced.

The original painting from which L. Prang & Co.'s Easter dove was copied is now on exhibition at the house of Geo. W. Carleton & Co.

A. F. Goldsmith & Co., dealers in periodicals, &c., Salem, Mass., have dissolved partnership. Goldsmith Brothers continue.

Hosford & Sons, stationers, New York, have dissolved partnership. Henry and J. S. Hosford continue under same style.

William C. Conner, of the firm of James Conner's Sons, type founders, New York city, is dead.

Robert Gabie, of J. Gabie & Co., dealers in fancy goods, Brooklyn, E. D., N. Y., is dead.

The *Argus* Printing Company, Kingwood, W. Va., has made an assignment.

Frank Crandall, bookseller and stationer, Bay City, Mich., is closing out.

E. O. Kibbe, printer, Elroy, Wis., is closing out.

R. H. Constable, printer, Ridgetown, Ont., has sold out to E. McKay.

George Wilmarth, printer, Vergennes, Vt., has sold out to James Crane.

Hard & Parsons are preparing an extensive line of new goods for the fall trade and are very busy at present.

Attention is invited to an advertisement offering a business for sale, which will be found in another column over the signature K.

Kelly & McDonald, bookbinders, New York city, have dissolved partnership by limitation.

Chas. B. Vail, of Whitfield, Power & Co., wholesale dealers in notions, New York city, is dead.

The Chas. Stewart Paper Company, Cincinnati, O., has been incorporated with authorized capital of $125,000.

The W. E. Dibble Publishing Company, Cincinnati, O., has been incorporated with authorized capital of $40,000.

Philip Fleischner & Co., dealers in fancy goods, Philadelphia, Pa., have sold out to F. Pulaski & Co., of Cuthbert, Ga.

The Schoeneck & Lindeman Lithographic Company, Brooklyn, W. D., N. Y., has been changed to Schoeneck Lithographic Company.

J. H. Van Kirk & Co. removed this week to their new warehouse, 76 Beekman street, and have in their new location increased facilities for conducting their growing trade.

The J. G. Shaw Blank Book Company has been compelled to take two floors in the adjoining building to its factory in order to secure necessary facilities for its growing business.

The firm of Wm. H. Woglom & Johnston, stationers, 239 Greenwich street, New York, has been dissolved, James D. Johnston retiring. Wm. H. Woglom will settle the affairs of the late firm and continue the business.

Lockwood's Directory of the Paper and Stationery Trades for 1881 is selling fast. No delay should be made in ordering if copies are wanted. It is the best, the only guide to the paper and stationery trades.

The new styles aud designs in papeteries now being prepared for the fall trade are numerous and in many instances beautiful. Those in which embossed and illuminated goods are used are particularly handsome.

At the Australian World's Fair, just closed at Melbourne, Carter, Dinsmore & Co., manufacturers of Carter's inks and mucilage, received four awards, three of the first order of merit, for copying, black and colored inks, and one of third order of merit for mucilage. This last, although of third order, was the highest and only award made for mucilage.

T. S. James has just returned home from quite an extended trip for Daniel Slote & Co., having been gone nearly four months, his objective points being St. Paul and Kansas City. Notwithstanding the backwardness of spring, Mr. James made the best trip of any previous year. Mr. James' appearance does not indicate that he has lost any avoirdupois.

Philip Hake this week occupied the building Nos. 63 and 65 Ann street, which he will use in connection with his present building located nearly opposite. This addition gives him five additional floors 150 feet deep. He has placed in it three new envelope machines and several patent power cutters, and starts out with his new machinery in the manufacture of his new line of fall goods, which he says will be the finest he ever made. He claims that his combined fa-

cilities are not surpassed by any concern in the country in the same line of business.

William Trinkle, bookbinder, Philadelphia, Pa., is dead.

Thomas Reilly, paper stock dealer, Philadelphia, Pa., is dead.

John G. Ramsay, printer, New York, has been sold out at auction.

Samuel Woodruff, stationer, &c., Olympia, Wash. Ter., has sold out.

Samuel Wood, dealer in notions, Aberdeen, O., has made an assignment.

W. E. Kewney, printer, Sutton, Ont., is advertising his business for sale.

Charles H. Pelton, printer, Middletown, Conn., has sold out to Robert Pike, Jr.

Rufus Adams & Co., stationers, New York, have removed to Nos. 4 and 6 Pine street.

Timmer & Carlton, publishers of the *Daily Hour*, Wichita, Kan., have been burned out.

Hunt & Cornish succeed as publishers and proprietors of the Lanesboro (Minn.) *Journal*.

The stock of Simon Hoffman, dealer in fancy goods, San Francisco, Cal., has been attached.

Townsend & Everett, publishers of the *Mining Index*, Lunday, Cal., have dissolved partnership.

Bishop & Daniel, publishers of the *Independent*, Le Roy, Minn., have dissolved partnership.

The New England agency for Obpacher Brothers' goods is held by Ward & Gay, of Boston.

Martinelli & Gillooly, bookbinders, Rockford, Ill., have dissolved partnership. J. F. Gillooly succeeds.

Henly & Orton, fancy goods dealers, Kingston, Ont., have dissolved partnership. M. Henly continues.

Rueff & Schultze, engravers and printers, New York city, have dissolved partnership. Charles L. Schultze continues.

Kleiner & Gilbert, publishers of the *Argus*, Evansville, Ind., have dissolved partnership. F. C. Gilbert continues.

J. L. L. F. Warren, publisher of the *California Farmer*, San Francisco, Cal., is advertised to be sold out by the sheriff.

Bids for furnishing postal cards for the next four years were opened at Washington yesterday. Woolworth & Graham were the lowest bidders.

The fringing of Xmas, New Year's and birthday cards will be carried on extensively this year. Almost every house handling these goods will place them on the market, decorated, more or less, in this manner.

John Carter & Co., 123 Franklin street, Boston, have a large and varied stock of fancy and advertising cards, which they are making a specialty, doing a large business in them. They are also offering book and news papers of all grades.

Henry Levy & Son have opened this week a new and exceedingly pretty line of fans, which are very suitable for use at summer watering places. The line includes a great many designs and styles and the prices range from five cents to five dollars, each.

Several members of the family of A. Hoen, of Hoen & Co., lithographers, Baltimore, are now visiting the city, and, notwithstanding that the principal object of their visit is to attend the great festival at present progressing in the Seventh Regiment armory, a great deal of business has been transacted by some of them since their arrival in this city.

CEMENTINE.

WE desire to call attention to a new article which we are just now introducing to the trade. It is a liquid glue, cement and mucilage combined. In our own business we experienced so much difficulty in finding an adhesive that would make our labels adhere to the tin cover of the Hektograph, that we gave a commission to one of our most distinguished chemists to compound for us an article which would answer our purpose. After months of labor the result has been the production of an adhesive so far superior to anything heretofore made, that we have decided to manufacture and offer it for sale, and are now ready to supply it in any quantity. It is without doubt the best article of the kind for family and general use ever offered to the public. For repairing China, Glassware, Furniture, Rubber, Leather, Books, Billiard Cues, or pasting labels upon tin or other metal or for any use where glue, cement or mucilage is required, it is unrivaled. For warm climates we make an article expressly adapted for use there. We supply it by the gallon or barrel, and for family use it is put up in bottles, with brush, at 25 cents. Samples will be sent free to large consumers.

LIBERAL DISCOUNT TO THE TRADE.

FOLEY'S

Celebrated Gold Pens and Pencils

THE FINEST AND BEST.

CIRCULAR.—To those engaged in mercantile pursuits, any invention that will facilitate their labor is highly worthy of notice, as well as of extensive patronage. One of the most important inventions of the present age is that of a pen that possesses the necessary qualities of firmness in mark and durability in use. Pre-eminently such are those of JOHN FOLEY, Manufacturer of Fine Gold Pens and Pencils, No. 2 Astor House. Their superior value is tested by the long time he has been engaged in our city in their manufacture. We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

BRADSTREET'S

A JOURNAL OF

Trade, Finance and Political Economy.

THIS JOURNAL covers a ground the extent of which is occupied by no other publication, and forms an invaluable work of reference to the merchant and manufacturer.

REGULAR AND TRUSTWORTHY CORRESPONDENCE, furnished by experts, expressly for this journal, from all the principal trade centres of this country, is embraced in its columns.

THE CONDITION AND PROSPECTS of the various markets are carefully recorded, and the possibilities and opportunities for trade are demonstrated as by no other medium extant.

QUESTIONS OF COMMERCIAL INTEREST and importance are fully and ably discussed editorially, without prejudice, by some of the most responsible writers and statisticians of the time.

THE BUSINESS CHANGES occurring in the United States and Canada—such as failures, dissolutions of partnerships, chattel mortgages, etc., etc.—are printed in each issue, and the list is more complete and comprehensive than can be obtained through any other source.

THE CIRCULATION OF THIS JOURNAL being among the best merchants, manufacturers, and banking institutions of not only this country but many foreign, it presents an excellent advertising opportunity to a limited number of first-class banks, corporations, and business firms.

THE BRADSTREET COMPANY,

279, 281, 283 BROADWAY, NEW YORK.

WANTED—SITUATION AS TRAVELER FOR Paper, Stationery or Fancy Leather House. Reference, present employers. Address TRAVELER, office American Stationer.

CLEMENT HOE, 301 East Fifty-seventh st., for the last seven years Bookkeeper for Joseph Gillott & Sons, 91 John street, is desirous of obtaining a similar position in some good Wholesale House. He refers to his brother Henry, who is the manager of above house.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, MAY 5, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

JUST now there are many changes of address. It will be a matter of convenience for us and for our subscribers to send us notification of removals whenever such changes occur.

REFERRING to the fact that there were several inquiries from correspondents to which we could not give definite answers last week, we ask that our readers who can at any time supply the information sought will notify us. We are indebted to the kind suggestion of two of our Baltimore friends for a reply to an inquiry which we printed in our last issue, and we thank them for it.

WHAT with the winter's storms and spring floods the Northwest has had a hard time of it this year. The effect on trade has been obvious; yet, if in one section business has been retarded, enough has seemingly been done in other quarters to put the aggregate ahead of that of former seasons. What would have been the conditions of trade if everything had been favorable? It is quite possible that the rush might have been such as to take people off from their feet and give an impulse more exciting than healthful. Let us believe that all has been disposed for the best, and that those who have not shared in the activity, by reason of the stress that has been laid upon them, will happily find consolation in the next busy season.

IF summer delights or political antagonisms do not prevent, something may be done toward the preparation of a national bankrupt law between now and the next session of Congress. We are told that the Sub-Judiciary Committee of the Senate is to be engaged during the Congressional recess in framing a much needed new national bankrupt law. The committee, consisting of Messrs. Ingalls, McMillan and Garland, it is said, will invite practical suggestions from the representative business men of the country, the judges and former registers in bankruptcy, with the view of remedying acknowledged defects in the former laws relative to delay in the distribution of estates and the consumption of assets in extravagant fees and costs. The information which is thus to be gathered by correspondence during the summer will be compiled and digested for the use of the sub-committee in the autumn, so that they may be enabled to report to the full committee, early in December, some measure that may meet with the approbation of Congress and the country. We hope that the committee will put in some effective work.

WE know of a stationer who has one great virtue. We do not mean that he is deficient in other respects, either as to moral or business qualifications, for he is, we believe, honorably known for these. But this individual runs to scrap books and catalogue work, and we really believe that he is the most thorough man in this way in the country. His system is admirable, and it deserves imitation. Scrap books and handy memoranda are of great value in trade, or indeed out of trade. There are plenty of things that plenty of people know, but which they either forget or underrate. Hence there is some use in calling their attention to them once in a while. If more men kept note books than now do there would be fewer things passed over which ought to be remembered. Very often a person hears or remembers something which he knows will be of use to him in his business; but he lets it go, so that when the time comes in which it would be of use to him it is not at hand. It is a very good plan to keep scrap and note books. The scrap book and the note book are great helps to the pocket book and the bank book.

THE MELBOURNE EXHIBITION.

[FROM OUR REGULAR CORRESPONDENT.]

MELBOURNE, Victoria, March 22, 1881.

The Lockwood Press, as your readers are already aware, obtained four awards of the first order of merit. The remarks of the jury in art are not yet published, but the jurors in stationery, printing and periodical publications have already made their observations. They are as follows: "Howard Lockwood, of New York, ably represented the printing and publishing enterprise of the United States. This exhibitor receives three first awards, viz., for printing, publishing and photo-typography. The exhibit consists of THE AMERICAN STATIONER, the *Paper Trade Journal*, the *American Mail and Export Journal*, the *Millers' Journal* and the *Musical and Dramatic Courier*. The *American Mail* is a high class trade medium, the illustrations are good, it is carefully edited, well printed, and meets an evident want in commercial circles. THE STATIONER is a useful publication for those in the trade, and is superior to any other similar publication. The *Musical Courier* is illustrated with vignettes of foot-light celebrities, well printed and well posted with items of interest to

those for whom it is intended; the photo-typographic exhibit is of this paper, and though reduced to one-seventh, every letter is as clear and distinct as the original letter-press. These productions are all of first-class merit." These encomiums are exceedingly satisfactory, and the same may be said of the specimens of job printing and of book printing exhibited on the pavilion of the Lockwood Press—all the workmanship is chaste in design and elegant in execution. Culture and industry, as so highly practiced in the United States, were strongly reflected on the neatly arranged, richly carpeted and handsomely furnished stand of Howard Lockwood. This gentleman's name is now as popular in Australia as in America, and his publications are held in the highest estimation. The honors obtained here and in Sydney were richly deserved, and are of more intrinsic value because of their being conferred in both places by judges and jurors who are gentlemen of the highest attainments and conversant with printing and publications since the days of their boyhood. Singular enough the Government printer of New South Wales, Major Richards, was one of the judges at Sydney, and John Ferres, Government printer of Victoria, was the chairman of jurors here at Melbourne. Awards from these gentlemen are indeed a credit to the Lockwood Press.

Besides the four first awards to Mr. Lockwood's exhibits, the joint occupiers of the extensive pavilion of the Lockwood Press have succeeded in obtaining high honors. H. D. Wade & Co., 117 Fulton street, New York, obtained two awards of the first order of merit—one for an exhibit of colored printing inks and one for black printing inks. Mr. Wade beat all the world in inks here where the competition was most severe, being the only one who obtained the high distinction which must assuredly carry gold. The test was most severe, and in all elements of merit the jurors were unanimous in awarding the highest score to Wade's inks. It was a mistake that these manufacturers did not exhibit some of their lithographic inks; if so, they would have obtained another first order of merit.

Charles E. Johnson, Philadelphia, Pa., also made a most meritorious display. The official catalogue was printed with his inks, and he scored very high honors. He obtained second order of merit for black printing inks, and a second order of merit for colored printing inks, beating many excellent competitors from all parts of the world.

In writing fluids the far-famed house of Carter, Dinsmore & Co., Boston, Mass., scored a most signal victory—three awards of the first order of merit—one for copying inks, one for black writing inks, and one for colored writing inks. This is beating the whole world and making these manufactures the most popular in Australia. Nor is this all. Carter, Dinsmore & Co., Boston, obtained the highest and only award given for mucilage inside the Exhibition building, so that these manufacturers may, and very deservedly, look forward to the gold medal.

On the pavilion of the Lockwood Press the firm of Matthews & Warren, Buffalo, N. Y., scored a first order of merit for color printing. The printing was done from Wade's colored inks, and showed that the exhibitors are artistic in blending colors, excellent designers and most accomplished color printers. It is not too much to say that, in these days of ocean-going steamers and continental railways, Matthews & Warren will do a good business in Australia.

The railway punches of Warren Hill, 73 Cornhill, Boston, Mass., were also exhibited on the pavilion of the Lockwood Press. These obtained first order of merit, and are goods which stationers should deal in. They are cheap and substantial as well as elegantly finished. This made eight awards of the first order of merit—the highest distinction—given to the exhibitors on the pavilion of the Lockwood Press.

Among those who obtained second order of merit on the pavilion were the proprietors of the "Russell Common Sense Binder," Williams, Stillings & Co., New York. Their binder, as displayed on the publications of the Lockwood Press, was much admired, and through the exhibit it is not too much to say that it will become a favorite in Australia. Already several persons of good standing have applied or are about to apply for the sole agency in Victoria.

Moses Warren, State street, Chicago, book publisher, also exhibited "Hill's Manual of Social and Business Forms" on the pavilion of Howard Lockwood, and was awarded the second order of merit, a very high distinction. The work certainly is one of the best, and should be found in every drawingroom. The commissioners from Belgium and several other high functionaries desired to purchase copies, and it is to be regretted—as the publication is sold only by subscription—that none could be purchased. This work is, from an educational point of view, of a most meritorious character, for young or old, and should find space in every household.

The time globes of Juvet & Co., Canajoharie, N. Y., were also exhibited on the Lockwood Press pavilion. These interesting, useful and instructive instruments obtained three awards—first in horology, second in education, and the third for philosophical instruments. Though these are not of the first order of merit, yet, considering that the bulk of the manufacturers' exhibit was lost by the wreck of the "Eric the Red," they obtained a great victory. There is no doubt that the manufactures of these exhibitors are in the near future destined to become highly popular in the educational establishments of Australia—or for that matter those of all civilized nations. They should find space in every well ordered family and in the studio of every scholar—he has not only before him the accurate local time, but also the hour of the day in any part of the earth, whether it be land or ocean.

Fairbanks & Co., 811 Broadway, New York, have again secured highest order of merit for their improved letter balances. This, I believe, makes the fourth first award to this firm, whose offices are all over the leading cities of the world, and whose headquarters is at St. Johnsbury, Vt.

The MacKinnon Pen Company, 200 Broadway, New York, obtained the highest order of merit for exhibits of pens. The company is ably represented here by Malcolm Brothers, Melbourne. The pen, though expensive, because of its lasting and other qualities, is a great favorite in Australia.

Henry Barnum, Hartford, Conn., who exhibited the *American Journal of Education* and other publications of the same class obtained second order of merit, a very high distiuction when the competition is considered.

Aikin, Lambert & Co., New York, have again obtained the highest order of merit. Their charms, gold pens, and pencil cases are of a most meritorious description and are much admired by all visitors. The firm is represented by Evan Jones, of Sydney, a most eminent practical horologist.

In toilet soaps and perfumery the firm of Eastman & Brother, 1011 Marble street, Philadelphia, obtained the high distinction of second order of merit, notwithstanding bad packing, which caused destruction of their goods and other losses. It should be considered also that they were in competition with exhibitors whose showcases, without their vast, varied and valuable contents, cost upward of $3,000. The toilet soaps of these exhibitors are highly creditable and are destined from their cheapness and quality to become popular in Australia. The perfumery of the exhibitors is of the most excellent description. It is to be regretted that between Philadelphia and New York their excellent showcase was much injured. However, they have obtained a very proud distinction. There were hundreds of exhibitors in this class from all countries who did not even obtain an award of the fifth order of merit. J. H.

N. B.—Address Box 86, General Postoffice, Melbourne.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, May 4, 1881.

THE MONEY MARKET.—The money market continues to work very easily, the supply of capital offering for both business and speculative purposes being generally in excess of the demand. The impression is very general, and seems to be justified by facts, that for some time to come the monetary situation is likely to be characterized by ease. In the government bond market the dealings were on a heavy scale and were generally firm in tone; 4½'s advanced ⅝ per cent. and 4's 1⅛ per cent. on the week's transactions; 6's and 5's were unchanged. It is generally believed that over 75 per cent. of the 6's of 1881 will be presented to the Treasury Department for continuance as 3½ per cent bonds. Railroad mortgages were in brisk demand throughout the entire week, and most of the leading issues recorded an advance in prices. There has been a marked increase of business in stocks and quite a general advance in stocks during the last three days, the shares of the trunk railway and of the coal carriers having attracted the most attention. Foreign exchange has further advanced on a continued light supply of bills and a good demand. The actual rates for prime bankers' sterling at the close were 4.83¾@4 84¼ and 4.85½@4.86. Cables closed at 4.86@4.86½, and prime commercial bills at 4.82@4.82½.

THE PAPER MARKET.—Although we are having more genial weather, it does not appear to exert much influence upon the paper trade. The spring season is now so far advanced that there is little probability that the shortage thus far this year can be made good during the remainder of the spring. The industrial affairs of the country generally are conceded to be in a satisfactory condition; business men are looking forward with some degree of encouragement to an active movement during the late summer and autumn months, and their hopes and expectations will not unlikely be realized. We think there has been more disposition shown by manufacturers to seek orders during the past fortnight than at any time this year; at the same time the number who have not all the orders to work on to keep them fully engaged is believed to be quite limited. Prices hold their own very fairly, and rule within the range of our quotations in prices current.

THE STATIONERY MARKET.—There has been no increase in the volume of trade since our last, the season for an active distribution of goods for spring and summer consumption being about over. There is a more cheerful feeling regarding the future, which has for its basis the generally sound condition of the industrial and commercial affairs of the country. The volume of the wholesale trade of this city during the month of April has generally been disappointing. At the beginning of the month the snow blockades at the West and Northwest interrupted the distribution of merchandise in that section, and these impediments to trade were no sooner removed than large portions of the same section were deluged with floods from the melting snow, thus destroying a large amount of property and prolonging the disabilities of trade and traffic. But there has been some compensation for these drawbacks by a fair amount of activity with the South and Southwest. The work of preparation for the fall is still being pushed forward. We hear of no material change in prices of our staple goods.

Beg leave to announce that they are constantly increasing their facilities for manufacturing Envelopes, by adding new machinery for folding odd sizes, so they can now make any size wanted, at short notice. Their stock of paper embraces every kind, from the common Manilla to the very best plated papers, in white or tints. They also carry a large stock of Linen Papers, two qualities, their Trade Mark being

"Pure Irish Linen" and "Imperial Linen" Papers,

IN NOTE SIZES AND FOLIOS, WITH ENVELOPES TO MATCH.

☞ Also a large assortment of PAPETERIES. Price List and Samples sent when requested.

THE GEOMETRICAL FORMATION OF SHELLS.

In the forms of shells, as well as in their ornamentation, though symmetry is universal, exact repetition does not exist. The spirals of the turbinated and discoid shells of mollusks are, however, the perfect expression of a mathematical law. The size of the whorls, and the distance between contiguous whorls in the shells, follow a geometrical progression; and the spiral formed is the logarithmic, of which it is a property that it has everywhere the same geometrical curvature, and is the only curve, except the circle, which possesses this property. Following this law, the animal winds its dwelling in a uniform direction through the space around its axis. As an eminent man of science says, "There is traced in the shell the application of properties of a geometric curve to a mechanical and artistic purpose by Him who metes the dimensions of space and stretches out the forms of matter according to the rules of a perfect geometry," which reminds us of the ancient Platonic doctrine that Deity proceeds by geometry.

Varied quantity and a more perfect geometrical rhythm would certainly result from some knowledge of the numerical laws upon which all nature is developed. It will be found, for example, that those numbers prevail as well in marine forms as in terrestrial vegetation whose correspondent geometric forms give the greatest variety consistent with symmetry. Thus five, corresponding to the pentagon, is the law of growth of the *radiata*, star fishes, sea urchins, and the like. The question was long ago put by Sir Thomas Browne, "Why, among sea stars, nature chiefly delighteth in five points?" And again, "By the same number, five, doth nature divide the circle of the sea star, and in that order and number disposeth those elegant gum circles or dental sockets and eggs in the sea hedgehog." "Every plate of the sea urchin," writes Professor Forbes, "is built up of pentagonal particles. The skeletons of the digestive, the aquiferous, and the tegumentary systems equally present the quinary arrangement, and even the hard framework of the disk of of every sucker is regulated by this mystic number."

In the crustacea, three and seven seem to be the regnant numbers, and in the sea anemones a most curious law of alternation occurs which is well illustrated in the full grown *Actina senelis*. The four concentric series of tentacles alternate with each other. In some the typical number is six, or a multiple of six. In the *Actina equina* there are twelve tentacula in the first row; in *Actina penduncuta*, six; and there are four rows in the first species and five in the second.

There is, indeed, much truth in the idea of Oersted's, that "inorganic creation constitutes the elementary, and organic the higher geometry of nature." Reference has been made to the wedge-shaped pattern, with which, we may be sure for some good artistic reason, so many different shells are ornamented, as are mammals with spots and bands, and birds (where pattern work occurs, as in most sorts of grouse) with varieties of crescent markings following the edges of overlapping feathers; but there is one beauty spot that nature confines to no one order of animals, but with which she embellishes fish, flower, insect and bird. This is the eyed spot, or *ocellus*, shown in its utmost perfection in a feather from the tail of a peacock. It is a sudden color, burst upon a comparatively plain and often dull ground, and tells with more effect than any other ornament that can be used. In the peacock's tail and in the plumage of the argus pheasant, it is multiple, for each feather is a

complete thing in itself. But it is most effective where it appears alone as the most conspicuous if not the only ornament upon its ground, as in the owl-butterfly and others, the chætodon, the eyed blenny, the John Dory, &c.

These beautiful shells, however, to be seen in all their lustre, should be looked at beneath the water, wet and washed, glistening in the fluent light, and tenanted by the mysterious forms of life to which they originally belonged; far otherwise they then appear than when they lie, dry and bleached and dusty, on the shelves of a cabinet. The ocean, indeed, beautifies all it touches. Give it any rough shard, and it will so roll it about, and lick it with its waves, and smooth it with their soft attrition, that it will return you a polished and shapely nodule, exhibiting all the beauty of color and surface of which the material is capable. If the worker in clay can learn much that is valuable, and can gather precious material for design from marine forms, what may be said of the boundless field of ideas opened to decorators of fabrics and lace designers in the unapproached delicacy and elegance of form exhibited in the lovely sea weeds so plenty on our coast, and the magnificent crinoids from the coral banks, the plumed sea-pen, and many more, of which want of space forbids the enumeration, much less the description. Lace being necessarily composed of ornament in delicate lines, different sea plants, by their extreme fineness of texture, their graceful, flowing contours, and their susceptibility to flat treatment, lend themselves more readily to the lace designer, and with greater elegance and variety, than terrestrial plants that have solid petals and leaves. Many a suggestion of beautiful net might be gathered from the reticulated fibres of the sponges, and particularly of the lovely flower basket of Venus and its cognates. For embroideries, what more elegant forms could be found than those of the so called basket fish of the genus Asterophyton and the Ophiura, and the dainty sea lilies?—*Crockery and Glass Journal*

ANSWERS TO CORRESPONDENTS.

NOTES ON ELECTROTYPING.

By Robert Grimshaw, Ph. D.

Electrotyping for printing purposes is American in origin. After English and French attempts had failed, Adams (1841) printed engravings. In 1842, Davis, of Boston, used it for his Manual of Magnetism. Wilcox, of Boston, first made a business of it.

Electroplating is covering a base surface with better metal. Electrotyping is duplicating surfaces—generally printing surfaces in copper—by a galvanic current, and mounting them for use in a press. It is distinguished from stereotyping in that the latter is hot casting, a mechanical process, and electrotyping is a cold chemical process. It demands special knowledge on the part of the compositor, electrotyper and mounter. There must be a depositing room, solution vats, scouring and cleaning apparatus, batteries or magneto machines, &c. The forms must be specially prepared. The rolls should be thick. There should be bearers or guards type high through the blank spaces to prevent the wax from spreading. The type faces should be made truly plane and the form locked much tighter than for printing. If there be curved lines the forms should be filled solid to the shoulder of the type with plaster. Wood cuts must be perfectly cleaned with naphtha, and dried.

The forms should be washed and dried; then blackleaded with a soft, fine hair brush, all excess of black lead being brushed out. The molding case—a flat rectangular frame—is filled with yellow wax, and then blackleaded. The impression is given in this by a toggle press or a hydraulic press. Where there are low places the first impression is taken with a gum cloth upon it. Then, where there are to be blanks, the spaces must be built up with a building iron, and strips of building wax. The mold must then be properly blackleaded to give it good conducting surface. The plumbago must be absolutely pure, lustrous, fine and free from grit, and worked into every line and letter. This is done either with a hand brush or with a machine. There are "dry" and "wet" machines. In the wet machine a current of black lead and water is directed over the mold. This leaves the mold ready to be wet with the liquid in the depositing vats.

To get a starting place upon the mold, there is a place removed from the edge of the frame. The conducting power of black lead is greatly increased by gilding or silvering, or by mixing it with one-third its weight of white bronze powder. A better way is to coat the mold with a fine film of copper by dusting impalpably fine iron filings upon the graphite mold, and then sprinkling with a solution of sulphate of copper. This causes the precipitation of fine metallic copper over the whole mold. By the Adams process the wax is covered with a metallic surface by applying fine powdered tin with a soft brush until the surface presents a bright metallic appearance, brushing off superfluous powder; then immersing in alcohol, expelling the air bubbles by washing in water, and then covering with fine copper in a small battery before putting in the regular depositing battery.

"Quicking" is touching with a solution of nitrate or cyanide of potassium to prevent the copper deposit being broken over lines in set up type.

The solution in the main vat must be stirred up regularly to prevent the liquid from getting too weak.

Spoiled or used plates may be utilized by employing them instead of new anodes; hanging them with the copper face opposite the molds,

the battery strips off all the copper and leaves the white metal. The copper shell is about as thick as good thick paper—say, three or four hours in the bath. For newspaper headings and other blocks requiring excessive use, the mold should remain in two or three days.

To remove the shell incline the mold, free the connections, and pour hot water over it, lift the shell as the hot water runs over it. The shell must be kept straight and not "cockled." There is always more or less wax sticking to the shell after being stripped from the mold. This may be removed by a hot solution of potash. All the wax must be removed, else the remainder would carbonize in the process of tinning and leave a black crust. This is for the purpose of making the metal backing adhere better to the copper shell. Tin has a better affinity for copper than stereotype metal has, and this latter metal unites with tin very readily. To tin the shell, ordinary soldering solution, or flux, is brushed over its back; then alloyed tin foil is spread over it, and the pan is floated on the hot backing metal until the foil melts and completely covers the whole shell. Instead of tin foil, molten solder may be used, being poured upon the shell after the flux has been brushed upon it. One objection to tinning is that there is more liability of the melted metal running through in minute pinholes in the shell, spoiling the face.

After tinning comes backing. The shell in the backing pan is swung upon the leveling stand, and the melted metal poured carefully from one corner to the others. The level of the stand should be tested often. It is very hard to get a backing metal which will not strip off in finishing. If there be too much antimony (which has great affinity for tin), it will absorb the tin and strip the shell.

The best proportion is about four of tin, five of antimony, and ninety-one of lead. The plates, which are rough on the back, and of uneven thickness, have also imperfections in the face; the blanks are too high, the bearers must be cut down, &c. If there be several pages in one plate, they must be sawed apart, and rough edges trimmed off with a special machine. The plate is then shaved to make it smooth and of regular standard thickness. It is then tested with a straight edge upon the face, and high places beaten down with a hammer. Then comes the fine shaving. Low places are brought up by laying the plate face down upon a smooth iron plate, and striking the thin places with a ball-faced hammer. The face is tested with a piece of charcoal rubbed over it. High places are rubbed down with a slip stone and water. Rough places are touched up with fine emery paper. Touching up defective letters is a very nice operation. Sometimes the dots of i's are low, and they may be brought up by punching them up. If one letter is to be replaced, it is punched out bodily with a chisel-end punch just the size of the body of the letter, after ploughing out the backing metal with a graver below this place. Electrotypes can be made from plaster molds.

Before going into the details of electrotyping, I shall state what must be done. The printing surface that is to be duplicated must first have a negative of it made by casting, as in stereotyping, although it is to be used in an entirely different manner. But generally this reverse or negative is made in wax, under great pressure, and, of course, such a mold would not be adapted for stereotyping or any other hot process, any more than the plaster mold can be used for the wet chemical process without special preparation, entirely different from that treatment which it would receive for stereotyping. After this reverse is obtained it must be made properly conductive for electricity, in order that the electric current may pass through it, and that the coating of metal may attach itself to it. The manner of making so non-conductive a substance as wax highly conductive must be such that the copper coating or shell may be readily separated, and at the same time it must have a perfectly even thickness (or rather thinness), for otherwise it would give a copper coating that was not smooth or not an exact, positive reproduction of the wax mold. The coating of copper, being deposited upon the wax negative, must be first detached, then stiffened by a metal backing, and, for most purposes, except book work, mounted upon either wood or metal (generally the former) to make it exactly type high.

The perfect electrotype must be an exact reproduction of the finest lines of the wood cut or type. Its printing surface must be smooth, hard and durable. It must be quickly made, although this is not so necessary as in the case of stereotypes, which are generally employed for newspaper and other hurried work. The copper electrotype face is harder by many times than type metal. But it has this disadvantage, that it will not work with vermilion ink, by reason of the chemical action upon it of the mercury in this latter. For this purpose an electrotype requires to be silvered or nickel plated. Electrotypes cannot be mended or altered as readily as stereotypes can; first, because copper is harder and not so readily engraved, and second, because the copper shell is liable to curl up and peel off.

COLE'S NEWSPAPER FILE.

Secures the Papers in Book Form with Consecutive Pages.

The only Correct Method of Filing Newspapers.

ALL who appreciate the advantages of keeping their papers for reference should use this File, combining simplicity with security and durability. When ordering, please state size of paper. Used in the Leading Newspaper Establishments; Washington Bureaus of Prominent Journals; City, State and Government Departments. A handsome piece of furniture for office, counting room, or family. This File is hand made, of the best material and workmanship, and will last for years.

WHITE and COLORED CRAYONS.

FOR the information of the trade, we would say, there are only three manufacturers of Crayons in this country, two of whom are at Waltham, Mass., and one at Sandusky, Ohio, for whom the **AMERICAN CRAYON and SLATE CO., 43 DEY ST., NEW YORK CITY,** are the agents. In connection with this we would say that the Crayons which we offer for sale will stand a better test in regard to strength and quality than any other Crayon manufactured in this or any other country.

We also make a specialty of **Colored Crayons,** and the colors which at present are being produced **surpass all others in brilliancy.**

AMERICAN CRAYON and SLATE CO., 43 Dey Street, New York.

OBITUARY.

JESPER H. HOLMAN.

Major Jesper H. Holman, of Philadelphia, eldest son of A. J. Holman, died on Tnesday, April 26, after a protracted illness, from paralysis, caused by wonnds which he received while in the service.

Major Holman engaged with his father in the book business in 1855, but left it to enter the One hnndred and twenty-first regiment of infantry, Pennsylvania volunteers, in 1862. He enlisted in Captain T. Elwood Zell's company of that regiment, and was selected as color sergeant, and was in different engagements from Ricker's Gap and Warrentown Junction to Fredericksburg. In December, 1862, he was promoted to second lieutenant and afterwards to first lieutenant of Battery G, Second Artillery. In 1864 he was promoted to captain of Battery E, Second Provisional Artillery, and participated in the battles of the Wilderness, Spottsylvania, Cold Harbor, and in front of Petersburg. He commanded his regiment in the several charges in front of that city. He commanded five companies of his regiment at the mine explosion before Petersbnrg, July 30, 1864, and was twice wounded. At the close of the war he returned to the book bnsiness, and occupied an important position in the house of A. J. Holman & Co. Four years ago he was stricken with paralysis, which deprived him of the nse of his right arm and leg. He had been nnable to attend to actnal business for a few years past. Major Holman's record is that of a gallant soldier.

Langfeld, Turner & Andrews, Philadelphia, illustrate several of their specialties in their advertisement, to which the following descriptions refer: Cnt "R" is an entirely new style of portmonnaie, with a new catch to fasten it securely. This article has gold and silver compartments, and is very roomy; it is made in rnssia, calf, seal and other desirable stock, from the cheapest to the best. Cnt "B" is a round purse for holding coin and is sufficiently large to hold $20 gold pieces, trade dollars and smaller coin. Cuts "G" and "H" represent the slide handle pocketbooks, with handle closed and open. Cuts "M" and "N" represent the new tablet card case, which can be worn suspended to belt or chatelaine, or can be carried in the hand or pocket; the compartments for holding the cards are in tablet form, and will hold a package of cards. It has an erasive tablet and pencil attached. Pocket photo cases, holding from two pictures to as many as are desired, are made after this style. All of these designs are patented.

R. Fideau, 16 Beekman street, agent for Hicks' patented hammocks, has jnst published an attractive show card, intended to be given to all parties handling his goods. The card is illustrative of a rural scene, and in the back ground is a croquet party, near which is a yonng lady reclining very gracefully in a hammock snspended between two trees. The young lady prefers the enjoyment of the hammock to that of joining the croquet party. Mr. Fidean is doing a large business in these hammocks. This week he shipped among others quite a good sized invoice to a Spanish port. The home trade is keeping him very bnsy.

A. Crusins, who is well known to the trade from his long connection with Victor E. Mauger & Petrie, and who has been suffering from iritis since Febrnary 4, has recently had a severe relapse. Mr. Crnsius has suffered very mnch since he was first attacked, and it is to be hoped that his convalescence will soon be brought about.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

CHINESE NEWSPAPERS.

Until a few decades ago advertisements were unknown in Chinese journalism. Such announcements were only to be found at the street corners. Here and there loose leaflets were distributed containing little else than a sensational story of robbery, as the breaking of an armed band into a pawnshop, or an account of the death of a man-eating tiger. From an article in the Austrian *Menatschift* for the East, by Herr F. Hirth, of Shanghai, we learn that of existing newspapers only one is due to purely Chinese initiative—the so called *King-pao*, or Pekin *Gazette*—which, solely confined to official decrees, can scarcely be compared with European journals. The *King-pao* is the organ of government, and disdains to concern itself with non-official matters or anything connected with trade. Advertisements are not to be thought of. On the other hand, it may be regarded as a happy sign of the times that the idea of newspapers in the European sense, as first started by Europeans, is becoming more and more understood and acted on in the coast provinces. There exist at present several papers printed in Chinese characters, partly in Hong Kong, partly in Shanghai. Amoy has also had for some little time its Chinese organ. The *Shên-pao*, a daily paper, founded by Mr. Ernest Major, which, under eminent editorship, advocates the progressive interests of the European party, numbers its Chinese subscribers by the ten thousand, and is read not only in Shanghai and the neighborhood, but also here and there in the interior of China, especially in the provincial chief towns and in the Treaty Ports. An opposition organ was founded several years ago by the anti-European or Mandarin party, the *Sin-pao*, edited after the model of the other, but conducted on a different platform. The *Sin-pao* has also a large contingent of readers. Both papers contain a full reprint of the *King-pao;* the Chinese reader thus saves his subscription to the official organ, and receives besides a large supply of news, which, after he gets used to this kind of reading, interests him exceedingly. A stroll through the Chinese quarter of Shanghai yields the best evidence of this. At almost every door will be found people diligently studying one or other of the two papers. If we examine the contents of these sheets we find, first of all, after the reprint of the State Gazette, a leading article. In this is seen the chief difference between the two party papers, unless the subject is purely literary, when there is no opportunity for airing political prejudices. To the latter belong, indeed, questions which with us have long ceased to have anything to do with politics. After this follow matters which for European readers are not only tedious but difficult to understand, mixed news partly translated from English papers, partly collected by special reporters from among the people. These news contain mostly matters of fact, and are as trustworthy as in most of the European papers. A considerable rôle is played by the accounts of the sittings of the Mixed Courts. Then come copies of proclamations by the local mandarins, and, lastly, advertisements, among which will be found announcements of special European firms. Here an apothecary extols an unfailing cure for opium smoking; there a Geneva watchmaker commends his newest manufacture with Chinese division of time on the dial; a dentist asks attention to his artistic sets of teeth; a Japanese trader to his importation of eye-water; the importer of English and German war materials, as cannons, flints, revolvers, and munitions, sounds the praise of the

goods he has for sale, whether Krupps or Armstrongs; then come numerous announcements, as of auctions of all kinds, or the sale of Manila lottery tickets; lastly, come market items, daily memoranda on the most important trade articles; an exchange column, as we should call it, gives the different values of the various kinds of money, and a notice of the outgoing and incoming steamers. There is no doubt that Chinese journalism, still in its infancy, forms a powerful means of furthering European interests; even the anti-progressive *Sin-pao* indicates, by its very existence, an advance, in the fact of its utilizing a Western medium of civilization on the part of this conservative people, and may, therefore, be regarded as a happy sign.—*London Times.*

POLISHING WOOD.

Turned articles must be brought to a fine smooth surface with the finest sand paper, and the direction of the motion should be occasionally reversed so that the fibres, which are laid down by rubbing one way, may be raised up and cut off. To apply the polish, which is merely a solution of shellac in alcohol, take three or four thicknesses of linen rag, and place a few drops of polish in the centre; lay over this a single thickness of linen rag, and a drop or two of raw linseed oil over the polish. The rubber is then applied, with light friction, over the entire surface of the work while revolving in the lathe, never allowing the hand or mandrel to remain still for an instant, so as to spread the varnish as evenly as possible, especially at the commencement, and paying particular attention to the internal angles, so as to prevent either deficiency or excess of varnish at those parts. The oil, in some degree, retards the evaporation of the spirit from the varnish, and allows time for the process; it also presents a smooth surface and lessens the friction against the tender gum. When the varnish appears dry, a second, third and even further quantities are applied in the same manner, working, of course, more particularly upon those parts at all slighted in the earlier steps.

Flat surfaces are polished in a similar manner. The wood must be filled, as it is called, and for this nothing is better than whiting colored so as to resemble the wood and kept dry. Rub the latter well with linseed oil, and then sprinkle it with whiting. Rub the latter well in, wipe it off carefully, and give time to dry. This is far superior to size.

The polisher, however, generally consists of a wad of list rolled spirally, tied with twine and covered with a few thicknesses of linen rag. Apply a little varnish to the middle of the rubber, and then inclose the latter in a soft linen rag, folded twice. Moisten the face of the linen with a little raw linseed oil applied to the middle of it by means of the finger. Pass the rubber quickly and lightly over the surface of the work in small circular strokes until the varnish becomes nearly dry; charge the rubber with varnish again, and repeat the rubbing till three coats are laid on, when a little oil may be applied to the rubber, and two more coats given it. Proceed in this way until the varnish has acquired some thickness; then wet the inside of the linen cloth, before applying the varnish, with alcohol, and rub quickly, lightly and uniformly the whole surface. Lastly, wet the linen cloth with a little oil and alcohol, without varnish, and rub as before till dry. Each coat is to be rubbed until the rag appears dry, and too much varnish must not be put on the rag at one time. Be also very particular to have the rags clean, as the polish depends in a great degree upon keeping everything free from dust and dirt.

M & H BLOTTER TABLET PATENTED

PADS OF PAPER WITH BLOTTER ATTACHED.

ELEGANCE. ECONOMY. CONVENIENCE. CLEANLINESS.

THE paper is tableted, so that each sheet may be freely removed, leaving a perfectly clean, smooth edge. No paper is wasted. The sheet on which you write is always clean, being protected by the blotter. The blotter, of the full size of the paper, is so attached at the top of the pad that both sides of it may be used, and will last out the entire contents of the pad, being always at hand, and perfectly clean.

The blotter is kept clean, and also from wearing, by the card board cover, which is made of a highly polished stock, perfectly smooth, and that will not catch dust or dirt from the desk. The cover is richly ornamented on every pad, giving the whole a neat and elegant appearance. All kinds of paper and printed blanks are put up in this form at prices as low as if loose; making the most complete line of staple and elegant stationery ever offered to the trade.

The J. W. Stoakes Automatic Shading PEN.

FOR PLAIN, FANCY AND ORNAMENTAL LETTERING.

WASHINGTON, D. C., March, 1880.

I desire to say that the "Shading Pen" invented by Mr. STOAKES meets a want long felt by penmen. The work done by it is perfect in line and shade. The rapidity with which lettering is done, aside from the beauty of the work, is enough to recommend it for general use.

H. A. WHITNEY, Ass't Cashier, U. S. Treasury.

U. S. ENGINEER'S OFFICE, ST. LOUIS, Mo., February 11, 1880.

I have tried the PEN, and it gives great satisfaction. It is worth twice the price asked. It is valuable for headings, etc. JNO. R. BALLINGER.

ANTIQUITIES IN IRON.

In reply to inquiries from a correspondent with antiquarian tastes, we have taken pains to examine an exceedingly interesting collection of articles in iron and steel, which are being carefully preserved in the rooms of the New York Historical Society. These objects form a part of what is known as the "Abbott Collection," gathered by Dr. H. Abbott during a residence of twenty years in Cairo. They were taken from excavations among the ruins of Thebes, which is about 300 miles S. S. E. from Cairo, and from the ancient city of Sakkarah, about 21 miles distant. There are less than a dozen of them altogether, and for the most part were recovered from tombs deeply buried beneath the ruins of cities once the most renowned. As remarked by Dr. Abbott, these evidences of skill among ancient iron workers have an origin supposed to be contemporaneous with Abraham. Speaking of the scarcity of the specimens so remarkably preserved, he says: "The rarity of the metal is to be attributed rather to the rapid decomposition it undergoes when exposed to dampness than to ignorance of its properties, for it would have been impossible to execute such works as are found both in Egypt and Greece without its aid." The articles referred to are designated in the catalogue of the New York Historical Society's collection by numbers as given below:

574. Helmet of steel and iron, with a neck-guard in chain armor. The helmet is formed of several pieces resembling rough sheet iron of the ordinary thickness, bent to the shape of the head, and joined at the laps by small rivets.

575. Fragment of breast-plate made of pieces of iron, one of which has the form of a cartouch, and has stamped thereon the name of Shishak, the Egyptian king who invaded Jerusalem 971 years B. C. The several scales forming the breast-plate may be compared in size and weight to elongated pennies of the present coinage, arranged like shingles on a roof, and attached by a strong thread to a backing of linen cloth.

775. Iron spatula, fragile and light in weight, resembling the handle of a modern teaspoon, from Sakkarah.

757. Arrow-head, small and conical, about an inch in length; also the handle of an instrument partly of wood and partly of steel; also, a small statue of Horus and an instrument having a lion's head, the lower extremity of which is forked—the latter from one inch to an inch and a half in length.

We learn from the catalogue, as stated by Dr. Abbott, that the articles last mentioned, as well as the helmet and breast-plate, are very rare, and the only articles in iron and steel of undoubted antiquity which the writer had discovered, and are not to be found in any other collection. The cartouch above described corresponds in design and purposes with the armorial bearings of later years. In addition to the above are large numbers of articles in bronze, such as battle-axes, daggers, keys showing wards—not unlike some now made—all from Thebes.—*Metal Worker.*

The Bible used by Martin Luther in making his translation has recently been discovered in a village of Bohemia. It is covered with marginal notes in handwriting. It formerly belonged to the royal library at Dresden. The possessor has been offered $750 for it by the University at Leipzig, but has refused the offer.

One triumphs over calumny only in scorning it.

SPRING ADDITIONS
—TO—
VAN ANTWERP, BRAGG & CO.'S
BLANK BOOK LIST.

DEAR SIR—We have added a number of new and attractive lines of Blank Books to our manufactnre, and give herewith a description of them, together with reductions in the oldest styles. We hope you will favor us with an order for samples.

Please notice reduction in price of No. 3 Cap, Half Bound, to 11 cents per qr. It is now the cheapest book of this grade offered to the trade.

NEW STYLES.

No. 1. Cap, Manilla Paper, Half Bound, cut flush, red edges, per qr.....$0.08
No. 5. Crown, Extra Superfine, Heavy Laid paper, unit lines, cloth sides, Russia red back, 18 sheet quires, per qr..... .35
No. 6. Same paper and styles, marble sides..... .32
No. 10. Reduced Cap, Half Bound, in Day Books and S. E. Ledgers, per qr.....$0.12
No. 40. Same in Duck, 4 to 10 qr..... .12
No. 42. Crown, Duck, Russia corners, Extra Superfine Laid paper, unit lines, 9½x14¼, per qr..... .32

MEMORANDUMS.

No. 281. Gilt Memo. Side Fold, 48 pages, Cap 8vo., per gross.....$3.60
No. 282. Gilt Memo. Side Fold, 96 pages, Cap 8vo., per gross..... 6.00
No. 283. Gilt Memo. Side Fold, 192 pages, Cap 8vo., per gross.....10.00
No. 284. Gilt Memo. Oblong, 48 pages, per gross.....$3.60
No. 285. Gilt Memo. Oblong, 96 pages, per gross..... 6.00
No. 286. Gilt Memo. Oblong, 192 pages, per gross.....10.00

REDUCTIONS IN STANDARD STYLES.

No. 3. Cap, Half Bound, reduced to, per qr.....$0.11
No. 2. Demy, E. B., " " " ..... .75
No. 3. " Duck, " " " ..... .36
Long Quarto Manilla, reduced to, per doz..... 2.00
Two-thirds Manilla, reduced to, per doz.....$2.80
No. 15. Drill Book, " " " ..... .36
No. 17. 24 pages. Press Bd., Exercise, per doz.. .45
No 16. 64 pages, Exercise, per doz..... 1.30

Cincinnati, April 20, 1881.

MARCUS WARD & CO.
BIRTHDAY CARDS.

☞ In addition to our regular lines of Birthday Cards we have now supplies of **FRINGED BIRTHDAY CARDS,** ranging in price as follows:

20 varieties at 25 cts. each. | 10 varieties at 50 cts. each.
20 varieties at 35 cts. each. | 10 varieties at 75 cts. each.
5 varieties at $1.00 each.

These cards are all fringed with **Extra Heavy Silk Fringe,** and are put up with envelopes and protectors.

Nos. 611 and 613 CHESTNUT ST., PHILADELPHIA, PA.

BYRON WESTON

DALTON, MASS.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST and ONLY AWARD** given for

LINEN RECORD and LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition*, *Massachusetts Charitable Mechanics' Association*, *Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission*, *Medal of Progress American Institute*, *1877*, *and Medal of Improvement and Progress*, *Boston*, *1878*. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

☞ **Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.**
Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 74 Duane Street, New York.

The American Stationer

A Journal Devoted to the Interests of the Stationery & Fancy Goods Trades

"The Stationer"—Every Thursday—$2.00 Per Annum.

VOL. IX.---NO. 19. NEW YORK, MAY 12, 1881. WHOLE NO. 307.

Correspondence.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BOSTON, Mass., May 10, 1881.

The stationers report a good trade during the past week, the pleasant weather having brought to town quite a number of familiar faces and a good many new ones. Buyers from the interior report an excellent feeling prevalent. Credits maintain their usual high standard, thus showing that there is plenty of money in the rural districts, and that people are disposed to buy liberally. So much for the tone of trade.

The drift of trade is still confined to purchasers of medium priced goods, there being no special call at this season of the year for high priced merchandise. Wholesalers content themselves with handling moderate quantities of goods, and jobbers appear to be satisfied with filling orders for immediate wants.

In the way of stationery there are a few new novelties under the head of note papers, envelopes, and small wares, designed for summer use at the seaside and the mountains.

Winkley, Thorp & Dresser, Devonshire street, now have two of the finest show windows of the trade in town, a wealth of goods attracting much attention, and reflecting in an admirable and tasty way some of the products of the stationer's art.

In this connection it is proper to say that there prevails, among the leading stationers, a feeling of friendly rivalry, in the way of presenting attractive show windows. This is one species of advertising, yet it is not equal in point of advantage to investing in printer's ink.

With the completion of their new additions, L. Prang & Co. will almost double their capacity for producing art-work, and they need all the room they can control in order to satisfy the demands of their customers.

The card mania is waning; still the volume of business done in this direction is very large. New designs in "Birthday" cards have made their appearance.

Estes & Lauriet, Washington street, are doing an immense business in books and stationers' articles. This firm knows the value of judicious and persistent advertising.

The senior member of the book publishing firm of Osgood & Co. is on the eve of going abroad, partly on business and partly on pleasure.

Commercial travelers in the interest of the stationers' trade report a good feeling out West, notwithstahding the recent drawbacks occasioned by flood and disaster. Several Chicago buyers have been in town looking for seaside residences and at the same time ordering bills of goods adapted to the Western trade. There is a peculiar push and go atmosphere about the average Western business man which does not fail to strike the Easterner at once.

Groom & Co. and Fairbanks & Co. have for many years furnished the city departments with blank books and stationery, the first mentioned firm excelling, in some respects, in the manufacture of blank books, some of which, for the Treasury department, are of immense size and great strength.

Stationers refer with a feeling of national pride to the fact that the "Lockwood Press" has succeeded in carrying off the honors of the Melbourne International Exhibition, in the line of press work and the general typographical execution of its productions, in competition with the exhibitors of older nations.

Boston is really talking about holding a "World's Fair." Plans for it have already been drawn, the grounds to cover sixty acres.

L.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, Ill., May 7, 1881.

This season has been, as I have already had occasion to remark, a phenomenal one with the trade. Miles of snow, water and mud in rapid succession have not served to dampen the ardor of business; so that even this usually quiet month of May is remarkable for its unlikeness to itself. Probably the time has not been within the memory of the "oldest inhabitant" when trade held up so well and long. Truly our country must be prospering.

John J. McGrath, dealer in wall papers, reports the retail department overflooded constantly; and Mr. Storm, in the wholesale department, states that this, their usual season of rest and preparation for the fall, is remarkable in being the busiest May the house has ever known.

E. L. Stevenson & Co., artists' materials, report a good sale for black ebonized plaques, as well as for decorating goods generally. The house carries a full line of Janentzky & Co.'s tube oil colors and German moist water colors in tubes. A very ingenious and convenient article for artists and amateurs is about being placed upon the market by this firm. It is the invention of Mr. Stevenson, and consists of a sketching easel and chair, including color box and portfolio for wet sketches. When folded, it is carried by a handle, being very light, and may be packed in a valise or trunk, occupying only a small space. The easel is so arranged that the canvas may be set at any angle with the eye, to obviate reflections, whilst it may be raised or lowered to any height to suit the hand or portion of the canvas being painted. Altogether it is the neatest, most compact and most perfect device for the purpose I have ever seen. The firm also intends making nearly the same thing in walking stick pattern.

Mr. Kingsley's "Papioflora," or paper garlands, are growing deservedly popular. Last week Mr. Kingsley did a fine and handsome job for Company G of the First Regiment; and today he finished another for the Oriental Pleasure Club on the north side. The best success is to succeed.

E. P. Donnell & Co. are certainly satisfactory in the way of enterprise. Though not yet settled in their quarters, they have this week sold three of the "Acme" cutters in this city—one 44-inch to the J. M. W. Jones Printing Company, one 36-inch to J. J. Spalding & Co., and one 36-inch to J. L. Reagan & Co. Orders from outside the city are also pouring in. Just here I may hint that the firm intend giving the trade a few novelties ere long in the way of useful bookbinders' machinery.

Tuerk Brothers & Johnston—motors,—just settled in their new quarters at 86 and 88 Market street, are just in receipt of the good news that they were awarded the highest prize at the Melbourne Exposition. But the motor is just as well appreciated at home, as witness the fact that they are building a motor for the *Tribune*, South Bend, Ind.; another for the *Lumberman* Steam Printing Company, Stillwater, Minn., and a third for the *Pioneer Magnet* Printing Company, Big Rapids, Mich., all to take the place of steam engines. They are now nearly a month behind on orders.

W. F. W. Hall, agent for the Mackinnon pen, 65 State street, after a temporary disarrangement incident upon building changes, says he will be "in shape" once more by Tuesday next. The pen business, he thinks, is again showing signs of a boom, the company's new style "Sovereign" pen having created quite a stir among the dealers. This pen is the most convenient yet made, and comes mounted or plain.

Merker & Co., manufacturers of pocket-books and fancy leather goods, have removed from the third story of 88 State street to the second story of 82 State street, where they have roomy and pleasant quarters. They make a specialty of jeweler's trays, sample cases, knife rolls, &c.,

and are agents for Stroebel & Wilkins' Cincinnati importations.

The Union School Furniture Company is about removing from 53 State street to 180 Wabash avenue. It manufactures, among other useful articles, the "automatic rear-folding school seat," for which it is in need of agents. It is also about introducing a new and cheap air pump to the schools.

Reynolds & Reynolds, Dayton, Ohio, have "scored one ahead" with their new "Always Level" writing tablet. For writing tablets, "their name is legion," but I know of only one that gives your hand the luxury of always lying flat, and that is made by Reynolds & Reynolds.

G. B. H.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, O., May 9, 1881.

By no means a boom—nothing of the sort—can be heralded from the stationery trade in Cincinnati up to this 9th day of May, in the year '81. Nor can the contrary—the extreme contrary—be reported. Spring, by some hap or mishap, has been omitted from the category of the seasons in 1881. Winter hung on obstinately through the spring months, and summer rushed right at once right into his place as soon as he left it vacant. This seems to have deranged all sorts of business, and the stationer never fails to be affected in sympathy by the vicissitudes of other branches of trade. There is no lack of cheerfulness, no lack even of activity and stir in the trade. The case is one of slightly disappointed expectations, not attended by any symptoms in the least degree of an alarming nature. No man complains of sluggishness in the tone of trade, but every man remarks that the intensity of business up to this date is not quite up to what he anticipated after the departure of winter.

The paper dealers are doing a lively business. It is the manufacturer and jobber of finished goods who has failed to discover that flood of business he anticipated. But there is time enough yet. This caper of spring dropping out of the procession of seasons would naturally create a momentary confusion. Presently order will be restored and the march of business will be to quicker music.

I talked only a day or two ago with a Cincinnati manufacturer of goods no way related to the paper business, and our conversation ran upon the destruction of the timber of the country, and by consequence the increased cost of wooden packing boxes. He said invention was busy devising a means of utilizing the twigs and branches of trees and all sorts of waste wood, sawdust included, to make elegant, beautiful, cheap and durable packages, and he thought that the outcome would be the production of pulp barrels and casks, made of wood pulp chiefly.

Speaking of inventions, reminds me that patents have been issued to Elijah P. Brown for an apparatus for casting stereotype plates, and to Joseph N. Veasey for a preparation to make paper indestructible. Both inventors reside in Cincinnati.

On next Thursday John Holland will promulgate to the world the result of a long series of experiments with the metal iridium which has been chiefly used heretofore to furnish points for gold pens. I have stated in this correspondence that he has discovered a flux by which he is able to cast it into bars of any desired size. Mr. Holland has spent years of time and a great deal of money experimenting with this metal to ascertain its applicability to other uses. One of the prettiest of these discoveries is a process for alloying silver with it whereby the silver becomes almost as hard as steel, and at the same time retains its own properties of flexibility and tensile strength. He has had for weeks in operation a focused electric light, using one point of iridium and the other a carbon pencil. Only last Saturday Mr. Holland received from Ben Homans, editor of the *Bankers' Magazine*, in New York, a gold pen which the writer said he had used constantly since 1851, only sparing it in 1876 long enough for the maker to "smooth the wrinkles out of it." He adds: "Now please give it a new set of teeth, after which I expect it will survive the owner." It was made by John Holland in 1851, while he was a workman for his predecessor, Mr. Sheppard.

James McLaughlin, one of the leading architects in this city, has been using the MacKinnon stylographic pen for two years in making architectural drawings with India ink and sepia. I saw him purchase it. A lady came and solicited him. "Will it work with India ink?" he asked. "I don't know; try it," was the reply. "Well," said McLaughlin, "I'll fill it with India ink now, and let it stand a week in my drawer, and if it will flow, I'll take it." A week later the lady returned—the ink flowed, McLaughlin bought the pen and has been using it ever since.

There has been no great rush of mercantile visitors to this city within a fortnight, but all of the business houses here have their men on the road.

PRINCE WILLIAM.

TORONTO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., May 7, 1881.

April was a miserable failure. It did not during its stay get up a respectable shower, and in place of mud we had dust without end. The city fathers were not advised of the change, and acting on precedent the sprinkling wagons remained in winter quarters, and the dirt whirled up and down the streets in the most reckless manner. Umbrella and india rubber dealers consulted their horoscopes and almanacs, watched the clouds, shook their heads, and looked grave. There was a screw loose somewhere, but they could not tell where. They expected a boom but no boom came, and they are awfully disgusted. That is an ill wind that blows nobody good. Owing to the many snow falls last winter, the country so far has suffered no inconvenience. The clear but not very warm weather gradually dissipated the snow and saved us from any trouble in the way of freshets.

Farmers are well on with their work, and it is to be hoped the season will prove propitious. The "sap bushes" this spring have been very prolific, and large quantities of sugar have been made. It is more than probable that many of your readers know but little more about a "sap bush" than that in the country, when the wood has not been altogether cleared away, some people tap the maple trees, and make sugar and syrup out of the sap. They may have read, too, about sugaring off and taffy, but have never enjoyed such a frolic. Well, they have lost much, but it is to be hoped they have never been so unfortunate as not to have tasted maple molasses, the most delicious of all sweets. The boy who was asked what he would like best to do, and replied, "Swing on a gate and eat molasses all day," was an epicure of the first water.

Trade is good. There was, as there always is for a short space in the spring, a time when there was but little doing in the retail stores; but now good roads and the opening of navigation have set things moving, and dealers are happy.

Nisbet, Byron & Co., who, it will be remembered, commenced business January last, speak highly of the spring trade. They have shipped large quantities of fancy goods, and have taken already good orders for fall importations in books and stationery as well as fancy goods.

James Campbell & Son have secured the exclusive sale of Raphael Tuck & Son's Christmas cards for the Dominion. Messrs. Tuck could not have secured a better house to push their publications here. The firm is one of the oldest establishments in its line we have; and from the popularity of the cards issued by Tuck and the energy of the house into whose hands they have fallen this season, a large trade no doubt will be done. Messrs. C. have furnished several special Canadian designs appropriate to the season, which will be published by Tuck and will enter into the list of attractions for the purchasers of cards this season.

Marcus Ward's cards are out; and, as I wrote you in my last, there is a prospect of a Christmas card deluge.

Moving and house cleaning, especially the latter, come as regularly in the spring as the robin, though the feminine community, during the process of turning things upside down and inside out, are not, as a rule, quite so cheery as the redbreast. Their wonted mirthfulness comes back when order has been restored out of the chaos and *pater* has to face a long list of bills. In these days of fancy decorating and artistic paper hangings the dealer in these goods is sure to be called on, and while many a poor wight is wandering about, dreading to put in an appearance at home, our friends, J. C. Stuart & Co., are happy. They have a fine stock of paper hangings and are very busy.

There seems to be no end to the manufacturing enterprises in contemplation. Several cotton and woolen mills are projected, and various other factories are under way.

Strikes. How is this thing to be cured? Every day our news columns have items that the carpenters, masons, &c., are going to strike. Employees of all kinds demand more wages and less working time, and, if not granted, strike. What is going to be the end of it? Is there to be a reversal of the long established order of things? Is the employer to change places with his employee? If there was a corresponding increase in the quantity and quality of the work done by the discontents; if the shorter hours' work, that is, the leisure time afforded them, was improved morally and otherwise—one could understand it better. But, so far as my experience goes, this is not the case.

C. H.

FINISH FOR BLACK WALNUT.—For a dead finish for black walnut prepare the wood by filling, and then give it three or four coats of shellac or oil finish, and when dry rub with fine ground pumice stone and raw linseed oil, using a woolen or hair cloth. Clean with old cotton rags. Care must be used not to rub through to wood.

PICTURE VARNISH.—The following is said to produce a fine article. Gum mastic, 6 ounces; pure turpentine, 4 drachms; camphor, 2 drachms; oil of turpentine, 19 ounces. Add first the camphor to the turpentine, and heat them over a water bath until solution is effected. Then add the gum mastic and the essential oil of turpentine, and finally filter through cotton wadding. The varnish, on being kept several months, improves in toughness and brilliancy. It is to be applied with a fine varnish brush; when quite dry it will stand washing without injury.

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER.' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD BERKSHIRE MILLS

LINEN LEDGER PAPER

Will stand the severest test of COLOR, CLIMATE, INK OR WEAR.

Being **Triple Sized** (a process entirely our own) and **Loft Dried**, can be erased and written upon the fifth time distinctly. None genuine without the water-mark and date, thus—**Old Berkshire Mills Linen Ledger, 1881.**

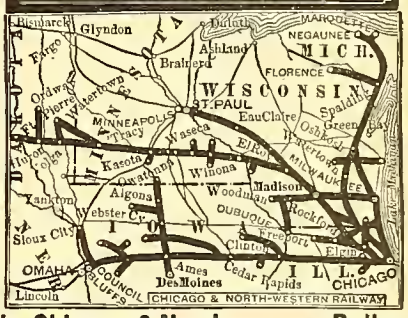
C. AND N.-W. RAILWAY



The Chicago & Northwestern Railway

Is the OLDEST ! BEST CONSTRUCTED ! BEST EQUIPPED ! and hence the

Leading Railway of the West and Northwest !

It is the short and best route between Chicago and all points in Northern Illinois, Iowa, Dakota, Wyoming, Nebraska, California, Oregon, Arizona, Utah, Colorado, Idaho, Montana, Nevada, and for **Council Bluffs, Omaha, Denver, Leadville, Salt Lake, San Francisco, Deadwood, Sioux City,** Cedar Rapids, Des Moines, Columbus, and all Points in the Territories, and the West. Also, for Milwaukee, Green Bay, Oshkosh, Sheboygan, Marquette, Fond du Lac, Watertown, Houghton, Neenah, Menasha, St. Paul, Minneapolis, Huron, Volga, Fargo, Bismarck, Winona, La Crosse, Owatonna, and all points in Minnesota, Dakota, Wisconsin and the Northwest.

At Council Bluffs the Trains of the Chicago and Northwestern and the U. P. Railways depart from, arrive at and use the same joint Union Depot.

At Chicago, close connections are made with the Lake Shore, Michigan Central, Baltimore and Ohio, Ft. Wayne and Pennsylvania, and Chicago and Grand Trunk Railways, and the Kankakee and Pan Handle Routes. Close connections made at Junction Points.

It is the **Only Line** running PULLMAN HOTEL DINING CARS between **Chicago and Council Bluffs.** Pullman Sleepers on all Night Trains.

Insist upon Ticket Agents selling you Tickets via this road. Examine your Tickets, and refuse to buy if they do not read over the Chicago and Northwestern Railway.

If you wish the Best Traveling Accommodations you will buy your Tickets by this route, ☞ AND WILL TAKE NONE OTHER.

All Ticket Agents sell Tickets by this Line.

MARVIN HUGHITT, 2d V. P. & Gen. Man., Chicago.

The MacKinnon Pen or Fluid Pencil,

HAS JUST BEEN GRANTED THE HIGHEST AWARD AT THE MELBOURNE INTERN'L EXHIBITION OF 1881.

FULL LENGTH, POCKET SIZE.

FULL LENGTH, DESK SIZE.

THE ONLY RESERVOIR PEN in the WORLD

— WITH A —

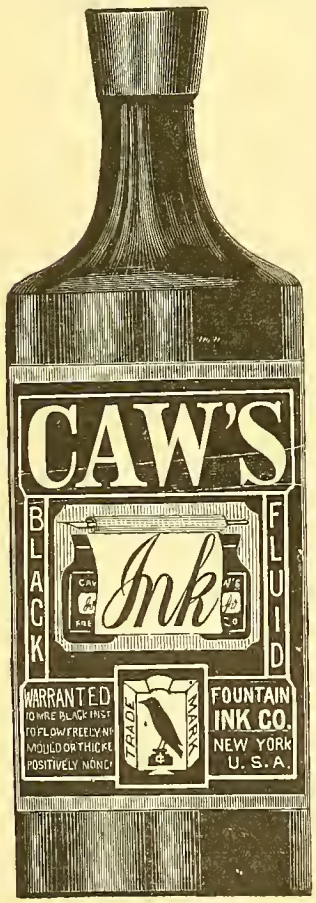
CIRCLE OF IRIDIUM AROUND THE POINT.

We Challenge Comparison with any other Stylographic Pen after a year's use.

OUR **"Sovereign" Pen** is the most popular Pen made, as it has greater strength, greater ink capacity, and is more convenient for the pocket than any other style now in use. Dealers should avoid cheap imitations which are offered at low prices. We guarantee our work, and the trade we cater to are willing to pay our prices.

MacKINNON PEN CO., Patentees and Manufacturers, **Broadway and John St., New York.**

☞ *General Supply Depots in all principal Cities in America and in Europe.*



Bottle for Quarts, Pints, 8 oz. Packed One Dozen, in cases.

CAW'S BLACK FLUID

Is the only known Ink that is

Positively Non-Corrosive to Steel Pens.

Flows freely; does not thicken by exposure, and has the decided advantage of writing **BLACK AT FIRST.**

— WARRANTED —

To Write Black Instantly.

To Flow Freely.

Not to Fade.

Not to Mould.

Not to Thicken.

Not to Corrode Steel Pens.

☞ A Copy of the above is printed on all labels for **Caw's Black Writing Fluid,** for the purpose of attracting attention to each especial feature claimed. This is done to facilitate its introduction, and that the consumer, when using, may notice its merits, and thereafter use it in preference to the unsatisfactory thick, black inks, or pale, green writing fluids of the past.

NEW STYLE OF STANDS.

Packed 3 dozen in Case.

The above is the exact size of No. 1 Stand. No. 2 being twice this size.

FOUNTAIN INKS.

These Inks are expressly prepared for use in Fountain Pens. Put up in two sizes of bottles. No. 1 containing the same as cones or other styles of bottles generally sold as 3 oz., the Stopper arrangement being very convenient for both Fountain and other pens. No 2 is twice the size of No. 1, and has a new device for filling Pens that keeps the Bottle always corked and free from dust, even while open ready for use.

FOUNTAIN INK CO., Manufacturers, 192 Broadway, New York.

L. PRANG & CO.'S BIRTHDAY CARDS.

We take pleasure in herewith presenting to the Trade our Price List of Birthday Cards, which has been greatly enlarged by a number of very elegant and novel sets:

ASSORTMENT.—They are made up in sets of one dozen, except No. 7, and are put up in a box or envelope. Each set contains all the designs of the series, and as no series, except Nos. 3 and 14, has more than eight designs, some of the designs are more or less repeated in the set.

ENVELOPES.—Fine Cream-Tinted Envelopes are furnished with the more elegant series, without extra charge.

SILK FRINGES.—Encouraged by the very great success with our Silk-Fringed Easter Cards, we have made up a number of our Birthday Cards with the best quality heavy silk fringe, made expressly for us. All fringed cards are furnished with Protectors and Envelopes, and are put up with assorted colors of fringes.

USUAL DISCOUNTS TO THE TRADE.

TO THE TRADE.—We have to ask the generous indulgence of our friends in the Trade, for what may have seemed a want of proper consideration for their interests on our part during the past Easter season. The sales of our Easter Cards have largely exceeded our anticipations, and these sales following so closely upon the large sales of our Valentine Cards, made a demand upon us greater than our facilities for production enabled us to supply. Under these circumstances we have been unable, in many cases, to fill orders as fully and as promptly as we have desired, and our not being able to do so has been a cause of as great regret to ourselves as it has been to our customers. We are now enlarging our building and making extensive additions to our machinery, not only for the purpose of increasing our facilities for production, but also for the purpose of improving the character and excellence of our work, and we trust, with our increased facilities, to be able in the future to meet all demands for our publications with the utmost promptness.

Our samples for Christmas season are in a forward condition, and we have the pleasure of announcing that we intend to start our travelers with them in the later part of May, and we shall endeavor to have these samples submitted to our customers throughout the United States and Canada as early in the season as possible. We trust to be favored with the same consideration, on the part of the Trade, in the placing of advanced orders, which has been extended to us in the past.

NEW YORK: 38 Bond Street.
PHILADELPHIA: 1110 Walnut Street.

L. PRANG & CO.,
BOSTON, MASS

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW PATENTS.

No. 240,805. Binding Books.—Hermann D. Baumfalk, Essen, Hanover, Prussia, Germany. Patented in Germany, September 11, 1878.

As a new article of manufacture, a book whose leaves are separated from one another and made fibrous at the back, and whose back strip is made of cotton flannel, having its woolly sides next to the leaves, so that the fibres of the paper and the flannel are interlocked and felted together, and also united by glue.

No. 240,809. Stereotype Casting Apparatus.—Elijah P. Brown, Cincinnati, Ohio.

No. 240,825. Index.—Elroy N. Heath, Wakefield, Mass.

In combination with an index table having vertical vowel-columns and horizontal terminal-letter columns and reference numbers, an index book whose pages are divided into five folios each, numbered in a uniform manner, according to a decimal arrangement, and provided with a numerical side index.

No. 240,852. Engraver's Vise.—Hugo Schmidt, Chicago, Ill.

No. 240,866. Clasp for Adjusting Hammocks, &c.—Vincent P. Travers, New York, N. Y.

No. 240,868. Paper Dome.—Elisha Waters, Clarence W. Waters and George A. Waters, Troy, N. Y.

A dome is made of waterproof paper sections fastened upon supporting ribs and bolted together, and provided with a water conductor at each joint and lined with a paper sheathing.

No. 240,885. Registering Apparatus for Plate Printing Presses.—John Carson, Brooklyn, N. Y.

1. The combination, with a plate printing press, of fingers constructed and operated to bear on the plate block or engraved plate to act as guides, against which the top and one of the side edges of the sheet of paper are fed, and to be moved automatically from the block or plate when the bed is passing under the impression cylinder. 2. In a plate printing press, the combination of guides or registering fingers adapted to bear on the engraved plate or plate block, and to act as stops, against which the top and one of the side edges of the sheet of paper are fed and carried by a shaft fitted in bearings on the bed at right angles to the line of motion of the bed, with an adjustable device for actuating said shaft to throw the fingers off the plate over onto the front end of the bed as the bed is passing under the impression cylinder. 3. In a registering guide attachment for plate printing presses, in combination, fingers carried by a shaft fitted to turn in bearings on the bed of the machine at right angles to the line of motion of the bed, an adjustable arm secured to the frame of the press, in combination with a crank arm on the end of the finger shaft and a spring-acting device constructed to hold the fingers down on the plate or plate block and also in position when thrown off the same.

LACQUER.—Melt 50 pounds of Naples asphaltum and 8 pounds dark gum anime; boil for about two hours in 12 gallons linseed oil; then melt 10 pounds of dark gum amber and boil it with 2 gallons linseed oil; add this to the other, and add driers. Boil for about two hours, or until the mass when cooled may be rolled into little pellets. Withdraw the heat and thin down with 30 gallons turpentine. During the boiling the mass must be constantly stirred to prevent boiling over.

NEW GOODS! Manufactured and Just Offered to the Trade by **NEW GOODS!**

ACME STATIONERY AND PAPER COMPANY,

117 Fulton and 52 Ann Sts., New York.

LAWYERS' BRIEF BOOKS.—(Copyrighted December, 1880.)

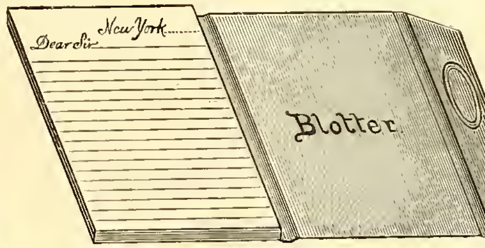
Made of our best Manilla writing paper in four sizes, bonnd in heavy paper covers, with an index printed on one side, and a filing blank on the other, so as to fold like a Lawyer's Brief. These have been highly approved by many prominent lawyers as meeting a want long felt by the profession, and will find a ready sale when brought to their attention. Size, 8x10 inches, oblong, 24, 40, 60 and 100 pages.

FORTFOLIO TABLETS.—(Patent Applied for.)

THE attention of the trade is particularly called to this **new line of Fine White Writing Papers** in Tablets, handsomely bound in PORTFOLIO STYLE, with a sheet of best blotting Paper attached.

Decidedly the BEST, MOST CONVENIENT and HANDSOMEST package of Writing Paper in the Market.

CLOSED.



OPEN FOR USE.

THIS Portfolio Tablet has been highly approved by every one in the trade who has seen it, as an article that will sell at sight, and that will be needed in the stock of every stationer.

SIZES AND STYLES.

Billet, Octavo, Commercial, Packet Note, Bath and Coogress Letter.

WHITE DESK OR SCRATCH PADS. (Unruled.)

No. 101, 2¼x4 inches; No. 102, 3x4¾ inches; No. 103, 3⅝x6 inches; No. 104, 4x6¾ inches; No. 105, 4½x7¼ inches; No. 106, 5x8 inches; No. 107, 6x8½ inches; No. 108, 8x10 inches; No. 109, 8x12½ inches.

PARCHMENT COPYING BOOKS AND COPYING PAPER,

POSSESSING THE FOLLOWING ADVANTAGES OVER ALL OTHERS:

The paper is a Rich Lemon Color. Is stronger than any other. It is thick, and can be readily handled while damp. Can be written upon with pen and ink. Makes a perfect and instant copy. The paper being pure, and free from injurious chemicals, insures a permanence to all copies.

Regular Sizes of Books and Paper always on hand.

—ALSO, MANUFACTURERRS OF THE—

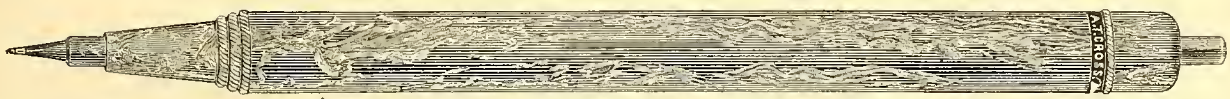
Celebrated Neutral Tint Papers,

For PROFESSIONAL and EDUCATIONAL Purposes.

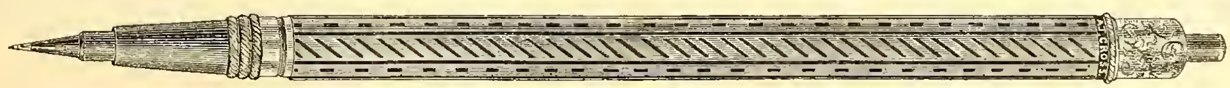
☞ **For Price Lists and Discounts address as above.**

PERFECTED STYLOGRAFIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS**, the last, June 29, 1880, being the most important and giving the name **Perfected.** All cuts are exact size

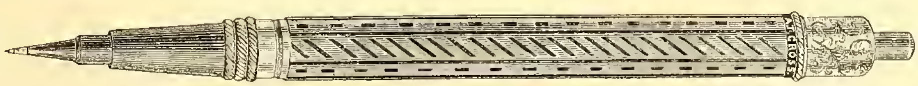


MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambler's Pocket. Same price as Long.



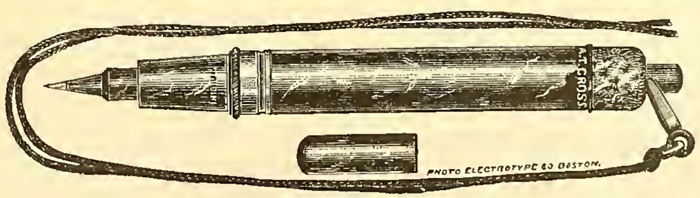
LONG.—The famous Desk Pen. Extra long. Holds most ink, except the **Maximum.**

SHORT.—Most widely known and sold heretofore; but Maximum is better for desk or Hambler's Pocket Giant for Vest Pocket or Cord. So this will be largely superseded.



Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined.

☞See Descriptive Circulars.



GIANT, with Cord and Gold Ring, same price as Short.

Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, both of which will have all new improvements.

☞See Descriptive Circulars.

VEST GIANT, Plain, - - $2.50.

All Styles up to $4.00.

☞ **VEST GIANT.—The Cheapest PERFECTED Pen made.**

BRADSTREET'S

A JOURNAL OF

Trade, Finance and Political Economy.

THIS JOURNAL covers a ground the extent of which is occupied by no other publication, and forms an invaluable work of reference to the merchant and manufacturer.

REGULAR AND TRUSTWORTHY CORRESPONDENCE, furnished by experts, expressly for this journal, from all the principal trade centres of this country, is embraced in its columns.

THE CONDITION AND PROSPECTS of the various markets are carefully recorded, and the possibilities and opportunities for trade are demonstrated as by no other medium extant.

QUESTIONS OF COMMERCIAL INTEREST and importance are fully and ably discussed editorially, without prejudice, by some of the most responsible writers and statisticians of the time.

THE BUSINESS CHANGES occurring in the United States and Canada—such as failures, dissolutions of partnerships, chattel mortgages, etc., etc.—are printed in each issue, and the list is more complete and comprehensive than can be obtained through any other source.

THE CIRCULATION OF THIS JOURNAL being among the best merchants, manufacturers, and banking institutions of not only this country but many foreign, it presents an excellent advertising opportunity to a limited number of first-class banks, corporations, and business firms.

Importers of English White and Silver Ware Tissue.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

D. F. Sherman, publisher, Howard, Neb., is closing out.

M. Nathan, dealer in notions, Evansville, Ind., has made an assignment.

G. W. Basler, publisher, Sullivan, Ind., has sold out to J. C. Bastellett.

Camp & Stewart, printers, Newport, Vt., have dissolved partnership.

J. L. Taylor & Co., of Ottumwa, Ia., was burned out on May 6. Loss, $17,000.

Babcock, Higgins & Co., printers, Montreal, Can., have dissolved partnership.

J. G. Kuenzel, Compton Label Works, St. Louis, was in town during the week.

C. J. & F. H. Field, fancy goods dealers, Montreal, Can., have sold out to M. Michaels.

Cyrus P. Breckbill, dealer in notions, Mount Pleasant, Pa., has been closed out by the sheriff.

J. & R. Frazer, dealers in paper hangings, Cincinnati, Ohio, have assigned to Charles Moulton.

A. H. Goetting is very busy getting his samples ready for the fall trade. His line promises to be very fine.

Hodgkins & Blodgett, paper stock dealers, Boston, Mass., have dissolved partnership. O. Hodgkins succeeds.

S. G. Wetmore, of Scranton, Wetmore & Co., Rochester, N. Y., and Mr. Camp, of Philadelphia, were in town during last week.

A. W. Stuart, manufacturer of and wholesale and retail dealer in blank books, &c., Philadelphia, Pa., has been sold out by the sheriff.

Buxton & Skinner, commercial stationers, St. Louis, are said to have a very fine establishment and to be doing a very large business.

The Walker Pen Manufacturing Company, manufacturers of pens and penholders, Hamilton, O., has been incorporated, with authorized capital of $100,000.

W. S. Hallock, publisher of the *Journal*, and William H. Russell, publisher of the *Clipper-Herald*, Hannibal, Mo., have consolidated, and will publish the *Hannibal Journal*.

The Franklin Paper Company, Holyoke, has issued a neat sample book of writing and envelope papers. These goods compare with anything in the market as to quality, tint and finish.

Charles J. Cohen, 505 Chestnut street, Philadelphia, is making a specialty of white and colored shelf paper, which is in active demand at this season. It is stated that the quality is superior and the assortment of colors quite complete. Orders from the trade will receive prompt attention.

T. W. & C. B. Sheridan, manufacturers of bookbinders' machinery, will occupy, when completed, a large portion of the second floor of their new building, Nos. 7 and 9 Elm street, as a showroom. This building is connected with their present shop by a doorway, and the addition will add greatly to their present facilities. The new showroom will be supplied with large skylights, thus giving them fine light and ventilation. Power will be supplied, in order to show all of their make of machinery in running order.

J. H. Bufford's Sons have just introduced five new series of chromo cards. Three of them are known as Nos. 640, 790 and 630. No. 640 is 2¾x4¼ inches in size, and is in four designs, each representing a view along the Hudson River, viz., the Palisades, Fort Lee, Highlands, and West Point; No. 790 is also of the same size and in the same number of designs, each showing a river scene. A picture of a human figure behind a screen on one side of the card greatly improves its appearance. No. 630 is 6x4 inches in size and is in four designs, representing the seasons of the year. This series is an addition to the cabinet one now being published by this house. The fourth series is called the "Man of the Moon." It is in four designs, and represents beach scenes by moonlight. The fifth series includes six designs, each consisting of a cheap chromo card, very low priced but elegantly finished. It is said to be very attractive as an advertising card.

George R. Cathcart, who has for a number of years been active in the literary and business management of the firm of Ivison, Blakeman, Taylor & Co., has been admitted to partnership in the concern. The firm retains the old style and name, and the partnership is ante-dated from January 1. Mr. Cathcart, as author and editor of several standard works, has made a reputation for himself, and much profit for the house. His literary tastes and practical business methods specially adapt him for his new and enlarged sphere of work.

C. C. White, 38 Reade street, New York, is agent for the witch-hazeline medicated toilet paper, which is made of the same size, weight and count as the Star Mills. This paper is said to be made from pure manilla fibre, washed free of all impurities and chemicals, the pulp being thoroughly impregnated with the pure extract of witch-hazel. The paper is said to contain in a high degree all of the curative properties of the well known remedy.

Crane & Co., Dalton, Mass., forward their sample book and price list of bond, bank note, parchment, tracing, letter, note and other papers. This ought to be in the hands of every stationer who wants to keep posted as to fine papers.

John Danner, Canton, O., manufactures the revolving book case which has been received with so much favor by literary and business men. Illustrated price lists can be had by addressing Mr. Danner.

Evans & Herger, Main street, Buffalo, are said to have one of the prettiest stationery and book stores in the State. This concern only very recently started in business, as successor to Martin Taylor & Co.

McLoughlin Brothers are making great preparations for the fall trade. Among the new things to be introduced they are about to issue additional numbers to their "Aunt Louisa" series.

Ritchie & Duck, manufacturers of paper boxes, Chicago, Ill., have dissolved partnership. F. R. Duck retires, and W. C. Ritchie continues as W. C. Ritchie & Co.

T. S. Pratt, printer, Mansfield, Mass., has admitted William White to partnership, under style of Pratt & White.

Chas. C. Soule has retired from the firm of Little, Brown & Co., booksellers, Boston, Mass.

Archibald MacMartin, publisher of the *Musical Review*, New York city, is dead.

James E. Shuttleworth, paper dealer, New York, has made an assignment.

Benjamin G. Oaker, printer, New York city, has been sold out at auction.

Bingham & Taylor, printers, Toronto, Ontario, Can., have assigned in trust.

Marcus Morris, paper stock dealer, Louisiana, Mo., has been burned out. Insured.

Major H. Tyler, newsdealer and stationer, Greenfield, Mass., has sold out to D. O. Griffin.

The Fountain Ink Company, of this city, has removed to No. 192 Broadway, corner of John street.

William Stuart Porter, dealer in stationery and manilla paper, New York, has removed to No. 23 Beekman street.

John Y. Yost, of H. S. Crocker & Co., San Francisco, is on his way East, and is expected in New York about May 25.

The Buxton & Skinner Stationery Company, St. Louis, Mo., has been incorporated. Capital $60,000, one half paid up.

The business of the late firm of M. A. Reay & Co., New York, will be continued by M. A. Reay on her own account, S. C. Hubbard withdrawing.

The line of Christmas and birthday cards at Ph. Hake's, to be ready about June 1, will comprise many novelties, and will embrace a number of new features.

Eaton & Dickson, wholesale and retail stationers, Worcester, Mass., have dissolved partnership. C. B. Eaton continues, under style of C. B. Eaton & Co.

George F. King, of George F. King & Merrill, of Boston, and J. L. Gartland, of Johnstown, N. Y., were among the few visiting members of the trade in the city this week.

A. Oppenheimer has retired from the firm of Oppenheimer, Loeser & Co., dealers in paper stock, New York city. Remaining partners continue, under the style of M. Loeser & Son.

W. B. Boorum and family left here this week for a pleasure trip to the West, and before their return will visit Niagara, Detroit, Chicago, the Mississippi, &c. They expect to be away about a month.

S. J. Filer, formerly with Porter & Coates, Philadelphia, and late of John Brothers, Indianapolis, is now to be found with Thorndike Nourse, Detroit, Mich. Mr. Filer has charge of the retail book department, lately vacated by Mr. Macfarlane.

Hard & Parsons' new line of goods for the fall trade is now complete, and buyers visiting the city should not fail to pay their store a visit of inspection. A. S. Alfred will astonish his customers with a line of superior goods. He leaves for the West in a few days.

Thomas S. Dando, Philadelphia, returned on Saturday last from his trip to Europe. He has brought with him samples of all of the goods which he has ordered. In a few days his catalogue, now in press, will be ready, and will be sent out at once to the trade.

Henry A. Lipman, with Boorum & Pease, who was taken very ill while on a trip West some time ago, has not been able to resume his duties until within the past week, when he made his first appearance at the store for several months. He has not entirely recovered his strength, but hopes to do so by the time the fall trade begins.

The Acme Stationery and Paper Company is actively at work, getting ready for the summer campaign, which it expects will open up next month. It will bring out a number of new things in its line of goods, among others a line of school exercise books in press board covers and white paper, which, it claims, will be the best of the kind in the market, the price being the same

as others of a poorer grade. It expects soon to have them ready for the inspection of the trade.

M. R. Marks, dealer in notions, Millerstown, Pa., has removed to Tiffin, O.

Henry Simmons, newsdealer, Abilene, Tex., has sold out to I. D. Stinchcomb.

Peter Paul, Buffalo, N. Y., is now visiting the Eastern publishing trade for fall stock.

M. Denis & Co., dealers in wall paper, Montreal, Can., have dissolved partnership.

Clark W. Bryan is about to start a printing and publishing establishment at Holyoke, Mass.

J. B. Lippincott & Co., Philadelphia, have issued their monthly bulletin of new publications for May. The trade should send for it.

C. B. Eaton & Co. have succeeded Eaton & Dickson in the wholesale paper and stationery business at No. 505 Main street, Worcester, Mass.

Selchow & Righter, 41 John street, this city, have reduced the price of their improved parlor roller skates. They claim that their four-wheel roller skates are the best in the market.

M. B. Belden has removed his paper warehouse from No. 46 to 45 Dey street, New York. He makes a specialty of straw, rag and manilla paper, which he says he always buys for spot cash.

George Waterston & Sons, 9 Rose street, Newgate street, London, E. C., have carried off the honors of the Melbourne Exhibition for their sealing wax. The well known "Bee" brand deserves this recognition.

The store of C. E. Glines, bookseller and stationer, Marietta, Ohio, was entered by burglars on the night of May 4, and about $300 worth of Aikin & Lambert's gold pens, cases and pencils were taken; also, $400 or $500 worth of rings, $300 worth of gold chains, a lot of lockets, charms, &c., amounting in all to $1,200 or $1,500.

The MacKinnon Pen Company has at last got fairly settled in its new quarters, No. 192 Broadway, corner John street, where it occupies both store and basement, which gives it better facilities than ever for the transaction of its rapidly increasing business. This is one of the best lighted and best located stores in New York and well suited to the business of this company.

Cline, Miller & Co., manufacturers and dealers in paper and envelopes, Philadelphia, have removed from their old location at 27 South Sixth street, to occupy much larger stores at No. 26 South Seventh street. This change is due to the extension of their business, the trade of this house having increased so much that it is now classed among the leading houses of Philadelphia.

Judge Blatchford, of the United States Circuit Court, has decided in favor of the plaintiff in the suit of Waring against Johnson, and has granted a perpetual injunction against the defendant. The suit was brought on a reissue of letters patent, No. 8,199, granted to G. Waring, Jr., April 23, 1878. The court held that the reissue was valid, and that where an invention is claimed as "the combination, in a checkbook, of checks and stub-pieces of substantially the same size, so united that two checks lie between every two stub-pieces, substantially as specified and set forth," it is immaterial, in view of the state of the art, whether the defendant's book has the line of perforation between the check and the stub-leaf at the top or bottom of the stub-leaf or at the leaf end of the check. It was also decided that it will not invalidate the reissue that the claim is broader than the claim of the original patent, provided that it is "for the same invention" shown and described in the specification and drawings.

NEW PROCESS OF ENGRAVING AND PRINTING.

COPPER PLATES vs. LITHOGRAPHY.

Advantages of this Process over Stone Work:

A CLEAR SHARP IMPRESSION—AS METAL IS HARDER THAN STONE.
THE PAPER RETAINS ITS GLOSS—NO DAMPING REQUIRED.
WE PERFORATE EVERY BLANK WE PRINT BY OUR ROTARY MACHINE.
OUR NEW DESIGNS ARE ALL ORIGINAL AND FINELY EXECUTED.
WE USE NOTHING BUT HEAVY TUB-SIZED FIRST-CLASS PAPER.
EACH BOOK IS STRONGLY BOUND AND EVERY HALF DOZEN PUT UP IN BOXES.
OUR PRICE IS MUCH LESS THAN LITHOGRAPHIC WORK.

NOTES, DRAFTS, RECEIPTS, ORDERS, CHECKS, &c., by the above Process, and also from STEEL PLATES.
Designed and Manufactured especially for Stationers.

NATIONAL BLANK FORM COMPANY,
OFFICE AND FACTORY: 148, 150 & 152 Worth Street, New York.
Address all Communications to Box 737, P. O., New York. } ALEX. CAMERON, Secretary.

JAPANESE HANDKERCHIEFS AND NAPKINS
For the Season of 1880.

WE are now prepared to furnish these goods in from Twenty-five to Thirty patterns, in new and elegant designs. They are as soft and pliable as silk, and their cost is less than that of washing linen or cotton. They are especially adapted for use at Public Dinners, Picnics, Hotels, Steamboats, Restaurants, &c.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---$2.00 PER ANNUM.

Single Copies - - - - - 10 Cents.

NEW YORK, THURSDAY, MAY 12, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

CHANGES of opinion are apparent in the views of even the most pronounced free trade countries. Germany and Austria have been trying to get up a commercial treaty, the greatest anxiety on this behalf being shown by the latter named country. There seems to be a small chance of agreement between the two, and the Austrian papers are beginning to urge a restrictive tariff on German imports.

THE economic principle of protection is even affecting Great Britain. We cannot tell how strongly it is supported, but the development of opinion in its favor is becoming more apparent. Not long ago it would have been rank heresy for an Englishman to advocate a tariff which had even the semblance of a departure from the free trade principle upon which England has so glorified herself after she had gained a high manufacturing position by the instrumentality of protection. The first symptoms of change were to be seen in the discussion of the means for resisting the inroads of foreign manufactures, notably American. Then these developed into a euphuistic expression of reciprocal duties or discrimination against countries which refused to yield their industries to the competition and control of British manufacturers, and of late we have seen that even the thinly disguised advocacy of protection has been thrown off, and that there is a bolder expression of a demand for duties which will bar competition.

AND yet the American people are seriously asked to throw aside the ægis of protection and to open our markets to the free competition of goods from any source. A prominent politician once made the specious argument that the American people could buy cheaper and live cheaper, were a tariff for revenue only established. He might have added that they could have died cheaper—and sooner. We do not advocate monopolies to the exclusion of necessary means for existence, and for the benefit of one, two or three—say a few—individuals or corporations; but when the issue is raised as to whether we shall submit to the destruction of any industry which promises large development and the consequent employment of many individuals and the enrichment of the nation, we are decidedly opposed to the freedom of entry of goods and the competition of countries which are at all likely to thwart and defeat such promises. Great effort has been made to imbue the minds of our agriculturists with the idea that free trade is essential to their prosperity. This principle is radically wrong. Our producers derive their largest profit from our own people. We sell more at home than we do abroad; and should we discourage or break down the industries which enable a very large proportion of the consuming class to purchase largely and freely at the best prices attainable, we should soon find that there would be a more limited market for what we have to offer. The Secretary of the Treasury, in his speech at the dinner of the Chamber of Commerce on Tuesday evening, referred to the necessity for a readjustment of the tariff. While we admit that there are some possible incongruities in our tariff, and that the subject should be carefully considered and as deliberately acted upon as the Secretary suggested, yet, reading between the lines of his speech, we are led to believe that the Secretary had opinions stronger than he dared to express, and that these were at variance with one of the principal issues of the Presidential campaign to the result of which he owes his present position. We believe that the sentiment of the majority of the voters of this country, expressed without political bias and free from the inhibitive control of parties, is opposed to yielding our strength and surrendering our manufacturing advantages to the demands of foreign countries. In the report from the Committee on Commerce of the House of Representatives presented by the Hon. William A. Russell just prior to the adjournment of Congress, there are the best conclusions and the strongest affirmative reasons for sustaining our industries and enlarging our commerce. The agriculturist must remember that his interest falls in with that of the manufacturer, and in the necessity for holding up and extending our trade in manufactured goods lies the development of our natural resources and the enlargement of our national wealth and importance.

ANSWERS TO CORRESPONDENTS.

L. P. P. wants to know what New York importers take import orders for photograph albums.

Ans.—Koch, Sons & Co., Liebenroth, Von Auw & Co., Henry Levy & Son, and McCarty & Hasberg.

A new postal agreement has been entered into between the Dominion government and the government of the United States for the purpose of affording the public increased facilities for the exchange of correspondence, and also to prevent the evasion by publishers of the postal laws and regulations of the United States. The first article of the new agreement provides that insufficiently paid letters mailed in Canada and addressed to parties in the United States, or *vice versa*, on which one or more rates of postage have been prepaid, shall be forwarded and charged with the amount of the difference in postage to be collected on delivery and retained by the Post Office Department of the country of their destination. The second article provides that when newspapers, periodicals and other printed matter published or originating in the United States are brought into Canada and posted there for destination in the United States, apparently to evade the postage rates or regulations applicable to such matter in the United States, the Canadian Post Office may require prepayment of the same at a rate equivalent to double the ordinary Canadian rates. The new agreement is to go into effect immediately.

The bids for supplying the Interior and Treasury departments with stationery for the ensuing year were opened at Washington this week, the former on Monday and the latter yesterday. It will probably be some days before the successful bidders are announced.

OBITUARY.

EDWARD HEWITT.

Edward Hewitt, well known among the trade in this city as a stamper and engraver, died of pneumonia on Tuesday. He was about thirty-two years old. Mr. Hewitt, although quite a young man, was an inventor of some distinction. Among the most important of his inventions is the application of steam power to stamping. He was a practical engraver and a thorough master of his trade. For the past two years he had been engaged in the engraving business on his own account at 74 Fulton street, in this city. He has been chiefly occupied on work for Ph. Hake for several years, in fact doing very nearly all the engraved work emanating from that gentleman's establishment. Mr. Hewitt was a man well liked by those having business relations with him, and possessed many good traits of character. He leaves a wife and two children. He was buried from St. Luke's Church this afternoon.

TUCK'S CARDS.

Willy Wallach has now ready for inspection a line of samples of Raphael Tuck & Son's Xmas and New Year's cards. The samples include the famous prize cards which carried off high honors at the recent London Exhibition. They consist of five series, all of which evince great taste. The first series is in four designs and represents the seasons by four single figures of children and maidens. The second series is also in four designs, which are ornamented by butterflies fluttering among wild flowers and birds on branches. Series 3 is in two numbers, one representing in four designs the seasons with four single figures of maidens on a gold background, and the other in three designs of quaint looking children bearing presents and greetings. Series 4 consists of six numbers including twenty designs. Series 5 contains seven numbers and includes twenty-two designs. There are twelve numbers of satin cards including forty-four designs, all of which are beautifully illuminated and mounted on gilt-edged white boards. In addition to the above mentioned there are one hundred and twenty-eight numbers of other cards, which are excellently finished, and will no doubt be readily taken up by the trade. The prize cards will be put up in envelopes each containing one set, and the others will be put up in packages containg thirteen each. They will be offered to the trade both fringed and unfringed, and it may be said that the line is one of the finest ever shown in this country. The London and French newspapers speak in the highest terms of these cards.

A PHILADELPHIA LITHOGRAPHIC ESTABLISHMENT.

The lithographic establishment of T. Sinclair & Son, 506 and 508 North street, has lately undergone many important changes—a new engine, elevator and other machinery having been put in to enable them to keep pace with the increasing demand for their publications.

The fifth floor of their building is reserved for the use of artists and designers, of whom they employ from twenty to thirty. The fourth floor is devoted to grinding and polishing the lithographic stones and to preparing and transferring work for the pressroom. On this floor two of Hoe's largest steam presses are being put up, while on the third floor six other large steam presses are all in active use on large editions of work, principally on chromo advertising cards, of which the firm of Sinclair & Son is one of the largest publishers in the United States. The second floor contains the offices, stock and shipping department, containing immense piles of finished work and stock waiting to be lithographed. The basement has been recently fitted up with a powerful engine and new mills for grinding and preparing the colors used on the various kinds of work. Here, also, are stored tons of lithographic stones, among which are single slabs weighing over 800 pounds, which are used on one of the two largest presses in this country. The establishment gives employment to upwards of sixty hands, among whom are some of the most skilled workmen in their line.

In the chromo advertising card department, now under the management of George M. Hayes, the firm says that it has during the past six months sold over fifty millions of cards, and the demand has been so great that it has been obliged to refuse orders for many large editions. Some of its new designs are worthy of special mention and are decidedly original. A set of four designs called the "Stock Exchange series" portray by the expression in the face of each the market value of their respective stocks, showing the "rising," "falling," "up" and "down" state of the market. A series of animal cards represent a hound in one and a bulldog in a second, with a tin kettle tied to their tails, while the dogs are flying through the street with comic expressions of fright on their faces; a third represents a pig with a bunch of firecrackers tied to his tail, to which some small boy has touched a match; the fourth shows a cat (one of the midnight, backyard species) which, getting too near a crack in the fence, has been seized by the tail by a boy who, with a tight grip, is watching from a hole in the fence the frantic struggles for liberty of the animal, whose fright is plainly portrayed by the eyes, mouth and bristles, tail and back. This series, painted by the well known artist, J. C. Beard, is one of the best American series yet produced. Flowers, figures, caricatures, &c., make up an assortment of sixty to seventy different series finished and in hand, all of recent production, and almost all of original designs by American artists, which this house prefers to have made in preference to copying worn out ideas of foreign cards. To this end it inaugurated the prize competition now in progress in New York, in which it gives prizes aggregating $800 for the three best series of original sketches. The house is one of the largest, as well as one of the oldest, in the United States, being established in 1840.

Marlborough, Gould & Co., Old Bailey, London, E. C., have just brought out some very nicely finished correspondence cards, mottled, wove and in various tints, as well as gilt-edged, with envelopes to match. These goods are of excellent quality and are well worthy of attention. There are many people who do not care to send post cards, but do not care to waste a sheet of paper. For these people these correspondence cards are very suitable. This same firm has also brought out some very good end papers for bookbinders, combined in artistic style and good taste.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, May 11, 1881.

THE MONEY MARKET.—The money market exhibited the greatest ease, and loans, whether for business or speculative purposes, were readily effected at extremely low rates of interest. In fact, owing to the Treasury disbursements, and the immense amounts of money flowing to this centre from various other sources, there is at the moment a perfect glut of capital in the market seeking employment. Transactions in time loans for the balance of the year were reported at 4@4½ per cent. In the discount market prime mercantile paper sold at 4@5 per cent. In the stock market the decided ease in money which promised to continue for a long period, coupled with other influences of a favorable character, tended to impart strength and even buoyancy to speculation. In the government bond market a large business was transacted, and all the issues, with the exception of 6s, which continued unchanged, showed an advance on the transactions of the week. New 4s rose ⅛ per cent, 4½s ¼@⅜, and 5s ⅛ per cent. Advices from Washington state that the 6s of 1881 are coming in in large amounts for continuance as 3½ per cent. bonds. Railroad mortgages were in brisk demand throughout the entire week, some issues recording a very material advance in prices. Foreign exchange is in better supply, and the advancing tendency of rates has been checked. Some bills drawn against the shipment securities are offering. The posted rates for prime bankers' sterling are now uniformly $4.85½@4.87½. The actual rates were $4.84¾@4.85 and $4.86½@4.86¾. Cable transfers were $4.87¼@4.87½.

THE PAPER MARKET.—Although the paper trade is not alone at this time in experiencing the effects of a dull trade, the amount of business doing will compare very favorably with the dry goods, hardware, clothing and some other lines. Notwithstanding this lack of activity, values, particularly on the fine and higher grades of papers, have a firm support, and the demand and supply are nearly equal, and there is no apparent weakening in prices, except in cheap print papers and coarse wrappings. We hear of an offer to supply news to one of our city dailies at 6¼c. The Eastern Straw Wrapping Paper Manufacturers' Association met at Albany on Tuesday and passed a resolution sustaining the present market prices of paper, which are on the basis of 30c. per ream for 15x20, 8 pounds; 28c. for 14x18, 35c. for 15x20, 10 to 10½ pounds, and $2.75 to $2.90 per 100 pounds for heavy weight. It also agreed to a general shutting down of the mills on July 1, to continue through the month. The next meeting takes place on the second Tuesday in August.

THE STATIONERY MARKET.—Quiet rules throughout the trade, and the present may be termed a season between hay and grass, during which time many will avail themselves of the opportunity for recreation. Very little else will be done in the interim other than to get ready for the fall trade. This work is going on very actively, and we may expect to see some of the many novelties promised in the course of the next month. There are very few country buyers visiting the city, and mail orders are very light. No change to note in prices.

IF YOU WANT THE BEST STYLOGRAPHIC PEN,

☞ The Latest and the Best.

Circulars on application.

☞ Examination Solicited and Satisfaction Guaranteed.

The attention of the Trade is called to the improvements made and advantages offered in Livermore's New Stylographic Pen.

Patented July 15, 1879, and March 9, 1880.

FIRST—**A Smaller Air Tube**, allowing more space for the ink, and rendering the operation of filling easier and less frequent.

SECOND—**The Manner of Fastening the Needle**, not to the air tube, where it would be in danger of being bent or injured every time the pen was filled, but in the point, where it is not so exposed.

THIRD—**The Protection of the Spring** by a silver casing, preventing the ink from clogging its action.

FOURTH—**The Duplex Interchangeable Point Section**, furnishing great facility in cleaning the pen.

FIFTH—**The Ease with which Repairs can be Made.** The needle being in the point, it is not necessary to send the whole pen to the factory, but any dealer can supply a new point.

SIXTH—**Freedom from Legal Difficulties.** The New Stylographic Pen is manufactured under the patent controlling the use of an air tube in a Fountain Pen, and it is therefore free from legal complications.

MOUNTAIN MAHOGANY.

We have in this State a wonderful wood known as "mountain mahogany." The trees do not grow large. A tree with a trunk a foot in diameter is much above the average. When dry the wood is about as hard as boxwood, and being of a very fine grain, might, no doubt, be used for the same purposes. It is of a rich, red color, and very heavy. When well seasoned it would be a fine material for the wood carver. In the early days it was used in making boxes for shafting, and in a few instances for shoes and dies in a quartz battery. Used for fuel it creates an intense heat. It burns with a blaze as long as ordinary wood would last, and is then found (almost unchanged in form) converted to a charcoal that lasts about twice as long as ordinary wood. For fuel it sells much higher than any kind of wood; indeed, a cord of it always brings the same price as a ton of coal. The only objection to it as a fuel is that it creates such an intense heat as to burn out stoves more rapidly than any kind of coal, however bad.—*Virginia City Enterprise.*

AN ANCIENT HEBREW MANUSCRIPT.

The Lee, Mass., *Valley Gleaner* says: From an interesting letter lately received by Amos G. Hulbert, from his son, Henry C. Hulbert, of New York, who is now traveling in the East, we take the following sketch of a look at one of the oldest Hebrew manuscripts in existence, and probably one of the most valuable. Mr. Hulbert says:

"While at Cairo I visited the Coptic church from which Peter wrote his Epistle (see First Peter, 5:13). The church is to this day called Babloun or Babylon, and Dr. Lansing, our missionary at Cairo for the last twenty-five years, says he has no doubt it is the spot. We also visited the Jewish synagogue in hopes to get a chance to see the manuscript of the five books of Moses, which was left there by Ezra the Scribe. They do not show it, and it is only by chance it can be seen. Dr. Lansing has been able to see it but once or twice, and he hopes to get possession of it or, at least, have it photographed. Fortunately the old Rabbi was away, and the attendant, who knew Dr. Lansing, allowed us in the synagogue and locked the door. We then had full sweep. Dr. Lansing went up a ladder to a hole in the wall with a wooden door and a curtain, some fifteen feet from the ground or floor, and took out a portion of it. It is in a long, round box that opens in the middle, with a peg through each half on which the parchment is rolled, and as fast as read it rolls from one peg to the other. Dr. Lansing had with him a copy of the Hebrew in two versions, and he and Mr. Pelham, an English clergyman, with E. P. I. [Rev. Dr. Ingersoll of Brooklyn], and Dr. Ludlow and myself standing round, compared a portion of the fifth chapter of Deuteronomy, and found that it compared exactly with the accepted Hebrew version from which our Bible was translated, and not with what is called the Samaritan version. I measured it, and found the width of manuscript 2 feet, length of written page 18½ inches, and margin top and bottom 2¾ inches each, width between the pages 1¼ inches. Five lines measured 2 inches. It is in a very good state of preservation, and though the margin is crumbling with age, the writing is clear and distinct.

"An old rabbi, who taught Hebrew to Dr. Lansing's children, says their tradition is that after the return of the Jews from captivity,

Ezra the Scribe came down to Cairo or Egypt to correct the genealogy of the Jews who had fled and found refuge in Egypt (see Ezra, 2:26), and before leaving, at the request of the rabbies, left this copy with them, and it has been here ever since. Macrasi, the historian, wrote 500 years ago that this synagogue was built 45 years before the destruction of the second temple, and also refers to the manuscript left by Ezra. Dr. Lansing believes this the oldest copy of the five books of Moses in existence. It is not kept for show, and can only be seen by a chance shot, which we had. It is truly wonderful, and I enjoyed it very much."

BELMONTYLE OIL.

Belmontyle oil is an oil that prevents rust, tarnish or verdigris, without injuring the brightness of the polished metal. In short, it is a preventative of the oxidation of metals, and is, therefore, useful in preserving bright work on steam engines when not in daily use, for firearms, sewing machines, safes, saws, tools, skates, cutlery, &c. The oil is of a very greasy, slippery and filaceous nature; its odor is similar to that of mineral oils. When exposed to the air in open vessels a long time it will lose its slippery, filaceous nature, but not its preventative power against rust. Nevertheless, the keeping of the oil in well corked up tin or glass bottles is always recommended. It will draw into porous wood very briskly, deprive the same of its hygroscopic peculiarity, and protect it against rottenness. Rust is by this oil sooner dissolved than by any other; mixed with water it will get a milky appearance and undergo a decomposition. With spirits of hartshorn it will form a clear fluid liniment. Very thin coats of this oil on metal will evaporate after a while, and leave a very thin lamella protecting the metal. This lamella, when spread over with Belmontyle oil, will be dissolved again.

Rooms where this oil is used will be kept free of moths and other insects. It appears transparent, with a slight yellowish wine color, in small white bottles and not over half an inch in diameter; when the diameter is larger it is somewhat reddish. Its specific gravity is between .875—.890. A higher specific gravity infers adulteration; at 41° F. it becomes dim; at 37° F. crystals will appear in it; at 21° F. it becomes stiff and chilled; but by trituration will be changed into a thin fluid liniment, and at 43° F. its former clear transparent nature will be restored, without leaving any sediment.

In reference to its application to steel and iron, we may say that a thin coat of the Belmontyle oil forms a very thin, dry and invisible lamella, preventing the metal from coming in contact with the air and moisture without dimming its brightness. It can be easily removed by a second application of the oil, or by benzine. This article is therefore especially adapted for use on bright metal which needs protection from rust during storage or transportation, and in preserving parts of machinery, etc., while in course of fabrication. It also makes blued and browned work brighter and hold the polish.

The oil proves efficacious in preventing rust on bright surfaces of machinery or goods that have to be transported by sea. Bright brass or copper work, oiled with it, will also retain its original color and brightness. When used on bronze the formation of verdigris will be entirely prevented, whether the metal be exposed to the weather or not, and the color remain unchanged. The cleaning properties of the oil are superior. It will remove gum, etc., immediately, and rust after the lapse of twenty-four hours; very rarely a second greasing will be found necessary.—*Boston Journal of Commerce.*

INDIA INK IN DRAWING.—Much trouble is experienced in the use of india ink from the fact of its drying so rapidly on the porcelain on which it is used. This trouble may be avoided by adding a few drops of glycerine to the ink.

NEW YORK CRAYON CO.

Gentlemen,

I find in testing the breaking strength of 12 crayons taken indiscriminately from original closed boxes of the undermentioned brands, the following result—

	New York Crayon Company.	Western School Supply Co.	Parmenter and Walker.
From 1000 Grammes to 1200 Grammes....	**None.**	None.	4 or 33⅓ %
" 1200 " 1500 "	**4** or **33⅓** %	10 or 83⅓ %	4 or 33⅓ %
" 1500 " and upwards........	**8** or **66⅔** %	2 or 16⅔ %	4 or 33⅓ %

The specific gravity, follows of course the breaking test; and is therefore greatest in those of the New York Crayon Company.

I find that great strength is not inconsistent with perfect marking qualities, but that the Crayons are rather improved thereby.

These Crayons are all made from similar materials, with a possible difference in favor of the finer grain of that made by the New York York Crayon Company.

WM. M. HABIRSHAW,

Analyst for the Chemical Trade of New York, Chemist of the N. Y. State Agricultural Society, Analytical Chemist to the New York Produce Exchange.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. ure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

THE PAPER TRADE IN THE CITY OF NEW YORK.

[Continued.]

An interesting and very important branch of the paper trade that has not yet been touched in this series of articles, is the straw board business. An idea of the magnitude and importance of this business may be gained by reflecting for a moment on the multifarious uses of paper boxes and the vast number of those handy contrivances daily required in the transaction of business and the arrangements of the household. It would, indeed, be difficult to enumerate those uses, so various are they, but it is not necessary. For the purposes of this article it is sufficient to call attention to the fact that many large wholesale houses use such large numbers of paper boxes that they have found it profitable to establish manufactories solely for the purpose of supplying their own wants. But notwithstanding this fact the general demand is so great that in this city at least one hundred independent manufactories are kept busy in supplying it. And for each one of these many million boxes annually so produced, straw board furnishes the crude material. Forty years ago straw board was almost unknown in this country—perhaps a few hundred pounds had been made. Now, the annual product is about 35,000 tons.

The origin of its manufacture may be said to be due, if not to accident, at least to a combination of circumstances partaking very much of the nature of chance. About the year 1840 the demand for cheap books caused the manufacturers of binders' boards to look about for some cheaper material than hemp, out of which they could be made. It should be stated before going any further that binders' boards were then, as the finer grades of them are still, made out of fragments of tarred ropes, which though not adaptable to all kinds of paper making were, nevertheless, and are yet, comparatively, quite expensive. The refuse binders' board—odd bits, scraps, imperfect sheets, &c., not fit for binders' use—were worked over into what was called "pasteboard," and used for making paper boxes; hence the term "pasteboard boxes" in vogue a quarter of a century ago, and still to some extent used for paper boxes. This pasteboard was the only material obtainable for making paper boxes up to the beginning of 1840. But as was said just now the demand at that time for cheaper books set the manufacturers of binders' board thinking, and one of them having hit on straw board gave to posterity not only cheaper books, but also cheaper boxes. This was the firm of Chambers & Heiser, of Chambersburg, Pa., which about the time stated made on a venture one or two tons of straw board. This was sent to Philadelphia where it sold readily for a cheap binders' board and was found to answer the purpose so well that its manufacture was continued, and other manufacturers soon followed Chambers & Heiser's example. For several years Philadelphia continued to absorb the whole product, and it was not until 1845 that a consignment found its way to New York. This consignment was held for sale by Cyrus W. Field & Co. Up to this time no one seems to have thought of using straw board for any other than binders' purposes. But when this first consignment arrived in New York Edwin L. Butterfield, who was then foreman of the paper box manufactory of Samuel E. Brower, hearing of it, thought it might be adaptable to making boxes, and went down to Burling Slip, where Cyrus W. Field & Co. kept store, to look at it. He bought the entire lot and found that it served his purpose admirably. From that time straw board was in steady demand, and, as is always the case when

a new use is discovered for anything, the number of persons to use it soon began to multiply. In 1840 there were only five paper box makers in the United States—one in Philadelphia, one in Boston, and three in New York; at the present time there are, as already stated, fully one hundred in this city alone, exclusive of factories established by wholesale houses to supply their own wants.

The rise of the straw board business, and indeed of any business, suggests an instructive consideration, namely, how industries multiply of their own accord, by a kind of vital force as much inherent in them as life is in the human body. It would be out of place in this connection to do more than refer to the variety of new industries—new employment for human thought and human labor—created by the steam engine, the printing press and the telegraph. A striking example is afforded by the paper itself. Even so late as the beginning of the present century its widest scope included the sale of only writing and printing paper, binders' boards, perhaps a little wrapping paper, and the manufacture and sale of paper hangings. Since then the envelope business, now a great industry in itself; the manufacture and sale of wrapping paper, now a distinct branch; the manufacture of paper boxes, and growing out of this the straw board business, all have arisen, and all now play an important part in business and domestic economy.

When a large and steady demand for straw board had grown up, it became, as a consequence, profitable to deal in it as a separate business, and Mr. Butterfield, as he had been the first to utilize it for paper boxes, became also the first to make its sale an exclusive business, and this he did in 1850.

To make this sketch complete it is necessary now to turn back and trace the outline of his personal history. He was born in Winchester, New Hampshire, in 1822; came to New York in 1841, and entered the employ of Dorr, Allen & Co., dry goods importers and predecessors of Allen, Hazen & Co. In 1842 he became the foreman of the paper box manufactory of Samuel Brower. Brower sold out in 1845 to Cyrus Jones, and in 1848 Jones took William H. Mallory and Mr. Butterfield into copartnership with him, under the name of Cyrus Jones & Co. Mallory and Butterfield bought Jones out in 1849, and continued to make paper boxes under the name of W. H. Mallory & Co. In 1850 they also opened a store, under the style of Mallory & Butterfield, for the sale of straw boards. In 1854 they sold out the box-making business to Thomas Ryan, and devoted all their time to the straw board business. Mallory & Butterfield enjoyed a prosperous career until the crisis of 1873, by which they were embarrassed, and in 1875 they were forced to suspend. H. A. Butterfield, a younger brother of Edwin, then a clerk, bought the business, and has since carried it on in his own name. H. A. Butterfield had been a clerk with Mallory & Butterfield from 1866. Previous to that he had lived in California, whither he went in 1852. His store is now at 538 Pearl street.

In conclusion it should be noted that the advantage possessed by straw board over all other substances for box making is, that it gives a greater surface for the same weight than anything else. At first it was dried altogether in the open air, but the process was tedious, and involved frequent handlings. About the year 1860 the firm of J. G. Wheeler & Co. devised a means of drying the board by steam, which, by saving time, lessened the cost of manufacture. But the original method has not fallen into disuse, and to-day "air-dried" and "steam-dried" are the two distinctions as to quality prevalent in the market. The air-dried board is tough and preferable for some purposes. The steam-dried is brittle. Nevertheless the quantity of steam-dried board used greatly exceeds that of air-dried board.

FOR SALE BY ALL JOBBERS.
M & H BLOTTER TABLET PATENTED
PADS OF PAPER WITH BLOTTER ATTACHED.
ELEGANCE. ECONOMY. CONVENIENCE. CLEANLINESS.

THE paper is tableted, so that each sheet may be freely removed, leaving a perfectly clean, smooth edge. No paper is wasted. The sheet on which you write is always clean, being protected by the blotter. The blotter, of the full size of the paper, is so attached at the top of the pad that both sides of it may be used, and will last out the entire contents of the pad, being always at hand, and perfectly clean.

The blotter is kept clean, and also from wearing, by the card board cover, which is made of a highly polished stock, perfectly smooth, and that will not catch dust or dirt from the desk. The cover is richly ornamented on every pad, giving the whole a neat and elegant appearance. All kinds of paper and printed blanks are put up in this form at prices as low as if loose; making the most complete line of staple and elegant stationery ever offered to the trade.

The J. W. Stoakes Automatic Shading PEN.

FOR PLAIN, FANCY AND ORNAMENTAL LETTERING.

WASHINGTON, D. C., March, 1880.

I desire to say that the "Shading Pen" invented by Mr. STOAKES meets a want long felt by penmen. The work done by it is perfect in line and shade. The rapidity with which lettering is done, aside from the beauty of the work, is enough to recommend it for general use.

H. A. WHITNEY, Ass't Cashier, U. S. Treasury.

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST and ONLY AWARD** given for

LINEN RECORD and LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition*, *Massachusetts Charitable Mechanics' Association*, *Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission*, *Medal of Progress American Institute*, *1877*, *and Medal of Improvement and Progress, Boston*, *1878*. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

☞ **Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot. Each sheet is water-marked with name and date.**

LOCKWOOD PRESS, 74 Duane Street, New York.

The American Stationer

A Journal Devoted to the Interests of the Stationery & Fancy Goods Trades

"The Stationer"—Every Thursday—$2.00 Per Annum.

VOL. IX.---NO. 20. NEW YORK, MAY 19, 1881. WHOLE NO. 308.

Correspondence.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BOSTON, Mass., May 16, 1881.

There is very little new to write pertaining to the stationery trade this week. Dealers note a slight slackening in business, but there is enough to keep them busy, ordinarily speaking. The interior has become pretty well stocked since the improved condition of the roads and the disappearance of the snow.

Hooper, Lewis & Co., Milk street, report a fair trade in fine leather goods and choice stationery. This is one of the oldest houses in the trade, and maintains its reputation for fair dealing and ever keeping an ample and seasonable stock of goods.

The Dennison Manufacturing Company reports through its various agencies quite a demand for its novel tissue papers, which are more or less used in divers ways during the summer season. Its display window, at the corner of Milk and Arch streets, is as attractive as it is artistic in design.

Winkley, Thorp & Dresser report a fair trade for the season. The demand for their new albums continues, the trade in all parts of the country being supplied on the principle of "First come first served." This house now has one of the best and largest stocks of stationery in the city; and its facilities for doing blank book work are unequaled.

The call for the Livermore stylographic pen, Mr. Dunlap agent, Washington street, near the Old South, continues unabated, in spite of other kinds of stylographics in the market. "The proof of the pudding is in the eating."

Doane & Greenough, State street, opposite Broad, report a fair country trade in light goods. Aaron Gay & Co., a few doors south of the above named firm, probably enjoy one of the best small goods trades of any house in the city. They have long been established, and have the happy faculty of retaining all their old customers and securing new ones.

Although the stationery business has been gradually deserting State street during the past few years, still the houses on that thoroughfare of the "money bags" continue to do a good business. There are now only three firms in the trade on State street, most of them having gone to Milk street or its immediate vicinity.

The low price of paper stock seems to make no material difference in the prices of paper goods. In fact, dealers say that such goods are about as low as they possibly can be and at the same time leave a satisfactory margin for profit. Holders of paper stock, however, are looking for higher rates.

Upon the whole, all things considered, the stationer's trade in this city is in a healthy condition, and the volume of business is as large as it reasonably could be expected to be at this season of the year.

Among the book dealers there is quite a trade in certain lines of stationery goods. The book publishers report a renewed demand for light literature and matter for summer reading generally.

Business at the "Riverside Press" was never more pushing than it now is, many standard works being printed, bound and sent to market every week. The "poets" seem to be in as much demand now as at any previous time.

The State Printer is just now overwhelmed with work, such as it is; the "dear people" pay for lots of public documents that are never read.

The *Sunday Mail*, with its assigned mortgage, was cleaned out completely on Saturday by an irate doctor who had sued the paper for libel; but the paper appeared on the following day, Sunday, as though nothing had happened. L.

BALTIMORE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, Md., May 17, 1881.

Business in Washington, which city I visited a few days ago, is somewhat quiet, as it is here in Baltimore just now. Brad. Adams, one of the leading men in the trade there, is, however, in good spirits, as usual, and Wm. Ballantyne & Son, J. I. Chapman, W. H. Dempsey, Hopkins & Son, T. B. Mohun, G. A. Whitaker, and many others of the capital are still feeling well over recent good sales and were not unwilling to rest during the heated term.

In Baltimore a similar feeling exists, and members of the trade look for but little improvement for several months to come. A good fall trade is anticipated in many branches.

A handsome specimen of book printing is that of the annual report of the School Board, from the press of John B. Piet. It is an 8vo volume of about 250 pages, beautifully bound in black muslin, with gold stamp on the side. The paper used in the report is tinted, and the type is large and clear.

F. K. Murphy, I. Kilner and D. Noble have formed a copartnership for continuing the business of the late firm of John Murphy & Co., under the same name and style. F. K. Murphy is a son of the late John Murphy, and, though young in years, is regarded as an active business man. Mr. Kilner was bookkeeper for the old house for several years before Mr. Murphy's death, and Mr. Noble has been a long time in the printing business. He is a member of the School Board from the Fourth ward, and has many friends who wish him well in his new undertaking.

Harvest Osbourn has accepted a situation to travel for Nagle & Co., blank book manufacturers, Philadelphia. Mr. Osbourn is an old Baltimorean. He was formerly with his brother, D. K. Osbourn, and of late with H. P. Guyton & Co. Possessed, as he is, of a thorough knowledge of the blank book and stationery business, he will, doubtless, secure the success his friends here hope for him.

There have been no leading representatives of the trade here since I last wrote you. This is truly something wonderful, and, it is safe to say, that there have been less traveling salesmen hereabouts of late than for many years past.

W. P. M.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, Ill., May 14, 1881.

Lively as business may be just at present, the time is very near when our tradesmen will be donning their dusters and trying to devise means to keep cool, while their customers are off enjoying the balmy breezes of mountain, lake or sea.

People are not yet done moving, however, as witness the following: Donahue & Henneberry are removing their extensive bookbindery from 105 Madison street to 180 and 182 Monroe street, where they intend to made a further extension of their business. C. E. Fithian, representative of Snider & Hoole, bookbinders' supplies, Cincinnati, is moving into the office of H. Hoffman, blank books, at 104 Madison street, where he intends to keep a full line of the goods for which his house is so justly renowned.

A card has been issued by T. S. Gillett, in which he gives notice that he retires from business—card board and paper—in his own name. He may now be found with the J. W. Butler Paper Company, of this city, a house well and widely known throughout the Northwest. Mr. Gillett's business at one time covered the entire West, he being the pioneer of the trade in this section of the country; but the competition of machine Bristol boards has decided him in the step he now takes.

Baird & Dillon, 25 Park place, New York, have taken the offices lately vacated by Belford, Clarke & Co., 10 and 11 Lakeside Building, where they will carry on the regular business of

the New York house, making a specialty of fine albums imported for the trade.

Charles P. Willard, 20 La Salle street, has just issued a complete catalogue of his engines and boiler for the printing and other trades. It is neatly printed and well illustrated, containing forty pages. Printers wishing a cheap engine should send for this catalogue.

Dunwell & Ford have just shown me some fine samples of copper plate engraving. They consist of the invitation sheets and *menu* cards for the forty-eighth annual convention of the "Psi Upsilon" Society. The card is fringed with old gold satin, with an illuminated monogram on the front cover. Both are exquisite pieces of work, not inferior to the finest specimens from New York or Philadelphia.

Nevers & Bowen, lithographers, have lately removed from 137 Madison street to 200 and 202 Clark street.

This office lately received a flying visit from Clarence Beebe, the genial representative of W. H. Parsons & Co., 83 and 85 Duane street, New York. He reports business excellent.

H. H. Unz, Chicago, manager for E. Remington & Sons' perfected type writer, has sent me a copy of the new catalogue just published by himself. It is in every way a neat and creditable piece of work, not only to the printer, but to Mr. Unz himself. Especially neat is the title page vignette, entitled "The Past," with which Mr. Unz has decorated the front cover of the book, the "Future" being represented by the matter which follows in the pamphlet. The design, representing an ancient open fireplace with tiles, a sword depending under the mantelpiece, and an ink jar with quill pens protruding, is very descriptive, and the book tells the rest of the story. G. B. H.

GLASS PAINTING—OLD AND NEW.

Painting on glass, most probably a German invention, consisted, in its early beginnings, in fitting together differently colored pieces of glass into a sort of mosaic work, the pieces being specially cut according to the subject which was to be represented, and then being bound to one another by a setting of lead. Later, to the figured work thus produced, the artist added contour or outlines marked with dark brown glass in fusion; still advancing, he at length added shades, and finally thus attained to the laying on and burning in of the colors.

The need early disclosed of excluding the outward view through the church windows and of admitting only a subdued harmonious light auspicious to self-recollection and devotion—"the dim religious light" of the English poet—contributed essentially to the development of glass painting. There is no doubt that the purpose of the art was particularly served by the imperfectly fused and impurely colored glasses of that time—a circumstance mentioned by Knapp in his excellent "Technology." "The old masters," he says, "compounded their colors with nice perception and practiced intelligence, guarding against the excess of each by harmonizing them all. They were, however, moved by other than purely artistic considerations. For, as it is easy to perceive, not only the advantages but the defects of the glass industry of those times contribute to the perfection of the effect in the ancient glass painting. The table glass or plate glass was in those days much more strongly colored, of a bluish-green or yellow tone, hardly ever white, for the most part blistered, granular and in other ways defective—faults which were all the more conspicuous, as, at least before the fifteenth century, manufacturers did not know how to make table glass so thin as at the present day. This thickness of the plates gave the church windows great firmness; the want of clearness and whiteness deprived both the plate and the colors of glaring transparency, subdued the effect into an agreeable softness, and promoted the tone of the whole. The colors also employed in the ancient glass painting were produced from less pure preparations and were, therefore, less glaring and less blinding or dazzling to the eyes than the colors now used. The selection was made from a small compass. Blue, by means of zaffer, was marked by a soft tone passing into sky blue (not indigo); turquoise blue, oftenest a pale blue shading into gray, both with copper; two kinds of violet with manganese; yellow with silver and carbon; the excellent ruby glass as coating with copper; a violet passing into yellow, as flesh color, obtained from manganese with some iron; green with copper and iron; and finally, a mixed black for lines of the design—these were pretty much all they knew."

The time in which Gothic architecture most flourished was the time in which glass painting attained its greatest excellence. With the downfall of one the other also declined, and toward the end of the sixteenth century ecclesiastical glass painting had sunk into insignificance.

In the seventeenth and eighteenth centuries scarcely anything was done toward the development of the art of painting on glass. First in our century we see it once more advanced to a high condition of excellence. And yet, though the artist of the present day has at his command richer means than the artist of the middle ages, it is still undeniable that in many respects the earlier stage of the art has not yet been overtaken. Great difficulty is still met with in the attempt to reproduce after the medieval model the softness and the harmonious blending of colors. Many colors and their proper treatment have been but lately rediscovered. In particular, the art of making the purple red glass had until very recently been so utterly forgotten that it was commonly believed to be completely lost. Printed recipes, which circumstantially described the entire process have, however, always existed. At the present time, the manufacture of red glasses, colored with gold or copper, presents no difficulties.

The laid on and inburnt colors of the old glass paintings, if exposed to the influences of the weather, are in the course of time affected and destroyed. Glass painting proper, that is to say, the application or laying on of colored fusible glass of different kinds upon colorless glass plates was less known to the old artists. It is only in recent times that this branch, thanks to the progress of chemistry, has attained to a high degree of perfection. The fusible colors prepared at the present day resist, for the most part, not only atmospherical influences, but are able to defy the assaults of even stronger agencies.

In our time glass painting is extensively employed in the decoration of the most various subjects of common life.

Colors proper or pigments cannot be directly laid upon the glass and burnt in, but they require to be, first, according to the tone which is desired, mingled in greater or less quantity with easily fusible glass, the so called flux.

For the preparation of the flux, we thoroughly fuse together in a moderate-sized Hessian crucible a thorough mixture of litharge and powdered quartz or silex, to which substances calcined borax is now often added, and, the glass well fused, we pour, in the form of a thin jet, into cold water, thereby facilitating the process of pulverization. For use it must be ground with the muller on a glass plate into the finest impalpable powder. By mingling the flux with the pigment, that is, the coloring metallic oxide, we obtain the color, which, tempered with lard or inspissated oil of turpentine, is laid with the brush or pencil upon the object to be decorated.

Some pigments which, for their complete vitrification, require a longer time and a higher temperature than are allowed during the process of burning in the muffle must, in order fully to develop their peculiar color, be first thoroughly fused together with the flux in the crucible, sprinkled with water and reduced to the finest powder.

These reinforced or strengthened fusible colors are real solutions of metallic oxides in the flux. It is not always the design of the painter with fusible colors to obtain a perfect vitrification of the flux with the pigment; very often, indeed, he desires as much as possible to avoid that result, and to bring only the flux to the melting point, which, then cleaving to the glass, may mechanically envelop the added coloring matter. Such colors, to which, for example, the brown and red, produced with iron oxide, belong, require during the burning in the muffle the greatest attention and care that their color tones may not be wholly destroyed by the too protracted or too intense melting heat. These colors, which represent solutions of pigments in the flux or agent of fusion, are not easily injured through neglect or carelessness during the process of burning in the muffle; while the others, which only mechanically envelop or enclose the pigment, can be consumed or unduly burned in a moment, since their entire or partial dissolution in the flux always results in a color wholly different from the one desired.

The main condition which fusible colors for glass painting must fulfill is this, namely, that they shall fuse at a lower temperature than that at which the object to be decorated grows soft. Furthermore, they must all be so accommodated to one another in their melting point that they shall all as nearly as possible, at one and the same temperature and in the same length of time, be burnt in the way desired. It is not difficult to perceive that these are conditions not easily fulfilled, which can not in fact be fulfilled with ideal completeness. Colors produced with different pigments will vary somewhat in the qualities just mentioned. These are points which can be ascertained only by a series of carefully executed experiments. Frequently, indeed regularly, in the case of many colored paintings, the painter on glass is compelled to burn in the colors many times, the hardly fusible first and the softer afterwards.

It is not every kind of glass that is suitable for painting on. In general, the hard kinds containing much silica are to be preferred to the softer glasses, poor in silicic acid but rich in alkali. Manifestly, glass subjected for a long time to the temperature of the muffle should show no signs of devitrification, which would result in dullness and in the detachment of thin layers or flakes from the upper surface. In order to be able to observe intelligently the progress of the burning in, the glass painter rubs a portion of every color used upon a shard or piece of glass, and these pieces, so called "watchers," he places in an easily accessible part of the muffle or furnace. They thus enable him to judge both of the temperature and of the fusion of the colors.

STAINS ON GLASS.—To remove stains from glass take American potash, three parts; unslaked lime, one part. Lay this on with a stick, letting it remain for some time, and it will remove either paint or tar.

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD BERKSHIRE MILLS

LINEN LEDGER PAPER

Will stand the severest test of COLOR, CLIMATE, INK OR WEAR.

Being **Triple Sized** (a process entirely our own) and **Loft Dried**, can be erased and written upon the fifth time distinctly. None genuine without the water-mark and date, thus—**Old Berkshire Mills Linen Ledger, 1881.**

The J. W. Stoakes Automatic Shading PEN.

FOR PLAIN, FANCY AND ORNAMENTAL

LETTERING.

WASHINGTON, D. C., March, 1880.

I desire to say that the "Shading Pen" invented by Mr. STOAKES meets a want long felt by penmen. The work done by it is perfect in line and shade. The rapidity with which lettering is done, aside from the beauty of the work, is enough to recommend it for general use.

H. A. WHITNEY, Ass't Cashier, U. S. Treasury.

U. S. ENGINEER'S OFFICE, ST. LOUIS, MO., February 11, 1880.

I have tried the PEN, and it gives great satisfaction. It is worth twice the price asked. It is valuable for headings, etc. JNO. R. BALLINGER.

BIRTHDAY CARDS.

We take pleasure in herewith presenting to the Trade our Price List of Birthday Cards, which has been greatly enlarged by a number of very elegant and novel sets:

ASSORTMENT.—They are made up in sets of one dozen, except No. 7, and are put up in a box or envelope. Each set contains all the designs of the series, and as no series, except Nos. 3 and 14, has more than eight designs, some of the designs are more or less repeated in the set.

ENVELOPES.—Fine Cream-Tinted Envelopes are furnished with the more elegant series, without extra charge.

SILK FRINGES.—Encouraged by the very great success with our Silk-Fringed Easter Cards, we have made up a number of our Birthday Cards with the best quality heavy silk fringe, made expressly for us. All fringed cards are furnished with Protectors and Envelopes, and are put up with assorted colors of fringes.

USUAL DISCOUNTS TO THE TRADE.

TO THE TRADE.—We have to ask the generous indulgence of our friends in the Trade, for what may have seemed a want of proper consideratiou for their interests on our part during the past Easter season. The sales of our Easter Cards have largely exceeded our anticipations, and these sales following so closely upon the large sales of our Valentine Cards, made a demand upon us greater than our facilities for production enabled us to supply. Under these circumstances we have been unable, in many cases, to fill orders as fully and as promptly as we have desired, and our not being able to do so has been a cause of as great regret to ourselves as it has been to our customers. We are now enlarging our buildiug and making extensive additions to our machinery, not only for the purpose of increasing our facilities for production, but also for the purpose of improving the character and excellence of our work, and we trust, with our increased facilities, to be able in the future to meet all demands for our publications with the utmost promptness.

Our samples for Christmas season are in a forward condition, and we have the pleasure of announcing that we intend to start our travelers with them in the later part of May, and we shall endeavor to have these samples submitted to our customers throughout the United States and Canada as early in the season as possible. We trust to be favored with the same consideration, on the part of the Trade, in the placing of advanced orders, which has been extended to us in the past.

THIS IS TO CERTIFY THAT THE SUBSCRIBERS have formed a limited partnership, pursuant to the provisions of title one, chapter four, part two, of the Revised Statutes of the State of New York, and of the several acts amendatory thereof, for the transaction of business within the city and State of New York, to be conducted under the name of M. A. Reay. The general nature of the business to be transacted by such partnership is the manufacture of envelopes and the carrying on of a general stationery business, and the importing, buying and selling, at wholesale and retail, of such articles of merchandise and property as is usually bought and sold by Stationers and Envelope manufacturers.

The names of all the general and special partners interested in said partnership are as follows:

Marie A. Reay, who resides at Jersey City, in the State of New Jersey, is the only general partner.

That John J. Murphy, who resides in the city of New York, is the only special partner. That the said special partner, John J. Murphy, has contributed ten thousand dollars in cash as capital to the common stock.

The partnership is to commence on the 12th day of May, 1881, and will terminate on the 12th day of May, 1884.

MARIE A. REAY, General Partner.
JOHN J. MURPHY, Special Partner.

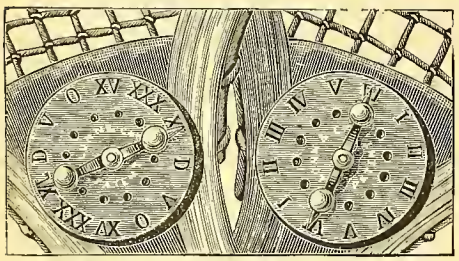
Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

LAWN TENNIS SCORING DIAL.

The cut illustrates Lunn & Co.'s lawn tennis scoring dials, which can be affixed to any racquet. Two dials are intended to be used, so that each player can tell the state of the score, both for his own game and that of his opponent. The hands are retained in their places by short pins and are moved by raising them slightly. These



dials are made of metal, very strong, light and durable and nickel plated; the hands are gilt and the knobs are of ivory. Peck & Snyder have them.

NEW PATENTS.

No. 240,886. Book Sewing.—Cyrus Chambers, Jr., Philadelphia, Pa.

1. A method of sewing books preparatory to binding, the same consisting in passing the thread from the inside to the outside of each signature through any number of holes in the crease of its fold, in a series of loops, which are afterward glued to the back to bind the book. 2. Book signatures prepared for binding by having oblique rows of holes across the back, in order that the thread loops projected from such holes may be separately glued to the back without interfering with each other or forming welts. 3. Book signatures having holes in double oblique lines near the heads and tails of the signatures. 4. A flexible book hinge having alternate rows of thread ends or loops projecting from the signatures combed and fastened in opposite directions across the back of the book, so as to unite each signature with every other by an attachment outside of the edges of the signatures.

No. 240,909. Fountain Pen.—Albert J. Kletzker, St. Louis, Mo.

In a fountain pen, a barrel or slitted writing point connected to and operating a needle-clearer by the springing of the pen-point in use, said clearer having valve or valves for controlling the flow of ink.

No. 240,913. Stamp Canceler and Register.—Lewis R. Lupton, Comanche, Tex.

No. 240,921. Parallel Gauge for Paper Cutters.—John B. Murray, Brooklyn, E. D., assignor to M. Nichols Johnson, New York, N. Y.

No. 240,955. Toy.—James H. Bowen, Philadelphia, Pa.

No. 240,972. Paper Bag Machine.—William C. Cross, Boston, Mass.

No. 241,003. Lead and Crayon Holder. — Horace Harris, Newark, N. J.

No. 241,004. Celluloid Playing Cards, &c.—Nathan Hart and Robert A. Bacon, New York, N. Y.

1. A playing card consisting of a foundation of woven or other fibrous material covered with a compound of pyroxyline, such as celluloid and similar substances, or with a coating of which such substances are a component part, and marked or printed in colors. 2. The process of decorating surfaces composed of compounds of pyroxyline, such as celluloid and similar substances, or of which such substances are a component part, by marking or printing such surfaces with aniline colors dissolved in a material which is a solvent of both aniline and of such substances, and which, when dry, leaves the color in intimate union or incorporated with such substances without injuring the same.

No. 241,005. Decorating Celluloid. — Nathan Hart and Robert A. Bacon, New York, N. Y.

1. The process of decorating surfaces composed wholly or in part of compounds of pyroxyline, such as celluloid, xyloidine, and similar substances, by applying to such surfaces a solvent thereof in which is mixed the color to form the design. 2. The process of decorating surfaces composed wholly or in part of compounds of pyroxyline, such as celluloid, xyloidine, and other and similar substances, by the application of aniline or equivalent colors, dissolved in alcohol and ether. 3. The process of decorating surfaces composed wholly or in part of compounds of pyroxyline, such as celluloid, xyloidine, or other similar substances, by the application of aniline or equivalent colors, dissolved in alcohol, ether and carbolic acid, and applied.

No. 241,021. Process of Producing Engraved Plates. —Alfred Jones, Yonkers, N. Y.

The process of preparing a printing plate from a photographic negative by first producing a relief-film from the negative and then engraving such plate, by means of a pantograph or equivalent device, direct from such relief-film, for the purpose of printing either with the typographic press or with the plate press.

No. 241,055. Toy Savings Bank.—John Murray, New York, N. Y.

No. 241,061. Method of Producing Photochromic Pictures or Prints.—Theodor Pixis, Munich, Bavaria, Germany. (Specimens.) Patented in France August 27, 1880.

1. A method of producing photochromic pictures, consisting in forming the groundwork of the picture in suitable colors or pigments and then printing directly upon said colored groundwork with a phototype plate bearing a design or image corresponding in size and contour with said colored groundwork, and inked so as to register with the latter when impressed thereupon for bringing out the solid effects, the shadows, and the half-shades of the picture. 2. A photochromic picture consisting of a colored or painted groundwork or body colors applied to give the general outlines of said picture and a superposed coating of permanent colors or inks printed upon said groundwork to bring out the solid effects, the shadows, and half-shades of the picture.

No. 241,070. Photographic Paper.—Thomas C. Roche, Brooklyn, assignor to E. & H. T. Anthony & Co., New York, N. Y.

1. A method of combiuing sensitized gelatine with paper for positive photographic printing, consisting in first softening the gelatine in water and adding the bromide of ammonia or an equivalent bromide, using about the proportions named; then dissolving the gelatine by heat and adding gradually nitrate of silver dissolved in water in about the proportions named; then continuing the heat at about 80° or 100° Fahrenheit for two or three days; then, after allowing it to cool and set, cutting it into fragments and washing out the soluble matter; then melting it by heat and adding about its weight of water; then applying it to unfilled photographic paper, into which it penetrates, and with the organic matter of which it combines; lastly, drying it in any suitable manner. 2. As a new article of manufacture, unfilled and unglazed photographic paper for positive printing, with the face of which is combined a sensitive substance consisting essentially of gelatine and a bromide of silver.

No. 241,088. Calendar. — Joseph R. Swain, Scarborough, N. Y.

No. 241,113. Former for Paper Bag Machines.—Daniel Appel, Cleveland, Ohio, assignor to himself and Newton W. Taylor, same place.

No. 241,114. Bag Machine.—Daniel Appel, Cleveland, Ohio, assignor to himself and Newton W. Taylor, same place; one-half to each.

No. 241,123. Revolving Book Case.—John Danner, Canton, Ohio.

A quadrangular revolving book case constructed with two compartments, secured on a diagonal line to the top and bottom thereof, and two hinged compartments located on a diagonal line at a right angle to the first.

No. 241,128. Stereotype Block.—Charles W. E. Eberhard, St. Paul, Minn., assignor of one-half to Harlan P. Hall, same place.

No. 241,168. Printing Machine.—Stephen D. Tucker, New York, N. Y.

No. 241,188. Toy Horse.—Francis W. Carpenter, Harrison, N. Y.

The combination, with a pivoted toy horse and wheel and crank, of a flexible connection from the crank to the front portion of the toy horse.

No. 241,214. Inkstand.—Wm. C. Hicks, Summit, N. J.

1. The combination of a reservoir or well, a cover provided with an opening, and a dipper, bucket or cup, mounted on a swinging lever and arranged to fall to a vertical position and empty the bucket of the sediment, fill it with fresh ink, and when turned upward to close the opening in the cover on the under side. 2. The combination, substantially as hereinbefore set forth, of the ink reservoir, the cover with an opening in it, with the dipping bucket and the lid both mounted and arranged to swing on the same shaft or centre of motion.

No. 241,215. Fountain Pen.—Frank Holland, Manchester, Conn.

No. 241,235. Pantograph.—Wm. V. Oothout, Brooklyn, E. D., N. Y., assignor to himself and Gibbons L. Kelty, same place.

No. 241,350. Bill File.—John E. Gorman, Newark, N. J.

No. 241,362. Lead and Crayon Holder.—Joseph Hoffman, New York, N. Y., assignor to Joseph Reckendorfer, same place.

1. The combination, with the sheath and the sliding lead carrier, of a slotted receiver adapted to have a movement of partial rotation, and provided with teeth to engage a detent on the carrier. 2. The combination, with the slotted sheath or handle and the longitudinally movable lead carrier provided with pawl or detent, of the slotted and toothed receiver containing the carrier and held in the sheath so as to be capable of partial rotation without longitudinal movement. 3. In combination with the sheath and the carrier and the carrier pawl or detent, the partly rotating toothed and slotted receiver provided with a nozzle end projecting beyond the front end of the sheath, and held in the sheath by a shoulder in front and cap or head at rear, so as to be incapable of longitudinal movement therein.

REISSUES.

No. 9,701. Printing Press.—Calvert B. Cottrell, Westerly, R. I. Original No., 212,196, dated February 11, 1879.

Extra Fine Papers

Manufactured by

Z. CRANE, Jr., & BRO.,

DALTON, MASS., U.S.A.

These Papers, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

REGULAR QUALITY.

handsome Light Blue Packages containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In a separate Package of uniform size, is one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or New York Office, *47 Beekman Street.* GEO. B. HURD, Gen'l Agent.

PERFECTED STYLOGRAFIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS,** the last, June 29, 1880, being the most important and giving the name **Perfected.** All cuts are exact size

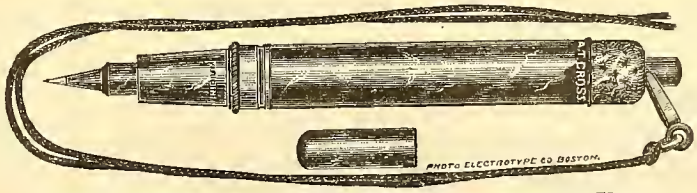
MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambler's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra long. Holds most ink, except the **Maximum.**

SHORT.—Most widely known and sold heretofore; but Maximum is better for desk or Hambler's Pocket Giant for Vest Pocket or Cord. So this will be largely superseded.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined.

☞See Descriptive Circulars.



GIANT, with Cord and Gold Ring, same price as Short.

Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, both of which will have all new improvements.

☞See Descriptive Circulars.

VEST GIANT, Plain, - - $2.50.
All Styles up to $4.00.

☞ **VEST GIANT.—The Cheapest PERFECTED Pen made.**

General Manager, Chicago.

CEMENTINE.

WE desire to call attentiou to a new article which we are just now introducing to the trade. It is a liquid glue, cement and mucilage combined. In our own business we experienced so much difficulty in finding an adhesive that would make our labels adhere to the tin cover of the Hektograph, that we gave a commission to one of our most distinguished chemists to compound for us an article which would answer our purpose. After months of labor the result has been the production of an adhesive so far superior to anything heretofore made, that we have decided to manufacture and offer it for sale, and are now ready to supply it in any quantity. It is without doubt the best article of the kind for family and general use ever offered to the public. For repairing China, Glassware, Furniture, Rubber, Leather, Books, Billiard Cues, or pasting labels upon tin or other metal or for any use where glue, cement or mucilage is required, it is unrivaled. For warm climates we make an article expressly adapted for use there. We supply it by the gallon or barrel, and for family use it is put up in bottles, with brush, at 25 cents. Samples will be sent free to large consumers.

LIBERAL DISCOUNT TO THE TRADE.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Geo. Lies, dealer in notions, Allegheny, Pa., is selling out.

Edward Mallandaine, publisher, Victoria, B. C., has sold out.

Arthur O'Brien, publisher of the *Sun*, Logootee, Ind., has sold out.

Rowell & Coffin, printers, Manchester, N. H., have dissolved partnership.

Wm. Colville, printer, Cookstown, Ont., is advertising his business for sale.

Chauncey R. Murray, printer, Cincinnati, O., has sold out to Murray, Hobby & Co.

Wm. Schmidt, bookseller and stationer, Syracuse, N. Y., has made an assignment.

McKim & Billings, printers and bookbinders, Cleveland, O., have dissolved partnership.

D. J. Stalter, publisher of the *News*, Tiffin, O., has changed his style to Stalter & Johnson.

Hammond & Ligon, publishers of the *Journal and Review*, Aiken, S. C., have dissolved partnership.

Graham & Co., printers of the *Star*, Montreal, P. Q., Can., have admitted G. R. Angus as special partner for $10,000.

Geo. O. Harding, of the firm of Harding & Dennis, publishers of the *Saturday Review*, Indianapolis, Ind., is dead.

Taylor Brothers, manufacturers of subscription books, New Haven, Conn., have dissolved partnership. S. H. Taylor continues.

Fleming, Miller & Ussing, paper dealers, New York city, have dissolved partnership. A new firm has been formed as Fleming, Miller & Co.

Hollingsworth & Whitney's Aroostook mill at Gardiner, Me., has been burned. It was devoted to the manufacture of chemical fibre. Insured.

George F. Brown, of Brown & Sanson, will hereafter represent the interests of this house in the West, and is now among the trade in that section.

Jacob Hahn, dealer in notions, Philadelphia, Pa., has associated with him Isaac Hahn, and they will continue business under the style of Jacob Hahn & Son.

A fire on the premises of H. Willson & Co., printers and wood engravers, Chicago, Ill., Friday night, May 13, caused a loss of $1,000; fully covered by insurance.

T. Shriver & Co., New York, have been awarded the prize medal of the Melbourne International Exhibition for their copying presses. This honor is deserved, and is another credit mark for American manufacturers.

Theo. Leonhardt & Son, Philadelphia, have made arrangements with Wirths Brothers, 39 Beekman street, to carry a full line of their French chromo cards. They will be pleased to have the trade call there and inspect their specimens.

Cooke & Cobb, No. 10 Broadway, New York, are manufacturing the "Favorite" letter and invoice file, which they claim is a better and cheaper file than any in the market. They will furnish samples to the trade on receipt of postage—26 cents. They report a large trade in this file and their other specialties.

J. B. Lippincott & Co., Philadelphia, have made many and extensive changes within the past few weeks in their stationery department. It is now double its former size, comprising the second and third floors of the Market street building, each being 200 by 45 feet. Both floors are used for sample and sale rooms. The second floor is particularly adapted for the sale of miscellaneous articles, staple stationery and blank books; while upon the third floor will be found an extensive line of fancy goods and games. J. B. Lippincott & Co. propose to carry a large and well selected stock of games, for which they have a large sale, comprising lawn tennis, archery, croquet, &c. The trade will find it to their advantage to examine the new line of fancy goods recently introduced by the firm. Much taste has been shown in the arrangement of the samples. Buyers can see at a glance what the stock embraces by passing from table to table and from floor to floor.

Octave Feuillet has always been a favorite among the public. His "Count de Camors" and "The Amours of Philippe" have had an immense success. "Bellah" is a novel of a different type. The scene is laid in Brittany, a part of France more full of picturesque legends than any other. The peasantry there have a character of their own, the women are noted for their beauty, the men for their patriotism. Feuillet has taken an incident of the Vendean war and interwoven with it a passionate love story. It is published by T. B. Peterson & Brothers, in a square 12mo volume, paper cover, price 75 cents, in uniform style with "Xenie's Inheritance," "Dosia," "Saveli's Expiation," "Lucie Rodey," &c.

Potsdamer & Co., lithographers and art publishers, Philadelphia, find their trade so largely increased that they are obliged to remove their factory so as to secure more room in order to double the number of their presses and their artists. The orders now on hand will keep them busy until September. They are also obliged to provide additional facilities to keep up with the current demand for their goods.

The Jersey City Paper Company, 211 Wayne street, Jersey City, N. J., forwards samples of yellow copying paper of its own manufacture. It seems to be an excellent paper, and is said to be in favor where a large number of copies are required, as in railway manifests. It is sold by Henry Bainbridge & Co., New York, and by the *Courier* Company, Buffalo, N. Y.

The American Crayon and Slate Company is now settled in its new and capacious store, 43 Dey street, this city, and is doing a live and large business in its celebrated crayons, slates, school bags, and Vermont soapstone pencils, which are now being manufactured in a better style and shape than ever before. The "Triumph" black-board is said to be having a large sale.

Lucien Sanderson, late partner with F. C. Philbrick, gives notice that he has purchased all the stock in trade, books, accounts and other assets of the late firm of F. C. Philbrick & Co., heretofore carrying on the business of manufacturing stationers at 103 Devonshire street and 19 Spring lane, Boston, and that the same business will be carried on by him at the same place.

Proposals will be received by the public printer at Washington, until June 6, at 10 A. M., for printers', binders', stereotypers' and miscellaneous material for the use of the government printing office during the next fiscal year. The ledger papers called for are required to be 500 sheets to the ream.

Patridge & Teele, publishers, Moorhead, Minn., have dissolved partnership.

Mrs. D. N. Taffe, dealer in notions, Kansas City, Mo., is advertising to sell out.

S. Wiler, of Hanna, Wiler & Co., wholesale dealer in notions, Fort Wayne, Ind., is dead.

F. A. Rust, paper box manufacturer, Northampton, Mass., has sold out to A. Kingsbury.

Mulgrew Brothers, printers and publishers, Healdsburg, Cal., have dissolved partnership.

Wing & Bush, fancy goods dealers, Castile, N. Y., have dissolved partnership. G. H. Bush continues.

Huckman & Herrick, news dealers, Syracuse, N. Y., have dissolved partnership. Mr. Huckman continues.

Mayfield & Smith, publishers of the *Index*, Slater, Mo., have dissolved partnership. Henry E. Smith continues.

W. H. Benson & Co., publishers of the *Baltimore County Herald*, Towson, Md., have been sold out by mortgagee.

Lathrop & Wilkins, booksellers and stationers, New Orleans, La., have dissolved partnership. G. T. Lathrop continues.

Lathrop & Wilkins, stationers and booksellers, Houston, Texas, have dissolved partnership. Wilkins & Adey continue.

Means & Downing, publishers of the *Republican*, Boone, Iowa, have been succeeded by the *Republican* Printing Company.

Spring & Robertson, stationers and printers, Lafayette, Ind., have dissolved partnership. Spring, Emerson & Co. continue.

R. Fideau, 16 Beekman street, since last Saturday has shipped to different places fifty-two bales of hammocks. Mr. Fideau is well pleased with his present trade, and feels as cool as a cucumber.

Alexander Agar is on a trip this week to the Adirondacks in company with some friends, and will indulge in fishing before he returns. The members of the party, finding the weather too cool to camp out, are stopping at a hotel.

T. B. Potsdamer, of Potsdamer & Co., 321 Chestnut street, Philadelphia, paid a flying visit to the city yesterday, returning in the afternoon train. His firm has just contracted with R. Hoe & Co. for some new machinery, and will move about July 1.

A. M. Collins, Son & Co. have just issued the Standard picture frame, a neat and cheap article, made from black, pearl, buff and rose, in two sizes, for card and cabinet photographs. The back is cut from one piece, so as to form a hinge and support. The price is astonishingly low.

Harry A. Schmook, representing John Gibson, has just returned from his second spring trip. He reports trade as having been much better than last year, notwithstanding the snow and water that have, as a general thing, kept the trade back in the West this season. Mr. Gibson has been compelled on account of the large increase in his business to put in more new machinery, and for this purpose will, on June 1, occupy an additional double floor in his building.

The "Nonpareil" blotting paper, for which Miller & Flinn are the manufacturers' agents, continues to meet with a good and steady sale. This paper sustains its reputation for excellence of quality and as a perfect absorbent. Its manufacturers do not intend to allow it to deteriorate, whatever may be the fluctuation in prices. Full weight and count are guaranteed,

and fair treatment of all its customers is a leading principle with this firm.

A. Weidmann, of A. Weidmann & Co., is expected home next week. He left Havre on May 14 per steamship Westphalia.

The attention of the trade is invited to two advertisements by R. G. Hutchinson in other columns of this issue. One relates to pamphlet boxes and the other to file bands.

J. B. McCarty, of McCarty & Hasberg, who is now in Europe selecting goods for the fall trade, reports having secured some exquisite lines. The house will present, as usual, an entire new stock.

The standard rubber goods manufactured by Evans & Gardner are meeting with so large and constantly increasing demand that the firm finds it necessary to extend its manufacturing facilities. The house is not through with its spring trade yet.

John S. Downing, manufacturer of stationers' sundries, Crown Works, Commercial street, Birmingham, England, has been awarded highest honors, viz., first degree of merit, for his exhibit at Melbourne. He has also received the medal and diploma, being first award, for his case at Sydney, 1879.

Mrs. E. P. Coby, wife of the well known William street stationer and printer, who has been in Paris for the past year, has recently finished a portrait which has been admitted to the Spring Salon. The fact that it possessed sufficient merit to be received there, where the committee is exceedingly strict, encourages the many friends of the lady to the belief that she has a brilliant future in the art she has chosen.

Henry Levy & Son have just received a new and elegant line of wall pockets and brackets in solid ebony, decorated with gilt mythological subjects. In many of the designs the centres are of embossed plush. This house shows a line of papiernaché plaques, used for decorating purposes. They are in black and white and in sizes ranging from five to fifteen inches in diameter. They are offered from $18 per gross upward.

The business of the late firm of M. A. Reay & Co. will be continued under the style of M. A. Reay. The general partner is Marie A. Reay and the special partner is John J. Murphy. Mrs. Reay has been the head of the house for some years and has had active charge of its business management, in which she has acquired an excellent reputation. Mr. Murphy is an old and well known merchant of high standing, and his name is a guaranty for the character and stability of the house. The new copartnership extends to May 12, 1884.

Charles Taber & Co. have just added ten new and attractive subjects to their artotype engravings. Among them are two illustrative of sperm whaling, one representing the chase and the other the capture. In each the whalers, boats, crews, icebergs and other scenes connected with such events are elegantly shown. The one represeuting the capture, the capsizing of a boat and the excitement attendant on such an incident, is striking. These engravings were produced in New Bedford, which is the principal whaling port in the United States, and before they were issued were inspected by several old whalers, all of whom expressed themselves as being pleased with the productions. Another of the engravings, called "The Slide," is after the painting of Hans Dahl. It represents school girls sliding down a frozen embankment in all the attitudes peculiar to such exercise. Another engraving shows New Bedford as it appeared in 1807.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---$2.00 PER ANNUM.

Single Copies - - - - 10 Cents

NEW YORK, THURSDAY, MAY 19, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

GREAT expectations for the next season's trade have been formed and much energy is being expended in the preparations which are thought to be necessary in order to provide for the activity of business.

EMULATION is a distinguishing feature of the arrangements for the fall awakening. There is not so much a desire to have what others have or what may now be considered the latest novelties, but something altogether new is sought. The fancy goods dealers whose opportunities are by far the most extended are trying to get entirely fresh stocks throughout as to designs and goods. If they could so manage it, they would not offer anything that has been on the market before, no matter how new. They intend to approach this point as near as possible.

Now, what has become of all the projects of reform in certain trade matters? We were seriously assured some time ago, that the Board of Trade was directing its efforts toward the reform of abuses of which the whole trade complained, and we took advantage of the fact to invite attention to a few other things which we knew wanted looking after. There was some discussion, and the trade were seemingly expectant of having something done. No results have followed. While we disclaim the intention of dictating to the stationery trade or its representatives (if it has any) in chartered organizations, it certainly seems to us as it will to many others that when members of the trade publicly avow that they are doing or going to do this, that or the other thing, we ought to be able to perceive something in the way of fruits after a reasonable time has gone by. Is there a paralysis upon action? It certainly looks like it.

FOR many, the most absorbing matter of interest just now is, "Where shall I go for my holiday?" We often wonder at those who plunge headlong into the crowded watering places where nothing comparable to the comforts of home are to be found, and who endure the heat, the crowding and flatness of a life which has a sameness which gives no refreshment to the mind and is really injurious to all but the most fatuous brains. Many of our young men in the trade are putting by their money for their summer's vacation, and are getting ready to drift with the current of humanity which follows beaten tracks and timeworn channels only to swallow the dust and absorb the bitterness of all that have gone before them. There are many delightful spots hidden from the crowd which only need to be stumbled on to be enjoyed. Two or three of them are in our mind, and we know that the summer tourists have not as yet deprived them of their native charm or worn the freshness from their virgin nature. The cost of a few weeks at Saratoga, Long Branch or the like would pay for as many months of quiet easy pleasure, were three or four to wander from one place to another, using their own conveyance if preferred, or taking up with the conveniences of the country when required. Why don't some of our overworked business men try this lazy, cheap, yet delightful way of summering. There are plenty of chances for adventure and rest and enjoyment to be found in hitherto unknown nooks if they are only sought. Why not look for them?

CHATTEL MORTGAGES.

[In the appended list R. signifies a renewal of a pre-existing mortgage; B. S., bill of sale; and Real, a mortgage on real estate.]

The committee appointed to award the prizes in the competition for $800, instituted by T. Sinclair & Son, of Philadelphia, for the best series of original designs for advertising cards, have awarded the first prize of $500 to J. C. Beard, of New York; the second prize of $200 to Max Rosenthal, of Philadelphia; and the third prize, of $100, to Rosina Emmet, of Pelham Manor, N. Y. The series awarded the first prize contains four designs, 3 by 4 inches in size, each giving a half length figure of a young girl, with a fan in her hand, which forms an advertising space in each respectively, is a horse, a dog, a cat and a parrot. This series has been very delicately treated, though bright and strong in effect, and is critically pronounced the best work of its kind ever painted by Mr. Beard. The second prize, 3 by 5 inches in size, entitled the "Four Continents"—Europe, Asia, Africa and America—portrays in a plaque, on one end of each card a female bust, typical of each continent; on the opposite end is a scene. The third prize series, 3 by 5 inches in size, by Miss Emmet, who took the first prize in the 1880 Prang exhibition, is purely decorative in character. The exhibition has attracted a great many publishers, lithographers, card and art dealers, as well as artists and art critics, and is prononnced a decided success. It will remain open until May 24, and is free to all. The remaining designs are many of them for sale.

Among the visiting members of the trade in the city this week were C. E. Young, of Young, Lockwood & Co., Buffalo, N. Y.; C. W. Breed, Malone, N. Y.; Mr. Gillies, of Bunton, Gillies & Co., Hamilton, Canada, and T. B. Potsdamer, of Potsdamer & Co., Philadelphia.

ANSWERS TO CORRESPONDENTS.

W. H. W. asks: 1. What firm buys old scraps of paper, such as are swept from stores? 2. What is such stock worth? 3. Are the "H. & W." and "Triumph" files identical? 4. Who deals in old coins? 5. Can you give me the name of some collector of coins? 6. Have prices of envelopes and blank books advanced recently? 7. Are * * * * manufacturers of blank books and envelopes?

Ans.—1. Paper stock dealers generally. 2. Seventy to eighty cents per 100 pounds. 3. No. 4. Scott & Co., No. 146 Fulton street, New York. 5. Mrs. J. M. Ritter, 532 Mulberry street, Baltimore, Md. 6. They have not. 7. No: they are jobbers.

OBITUARY.

JOSEPH CAREW.

The Springfield *Republican*, of May 17, announcing the death of Joseph Carew, says: "The death of this veteran paper maker of South Hadley Falls will be widely mourned. It removes a man successful after the old-fashioned model, a strong, pure and generous nature, whose life made the world better. There was little of incident in Mr. Carew's experience; he was faithful in business, manly in all social relations, made money and did good with it. He never sought or entered public life. Mr. Carew took a severe cold about two weeks since, which developed into catarrhal fever with typhoid complications, and the end came about two o'clock on Monday afternoon.

He was born in Springfield, Mass., on September 5, 1807; married Eliza, daughter of Josiah Bardwell, of South Hadley Falls, in 1833; and they had two sons, one of whom died in childhood, and the other, Frank, became an active business man, whose distressing death in 1877 gave his father a shock from which he had never completely rallied. After studying in Springfield and at Monson Academy, Mr. Carew became a clerk in Howard & Lathrop's store in that city in 1824; the next year this firm sent him to their store in Hadley Falls Canal, as the village was then called; and in the winter of 1829–30 sent him to Washington on important business, where he saw something of society, made the acquaintance of many distinguished men, and heard the celebrated debate between Webster and Hayne. His employers had a small paper mill at the Falls, and upon his return Mr. Carew was put in charge of it, and soon became the best paper maker of the region. This mill was burned, after which Mr. Carew associated himself with a Mr. Demond in general milling business, among other things grinding salt for table use, which they were first in the country to put up in small cotton sacks. In 1817, in company with Josiah Bardwell, his father-in-law, and a few others, he organized the Carew Manufacturing Company, to make fine writing papers.

In early manhood Mr. Carew joined the Congregational church, of which he was a deacon, and he has been a liberal supporter of good causes. Mr. and Mrs. Carew in 1864 built the present South Hadley Falls Congregational Church at a cost of over $24,000, and presented it completely furnished to the society. A scholarship which he founded at Amherst College was coupled with the condition that no one who used tobacco should receive its benefit. He was one of the founders and a director in the Third National Bank of Springfield, also of the City National Bank of Holyoke, and a trustee of the Holyoke Savings Bank. A gift to the Hartford Theological Seminary, of which he had long been a trustee, established the Carew lectureship. He aided the widow and the fatherless, and his best monument will be in the hearts of the many who have shared his benefactions. Mr. Carew took a personal interest in those whom he employed, and several operatives have spent periods of twenty and thirty years in his employ. He was remarkably approachable, and probably did not have an enemy. He was uncompromising in his opposition to wrong and immorality of every kind. He leaves three grandchildren, children of his deceased son Frank. His funeral took place on Wednesday.

THE TELEPHOTOGRAPH.

An apparatus has been devised by Shellford Bidwell which he calls the "telephotograph," and which, though still crude, makes an important step forward towards a solution of the problem of transmitting images by electricity. The instrument is described in the *Iron Age* as follows: The positive pole of a battery is connected, through a set of adjustable resistance coils, to a platinum stylus which rests its marking point on a plate of zinc, covered with a sheet of paper moistened with a solution of iodine of potassium. The circuit of the battery is completed through a galvanometer by a wire from the zinc plate to the negative pole of the battery. This is the receiving part of the apparatus. The transmitter consists of a second battery, the negative pole of which is connected to the platinum stylus through a sensitive selenium cell, the circuit being completed also through the zinc plate and the galvanometer. Now, if the selenium cell be exposed to a strong light, or, in other words, if a beam of light be focused on it, and the variable resistance be so adjusted that the opposing currents in the two battery circuits exactly neutralize each other, no current will flow from the stylus to the plate across the iodized paper, and hence no stain of liberated iodine will mark the paper if the stylus be drawn across it. But if the light be shaded off the selenium, the resistance of the latter will increase, and the current from the first battery will, therefore, predominate, so as to cause a flow of electricity down the stylus. When the stylus is drawn across the paper it leaves its trace as a brown mark of liberated iodine; and this trace is strong or faint, according as the current is strong or feeble—that is to say, in proportion as the light is less or more intense. The galvanometer serves to indicate when the balance of currents is exact; and the connecting wires which correspond to the telegraph line between the two stations, where the transmitter and receiver are placed, may of course be of any length. With an apparatus having substantially these elements, Mr. Bidwell, before the Physical Society, succeeded in transmitting simple designs.

The Postmaster General has awarded the contract for furnishing the Postoffice Department with postal cards during the four years beginning July 1, to Woolworth & Graham, New York, who were the lowest bidders at the recent opening of proposals, and who have given sufficient evidence of their ability to perform the work. According to the last annual report of the Postmaster General the cost of procuring postage stamps, stamped envelopes and postal cards for the year ending June 30, 1880, was $104,960, or 15 4-10 per cent. less than for the year ending June 30, 1877, notwithstanding that there was an increase of 28 9-10 per cent. on the total number of articles furnished. The first postal card contract was made in 1873, and under it the ordinary one cent cards were supplied for the first four years, or up to June 30, 1877, at the rate of $1.39⅞ per thousand cards. Under the second contract, which will end on the 30th of June proximo, they have been furnished at 69 56-100 cents per thousand; under the new contract the price will be 54 53-100 cents per thousand. The number of cards issued during the contract term from July 1, 1873, to June 30, 1877, was 550,619,500. Under the contract ending June 30, 1881, the number will be about 990,000,000. Under the new contract, which will expire June 30, 1885, the estimated number will be 2,000,000,000.

Fred. Boland, Philadelphia; C. P. Penfield, Saratoga, N. Y., and Mr. Day, of Day Brothers, Peoria, Ill., were in town during the week.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, May 18, 1881.

THE MONEY MARKET.—In the money market the greatest ease continues to prevail, the supply of capital seeking employment at low rates of interest being absolutely in excess of the demand. The government bond dealers found ready accommodation at 2@2½ per cent., while the wants of borrowers offering stocks as collateral were supplied at 3@3½ per cent. In the discount market prime mercantile paper sold at 4@4½ per cent., according to date of maturity. The stock speculation was active and buoyant, and a sharp advance in prices was recorded, the entire list, with scarcely a single exception, participating in the improvement. The government bond market was strong in tone during the week, and an active business was transacted in all the issues, prices at the close showing a material advance on the week's transactions, new 4s being 1¼ per cent. higher, 4½s and 6s 1½ per cent., and 5s 1¾ per cent. In railroad mortgages a brisk demand prevailed for all the leading issues, and a general advance in prices was recorded. Foreign exchange has again advanced on a light supply of bills and a good demand. The closing actual rates for prime bankers' sterling were $4.85@4.85¼ and $4.86¾@4.87; cables, $4.87¼ @4.87¾. Prime commercial bills were $4.83@4.83¼.

THE PAPER MARKET.—Very little, if any, improvement is to be noted in the movement of paper in the hands of dealers. Although the expectations as to the magnitude of the spring trade, based somewhat upon the prosperous condition of the country and the course of affairs during a large portion of the past two years, have been rather disappointing, business is apparently on a far safer foundation than it was last year or the year before, and there is no fear of any commercial or mercantile disasters, the prospects for a continuance of a satisfactory condition of the material interests of the country being very gratifying. In the line of book paper high grades of super-sized and super-calendered hold their own very well, and there is no apparent weakening in machine finished. News, although lower than a few months ago, shows a fair degree of steadiness at present. Manilla wrappings are held at a steady point, and no further giving way is noticed since the last drop of about ½c. Straw and binders' boards have undergone no recent changes in value.

THE STATIONERY MARKET.—Although the market generally remains quiet, there is here and there a little more animation, and in these exceptional cases a better tone is apparent. A comparison of the present with that of the corresponding time of last year shows that the volume of trade is quite as large now as it was then, although many of the reports heard around in the trade would lead to a different conclusion. There is no rush of business, but there is a fair movement for this advanced stage of the season, and there is every indication of the usual summer traffic. Some of the foreign fancy goods buyers are returning from Europe with new stocks, and each house will vie with the other as to which will show the largest variety of novelties. Preparations for the fall trade are still going on very actively, and there is every indication of a most prosperous season. We have no changes to note in prices.

BRADSTREET'S

A JOURNAL OF

Trade, Finance and Political Economy.

THIS JOURNAL covers a ground the extent of which is occupied by no other publication, and forms an invaluable work of reference to the merchant and manufacturer.

REGULAR AND TRUSTWORTHY CORRESPONDENCE, furnished by experts, expressly for this journal, from all the principal trade centres of this country, is embraced in its columns.

THE CONDITION AND PROSPECTS of the various markets are carefully recorded, and the possibilities and opportunities for trade are demonstrated as by no other medium extant.

QUESTIONS OF COMMERCIAL INTEREST and importance are fully and ably discussed editorially, without prejudice, by some of the most responsible writers and statisticians of the time.

THE BUSINESS CHANGES occurring in the United States and Canada—such as failures, dissolutions of partnerships, chattel mortgages, etc., etc.—are printed in each issue, and the list is more complete and comprehensive than can be obtained through any other source.

THE CIRCULATION OF THIS JOURNAL being among the best merchants, manufacturers, and banking institutions of not only this country but many foreign, it presents an excellent advertising opportunity to a limited number of first-class banks, corporations, and business firms.

No. 23 MAIDEN LANE, NEW YORK.

DISCOVERY OF PORCELAIN IN EUROPE.

Porcelain, which has been known to the Chinese and Japanese for ages, was not made in Europe until the beginning of the eighteenth century, when John Bottger, a German from Schlaiz, in Voightland, was the first who invented the art. This man was an apprentice to one Zorn, an apothecary at Berlin, where he met with an alchymist who, in return for some good offices done to him by Bottger, promised to teach him the art of making gold. To discover the grand secret he labored incessantly; and it so happened that, having once mixed various earths together in order to make strong crucibles, in course of baking them he accidentally discovered the art of making porcelain. Thus the intended transmutation took place, not in the metals, indeed, but in his own person; and as if he had been touched with a conjuror's wand, he was on a sudden transformed from an alchymist into a potter. The first porcelain thus manufactured at Dresden, in 1703, was of a brownish red color, being made of a brown clay.

VANADIUM INK.

Berzelius found that by treating an infusion of galls by a solution of vanadate of ammonia, in place of sulphate of iron, he could produce an ink of remarkably good quality. At the time of his discovery, in 1831, it was of no practical interest, because the vanadates were very costly. At the present time their cost has been so much reduced that his recipe can be employed for ordinary inks, which have the additional advantage of presenting great resistance to most reageuts and destructive materials. Gum arabic can be dispensed with, and the chance of molding or alteration thus reduced.—*Chron. Industr.*

R. G. Hutchinson's "strap file and binder" is now in great demand, and is said to be highly approved everywhere it is used. This file and binder consists simply of stiff covers in cloth, with a flexible back, and broad heavy leather straps across the back at the top and bottom of the inside, between which are stretched stout cords, for holding six or twelve months' numbers of a weekly periodical. It is adapted for the illustrated papers, and all other periodicals containing 16 to 40 pages in each issne. The following are among the advantages claimed for it: It is simple, strong and easily used; it preserves papers perfectly, as no holes are punched through them; it will always lie flat open, even when full, and is very desirable when an illustration extends over the two centre pages; it allows any paper on file to be taken off without disturbing the rest. This article is much used in the library of the Patent Office in Washington. Mr. Hutchinson controls the patent.

FOR SALE.

Good will, stock and fixtures of the extensive blank book store and manufactory, 32 South Fourth street, Philadelphia, late of John W. Gladding, deceased. Address GUARANTEE TRUST AND SAFE DEPOSIT CO., Philadelphia.

FOLEY'S

Celebrated Gold Pens and Pencils

THE FINEST AND BEST.

CIRCULAR.—To those engaged in mercantile pursuits, any invention that will facilitate their labor is highly worthy of notice, as well as of extensive patronage. One of the most important inventions of the present age is that of a pen that possesses the necessary qualities of firmness in mark and durability in use. Pre-eminently such are those of JOHN FOLEY, Manufacturer of Fine Gold Pens and Pencils, No. 2 Astor House. Their superior value is tested by the long time he has been engaged in our city in their manufacture. We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

JOHN FOLEY, Gold Pen Manufacturer,

No. 2 ASTOR HOUSE, BROADWAY, N. Y.

FINISHING.

Ebony finish is usually applied to cherry, or other light colored woods having little grain. The ebony appearance is produced by the use of a stain. White shellac is the varnish usually employed, but some prefer the best rubbing varnishes. Whatever varnish is selected, it should be as near as possible transparent, as otherwise the color of the work will appear to be greenish or brown. Not more than three coats should be applied, as successive coats of the most transparent varnish will cause an opaque or clouded appearance. Experience and care are required to successfully rub an ebonized article, as the varnish must be rubbed almost to the wood, and if rubbed too deep a portion of the stain is removed, leaving a spot. Especial care should be used in rubbing the angles.

Instead of staining the wood and applying successive coats of transparent rubbing-varnish, a black varnish (or more properly speaking, a lacker) is often laid upon the surface of the wood. This process possesses the advantage of being very speedy, not occupying more time than ordinary spirit varnishing, but on the other hand, the rapid hardening of the gum prevents the varnish from entering into and becoming fixed in the pores, so that it lies in a thin, hard, but very brittle coating upon the surface, and is very readily broken and scaled off, leaving spots of the original color of the wood, that cannot be properly repaired. Shellac varnish is generally used for this varnish and is prepared by adding to it drop black or perfectly pure lampblack, containing no grease or other foreign substance, sufficient to make it perfectly black. Apply one or more coats of this to the work, and finish by adding the necessary number of coats of brown shellac, and rubbing in the usual way. The finish is employed when it is desired to engrave or carve a design through ebonized work, thus making the natural color of the wood appear in contrast to the black.

French polishing is a method of varnishing by rubbing the varnish upon the surface of the wood instead of applying it with brushes. When varnish is applied simply with a brush, a comparatively uneven surface results, rendering necessary the subsequent process of rubbing and polishing; but by the method of French polishing, a smooth and continuous surface, hard and not easily scratched, is secured. All of the polishes are applied very much in the same way and a general description will therefore be sufficient. To obtain a good polish with lac varnish on wood, the quantity applied must be very small, and must be rubbed continuously until dry. If the work be porous or coarse grained, it will be necessary to give it a coat of thin, clear size previous to commencing with the polish; when dry, the surface must be smoothed with fine glass or sand paper. The size fills up the pores and saves the polish, and also saves considerable time in the operation.

Make a wad of cotton batting, covered with several folds of very fine, soft linen cloth; put the wad or cushion to the mouth of the bottle containing the preparation (or polish), and shake it sufficiently to dampen the cloth. Then proceed to lightly rub the work with circular motion; as the rubber becomes drier the pressure may be increased, but care should be taken not to press too heavily when the rubber contains much polish, as streakiness will result. The circular motion should be continued until the rubber becomes quite dry, when more polish may be taken upon it and the rubbing renewed. It should be borne in mind that the rubber should never be raised directly from the work, but should be raised with a sweeping motion; also, that it should never for a moment remain quiet upon the surface, and that its motion should be as even as possible. Neglect of these precautions will produce a rough surface wherever the rubber remains quiet or is improperly removed. The circular rubbing must be continued until the surface appears perfectly smooth and the pores are no longer visible. Be very particular to keep the cloth covering of the wad clean and soft; it is desirable to use a clean portion each time it is dipped in the polish. It is quite likely that in about twelve hours after the above operation the surface of the work will be lustreless and the grain plainly visible; in that case proceed over the work again until the grain is thoroughly filled. French polishing is a process requiring particular care and skill, and considerable experience is necessary to produce good results.

Shellac dissolved in alcohol is the basis of all French polishes, and some finishers use this shellac varnish without other admixtures, slightly moistening the rubber with linseed oil to prevent stickiness and make it work smoothly.

ZINCOGRAPHY.

M. Thonrocq, a Paris lithographer, has been very successful in substituting zinc for lithographic stones. By using 5,000 zinc matrices, worth 38,500 francs ($7,700), he has avoided an expenditure of 250,000 francs ($50,000) for stones; besides considerable saving in the cost of handling and manipulating. He has published in this way more than 350,000 copies for some of the leading French editors, the Polytechnic School, the Department of Bridges and Highways, the Ministry of Public Works and different municipalities. Each plate is good for 40,000 impressions, and the change seems desirable in all cases where large editions are to be worked off within a brief period.—*Bull. de la Soc. d'Encour.*

A very superior article of imitation ivory, now made in Paris, is said to be a mixture of one hundred pounds ivory dust, the same of pyroxyline, and fifty of camphor. The pyroxyline is ground wet, then pressed until only enough water remains in it to prevent ignition, and, after being combined with the ivory dust and camphor, is pressed between absorbing cushions until all the moisture is extracted, when fifty parts of nitrite of ethyl are added. The mixture thus formed is left for several hours in a closed vessel, until this nitrite is equally distributed throughout the mass. It is next subjected to heavy pressure in heated cylinders and rolled between hot rollers. The product thus obtained possesses a remarkable similarity in appearance and quality to natural ivory, is free from streaks and spots, and is not attacked by moisture.

RHODIAN FAIENCE.

The ancient faïence of the island of Rhodes in form and decoration so closely resembles that of Persia that an ordinary observer could hardly tell the one from the other. Yet learned writers on the ceramic arts have not always agreed upon its origin. Some writers have tried to show that the faïences richly decorated "de mauresque," in which turquoise blue, cobalt manganese, and a sombre olive green prevail, and the pieces entirely analogous in style, decorated with beautiful copper green and that pure and rich red borrowed from iron, are derived from different sources. Jacquemart hardly has patience to entertain this idea, though he does not pretend to say at what period and under what conditions Rhodes became possessed of ceramic manufactories strayed from those of Persia. There is a legend that a vessel bound for Venice, and having some Persian potters on board, was wrecked on the island of Rhodes, and that there a manufactory was founded. Jacquemart does not seem to have heard of this, for he only mentions the legend that during the Crusades, the knights of Rhodes captured a vessel laden with Persian pottery and artizans, and compelled the latter to establish a factory on the island. At the Musée de Cluny there are many pieces produced in these suddenly formed workshops. Jacquemart says: "One recognizes in them perfectly the work of men who have left their country, of exiles detained far from their homes; certain pieces manifest the impatience felt by the captives to reconquer their liberty. Upon one the workman has painted himself in the attitude of prayer, his arms extended toward heaven, supplicating his Divine Master to break his chains. In these conditions the wares made at Rhodes would suffice to determine the nature of Persian faïence, even when we have not under our eyes the original pieces. How, indeed, could we suppose that prisoners, enemies retained in spite of themselves, in a strange land, would have made there any other thing than that which they had long produced every day? How admit that upon an unknown soil, without resources, they could have been able to invent new processes, create a style, imagine the employment of decorating matters different from those they had in constant use? No; the Rhodian pottery is merely Persian faience of an inferior order."—*Art Amateur.*

An excellent furniture polish is made of ten cents worth of beeswax, placed in a tin cup and melted in a hot oven. Into this pour two ounces of turpentine, and let it stand to cool. Apply it briskly to the furniture with a woolen rag, and give it a finishing rub with an old silk handkerchief. The polish is almost equal to a coat of varnish.

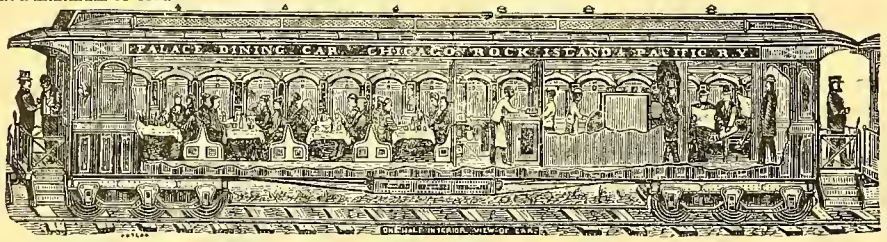
"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.



That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

INCUNABULA.

This word, which signifies in Latin (as used by Plautus) that which is in the cradle, and by Cicero the cradle itself, consequently is figurative for the birthplace, or the origin, or beginning of a thing. Accordingly, the writers on typography have employed it to express the books printed immediately after the invention of printing, and they generally restrict the books published in the infancy of the art to those published before the year 1500.

The books considered under this head have been subdivided for convenience into eight classes, though the classifications are essentially arbitrary, and have been adopted for certain reasons of convenience, notwithstanding the impossibility of exactitude arising from the fact that the same volume may belong at the same time to several of the classes, as will be at once seen when we proceed to specify them.

Class I.—In this class are included many of the block books which have been claimed to be produced from movable types. Among these are the books presumed to be printed by Koster, and also several fragments ascribed to the early efforts of Gutenberg. In this class are also included the earliest ascertained examples of typography, such as the Letters of Indulgence issued by Pope Nicholas V., in 1454; the Almanac of 1457; the Psalter of Faust and Schoeffer, bearing the date of 1457, with certain works ascribed to Albert Pfister of Bamberg and Mentelin of Strasburg, upon which have been based their claims as inventors of movable types.

Class II.—The first impressions of books in particular cities or towns, such as Subiaco, Rome, Elfeld, Cologne and others, are placed in this class. These impressions frequently embrace books as rare and valuable as those included in the first class.

Class III.—This third class embraces books in certain languages or type, such as the first books in Roman or Italic letter. Among these are enumerated the Cicero and Lactantius of 1465, as containing the first Greek words cut in wood; the Greek grammar of Lascaris, printed in Milan in 1476, as the first work printed entirely in that language; and the Hebrew work published at Soncino in 1484, as being the first of its kind.

Class IV.—Editions from such presses as are famous for the rarity of their productions are contained in this division, such as the Mentel editions of the old Roman classics.

Class V.—Books marking the stages of typographical improvement are included in the fifth class, such as the book published at Cologne in 1470, containing the first instance of numbered pages, and the work printed in the same city in 1472, containing signatures; the Cicero of 1465, claimed as the first quarto; Jenson's "Offices of the Virgin," claimed as the first 32mo.; and the book published in 1485, claimed as having the first title page.

Class VI.—This subdivision was made to include the first instances of the application of the fine arts to typography, such as the work containing copper plates, published in Florence in 1477, and books marking the introduction of special improvements in the art of book illustration.

Class VII.—This class contains single copies, celebrated as being on vellum, or in letters of gold, or such like.

Class VIII.—The eighth and last class contains complete series of works of special kinds, such as the six Greek works printed in capitals by Alopa from 1494 to 1496, and the books printed

in the peculiar round Greek type used in Milan from 1476 to 1499.

The standard authorities upon this interesting but perplexed question of the Incunabula are considered to be Panzer, who is very complete and minute upon German printing down to 1534; Mattaire, who ranks high as an authority; Santandar, who supplements Panzer by adding an account of printing in Spain and the Low Countries; and Audiffredi, the acknowledged authority upon Roman and Italian topography. In England the works of the famous bibliomaniac, Dr. Thomas Frognall Dibdin, upon the Incunabula of the Spencer collection has been very celebrated.

The printers who furnished the works known as the Incunabula were about 200 in number, including three Englishmen: William Caxton, of Westminster, 1474; Theodoric Rood, of Oxford, 1478; and an unknown printer of St. Alban's, 1480.—*Paper and Print.*

TRANSFERRING PRINTS TO GLASS—Is one of those arts that requires patience and practice. Much depends upon the skill of the transferrer in repainting and mending up a print if it is at all broken in removing, and, of course, transparent colors must be used in the painting. These are scarlet, lake, Prussian blue, gamboge, burnt umber and sienna, lampblack; it is best to have them in powder, and mix them together with equal quantities of Canadæ balsam and turpentine, and each put, as ready, into a bottle. It soon dries; therefore only a little is taken out at once; dilute, and work with turpentine, not water. The best varnish to use is shellac. It must be used warm, not hot; the glass, too, should be warm. The best is when the varnish is well heated—that is, it must be a little above summer heat—to keep it in the fender before the fire; have your work there, too, for a few minutes, and finish it there, using a large brush. If the varnish is too cold it will be streaky, thick, and white; if too hot—a very usual thing—it will rise in bubbles; it should look like glass. Prints are transferred to wood in the same manner, with the one difference that wood requires a coat of varnish first, and the prints should have a coat of spirits of wine on the print and lay it at once on the varnish before it sets. The French use what is called "Mordant" for their transfer.

IMITATION INLAYING.—Suppose an oak panel with a design inlaid with walnut is wanted. Grain the panel wholly in oil. This is not a bad ground for walnut. When the oak is dry, grain the whole of the panel in distemper. Have a paper with the design drawn thereon, the back of which has been rubbed with whiting, place it on the panel, and with a painted stick trace the design. Then with a brush and quick varnish trace the whole of the design. When the varnish is dry, with a sponge and water remove the distemper where the varnish has not touched. This, if well executed, presents a most beautiful imitation of inlaid wood. Marbles are executed in a similar manner.

To coat copper or brass objects with silver, without difficulty or loss of time, the following process is given in the *Gewerb.-Bl. f. Ost u. West Preussen:* Mix 3 parts of chloride of silver with 20 parts of powdered cream of tartar and 15 parts of powdered salt. Moisten a suitable quantity of the mixture with water, and rub it with a piece of blotting paper upon the metallic object, which must be thoroughly clean. The latter is afterward rubbed with a piece of cotton upon which precipitated chalk is dusted, then wash with water, and polish with a dry cloth.

THE PAPER TRADE IN THE CITY OF NEW YORK.

[Continued.]

The history of Eugene Ely has already been given in these columns, and reference has also been made to John C. Ely, his brother, who was at one time in copartnership and afterwards for a number of years in the paper business on his own account. John C. Ely separated from Eugene Ely, and started business for himself some time before 1850. He became embarrassed in 1857 or 1858, but was able to resume, and during the war, in common with others, profited by increased sales and enhanced prices. One day early in 1868 a young man entered his store, then situated in Platt street, and transacted some business with him. He had never seen the young man before, but was very favorably impressed with his business tact, and expressed a wish to know him better. This young man was Charles B. Hewitt, now the head of the well known house of C. B. Hewitt & Brother, 48 Beekman street. Acquaintance ripened into interest, and in a few months Mr. Ely proposed to young Hewitt to form a copartnership. The offer was after due consideration accepted, and the firm of Ely & Hewitt was formed on July 1, 1868. The firm dealt, as Mr. Ely had done before, particularly in binders' boards and paper stock and to a small extent in glue, which, as every paper man knows, is used by the manufacturers in the sizing process, to some extent by paper stainers, and very largely in the making of paper boxes.

At the time that the firm of Ely & Hewitt was formed the paper trade was undergoing an important transition. The era of small sales and large profits was giving place to the era of large sales and small profits. Mr. Ely clung to the former while Mr. Hewitt looked with more favor on the latter. The two views were incompatible, and the younger partner proposed to buy out the interest of the older. The offer was accepted, and in 1869, about one year the firm came into existence, John C. Ely retired and C. B. Hewitt began business on his own account and under his own name. And soon events justified his view of the matter. He continued to deal in the same articles, but enlarged the scale of his transactions, and from time to time added new items to his stock in trade. In this manner he came to deal in wrapping, book and news papers. Previous to entering the paper business he had been for ten years a clerk for the venerable Peter Cooper in the glue business, and his experience so obtained now enabled him greatly to enlarge the glue department of his new business. His house now keeps of the general line of "boards" one of the largest assortments in the United States, including binders', straw, press and album boards. In regard to album boards, it may be remarked that there are many caprices and fancies on the part of consumers which manufacturers and dealers are called on to satisfy. Of boards in general, the firm sells the entire production of two mills.

In 1870 the firm of C. B. Hewitt & Brother was formed by the entrance of C. B. Hewitt's elder brother, Edward G. Hewitt, who had been in the iron business with Cooper, Hewitt & Co., the Trenton Iron Works, and lastly secretary of the Southwestern Iron Company. He took charge of the finances of the firm. In 1880 the youngest of the three brothers, George F. Hewitt, who had been for a long time in the employ of the firm, was admitted to copartnership, and assigned to the charge of the glue department.

C. B. Hewitt was born in this city, in 1844. He is a son of the late Francis Hewitt, and a

nephew of Congressman Abram S. Hewitt. As a business man he is active and wide-awake, and his ideas are thoroughly progressive. Being well informed on all matters pertaining to the trade, he is a good man to talk with. As to the changes which have taken place in the trade since he entered it, he said a few days ago: "The most conspicuous is that goods are handled in larger quantities and on smaller margins; and the great fact underlying this is that the people are buying their goods cheaper every year. At the same time the quality of the goods they get is being all the time improved. The tendency of the times is such that manufacturers, while doing business on the smallest possible margins, are constantly raising the standard of their productions. Low as prices were last year, when the boom began, everybody expected and was prepared for even lower prices, and large consumers had placed their orders in the smallest quantities they could possibly get along with. Consequently when the upward movement set in it was a surprise to every one, and a rush of orders and a strong speculative tendency followed. Goods were turned out faster than was consistent with keeping up the standard of quality. New mills sprang up rapidly, and soon a reaction set in. Now prices have returned very nearly to the previous level, and hardly anybody, except a few speculators who managed to unload in time, has been benefited."

[To be Continued.]

CUTTING AND POLISHING GLASS.

Besides the oxide of zinc (commonly called ashes of zinc) oxide of iron (English red, caput mortuum, colothar) is usually used for cutting and polishing glass. In glasses intended for optical purposes, the very finest polish can, of course, be only obtained by exceedingly fine-grained oxide of iron. But, since such an article cannot always be obtained, and even oxide of iron prepared after Vogel's receipt from oxidulated protoxide of iron does not always answer the purpose, the glasses polished with it sometimes looking dim and brown-yellow, because the finest particles of the preparation enter the pores of the glass, Professor Dr. J. J. Pohl made experiments with oxide of zinc. The results answered, as Dingler's polytechnical journal states, perfectly the expectations entertained.

The sorts used were: 1. The finest white zinc. 2. Fine Hamburg white zinc, and gray zinc, such as the factory of Peteswald in Silesia puts into the market. Of these the gray zinc was found particularly well adapted to cut glass, while the Hamburg white answered for common polishing. The finest white zinc finally was found to be excellent for the so called "high polish" of optical glasses.

White zinc does not merely polish quickly, but with the finest sort we obtain the very highest white brilliancy. For polishing the very expensive optical glasses Professor Pohl considers the white zinc known in France under the name of *blanc de neige* (*i. e.* snow white) best adapted.—*German Glass Magazine.*

The detective camera is a new photographic feat. It enables photographs to be taken in the street, or anywhere else, without the person or persons photographed being aware of the fact, and is calculated to inspire a lively terror among that class of celebrities who object to having their portraits taken. Externally it is made to look like a book or small box. Several excellent street scenes have been secured by this device.

The loss of taste for what is right, is loss of all right taste.

M H BLOTTER TABLET PATENTED

PADS OF PAPER WITH BLOTTER ATTACHED.

ELEGANCE. ECONOMY. CONVENIENCE. CLEANLINESS.

THE paper is tableted, so that each sheet may be freely removed, leaving a perfectly clean, smooth edge. No paper is wasted. The sheet on which you write is always clean, being protected by the blotter. The blotter, of the full size of the paper, is so attached at the top of the pad that both sides of it may be used, and will last out the entire contents of the pad, being always at hand, and perfectly clean.

The blotter is kept clean, and also from wearing, by the card board cover, which is made of a highly polished stock, perfectly smooth, and that will not catch dust or dirt from the desk. The cover is richly ornamented on every pad, giving the whole a neat and elegant appearance. All kinds of paper and printed blanks are put up in this form at prices as low as if loose; making the most complete line of staple and elegant stationery ever offered to the trade.

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST and ONLY AWARD** given for

LINEN RECORD and LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition*, *Massachusetts Charitable Mechanics' Association*, *Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission*, *Medal of Progress American Institute*, *1877*, *and Medal of Improvement and Progress*, *Boston*, *1878*. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

☞ **Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.**
Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 74 Duane Street, New York.

Correspondence.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BOSTON, Mass., May 24, 1881.

Business among the stationers has been "fair to good," as one dealer expressed the situation; but a quiet spell is now looked for until the fall trade sets in. The abundance of money has been felt by the stationers during the past four or five months, and no doubt they have secured their share of the great surplus. The quiet season finds the dealers in a strong financial position, with still ample stocks of goods that are good to hold.

A run among the dealers has afforded no new features worthy of special note. Everything seems to be moving in the quiet tenor of its way. That is to say, there is just about enough trade to keep the proprietor and employees out of mischief, if stationers are ever disposed to do anything mischievous.

A new candidate for public favor, the *Manufacturers' Gazette*, is announced to appear about July 1. It will be published by Edward James, the publisher of the *Sunday Budget* and the *American Cultivator*.

The daily *Star*, a one cent paper started about six months ago, has changed hands.

The daily *Advertiser* is putting in a new Hoe perfecting press, and expects to appear as an eight-page paper in the course of four weeks.

I hear that a $200,000 paper mill is contemplated at Augusta, Me., several Boston gentlemen furnishing a part of the capital.

Taking advantage of the lull in business, several stationers have gone a-fishing down in Maine among the trout lakes.

Bufford's Sons report a large sale of their freshest, newest series of advertising cards. There seems to be no end to the novelty genius of this enterprising house.

Fairbanks & Co., Washington street, opposite School, keep one of the finest lines of counting house stationery to be found in the city. Their show window is a model of artistic neatness.

There is an absence of novelties in the stationery market just now, but the calls of traveling gentlemen of the trade from New York will soon supply that deficiency. It is a cold day when New Yorkers remain away from the "Hub" any length of time. But Boston is a good market for anything new in the stationery line.

The card mania has about run its course.

"Have you bought the revised New Testament?" has been the leading question of the hour. Booksellers are wondering what will become of their stocks of the King James revision. Elegantly bound Bibles of that revision will continue to sell as usual.

The leading publishers have only a few books in press; less than usual. L.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, Ill., May 21, 1881.

Our city is favored this season with cool and pleasant nights. One can enjoy his rest, and rise in the morning refreshed for the business which, despite the lateness of the season, still lingers.

A pleasant little event enjoyed by your correspondent from the beautiful arched window of 8 Lakeside Building, occurred at the new Post Office building on Thursday. The occasion was the unveiling of a bronze bust, erected by the clerks of the Post Office department of Chicago, to the memory of George Buchanan Armstrong, founder of the railway mail system in the United States. The event gave rise to a large and enthusiastic gathering, some stirring national music, and a couple of patriotic "Chicagoesque" speeches, Mr. Armstrong having been for a number of years a resident of this city, where he died in 1871.

E. W. Blackhall of Toronto, inventor of the now favorite power lifting perforator and the duplicating attachment for ruling machines, is now in the city with other novelties for the manufacturing stationery trade. His new devices comprise a striker, a drop box, a pen lifter, a guide piece, etc. Most of the leading houses are either using or about to adopt these inventions. Among others I may mention Brown, Pettibone & Kelly, Culver, Page, Hoyne & Co., J. M. W. Jones Stationery and Printing Company, Cameron, Amberg & Co., and J. S. McDonald.

E. W. Farnham, 6 American Express Building, is introducing a boon for the writing public. His invention, which he entitles "Armaline," is said to be a sure, speedy and permauent cure for "scrivener's palsy" or writer's cramp and kindred nervous affections. Mr. Farnham, himself an old medical student, claims that he has discovered a perfect specific for this class of diseases; and the certificates he publishes in his descriptive circular certainly go far towards establishing the validity of his claims. In any case, writers, musicians, and artists suffering from any form of this annoying malady, will do well to correspond with him.

I have received a visit from W. H. Watson, of Aurora, Ill., who, in conjunction with several prominent booksellers and stationers of this city, requests me to urge the trade so fully reached by THE STATIONER, to attend the convention of booksellers, stationers, and kindred trades, to be held in this city on June 8. The object of this convention is to consider the general condition of the trade and adopt such organization and take such action as may seem advisable for the interest of all concerned.

Though the names of Jansen, McClurg & Co. and the Western News Company do not appear attached to the call, I can state that both houses express themselves in full sympathy and accord with the movement, as are all the trade in this city.

Knowing, therefore, the necessity which exists for such a convention, I would urge all the Eastern trade interested in the subject, to give it their immediate attention, so as to secure a full representation, by which means only the proper course of action can be agreed upon and its ends assured. It is, moreover, desirable that friendly relations should be established between the houses of New York, Philadelphia, Boston and Baltimore, and those of the West—an object which can be fulfilled only by such a convention. Many prominent individuals of the East—among others Wm. Lee, of Lee & Shepherd—have signified their intention to be present; and all who have not already decided to come will do well to answer at once in the affirmative. They are sure of cordial treatment in this city, and a banquet is rumored as one of the probabilities. Then let the convention be a full one, to decide once for all whether the trade shall be in reality henceforward "booksellers or book sufferers."

The McCoun pamphlet case is a useful novelty, offered by Adams & Kimball, 38 Madison street. It is very convenient, as any pamphlet desired can be removed in an instant without removing the case from the shelf or disturbing the other contents. It is solidly made and perfectly dust proof. Though new, it has already a large sale.

Brown, Pettibone & Kelly are putting in a great deal of machinery to meet their increasing trade.

E. Lovejoy is still selling his charming photos "Good Night" and "Good Morning" at the wholesale rate, *i. e.*, twenty cents each. He has just added the little darkies, "I'se Sleepy" and "I'se Awake"—same price. G. B. H.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, O., May 23, 1881.

Dull, but not discouraging—dull only by comparison with phenomenal briskness and with unjustifiably exalted expectations—that is the tone

of the stationery trade here among the manufacturers. Dealers in the raw material in papers report very brisk business. Manufacturers are not complaining, nor are they suffering loss; on the contrary, their sales are steady and collections are reasonably good. But they miss those tidal swells which exalt the spirits and evoke enthusiasm while they last. In certain lines of manufacture the producers have orders weeks, and some of them even months, ahead—that is, orders, the filling of which will require months' high pressure work. An expert in financial matters said to me only two days ago, that business never was so sound in this country; never so healthy as now; production and consumption never so great; that all of the railroads were working at full capacity, and yet many of them had more orders for carrying than they could answer promptly; that all this meant life to business; that any lull in any line of trade was only an apparent dullness, destined soon to give place to an activity intense in proportion to the present apparent sluggishness. This is comforting, and it is certainly a true diagnosis of the situation. The complaint of this relative dullness is not confined to stationers. Retailers of special articles of goods—season lines in particular—meet slight disappointment as to the briskness of their business. A St. Louis capitalist who was here a day or two ago took a gloomy view of the situation. He said prices of material and labor are increasing, while the prices of the product were, if anything, decreasing, and that very, very soon this abnormal state of affairs would lock the wheels of business and bring it to a standstill. Leading dealers in material here say that payments are prompt and there is no sign of an increasing disposition to ask longer credits or extensions; that cash seems to be plenty, and their customers appear to regard the outlook as assuring a certainty of a good, healthy trade.

Now I shall drop this branch of the subject and tell you what the manufacturers in the Cincinnati region did in 1880 up to January 1, 1881. I take it from manuscript from the forthcoming report of the Cincinnati Board of Trade and Transportation.

In the paper business, including the raw material and its products, which I shall enumerate a little further on, the product during 1880 was $4,500,000, against $900,000 in 1870 and $205,000 in 1860.

The following tabular statement will show the details of the paper business for 1880:

Branch of Manufacture.	*Number of Establishments.*	*Hands Employed.*	*Capital Used.*	*Cash Value of Product.*
Paper	33	1,214	$3,250,000	$3,000,000
Boxes	11	141	90,000	114,000
Bags and sacks	6	153	273,000	749,000
Collars	5	35	16,000	21,000
Paper hanging	30	200	361,000	536,000
Totals	85	1,743	$3,390,000	$4,420,000

"Paper hanging," in the above exhibit, means simply putting the paper on the wall. No wall paper is made here. There has been no envelope factory in Cincinnati since Payne & Co. burned out on Home street. The manufacture of paper deserves further analysis, wherefore I give it as follows:

Kind.	*No. of Lbs.*	*Kind.*	*No. of Lbs.*
Book paper	10,618,232	Roofing	10,223,738
Manilla	11,235,507	Wrapping	8,648,033
News	6,615,218	Writing	1,140,000
Total, pounds			48,480,728

What is notable in this exhibit is the growth of this branch of manufacture in the last twenty years. The trade of these manufacturers extends all over the West and South, and in some branches it extends to the East. Staple papers, as will be seen, are the kinds exclusively made, but manufacturers believe there is room here for the manufacture of finer papers. Within a short distance around Cincinnati almost every variety of water can be found. The geological formations passing from West to East, beginning with the Indiana line, make rapid transitions from the lower silurian through the upper silurian, the old red sandstone into the coal measures. These strata extend in belts running north and south.

In 1880 there were eighty-five job printing establishments, turning out a product valued at $670,000, employing seven hundred and fifty hands, and using over half a million cash capital. Book and newspaper printing turned out a product of $3,750,000 from ninety-six establishments, employing three thousand hands; bookbinding and blank books employed four hundred and seventy-one hands, and yielded a product of $342,000; lithographing, nine establishments, employed three hundred hands and yielded a product of $577,000.

Prince William.

BINDINGS FOR A PUBLIC LIBRARY.

The most serviceable materials for bindings in a public library are calf parchment, goat morocco, levant, and linen buckram. The time is not perhaps far distant when a buckram will be made that will take the lead of all for durability and rough service.

Parchment has outlasted all the others, and survived even the glues or cements worked with it. One reason why it is not more used may be the difficulty in working it, owing to its elasticity when damp; but it can be used without trouble or danger of cracking, if properly lined, and by substituting a grooved or open for a tight joint, and in this way we can still have the volume flexible and solid.

Morocco and levant, only when of the best quality and manufacture, are fit for public library work. There is a difference in their durability on account of color. Olives and the lighter shades of brown are best; then come cochineal, red, light blue and green, medium, and dark green or black. This last color is most used, because it generally costs less; but it often happens that the skin has been first dyed another color, with poor success, before it is finally run into a dark green, and it can receive no benefit, but rather some harm, from the successive processes.

Buckram can be used to advantage where there are no raised bands, and for rough usage it surpasses all materials. The only trouble found in its use is in the prejudice that "there is nothing like leather." There may be difficulty in getting it to stitch; but this fault can be overcome by removing the glossy size from the calendered surface with sponge and water. It takes a finish in gold as well as morocco does. That there is a difference in strength and durability, on account of color, there is no room for doubt—flax-color, brown and red are best; green and blue poorest. If a buckram could be had with as little size as possible, and with the surface not at all, or but slightly, calendered, it would be every way preferable to leather and cost much less.

Every volume larger than a 16mo should be sewed upon not less than three bands, each made of at least a four-fly soft flax twine. Each fold of more than two leaves should be sewed "all along" the edge of the fold, regulating the size of the thread used, so that a proper swelling may be had to form the round in the back. The failure to be thus thorough in the sewing is a most common fault in ordinary binding, and one fatal to its durability and strength.

Each band (without thinning by scraping) should be laced into the boards, first cutting a groove for each band from the edge of the board to the first lacing-hole, thereby retaining for the bands their full strength, and preventing their showing through the leather or being cut off in "knocking down," or the pounding process.

Every volume should have, according to its thickness, one or more linings of strong "super" or gauze, put directly upon the paper. Tight, flexible backs, where the volume is of good paper, if properly made, are most durable and satisfactory; but for ordinary American publications an open back will last longer.

Good morocco should have a uniform firmness of grain, not soft and spongy or too harsh to the touch, with the feeling of being burnt. The boards should be square, with a solid feeling, and not light for their thickness. On the inside of the cover, the bands that have been laced in can generally be counted, and they should be more than two in number. Some judgment of the sewing can be formed from the firmness of the leaves and from the round of the back. The back of the folds should not show a wrinkle. There should be no cracking, even when the volume is opened for the first time. Such cracking often denotes too thick or chilled glue. The covers should shut heavily of their own weight. The book should stand firm and be well closed, whether placed on foot, head or front. Parchment corners are better than leather, because they are stiffer and stand a fall better, and they do not rub when the book is placed on or removed from the shelf.

Some imitations of morocco are so finely wrought that when they are well worked upon the volume, a thorough knowledge of leather is necessary to detect them. Such imitations are preferable to real morocco when the genuine article has been "burnt" in the coloring process.

It is false economy not to guard thick or double plates with a strong cloth, and not to mount most folding maps and plans upon at least a thin cambric. It takes but a little time when the volume is first being bound.—*The Library Journal.*

To Make Modeling Clay.—Knead dry clay with glycerine instead of water, and a mass is obtained which continues moist and plastic for a length of time. This removes one of the greatest inconveniences that is experienced by the modeler.

It is said that porcelain types have now become a reality in France. They resemble those made from metal, the only difference being in the foot, and that only in the large letters used for posters. This is accounted for by the kaolin being used in a very plastic state, and then placed in an oven heated to nearly 1,200°. This baking is said to render the type nearly unbreakable; a fall from the "stone," which would ordinarily damage metal, has no effect on porcelain type. Two large Parisian houses have used these types for broadside work, and have expressed themselves thoroughly satisfied. Porcelain type is alleged to be from thirty to forty per cent. cheaper than metal, of about the same price as wood type, but possessing the advantage of superior durability. It is also urged in its favor that a certain amount of violence must be employed to damage it, and in color printing it takes the ink easier than wood or metal.

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD BERKSHIRE MILLS

LINEN LEDGER PAPER

Will stand the severest test of COLOR, CLIMATE, INK OR WEAR.

Being **Triple Sized** (a process entirely our own) and **Loft Dried**, can be erased and written upon the fifth time distinctly. None genuine without the water-mark and date, thus—**Old Berkshire Mills Linen Ledger, 1881.**

L. PRANG & CO.'S

BIRTHDAY CARDS.

We take pleasure in herewith presenting to the Trade our Price List of Birthday Cards, which has been greatly enlarged by a number of very elegant and novel sets:

ASSORTMENT.—They are made up in sets of one dozen, except No. 7, and are put up in a box or envelope. Each set contains all the designs of the series, and as no series, except Nos. 3 and 14, has more than eight designs, some of the designs are more or less repeated in the set.

ENVELOPES.—Fine Cream-Tinted Envelopes are furnished with the more elegant series, without extra charge.

SILK FRINGES.—Encouraged by the very great success with our Silk-Fringed Easter Cards, we have made up a number of our Birthday Cards with the best quality heavy silk fringe, made expressly for us. All fringed cards are furnished with Protectors and Envelopes, and are put up with assorted colors of fringes.

LIST OF PRANG'S BIRTHDAY CARDS.

No. of Series.	No. of Designs.	DESCRIPTION.	HOW PUT UP.	Retail Price per Set.

39 DF	4	Same Designs, with silk fringe and tassels	12 Cards, with Protectors and Envelopes	7.20

USUAL DISCOUNTS TO THE TRADE.

TO THE TRADE.—We have to ask the generous indulgence of our friends in the Trade, for what may have seemed a want of proper consideration for their interests on our part during the past Easter season. The sales of our Easter Cards have largely exceeded our anticipations, and those sales following so closely upon the large sales of our Valentine Cards, made a demand upon us greater than our facilities for production enabled us to supply. Under these circumstances we have been unable, in many cases, to fill orders as fully and as promptly as we have desired, and our not being able to do so has been a cause of as great regret to ourselves as it has been to our customers. We are now enlarging our building and making extensive additions to our machinery, not only for the purpose of increasing our facilities for production, but also for the purpose of improving the character and excellence of our work, and we trust, with our increased facilities, to be able in the future to meet all demands for our publications with the utmost promptness.

Our samples for Christmas season are in a forward condition, and we have the pleasure of announcing that we intend to start our travelers with them in the later part of May, and we shall endeavor to have these samples submitted to our customers throughout the United States and Canada as early in the season as possible. We trust to be favored with the same consideration, on the part of the Trade, in the placing of advanced orders, which has been extended to us in the past.

Is the only known Ink that is

Positively Non-Corrosive to Steel Pens.

Flows freely; does not thicken by exposure, and has the decided advantage of writing **BLACK AT FIRST.**

— WARRANTED —

To Write Black Instantly.

To Flow Freely.

Not to Fade.

Not to Mould.

Not to Thicken.

Not to Corrode Steel Pens.

☞ A Copy of the above is printed on all labels for **Caw's Black Writing Fluid,** for the purpose of attracting attention to each especial feature claimed. This is done to facilitate its introduction, and that the consumer, when using, may notice its merits, and thereafter use it in preference to the unsatisfactory thick, black inks, or pale, green writing fluids of the past.

NEW STYLE OF STANDS.

Packed 3 dozen in Case.

The above is the exact size of No. 1 Stand. No. 2 being twice this size.

FOUNTAIN INKS.

These Inks are expressly prepared for use in Fountain Pens. Put up in two sizes of bottles. No. 1 containing the same as cones or other styles of bottles generally sold as 3 oz., the Stopper arrangement being very convenient for both Fountain and other pens. No. 2 is twice the size of No. 1, and has a new device for filling Pens that keeps the Bottle always corked and free from dust, even while open ready for use.

The J. W. Stoakes Automatic Shading

PEN.

FOR PLAIN, FANCY AND ORNAMENTAL

LETTERING.

WASHINGTON, D. C., March, 1880.

I desire to say that the "Shading Pen" invented by Mr. STOAKES meets a want long felt by penmen. The work done by it is perfect in line and shade. The rapidity with which lettering is done, aside from the beauty of the work, is enough to recommend it for general use.

H. A. WHITNEY, Ass't Cashier, U. S. Treasury.

U. S. ENGINEER'S OFFICE, ST. LOUIS, MO., February 11, 1880.

I have tried the PEN, and it gives great satisfaction. It is worth twice the price asked. It is valuable for headings, etc. JNO. R. BALLINGER.

CHICAGO, April 21, 1880.

Indispensable for the execution of neat, attractive lettering, etc. RAND, MCNALLY & CO.

NEW GOODS! Manufactured and Just Offered to the Trade by **NEW GOODS!**

ACME STATIONERY AND PAPER COMPANY,

117 Fulton and 52 Ann Sts., New York.

LAWYERS' BRIEF BOOKS.—(Copyrighted December, 1880.)

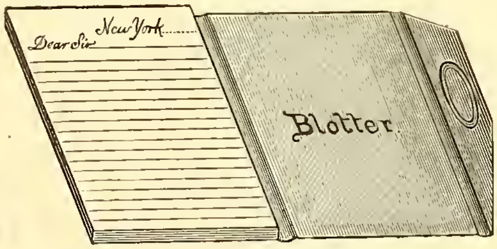
Made of our best Manilla writing paper in four sizes, bound in heavy paper covers, with an index printed on one side, and a filing blank on the other, so as to fold like a Lawyer's Brief. These have been highly approved by many prominent lawyers as meeting a want long felt by the profession, and will find a ready sale when brought to their attention. Size, 8x10 inches, oblong, 24, 40, 60 and 100 pages.

FORTFOLIO TABLETS.—(Patent Applied for.)

THE attention of the trade is particularly called to this **new line of Fine White Writing Papers** in Tablets, handsomely bound in PORTFOLIO STYLE, with a sheet of best blotting Paper attached.

Decidedly the BEST, MOST CONVENIENT and HANDSOMEST package of Writing Paper in the Market.

CLOSED.



OPEN FOR USE.

THIS Portfolio Tablet has been highly approved by every one in the trade who has seen it, as an article that will sell at sight, and that will be needed in the stock of every stationer.

SIZES AND STYLES.

Billet, Octavo, Commercial, Packet Note, Bath and Congress Letter.

WHITE DESK OR SCRATCH PADS. (Unruled.)

No. 101, 2¼x4 inches; No. 102, 3x4¾ inehes; No. 103, 3⅝x6 inches; No. 104, 4x6¾ inches; No. 105, 4½x7¼ inches; No. 106, 5x8 inches; No. 107, 6x8½ inches; No. 108, 8x10 inches; No. 109, 8x12½ inches.

PARCHMENT COPYING BOOKS AND COPYING PAPER,

POSSESSING THE FOLLOWING ADVANTAGES OVER ALL OTHERS:

The paper is a Rich Lemon Color. Is stronger than any other. It is thick, and can be readily handled while damp. Can be written upon with pen and ink. Makes a perfect and instant copy. The paper being pure, and free from injurious chemicals, insures a permanence to all copies.

Regular Sizes of Books and Paper always on hand.

—ALSO, MANUFACTURERRS OF THE—

Celebrated Neutral Tint Papers,

For PROFESSIONAL and EDUCATIONAL Purposes.

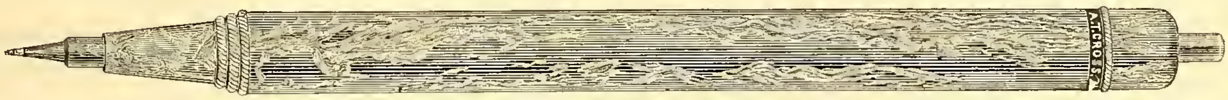
PERFECTED STYLOGRAFIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS,** the last, June 29, 1880, being the most important and giving the name **Perfected.** All cuts are exact size.



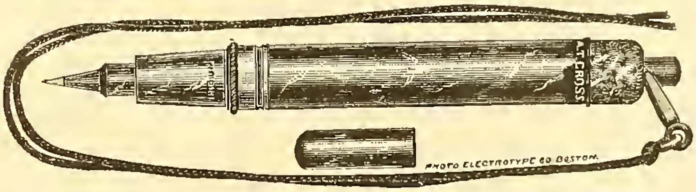
MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambler's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra long. Holds most ink, except the **Maximum.**

SHORT.—Most widely known and sold heretofore; but Maximum and Long are much better for desk or Hambler's Pocket. So this will be largely superseded.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined.

☞See Descriptive Circulars.



GIANT, with Cord and Gold Ring, same price as Short.

Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, all of which will have the new improvements.

☞See Descriptive Circulars.

TO THE TRADE.

HAVING bought of General James T. Hatfield his Eureka Knitting Mills, entirely complete, with steam power, I am prepared to take and fill orders for School Bags in large quantities. This mill is one of the best in this country, and produces weekly very fine woven net for eight gross school bags, and also five hundred pounds of other different kinds of netting. I am now able to offer an allowance of ten per cent. cheaper than before.

Respectfully soliciting a fair share of your patronage, I remain,

Your obedient servant,

June 1, 1881. R. FIDEAU.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

G. A. Percival, publisher, Central City, Neb., is closing up.

Thomas Griffith, paper stock dealer, Philadelphia, Pa., is dead.

C. C. Latta, newsdealer, Goshen, Ind., has sold out to C. S. Nusbaum.

Ralph Bergen, dealer in notions, Salisbury, Md., has made an assignment.

M. G. & M. Sage, straw board manufacturers, Elkhart, Ind., have been burned out.

G. S. Porter & Co., dealers in paper hangings, Prescott, Ala., have dissolved partnership.

Cowherd & Weatherwax, paper box manufacturers, Elkhart, Ind., have been burned out.

The annual meeting of the Keith Paper Company took place yesterday at Turner's Falls, Mass.

Delaney & Smith, wholesale dealers in notions, Philadelphia, Pa., have suspended payment.

Gregory Brothers, printers, New York city, have dissolved partnership. George Gregory continues.

The competition among the fancy card dealers is expected to be an interesting feature in the fall trade canvass.

Myers Brothers will agreeably surprise their friends in the trade with the new goods they will be able to offer next season.

Christophel & Hawk, publishers of the *Journal*, Elkhart, Ind., have dissolved partnership. The Elkhart *Journal* Company succeeds.

During the first week of June, almost all of the houses that handle fancy cards will begin to fringe those intended for Christmas and New Year's use.

Charles D. King, the well known gold pen and pencil traveler, has just returned from one of his best trips in the interest of the popular gold pen house of Aikin, Lambert & Co., 23 Maiden lane.

Henry Levy & Son show a new line of whisk broom holders. They are either in silk, illuminated with hand paintiugs, or in fancy tinsel in old gold and blue. This house also shows several new styles of embroidered baskets, which are very suitable for seaside purposes.

The copartnership heretofore existing between F. H. Stephens and George S. Perry, under the style of Stephens & Perry, Binghamton, N. Y., booksellers and stationers, was dissolved on May 23, and on the same day a new partuership was formed by George S. Perry and George M. Tyrrell, under the firm name of George S. Perry & Co., to conduct the same line of business at the old stand, 57 Court street.

Boorum & Pease are now getting out a handsome line of imitation ivory-covered autograph albums, plain and painted. Their new samples of leather goods are now ready for inspection, and are almost entirely of new and original design. They are also getting up a line of photograph albums in imitation ivory covers, handsomely painted in oil colors. Any detailed description of these goods is unnecessary, as they speak for themselves and stand entirely on their merits.

Though trade in nearly all the branches of the stationery business is somewhat quiet at present, there are unusually active preparations being made for the coming season. Almost every house has its manufacturing facilities at work with full hands, and as to new designs in certain lines it is said they are so plentiful that any old stock will be entirely superseded by them. Never before were manufacturers so careful to keep their new goods from being inspected until they are ready to offer them to the trade, as almost every one in certain lines is striving to outdo his neighbor as to design and elaboration of finish. It is almost impossible for any one unconnected with a firm to be permitted to see its new productions. The representatives of THE STATIONER, however, are always among the favored few in this matter. As these gentlemen are considered trustworthy in keeping such secrets inviolate, the trade desire that the journal they represent should be informed of the progress being made, as it is the acknowledged medium for posting all interested in the business. Another reason why the representatives of THE STATIONER are shown every new design as soon as it is matured, is that the trade know, from their long experience in describing every novelty introduced, they are able to tell whether the new article is likely to meet with approval upon its introduction.

J. H. Bufford's Sons have just published five sets of French cards on gold grounds. They are numbered 715, 716, 717, 718 and 719. Each is in six designs. In No. 715, each design represents a child appareled in the national costume and carrying the national ensign of some country; No. 716 includes solely comic cards in various attractive designs; No. 717 represents scenes at the seaside; No. 718 is a comic card series showing Chinese figures; in No. 719, each card shows a figure in brilliant colors of unusual but attractive design. In addition to the above, a new set of cards, styled the "bird nest" series, has just been published. It is numbered 120, and represents cupids and birds' nests on a gold panel.

Cyrus H. Loutrel, after close confinement to the stationery business for nearly half a century, is contemplating a trip to Europe. Although he has not yet decided to name the day when he will sail, he has the matter under serious consideration. It is very probable that he will remain away until late in the year, should he go; but this depends very much upon how he may feel when he gets over there. There is probably no one in the stationery trade in this city, who has been engaged in it as long as Mr. Loutrel has, who better deserves a respite from the arduous cares of business. This will be his first trip across the Atlantic.

The pleasure party to the Adirondack region referred to last week, among which were E. C. Martin, of George F. Nesbitt & Co., and Alexander Agar, returned home the first of this week, all having enjoyed very highly the ten days they spent up there, being engaged most of the time at trout fishing. One of the party who has suffered heretofore considerably with dyspepsia was greatly benefited by the trip, and it is said is now able to eat three full meals every day.

Arthur & Spencer, publishers of the *Chronicle*, Brookline, Mass., have dissolved partnership. C. W. A. Spencer continues.

A. Weidmann & Co. are now ready to take orders for any amount of fireworks intended for the celebration of July 4.

C. W. Hager, bookseller and stationer, Plattsburg, N. Y., has sold out.

A. Bilz, publisher, Spring Lake, Mich., has sold out.

D. Robson, publisher, Collingwood, Ont., has sold out to Haus & Williams.

Spencer & Ewing, stationers, Wheatland, Cal., are about to dissolve partnership.

Geo. Cathcart, printer, Goderich, Ont., is advertised to be sold out by the sheriff.

Hart & Rawlinson, booksellers and stationers, Toronto, Ont., have assigned in trust.

Metzger & Jordan, fancy goods dealers, New York, have removed to 104 Chambers street.

Mrs. S. M. Sherman, dealer in fancy goods, Beloit, Wis., has been closed out by the sheriff.

A. S. McDade has connected himself with Boorum & Pease, and will call on the trade for them.

August Wiebusch, president of the August Wiebusch & Son Printing Company, St. Louis, Mo., is dead.

Bicknell & Comstock, publishers, New York city, have dissolved partnership. Wm. T. Comstock continues.

James Golden has retired from the firm of Golden Brothers, publishers of the *Sentinel*, Norwalk, Conn.

Charles Leroi, printer, and M. Shyer & Son, paper and stock dealers, Nashville, Tenn., have been burned out.

Lydall & Foulds, paper manufacturers, North Manchester, Conn., have admitted Arthur J. Straw to partnership.

The Carew Company, South Hadley Falls, Mass., has secured the contract for furnishing stationery to the Interior Department at Washington.

As will be seen in an announcement in another column, R. Fideau has bought the Eureka Knitting Mills, and is going to develop the manufacture of school bags. He promises a reduction in prices. The trade are invited to peruse this announcement and profit thereby.

THE STATIONER has received, inclosed in the minutest of envelopes, a little bevel-edged Ph. Hake fine Bristol card, decorated with a tiny bow of white ribbon. The following inscription

PERCIVAL V. RAISBECK.
Born May 21,
1881.

appears upon the card. Now, George!

Charles J. Cohen, Philadelphia, reports a steady demand for the "Satinette" copying paper and books, of which he is the manufacturer and sole proprietor. Mr. Cohen proposes to advertise quite extensively to consumers the merits of the article, and that it is to be obtained from leading stationers throughout the country. The particular merit claimed for this copying paper is its fine copying qualities and the strength of the paper, which is thick and not liable to tear when dampened. Price list and samples will always be furnished to the trade on application.

J. H. Hamburger reports having taken an unusual large amount of import orders for Christmas cards. He says that he is not at all surprised at the number of orders placed in his hands, as he thinks that the line he shows is far ahead of that offered by any other house in the country. It includes fully two hundred and fifty new series. In a short time this house will be enabled to show a number of new series of advertising cards, which are painted, printed and copyrighted in this country, and which are said to be equal if not superior to the French. The trade of the house has slackened somewhat

just now, but is still much larger than at the same time last year.

Ellen M. Rogers, fancy goods dealer, Colchester, Conn., is closing out.

R. Smith & Co., news dealers, &c., Harrison, Mich., have made an assignment.

Cromwell & Barrows, bookbinders, Providence, R. I., have made an assignment.

Nauert & Klein, printers, binders, &c., Buffalo, N. Y., have dissolved partnership. Henry Nauert continues.

Askin & Harrison, manufacturers of printers' rollers, New York city, have dissolved partnership. Askin & Peets continue.

Misses Mitchell, dealer in fancy goods, Goderich, Ont., have assigned in trust. Their stock is advertised to be sold by auction.

The stock of the American Publishing Company, publisher of the *Daily American*, Nashville, Tenn., has been damaged by fire; insured.

Hill & Whiting, 32 Bromfield street, Boston, will publish a "George Eliot Daily Calendar" for the coming season. Orders from the trade are solicited.

Joseph Hyer has connected himself with the stationery and printing house of Stilwell & Albertson, of this city. He can be found at 131 William street.

Jos. B. Stilwell, late with C. M. Cornwell, has formed a copartnership with J. E. Albertson, under the style of Stilwell & Albertson. The firm will conduct a steam printing establishment and stationery business at 131 William street, this city.

T. B. Peterson & Brothers have just published a remarkable book, which will create a great sensation, being no less than a continuation of and sequel to the great Paris realistic novel of "Nana," by Emile Zola. It is entitled "Nana's Daughter," and is said to be one of the most exciting and absorbing stories ever given to the public.

F. K. Murphy, I. Kilner and D. Noble have formed a copartnership under the style of John Murphy & Co., for the purpose of continuing the business of the long established house of that name, at Baltimore, Md. Frank K. Murphy has had the active management of the business since his father's decease. Mr. Kilner has been actively connected with the house for a number of years. Mr. Noble is an experienced practical man, thoroughly familiar and identified with the printing business.

Watson Brown and Joseph B. Keen have formed a copartnership under the style of Keen & Brown for the purpose of conducting a stationery, printing and blank book manufacturing business, at 140 La Salle street, Chicago. These gentlemen are both well known to the trade.

Geo. W. Emerson & Co. have bought the stationery and fancy goods stock and have leased a part of the premises, 71 Randolph street, Chicago, from the American Baptist Publication Society. They will continue the stationery business at this location and at South Bend, Ind. The Publication Society will continue the book business.

Cooke & Cobb, 10 Broadway, New York, are manufacturing the "Favorite" letter file, and report a very liberal trade for it since its introduction, which has been within a few weeks past. The "Favorite" shows many points of merit. The manufacturers are sending samples to those of the trade interested on receipt of postage, 29 cents (or sent to pack free). See advertisement.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---$2.00 PER ANNUM.

Single Copies - - - - 10 Cents

NEW YORK, THURSDAY, MAY 26, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

IT can, we think, be safely promised that the trade will have a large and varied choice of novelties with the coming season. Some of the new goods shown to our reporters are said to be intended to draw coin from a triple-barred treasury vault.

EXTRAVAGANCE is encouraged by the elegant fancies which are offered nowadays, and it becomes a question whether it will not be advisable to stop and think how far we can safely go in the gratification of our taste for things new and beautiful. Manufacturers, artists, and dealers are educating the people of every station to desires for things which, not many years ago, were not thought of. Yet the demand seems to impel these teachers to make the most strenuous efforts to anticipate it. The error of extravagance, if it exists, is mutual, and the producer and consumer are equally responsible.

THERE is great need for the prosecution of our export trade. In every report of commercial action which comes to us from Europe we meet with references to American competition, which seems to be the bane and fear of foreign manufacturers. We are glad that this country can exercise such a wholesome influence on the trade of the world. In this respect it induces improvement in manufacture, enterprise in business and a better class of goods. But we have failed to assert ourselves as we should in foreign markets. Our manufacturing stationers ought to take this into consideration and devise means for extending their trade throughout the world. The establishment of depots in different trade centres has been one of the features which we have urged upon our people. It was also advocated by Secretary Evarts. This suggestion has been long enough under consideration to bear fruit. We find that it has been adopted, but not in the way we proposed or care to see it. European governments have acted upon it, and are opening trade museums at different points and providing information as to the kinds of goods that may be sold in different countries. Our consuls have helped us to the extent of giving some very valuable suggestions as to extending our commerce and as to what we can dispose of; but here we stop. Would it not be well for us to take a step forward and make an effort to claim and attract a larger share of the world's commerce?

COMPETITION is bearing hard on the envelope trade. Some of the manufacturers say that they are trying to figure out profits, and that all of their addition, multiplication, subtraction and division, only results in bringing out ciphers. We are sorry to hear this, for everybody ought to be able to make a little money nowadays. And right here comes in the inquiry as to whom the envelope trade have to thank for it. If the last advance in prices, which was afterward receded from when goods had been freely distributed, had not been pushed too far, it is probable that there would have been less complaint now. It is an old story and lesson, which, however often repeated, seems to be difficult to learn. If an inquest was to be held on the envelope trade, it is quite probable that the verdict of the jury would be, "Served 'em right." But in all cases of abnormal values it has invariably been found that, no matter how general a combination or agreement as to prices may be, there is always some one in the interest who is ready to "cut under" without notice, so as to secure the extra share of trade which may inure to his temporary benefit. So it has been in this case, and competition has reduced the manufacturer to a worse position than he held before. In the face of all complaints, it is still open to question whether the situation is so unhappy and doleful as some would have us believe. There must be some profit, if ever so small, or we shonld hear of somebody going to the bad and calling a meeting of creditors. We hear rumors of an attempt to harmonize the envelope makers. There has been an effort to this end, and we believe that it is still in progress; but whether it presents any chance for success we cannot yet say.

A fire broke out on Tuesday morning, from some unknown cause, on the fifth floor of the five-story brick building, No. 92 William street, New York, occupied by Snyder & Black, lithographers, and damaged their stock $1,000. The building was damaged $500.

ANSWERS TO CORRESPONDENTS.

L. de R. & Co. send specimen of cartoon sheets, and ask where they can be got, the price per M., &c.

Ans.—We are told that your sample is not made in this country, and all of whom we have inquired say that they have not seen anything of the kind before.

C. & G. want to buy an English oak stationery cabinet, such as H. Bainbridge & Co. used to import.

Ans.—We do not know where you can get one. Stationery cabinets in different forms have been made in this country, and we believe that Charles Taber & Co. and Henry Levy & Son are making such articles.

UNITED STATES TREASURY DEPARTMENT.

The following decision is printed for the information of parties interested.

Wall hangings manufactured of paper, cotton and putty—duty on.

The department is in receipt of your letter of the 8th instant, transmitting the appeal (1371 *g*) of Nicol, Cowlishaw & Co. from your decision assessing duty at the rate of 45 per cent. and ad valorem on certain merchandise imported into your port per France, December 13, 1880, which the appellants claim to be dutiable at the rate of 20 per cent. ad valorem. It appears that the merchandise is a fabric manufactured from cotton, paper, and putty, which is intended for wall decorations. It was classified by you under the provision for "all other oil cloth" (Heyl, 1179), while the appellants insist that such classification is erroneous, inasmuch as the article is in no sense an oil cloth, as it is manufactured from different materials, is entirely different in character and appearance, and cannot be used for the same purposes as oil cloth. Upon an inspection of a sample, the department is of opinion that the merchandise was improperly classified by you as oil cloth, and that the claim of the appellants in that particular is correct. While, however, the merchandise is not specially provided for as "oil cloth," or otherwise, it is not dutiable at the rate of 20 per cent. ad valorem, under section 2516, Revised Statutes, as an article manufactured in whole or in part, not otherwise provided for, as claimed by the appellants, because, under and by virtue of section 2499, Revised Statutes, it is dutiable at the highest rate to which any of its component parts may be chargeable under the statute. Such rate is 35 per cent. ad valorem; cotton and paper being subject to such rate, while the duty on putty is 20 per cent. ad valorem. The department, therefore, decides that the rate of duty to be assessed on such merchandise is 35 per cent. ad valorem; but, inasmuch as by their protest the appellants do not claim that it should be classified under the provisions for manufactures of cotton or of paper, they are not entitled, under the rule established by the courts, to a reliquidation of the said entry. (Collector of Customs, New York.)

Among the visiting members of the trade in the city this week were Mr. Smith, of Smith Brothers, London, England; F. Wright, of Averill, Russell & Carpenter, St. Paul, Minn.; George M. Collier, of Collier & Cleveland, Denver, Col.; Mr. Deal, of Probst, Deal & Co., Allentown, Pa.; J. W. Middleton, Chicago, Ill.; and Isaac Blum, of L. & H. Blum, Galveston, Texas.

The mica windows of coal stoves can be easily cleaned with a soft cloth dipped in vinegar and water.

ART WORK OF INDIA.

A lecture on Indian castes and trades was delivered recently at the London Institution by Professor Monier Williams, C. I. E. He said India had been described as a poor country on the verge of bankruptcy, whereas it was really a rich country with a poor population. Its potential wealth was incalculable. Indian art was in an advanced state long before Europe had emerged from barbarism; but at present the want of capital and the dislike to machinery were fatal to successful competition with European artisans, though Indian workmen were content with far lower wages. The secret of beauty of Indian art lay in delicacy of touch and manipulation. The hand was still the chief implement in India. No European machinery ought to supersede it, and Indian art ought never to abandon its own national traditions and pure taste for meretricious ideas derived from Europe. The lecturer exhibited several exquisite specimens of Indian industrial skill, lent for the occasion by the South Kensington Museum, such as Dacca muslin, Kincob work, silver work, wooden carvings, pottery and jewelry. Cotton cloth imported from Manchester, he said, was far inferior to that woven and decorated with patterns by man's hand in India. Spinning and weaving mills had lately been erected at Bombay, but native artisans were organizing bands of minstrels, who went about the bazaars singing songs, ridiculing the vulgarity of taste displayed in European textile fabrics. The connection between trades and castes was then explained. Every caste originally had its fixed occupation, and many castes were merely trade guilds. Some castes, however, had changed their occupations. All the low castes might be tillers of the soil; these constituted three-fourths of the whole population. The higher castes might engage in almost any industry. The Indian village system was the germ out of which the present castes and trades were developed. The various functionaries of an autonomous village community were then described. If anyone offended against caste rules he was "boycotted." No one would buy from him, or sell to him. "Boycotting" was a bad imitation of a custom practiced in India for centuries. Modern castes, trades and industries were innumerable. Some new ones reported in the recent census were rather strange—such as "professional speech-makers" and "professional givers of evidence." Indian art and industry ought not to be denationalized; the evils of caste should be neutralized by corrective influences rather than by government interference. Caste has its good side, which should be retained.

The National Blank Book Company has removed its manufacturing department to Holyoke, Mass., where it has greatly increased its facilities for the manufacture of blank books of every description. The office and salesroom of the company will be located, as heretofore, at 66 and 68 Duane street, to which address all communications should be sent, and where the company will always carry a full stook, from which the trade generally may be supplied without delay.

Advices from Rangoon speak of a society which has just been formed there for the purpose of establishing a large library, and also for printing the whole literature of Burmah. With this object, a capital fund of six hundred thousand rupees is to be raised in one hundred thousand shares. At the time of the dispatch of the letters in which the scheme is mentioned, greater part of the money had been raised, and a committee was being formed to decide on the choice of books to be issued and to superintend the editing and printing of them.

Market Review.

Office of the American Stationer,
Wednesday, May 25, 1881.

THE MONEY MARKET.—There has been no change in the ease which has characterized the working of the money market for several weeks past. Borrowers on call, offering acceptable stock collateral as security, readily effected loans at 2½@4 per cent. Transactions in time loans were reported at 2@3 per cent. In the discount market prime mercantile paper sold at 3½@4½ per cent., according to date of maturity. Business in the stock market was comparatively large in volume, and the speculation characterized by a strong and, at times, even buoyant tone. Prominent among the influences which contributed to impart strength to the dealings was the large and steady demand for our securities proceeding from foreign sources. In the government bond market the transactions were on a very large scale and the dealings were characterized by a decidedly strong tone; 6s of 1881 advanced 1¼, 5s 1⅛, and 4½s ⅛ per cent., while 4s declined ⅛ per cent. on the transactions of the week. Railroad mortgages were in active demand and most of the leading issues show a material advance as compared with last week's prices. Foreign exchange is again fractionally lower; bankers' bills are scarce, but the demand is light, while commercial bills are more plenty and dull. In view of the large orders from abroad for our securities it does not seem probable that there will be any improvement in rates during the coming week. The actual rates at the close were: $4.83¾@4.84¼ and $4.85½@4.86. Cables, $4.86@4.86½. Prime commercial bills were $4.82@4.82½.

THE PAPER MARKET.—Although the market generally remains quiet, there is a fair movement, considering the advanced stage of the season, and there is apparently every indication of the usual dull trade during the summer months. Fine Papers continue to receive a tolerably fair support; but the lower grades of print papers and wrappings do not show any great degree of strength. Stocks in the hands of dealers are not as large as many buyers are led to believe; in fact, we know of instances where buyers have failed to find assortments required, and are compelled to delay long enough to have the paper made up. Taking Holyoke as the principal centre of the manufacture, there are few if any mills that are not reasonably engaged on orders, and it is only in instances outside of that place where there is any particular effort being made to seek business. With firmer values for jute butts, and very high prices asked for straw, we cannot well see how much lower prices can be made on straw news, manilla and straw wrappings, and of the two former grades, unless heavily loaded with wood pulp, there can be left only a small margin of profit to the paper maker at present prices.

THE STATIONERY MARKET.—The market shows very little change since our last; in fact, we have reached a time in the year when a very quiet trade is looked for. This lull in business is taken advantage of by the manufacturing branch of the trade to make up novelties for the fall, many samples of which have already been shown us. As a general thing, there is a disinclination to give any information as to new goods until they are placed on the market, to prevent imitation. Enough has been seen and learned of the samples of novelties shown thus far to warrant the assertion that the coming season will not fall behind any preceding one in the varied display of goods and the beauty of their design. This is particularly true in the line of New Year cards, several houses seemingly having avoided old features and struck out in entirely new directions. Manufacturers of staple goods, such as envelopes and blank books, complain of the sharp competition existing, which compels the sale of their goods on extremely small margins of profit. As a general thing prices are unchanged.

THE PAPER TRADE IN THE CITY OF NEW YORK.

[Continued.]

In the account of the straw board business in the city of New York, printed in THE PAPER TRADE JOURNAL of the 7th inst., it was incidentally remarked that the manufacture of such boards was originated at Chambersburg, Pa., about the year 1840 by a firm called Chambers & Heiser. S. S. Shryock, of the Papyrus mills, Shippensburg, Pa., has written to THE JOURNAL to contradict these statements and inclosed a little monograph, purporting to give the true history of the manufacture of paper and board from straw, written by his father, G. A. Shryock, who claims to have begun the manufacture in 1829. Mr. Shryock also says that no such firm as Chambers & Heiser ever existed; but he mentions a family named Heyser still living in Chambersburg.

Of course, Mr. Shryock is entitled to the benefit of a hearing, and it must be admitted that his side of the story has the advantage of being circumstantial and told by one of the chief actors in the events described. On the other hand, the information on which the article that appeared in THE JOURNAL was based was obtained from persons who lived at the time referred to in this city and may have been easily and excusably led into error concerning exact names and dates. Neither must it be lost sight of that the errors pointed out by Mr. Shryock do not affect the main subject of the article, which was the rise of the straw board business in the city of New York.

The following extracts present such parts of Mr. Shryock's sketch as bear on the subject under consideration.

"Colonel Wm. Magaw, of Meadville, Pa., was extensively engaged in the manufacture of potash about 1827-28. As was customary, the ash hoppers were lined with long straw before the ashes were introduced. Magaw was in the habit of chewing the straw taken from the hoppers and pressing it on his hands, thus discovering that it produced a substance united and fibrous, closely resembling the pulp out of which is made the ordinary wrapping paper. He concluded that the material was adapted to the manufacture of paper. As I was at that time engaged in the manufacture of rag paper, by the old method, at Hollywell paper mill, one and a half miles south of Chambersburg, Magaw wrote to me on the subject of his discovery. I encouraged him to visit Chambersburg in July or August, 1829, to fairly test the matter at Hollywell paper mill. The experiment was at that time and place made, and proved a decided success. I was so well satisfied of its practicability that I bought a large cast-iron kettle of John V. Kelly in Chambersburg, cribbed it with wood staves so that I could boil from 700 to 1,000 pounds of straw at one filling, and made for some weeks from twenty to thirty reams per day. I was at that time intimate with John Jay Smith, Esq., librarian to the Philadelphia Library, and sent him quite a quantity of the straw paper as samples. Mr. Smith edited, I think, the *Saturday Bulletin*. His position as editor enabled him to give extensive circulation to the discovery. Not one claim was made to priority. The world was silent on the subject. The straw paper was distributed over this entire country and in Europe in pieces of from two inches square to a full sheet, and excited the astonishment of the paper manufacturers of the world. * * * Mr. Smith then predicted that it would become one of the staple articles of the world, in opposition to those who laughed at the idea of straw taking the place of rags.

"The material used at that time in the preparation of the straw was potash exclusively, the supply of which was obtained by Mr. Smith from Grant & Stone, of Boston. I abandoned the manufacture of rag paper, and devoted my mill exclusively to the manufacture of straw paper for some months. In November, 1829, I visited the East to see a cylinder machine then in operation in Springfield, Mass., by Messrs. Ames. On my way I accidentally met with Mr. Lafflin, of Lee, Mass., at Hay's Pearl Street House, New York, and engaged him to build for me a small cylinder machine at Hollywell paper mill, near Chambersburg, Pa. This was certainly the first machine that ever operated in that material. Within the first year I introduced the grooved wood roll for the manufacture of binders' and box boards, &c. These two manufactures were, as far as has been ascertained, the very first use of straw paper as a staple article in our world.

"In the winter of 1829–30, I purchased a steam boiler from Rush & Muhlenburg, of Philadelphia, of about fifteen horse-power, to cook the straw. The purchase was made by J. J. Smith, Esq. With the new boiler I was enabled to make about from one hundred and fifty to two hundred reams of crown wrapping paper in twenty-four hours. I soon discovered that when the paper broke between the press roll and layboy it accumulated in, sometimes, six or eight lamina round the press roll, and formed a solid and beautiful binders' board. I was thus led to introduce a gum-wood roll instead of the top press roll, with a longitudinal groove, in which the pulp was not pressed. This soft pulp being removed with a piece of wood to suit, the board was stripped off the roll. Thus board after board was made and laid in packs, then hung on poles or spread out to dry. I bought a rolling mill from M. W. Baldwin, of Philadelphia—a very superior one, and then introduced straw boards by the efficient aid of J. J. Smith into the Philadelphia market, and it was alone by his energy that they superseded, in a limited degree, the junk or rope board. * * *

"By observing the effect produced in removing the silex from the straw by the use of potash, I experimented with lime, and found by a judicious use of that material that it answered every purpose. * * *

"At the time under consideration, McDonald & Ridgley, of Baltimore, were the owners of Hollywell paper mill. Nicholas G. Ridgley visited Chambersburg in the winter of 1829–30, and was so impressed with the manufacture of straw paper and boards that he constituted me his agent to purchase from William Magaw, of Meadville, the exclusive right to the manufacture in all the United States east of the Allegheny Mountains. Magaw sent to Chambersburg as his agent Mr. Potter, a lawyer, then practicing in Meadville. We agreed on twenty-six thousand dollars for the above right. N. G. Ridgley arranged, in connection with the subscriber, to put Hollywell paper mill in the best possible condition to fairly test the operation, and, when satisfied of its practicability, to build four mills—one at Rochester, N. Y.; one at Paterson, N.J.; one at Old Chester, Pa., and one at Chambersburg.

"Encouraged at this time by the friendship of Mr. Ridgley and his vast means, I commenced and finished the improvements above mentioned. When they were completed, Mr. Ridgley died of apoplexy and, there being no written contract, I had to bear all the loss and had everything swept away by McDonald and the executors of Ridgley. * * * In 1831 I received a proposition from Thomas Chambers, Esq., to form a partnership for the manufacture of straw paper and boards at the mouth of the Falling Spring, where it empties into the Conodocheaque Creek. He deputed me to ascertain from T. G. McCulloh, Esq., executor of the estate of Samuel Provlance, the price of the old paper mill site which adjoined mills belonging to the Chambers estate. The purchase was made. Thomas Chambers then concluded to build a furnace near Shippensburg, and handed over the old paper mill site and partnership with me, by my consent, to S. D. Culbertson. The new firm was composed of S. D. Culbertson, Reed Washington, and G. A. Shryock, I to have one-third, the others two-ninths each. The mill, the ruins of which now (1866) only remain, was built on a much larger scale than contemplated by Chambers & Shryock. The new firm was G. A. Shryock & Co. In order to secure the entire water right, the new firm leased all the mills on the bank for ten years at $2,400 per annum. The driving part of the machinery was built by Donald Watson, of Baltimore, and the making portion by John & Philip Nitterhouse, of Chambersburg. The mill had pulp engines and eight machines, easily making one thousand pounds per hour. The building was 150 by 50 feet and five stories high, had 102 miles of drying poles, 17 large dry presses, and every facility for the manufacture of boards and paper. The machinery was so perfect that the annual expense for repairs, except wire cloths and felts, did not exceed $200."

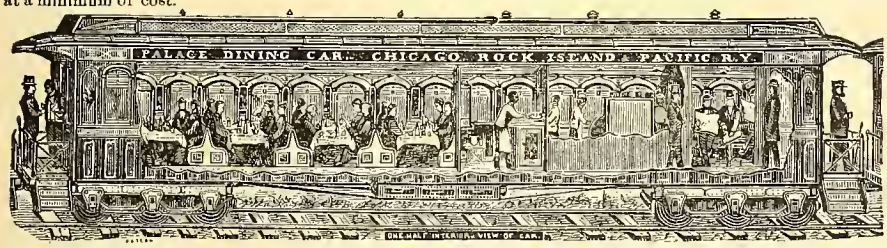
"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.



That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

ANTIQUE SCOTTISH TILES.

At the monthly meeting of the Society of Antiquaries of Scotland, a paper was read about some ancient tile-paving in Linlithgow Palace, by Andrew Kerr, architect, F. S. A. Scot. Mr. Kerr's attention had been attracted, when visiting Linlithgow Palace about twenty years ago, to several polished paving stones systematically arranged in the floor of one of the apartments on the west side of the quadrangle, and on clearing away the moss and weeds by which they were hidden, he found that they were combined with encaustic tiles of different colors, forming a beautiful design of flooring extending over the entire apartment. They were much broken and splintered on the surface, apparently the result of the accidental burning of the palace in 1746, when it was occupied by Hawley's dragoons. On examining the other apartments, a fragment of another tile paving was found in the chapel, situated on the same floor of the building, but on the south side of the quadrangle. The tiles in both were about eight inches square, and fully an inch in thickness, the upper surface covered with a thin glaze, in the one variety of a light orange color, and in the other of a reddish brown. The surfaces of some are stamped with a shield bearing the letters T. M., interlaced by a cord. The chamber in which the more entire flooring was found is 35 feet long by 21 feet wide, and after describing its arrangements minutely, and considering its relations to the adjoining apartments, Mr. Kerr came to the conclusion that it must have been intended for an audience or state council chamber. To the objection that Scotland was not sufficiently advanced in such ornate domestic architecture at that period to be credited with work of this kind, Mr. Kerr adduces the testimony of the Spanish Ambassador at the Scottish Court in 1497-98, that "the houses were good, all built of hewn stone, and provided with excellent doors, glass windows, and a great number of chimneys." Moreover, he adds, that "all the furniture that is used in Italy, France, and Spain is to be found in these Scottish dwellings, and that not recently provided only, but often inherited from preceding generations." In conclusion he urged that this was a subject to which sufficient attention had not been paid, and referred to the collection of Scottish tiles in the museum.

COLORING METALS.

Metals may be rapidly colored by covering their surfaces with a thin layer of sulphuric acid. According to the thickness of the layer and the duration of its action there may be obtained tints of gold, copper, carmine, chestnut brown, clear aniline blue, and reddish white. These tints are all brilliant, and if care be taken to scour the metallic objects before treating them with the acid, the color will suffer nothing from the polishing. On making a solution of 640 grains of lead acetate in 3,450 grains of water, and warming the mixture to 88° or 90°, it decomposes and gives a precipitate of sulphuret of lead or black flakes. If a metallic object be immersed in the bath, the precipitate is deposited upon it, and the color produced will depend on the thickness of the deposit. Care must be taken to warm the objects to be treated gradually, so that the coloration may be uniform. Iron treated in this way has the aspect of bluish steel; zinc, on the contrary, becomes brown. On using an equal quantity of sulphuric acid, instead of the lead acetate, and warming a little more than in the first case, common bronze may be colored of a magnificent red or green, which is

very durable. Very beautiful imitations of marble may be obtained by covering the bronze objects, warmed up to 100°, with a solution of lead thickened with gum tragacanth, and afterward submitted to the action of the precipitate spoken of above.

INCLINATION OF GLASS TO UNVITRIFY.

Pelouze, after his experiments, asserted that the disposition of glass to unvitrify was chiefly occasioned by a surplus of silica. This was disputed by Boutemps, who attributes the tendency alluded to to the lime in the glass. In reference to this M. Clemandot, a glass manufacturer, communicated his experience to the Academy of Paris, which shows that a surplus of silica may, indeed, under certain circumstances, unvitrify the glass. Years ago Clemandot produced a glass consisting merely of silicious acid and soda. It was free from lime, but contained a great surplus of silica. The fusion required a very intense heat. When accomplished, Clemandot took out a portion of the mass, allowing to cool rapidly. This portion has remained unchanged during a period of ten years; the rest, on the contrary, which was allowed to cool slowly in the crucible, was perfectly unvitrified, turning into an opaque white mass resembling feldspar, and crumbling in the air—a proof that glass may unvitrify even when totally free from lime. In the above instance the great surplus of silicious acid was, no doubt, the cause of this change, showing the opinion of glass makers, that glass is durable in proportion to its percentage of silicious acid, is not correct under all circumstances. In order to obtain a good glass, we must produce a double silicate of an alkali with an earth or a metallic oxide. The more bases it contains the stronger it is to resist atmospheric influences. Too much lime, however, may also unvitrify glass by a surplus of other acids and oxide of lead.

Sealing Wax.—The most common is prepared from powdered resin six ounces, and red lead four ounces, well mixed together, and carefully melted over a slow fire. When melted and allowed to cool the mixture may be rolled into sticks on a marble slab, or cast in molds. If any other tint is required the red lead may be omitted, and ivory black, finely powdered verdigris, massicot, chrome, verditer, smalt, or any other pigment, may be employed to produce the required color.

POTELINE.

M. Potel has communicated to the French Société d'Encouragement a compound which may be employed in hermetically sealing bottles and flasks, or in making an artificial marble for the ready manufacture of various useful and ornamental articles. It is composed of gelatine, glycerine and tannin; sulphate of baryta or zinc white may be added to make it opaque, and it may be dyed of any desirable tint by means of ordinary vegetable colors.—*Chron. Industr.*

To remove stains from glass take American potash, three parts; unslacked lime, one part; lay this on with a stick, letting it remain for some time, and it will remove either paint or tar.

Marking Ink.—The following is a so called indestructible ink: Dissolve 1 ounce gum arabic in 2 ounces water. Then add ¼ ounce indigo and ½ ounce lampblack, and triturate to a smooth fluid in mortar. Then dissolve by boiling 1 ounce borax and 1 ounce shellac in 16 ounces water. Filter this last solution, and mix it with the former, stirring both well together.

BRADSTREET'S

A JOURNAL OF

Trade, Finance and Political Economy.

This journal covers a ground the extent of which is occupied by no other publication, and forms an invaluable work of reference to the merchant and manufacturer.

Regular and trustworthy correspondence, furnished by experts, expressly for this journal, from all the principal trade centres of this country, is embraced in its columns.

The condition and prospects of the various markets are carefully recorded, and the possibilities and opportunities for trade are demonstrated as by no other medium extant.

Questions of commercial interest and importance are fully and ably discussed editorially, without prejudice, by some of the most responsible writers and statisticians of the time.

The business changes occurring in the United States and Canada—such as failures, dissolutions of partnerships, chattel mortgages, etc., etc.—are printed in each issue, and the list is more complete and comprehensive than can be obtained through any other source.

The circulation of this journal being among the best merchants, manufacturers, and banking institutions of not only this country but many foreign, it presents an excellent advertising opportunity to a limited number of first-class banks, corporations, and business firms.

THE ART OF WOOD WEAVING.

The manufacturing district of the Austrian empire lies in the north of Bohemia, where the miniature Birminghams and Manchesters are congregated together by the dozen, and hundreds of thousands of "hands" are actively and ceaselessly employed. For miles the high road is bounded by houses, chiefly one storied wooden buildings, with roofs of thatch or shingle, where the rattle of looms may be heard without intermission from early dawn till late at night. In some of the towns numberless chimneys pour forth volumes of black smoke by day, while by night the windows of the large factories glow with light as if there was a general illumination. One of the busiest of these little towns and villages is Ehrenberg, which lies close to the Saxon frontier, and is distinguished from the rest by a peculiar industry, which appears to be carried on in only two other places besides. The peculiar industry, for which Old Ehrenberg is distinguished is wood weaving, sparterie work as it is called, which was introduced something more than a century ago by a carpenter named Anton Menzel. The threads used for weaving are no thicker than writing paper, and vary in width from the fifth to the twenty-fifth part of an inch. The aspen is the only tree whose wood is sufficiently tough and pliable to supply these threads in the required lengths. The aspen was formerly indigenous in Bohemia, but has now almost entirely disappeared, or at all events does not exist in sufficient quantities to supply the demand in any degree. Consequently the raw material for sparterie work has to be brought from Russian Poland, which is both a laborious and expensive process. The wood merchants go to Poland twice every year, in the early spring and in the autumn, the only time when the wood can be cut with advantage, as none can be used at once but that in which the sap has not yet risen, or from which it has departed. Wood cut during the summer has to lie in water for a year, otherwise it is red and useless. It must be quite free from knots, as the smallest defect or irregularity, such as ordinary persons would hardly notice, makes the fibres quite unfit for weaving purposes. Arrived in Ehrenberg, the wood is planed and divided into pieces nearly 2½ inches wide. When these have been made perfectly smooth they are divided again by an instrument resembling a plane, but furnished with a number of fine knife blades, which mark the wood at regular distances according as the strips are to be one-twenty-fifth or one-fifth of an inch in width. This process requires the utmost dexterity and nicety, as it is absolutely essential that the divider should exactly follow the direction of the fibre: and for this reason among others it must always be done by hand. The divider makes incisions one-fifth of an inch deep; the wood is then carefully planed and comes off in thin paper-like strips, some of which are not wider than a stout thread. They are gathered up as they fall, by women, who examine them and pick out any defective pieces, and, in spite of all the care taken in the selection and manipulation of the wood, there is a great deal of waste in the process. The threads or fibres, being now ready, must be tied in couples at one end before they can be woven. This work is done by children, and in Ehrenberg little creatures of four years old and upwards are employed at it and earn 4d. a day. The weaving is done chiefly by women, and in looms which differ considerably from those in ordinary use, the fibres being, as before mentioned, not more than from 30 to 50 inches in length. The longer fibres form the warp, the shorter (28 to 32 inches) the woof,

which is passed in and out by means of a little instrument with an eye like a needle. Until within the past few years this concluded the whole process—the "foundations" as they were called, were complete, and nothing more was done, except that a few hats and caps were made of them; but these were of the very simplest description, and anything but becoming. Moreover, they were glued together which made them very unpleasant to wear in hot or wet weather, and accordingly they fetched but 15d. or 2s. 4d. per dozen, and were worn only by the very lowest classes. Within the last few years, however, a great change for the better has taken place, thanks probably in part to the interest shown by the government in the manufacture, in part to the establishment of an enterprising firm, and in part perhaps to the fact that the Ehrenbergers have at last become alive to their own interests. At present Ehrenberg sends out not only the raw material, but ready-made goods—fashionable hats of all kinds, and a variety of fancy articles skillfully concocted out of the wood fabric.—*Cassell's Family Magazine.*

PHOTO PROCESS OF WOOD ENGRAVING.—A simple plan is to coat the wood block with a little oxalate of silver, rubbed on with a drop or two of weak gum water. Lay your glass positive face downwards on the wood, and expose to the light. You will then have the design formed on the block in white on a dark ground. The engraver would have, of course, to cut away the dark parts instead of the light ones, as is usual. All these operations must be performed by a subdued light, or by gas or lamp light.

BLOTTER TABLET PATENTED

PADS OF PAPER WITH BLOTTER ATTACHED.

ELEGANCE. ECONOMY. CONVENIENCE. CLEANLINESS.

THE paper is tableted, so that each sheet may be freely removed, leaving a perfectly clean, smooth edge. No paper is wasted. The sheet on which you write is always clean, being protected by the blotter. The blotter, of the full size of the paper, is so attached at the top of the pad that both sides of it may be used, and will last out the entire contents of the pad, being always at hand, and perfectly clean.

The blotter is kept clean, and also from wearing, by the card board cover, which is made of a highly polished stock, perfectly smooth, and that will not catch dust or dirt from the desk. The cover is richly ornamented on every pad, giving the whole a neat and elegant appearance. All kinds of paper and printed blanks are put up in this form at prices as low as if loose; making the most complete line of staple and elegant stationery ever offered to the trade.

MARVIN HUGHITT, 2d V. P. & Gen. Man., Chicago.

THE YARD MEASURE.

Every one is acquainted with the nature and utility of the yard measure. It is the British standard of length, regulating all other measures, and consequently is the foundation of business transactions and professional operations of many different kinds. But its high utility is entirely dependent upon its fixed and uniform dimensions. It would be in the greatest degree inconvenient and unsatisfactory if a yard in one part of the kingdom meant something different to the measure which passed under the same name in another, or if the least variation were found in the yard measures of different parts. Hence it is necessary to have some authoritative standard by which the dimensions of the yard shall be accurately adjusted, and according to which the legality or otherwise of any measurement may be determined.

Many curious particulars are connected with the formation of this authoritative standard of the country, and few persons unacquainted with the facts would have any idea of the interest which thus attaches to so common an object as the yard measure. In the early history of England disputes often arose in the measurement of cloth, &c., and frauds were frequently committed. To check them Henry I. ordered a standard yard to be made and kept at Winchester, and decreed that it should be of the length of his own arm. This was a rough-and-ready mode of settling the matter which presents the greatest contrast to the formation of a standard measure at the present time. The disadvantage attending it was that, in the event of the standard being lost or destroyed, it would be next to impossible to construct another of precisely the same dimensions. To avoid any such difficulty, a scientific basis has been taken in modern times for the formation of the standard yard measure. Plainly stated, this basis is the exact length of the clock pendulum which vibrates seconds of time in the latitude of London. This may appear to some to be a simple rule, by which the standard may be determined with comparative ease; but, on the contrary, it is a matter requiring the most minute and accurate research, which only astronomers and mathematicians of the highest attainments are competent to undertake.

INK FOR LABORATORY USE.—A German pharmaceutical magazine gives the following recipe for a fine black ink, which flows easily from the pen, and may be used in laboratories, drug stores, &c., for labeling objects which are liable to get wet, or for producing writing which will resist acids and caustic liquids: Twenty grs. of brown shellac are dissolved in a warm solution of 30 grs. of borax in 300 to 400 grs. of water, and filtered hot; to the filtrate is added a solution containing 7.5 to 10 grs. of water-soluble nigrosin, 0.3 grs. tannin, 0.1 gr. picric acid, 15 grs. water of ammonia, and 7 grs. of water.—*Boston Journal of Chemistry.*

If elastic gum is warmed, then expanded and wound in a spiral upon a tube or wire and cooled for a short time in a cooling mixture, it shows no tendency to contract, but when it is submitted to hot water it returns quickly to its original length. The phenomenon can also be made to appear without the use of the cooling mixture. If one holds heated gum a second in an expanded condition, it shows no disposition to return to its original length; but if one immerses it in hot water it contracts to one-fourth or one-fifth of its original length. Maxwell has found that similar phenomena are produced in gutta percha.

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST** and **ONLY AWARD** given for

LINEN RECORD and LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition*, *Massachusetts Charitable Mechanics' Association*, *Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission*, *Medal of Progress American Institute*, *1877*, *and Medal of Improvement and Progress*, *Boston*, *1878*. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

☞ **Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.**
Each sheet is water-marked with name and date.

A JOURNAL DEVOTED TO THE INTERESTS OF THE STATIONERY & FANCY GOODS TRADES

"The Stationer"—Every Thursday—$2.00 Per Annum.

VOL. IX.---NO. 22. NEW YORK, JUNE 2, 1881. WHOLE NO. 310.

Correspondence.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BOSTON, Mass., May 30, 1881.

Trade among stationers has moved along in the even tenor of its way during the past week, the jobbers having had an unusually large number of orders for this season of the year, while the wholesalers have contented themselves with a quietness that is characteristic of the month of May. The retail trade has been brisk, as it is always in a metropolitan city, in order to meet the innumerable wants of a cosmopolitan population. Considering that the city virtually transacts the trade of a radius of twenty-five square miles, embracing a population of at least six hundred thousand, Boston's retail and jobbing trade is a fixed fact at almost any season of the year.

New York gentlemen have been in goodly numbers in town during the week, anxious to sell new goods; and they have met with tolerable success. Quite a number of novelties are promised the coming season, by which I mean the fall trade. Anything new or novel is always welcomed by the trade here. The more new things the better for all concerned.

Buyers from the interior report a dull trade in most departments. Merchants have generally a sufficiency of stock for the season, and are chary about stocking up largely, although all the signs point towards a continuance of active trade in its season. I believe this is a fair statement of the tone of trade in country towns.

Dealers now find this a good time to reduce stocks by a slight reduction in prices, preparatory to entering upon the "fall campaign." Live stationers do not care to have on hand at the beginning of a new season goods that have been on the shelves or in the drawers ever since last winter. Buyers always expect to find fresh goods offered them at all seasons of the year. There is a hint in this observation that every live dealer will appreciate at once.

The really most active department of business seems to be among those engaged in manufacturing art novelties. One firm told me that "there seems to be no end to the demand for goods in this line, and that demand, on account of the varying tastes of the people, is constantly inquiring for new styles. Consequently we are compelled to press into service the most talented men the market affords to meet that demand with new styles, combining originality with a genius that catches the new ideas of to-day."

In this connection, L. Prang & Co. have almost got fairly settled in their additional quarters; and what with new motive power, improved technical machinery, and at the same time commanding the services of some of the best workmen of their kind in the country, the firm is now in a situation to respond promptly to all demands that may be made upon it

A new occasional adventure, *Variety*, is a candidate for favor. It is edited by a clever member of the daily press.

The hot weather is making inroads upon a class of our population that can find the time and money to leave the city and not return until the early frosts.

There are no changes in the stationer's trade to notice. L.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, Ill., May 28, 1881.

Although the sultry season is upon us, there is but little falling off noted in business, most of the larger houses saying that they have all that they can do.

Rose & Hodge, printers' machinery, &c., state that they are having a fine trade, which promises to be steady for a month or two to come.

E. P. Donnell & Co. are having a heavy run. They have just added to their establishment a $4,000 machine shop, containing all of the latest and most approved "machine tools" for the manufacture of bookbinders' machinery. The company has just taken the agency for Blackhall's Ontario machinery, for which there is a notably growing demand.

F. H. Revell has just published "Ephiphaneia: A Study in Prophecy," J. A. Edgren, D. D.; cloth, 75c. It is a minute and scholarly piece of study, and will attract the attention of those interested in such subjects. By the same house, "The Date of Our Gospel," Samuel Ives Curtiss, professor in Chicago Theological Seminary, flexible cloth, 50c. It is an adverse review of Judge Waite's "History of the Christian Religion to the Year Two Hundred;" displays a keen logical insight and thorough study of the subject. It will interest readers of almost every class.

Clark, Friend & Fox have added to their regular line of Campbell & Smith's celebrated pink National safety paper the same stock in blue.

The Wabash, St. Louis and Pacific Railroad, with its customary taste and enterprise, has just published a beautiful little pocket volume, entitled "The Tourist." It is really a fine piece of work, not only as an advertisement, but as a pocket guide for summer loiterers. It is beautifully illustrated with artistic sketches made expressly for the work; and as a collection of descriptive pieces, it is seldom surpassed in the best magazines of the day. In fact, I do not know where one would go for better and more pleasing pen sketches of Northern Michigan, Niagara, the St. Lawrence, the Adirondacks and, in fact, all the prominent points of interest East and West, than to this book. It is a library of description in itself. This line runs cars from St. Louis to Boston, via the Toledo, Canada Southern, New York Central and Hoosac Tunnel routes—1,223 miles without change. This is the longest sleeping car line in the world. This route is to be preferred during the summer months, as it passes through the cool, northern lake regions, is free from dust, and goes via Niagara Falls. It has become the favorite route with tourists to the East. H. C. Townsend, general passenger agent, St. Louis, Mo. G. B. H.

BALTIMORE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, Md., May 31, 1881.

Business has been nearly all Bible since the revised edition made its appearance in Baltimore, the rush for the book here as elsewhere being simply immense. No store in town, small or large, has failed to have a stock on hand, and the demand has been equal to that usually made for Christmas and New Year's cards during the holidays.

The general trade in books and stationery is about as quiet as usual at this season, and will be apt to continue so until the first of August, when the school trade will begin.

All of the stores have signed to close their places of business during the months of June, July and August, at six o'clock, Saturdays at five o'clock, and this, I think, was a judicious course to take, giving, as it does, the hard worked employees a little time to recuperate after their day's labor.

Mr. Ringold, who sold out his interest in the Baltimore *Telegram* a few weeks ago, has gone to Washington, where he intends to devote his time to the editing of a new weekly entitled the *National Register*. He is a bright and painstaking newspaper man; but it is extremely doubtful if a weekly will pay in the capital. Time will tell however; and as Mr. Ringold is reputed wealthy, he can afford to pay for the experiment.

Hoping to be able to record more interesting facts connected with the trade in my next, I will now resume research on the merits or demerits of the revised testament. I won't, how-

ever, bore you with the result of my labors. The verdict has already been proclaimed from the pulpit all over the land; and besides, the views of laymen on such a weighty subject would be laughed at outside of an insane asylum.

W. P. M.

PHILADELPHIA NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE OF THE LOCKWOOD PRESS, PHILADELPHIA, Pa., June 1, 1881.

Thos. S. Dando now has all of his samples prepared, and in a few days his travelers will be on the road. Your correspondent at Philadelphia has inspected this magnificent stock, and he declares frankly that he has been surprised. It includes articles of the richest design and of the best taste that can be seen here or in Europe. Naturally, I cannot give a very succinct description of them, and to mention all of the objects of art which deserve notice would take more space for description than is permitted me in this letter.

I can now tell you that Thos. S. Dando is about to open a branch of his Philadelphia house at Nos. 13 and 15 Park row, New York. His Eastern customers will find there all of the goods of his manufacture, and will be able to make their selections without trouble.

One other observation. In the articles which Dando manufactures, he sometimes uses the chromos of De La Rue and other manufacturers, but these are all his own property, and cannot be obtained from anybody but him.

Now let me mention some of the goods offered by this house. In the first place, there is a series of 200 new designs of Christmas and New Year's cards, plain and fringed, ranging in price from 12 cents to $20 per dozen. Among them is the Christmas fan, manufactured by this firm. It is the most exquisite thing I have ever seen. It is made of very heavy enameled board, cut into five different parts, lithographed in gold and silver, with five of De La Rue's finest chromos mounted on each fan, with variegated fringe at the top and silk tassels at the bottom. When opened, it is supported by satin ribbons drawn through the centre of each of the five parts. On the first and last part of each fan are appropriate mottos. They are put up in handsome boxes, thirteen to the dozen, one fan in a box. Another of their features is the bevel edged, self-supporting panel mounts. They are made of very heavy board covered with velvet and gold, with handsome chromo lithographs mounted in the centre. There are three series of the above goods and three designs, each with patent wire support in back, in boxes, thirteen to the dozen. One of the articles which is said to be a very great success is the raised bevel-edged "Angelic Herald" (size 11½ by 15 inches), in three designs, mounted on velvet, one inch gold border of ash on outside, thirteen to the dozen. Unfortunately, there are not more than twenty-five dozen of this design to be sold, and it will be impossible to produce any more this year. The round prize mounts are round cards circled with fringe and mounted on gold, silver and tinted mounts. They are certainly handsome, and should have an enormous sale.

Dando & Co. have the agency for Marlborough, Gould & Co.'s wedding, birthday and Christmas cards, painted by hand, on extra fine tinted and white bristol, and also on porcelain. These are mostly floral designs, perfectly executed by the best lady artists in London, and as yet they have only been able to import a limited quantity of these delicate goods on account of the large sale for them in Europe, and, therefore, cannot insure delivery of orders taken after September 1. They have added ten new series of satin chromo-lithographs, making twenty-eight series in all, so as to show the art of using these goods for embroidery, &c. They have made up a variety of fancy goods, viz.: Pin cushions, handkerchief sachets, cologne bottles, whisk holders, reticules, tidies, mats, wedding toilet sets, velvet frames, &c. The popularity of the satin lithographs is growing every day, and it is only necessary to call the ladies, attention to the goods to make a sale. They have also secured a line of Dean's children's toybooks. Among which are: "Dog Tray's Travels," "Alderman's Feast," "Whittington and His Cat," "Jack and His Brothers," "The House That Jack Built," "The Bright Shilling," "Surprising Comical Characters," "Transforming Picture Book," "The Queen of Hearts; or, Who Stole the Tarts?" "Good Morning and Good Night," "The Farmer and His Family," "Ali Baba and the Forty Thieves," and two hundred and fifty others. These books are entirely different from any that have ever been shown before. Many of them are either embossed, panoramic, or capable of transforming one picture into one hundred, merely by changing the position of the leaves, others are capable of over five hundred metamorphoses.

One of the most remarkable importations of Thos. S. Dando is his series of one hundred and ten different varieties of photograph albums, among which are some special *objets d'art*. Besides what I have mentioned, there are two hundred styles of other novelties for the holidays, which I advise the trade to see before ordering elsewhere. This firm is also agent for Bradbury, Wilkinson & Co., who manufacture the celebrated "British Wild Flowers" and "Picturesque" albums. Dando has also seventy-five different varieties of imported papeteries and correspondence cards embossed and hand-painted, infinitely prettier and of much better design than any that I have heretofore seen. On account of the demand for "Greetings," similar to the one Thos. S. Dando & Co. issued last season, this house has published several designs on note sheets similar in style but with different designs. They have a splendid stock of other goods about which I could write much, but I must content myself with saying thus much, and advising the trade to come and see.

J. VIENNOT.

OHIO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, O., May 30, 1881.

To-day is being generally observed as Decoration Day, and business to some extent is being neglected. The present month has been unusually dry and hot; small fruits are being very much damaged, and the prospect for wheat and grass is not encouraging.

I notice in the last STATIONER that your Cincinnati correspondent gives statistics showing the amount of paper manufactured in that city. Practical paper makers should make a note of it and come West and find out how to make paper without a mill. There is not a paper mill, with possibly one exception, within ten miles of Cincinnati.

Common wrapping papers are very steady in price, and scarce; all other papers may be said to be weak, although the demand for all kinds is fair. The strawboard mills here have been shut down, I believe, under a resolution of their combination. The fact is, there are too many mills of that class. Notwithstanding this fact, two new mills are in process of erection within a few miles of our city.

Among our stationers trade may be said to be quiet. Lowe Brothers, dealers in paints and artist materials, have leased the room adjoining their store and are fixing it up, their largely increasing trade in their specialties compelling them to take this step.

Reynolds & Reynolds have all of the business they can well attend to. Louis Reynolds took a trip through the West with an idea of establishing a branch, but came back again satisfied with our beautiful city. The attractions of Dayton are very strong for him.

Travelers are rather scarce, Jas. T. Watkins, of the American Lead Pencil Company, being the last to appear. J. F. Hitchcock, of the Morgan Envelope Company, and his bride, are among the expected this week.

G. W. Holden, of the Holden Manufacturing Company, will go East in a few days to make his fall purchases; Joe Crane, for some time in the employ of the above firm, takes the road in the interest of Warren, Fuller & Co. about July 1. If he can sell wall paper as well as he tells a story his employers had better make arrangements to enlarge their factory at once.

MIAMI VALLEY.

OUR LONDON LETTER.

[FROM OUR REGULAR CORRESPONDENT.]

5 LUDGATE CIRCUS BUILDINGS, LONDON, E. C., May 14, 1881.

There is no doubt that trade generally is very depressed; but, so far as I can gather, the stationery and fancy houses here are working very hard for the Xmas trade. I have already seen some of the pattern books of our big firms, and you may take it for granted that a good show will be made this season.

Chief among the firms, the old established house of Thos. De La Rue & Co. will be to the front with new goods of very fascinating character. I ask my readers to turn to the announcement of this firm in the present issue of THE STATIONER. One of the most interesting features of Thos. De La Rue & Co.'s sample book is the reproduction of the first and original Christmas card. Although comparisons are odious, they are often valuable mentors. By comparing the old Christmas card with modern productions, we can gauge the immense change that time produces in the minds and tastes of people.

Charles Goodall & Son will follow up previous successes with an increase of design and variety of execution in their productions this year. This house has been paying great attention to steel work and has turned out some specimens which will commend them to every lover and admirer of good art. I was surprised to note a query in your issue of April 14, as to where Goodall's playing cards could be bought. Surely the firm has an agent in New York, and surely he looks after his orders. It seems a strange thing to see a question like the above in THE STATIONER. I should not like any one occupying a well known position in our trade to ask me if there was such a journal as THE AMERICAN STATIONER and where it could be had.

A very hard working and energetic firm is that of John Walker & Co., Farringdon street. It has just introduced a new pen, called the "Anchor." It is specially adapted for long letter writers. I think I have sufficient writing to do to know what a comfort an easy pen is. The "Anchor" is a capital pen, holds a very large amount of ink, which is a great boon. Many a time, just when I have got a grand idea in my head, and when I am going to send it to you, a dip at the ink pot scatters it to the winds, and

the whole American trade lose a precious and comforting reflection.

Marlborough, Gould & Co., Old Bailey, E. C., are very enterprising, and do much to excite the interest of the trade. Their end papers are a great specialty, and they are getting ready some very delicate designs indeed. I think your buyers might send for a few samples.

A big fire completely destroyed the S. E. warehouse of Millington & Hutton, a large wholesale paper and stationery house here. The fire took place yesterday morning and burned everything down, even to the bare walls. It is said that half a million dollars won't cover the damage; but I don't know. Paper is cheap now. Other adjoining premises were injured though, and they will have to be counted as more valuable than stock.

I have just heard that Mr. McDonald, of John Walker & Co., sails to-day in the Bothnia for New York and on to Canada. He takes out a splendid lot of samples, and a particularly fine selection of hand-painted cards. As we certainly excel in this line, your side can look out. You can look, even if you may not touch.

The copies of "Lockwood's Directory" have reached our trade, and this year's book is a good one. It is well printed, as usual, and is admired here very much. In fact, wistfully. I intend getting up a similar work here; indeed, I have the "copy" ready so far as the paper trade is concerned.

In future, now that my own journal, *Paper Making*, is well afloat, I intend keeping your readers well posted up. Kindly excuse my seeming neglect of late. It is never too late to mend.

The trade exhibition will come on very soon now, and that will produce a little excitement. I hope to see a good show. It opens on July 14, and will last that month out. Anybody from your side who may happen to be here, either by accident or specially to see the show, shall have every attention on calling at the above address and asking for W. F. C.

MELBOURNE INTERNATIONAL EXHIBITION.

[FROM OUR AUSTRALIAN CORRESPONDENT.]

MELBOURNE, Victoria, April 10, 1881.

The jury selected to adjudicate upon stationery were practical intelligent gentlemen, with John Ferres, Esq., late government printer, as chairman. The others, with the exception of of Count de Montmahon, Inspector General of Education, France, and Donald Manson of the American Watch Company, who represented the United States, were all citizens of Melbourne, renowned for their experience in matters connected with the press, printing, paper, and general stationery. Mr. Manson, at the risk of his health, very patriotically succeeded Mr. Hogan, the Australian representative of the *American Mail and Export Journal*, who resigned his position as juror for the United States, because of his being interested in certain exhibits included in the classes on which the jurors were to make awards. During the examination, the members of the jury became convinced that there were very many exhibits of special merit coming within their cognizance to which justice could not be done under a system of awards that was necessarily limited to the terms first, second, third, fourth, fifth, and honorable mention. They therefore resolved with the concurrence of the executive head of the Exhibition—Hon. J. J. Casey, C. M. G., executive vice president—to submit a detailed report upon their work which would in some measure overcome the difficulty that presented itself. In order to a systematic arrangement they classified the exhibits under the following heads: A, printing paper; B, paper other than printing (see reports on these classes in the *Paper Trade Journal*); C, paper making materials; D, printing, publishing, stationery, etc.—1, stationery requisites and account books; 2, bookbinding; 3, publications; 4, printing; 5, artistic and drawing materials; 6, electrotypes, stereotypes, woodburytype, type founding and lithographic stones; 7, lithographic proofs, photographic proofs and embossing; 8, writing inks, wax pens, pencils, penholders, office cement, etc.; E, printing inks. The exhibits under the above mentioned heads were 160 in papers, 38 in printing and writing inks, and 440 in the other classes, making a total of 638.

Leaving the official report of the jurors in the classes which included ordinary paper to the *Paper Trade Journal*, which represents the trade, and turning to their remarks upon fancy stationery, paper and envelopes, the chairman of the jury has reported to the Commissioners that "C. Goodall & Sons, London, kept up their well earned reputation by their exhibit in this class as also of drawing and bristol boards, in both of which the goods shown merit the highest commendation. They also showed playing cards and menu cards which displayed artistic taste of a high order and great care and delicacy in printing. The colors were good and bright, the outlines sharp and well finished; the designs both of papers and packages deserved to rank as Fine Art; their Japanese, Pinfold and other fancy note papers were commendable for their beauty and excellence." Such being the opinion of the jurors, these well known manufacturers were awarded the highest honor—first order of merit. The city warehouses of these exhibitors are at 17 St. Bride st., Ludgate Circus, London, and their manufactory in Great Camden street. Their exhibit was well situated in a most expensive and elegant showcase, and its contents attractively displayed. These included playing cards, Christmas cards, mounting boards, cardboards, ivory and message cards, ball programmes and menu cards, writing papers and envelopes in special boxes.

Following on this subject the report says: "A. Pirie & Sons, Aberdeen, exhibited a grand collection of paper"—referring to machine-made writings described in the *Paper Trade Journal*—"as well as fancy stationery papers, envelopes, blottings and drawing papers. Their exhibit of machine-made imitation hand-made papers closely approach all the excellences to be found in hand-made papers. They displayed great taste in their repp papers, both in design and tint, as well as in the excellence of material and finish." Of course they were awarded the highest distinction in the department on which I am writing, which makes two awards of the highest order of merit for those enterprising sons of Caledonia. The readers of THE STATIONER in every part of the world are aware of the excellence of the manufactures produced at Stoneywood and Woodside works near Aberdeen, and the Union works in that city. At all events, to a graphic account which appeared in THE STATIONER a few years ago, I am indebted for my knowledge of and veneration for this long established house. They have warehouses in Paris, Dublin, and in Farringdon street, London. You know how well they were treated at the Centennial Exhibition, and your correspondent is aware that they got six awards of the first order of merit at the Sydney International Exhibition.

"In this description of goods" says the report of the jurors, "the Austrian court merited equal eminence. The exhibit of Theyer & Hardmuth, of Vienna, consisted of note paper and envelopes in unique designs and colors—some of which were evidently intended for the Eastern trade. All were turned out in first class style, some of the hand-painted designs were gems in their way. Their designs in embossed papers, both of monograms and of crests, plain and in colors, were exceedingly well executed." The manufacturers were awarded the highest distinction—first order of merit.

Another Austrian manufacturer also obtained the highest award, and the jury added in its report the following complimentary observations. "F. Plentl's Sons, of Gratz, exhibited a great variety of pressed fancy note paper and cards to match. Those worthy of special mention were the Edelweiss, Alpine Flora, Garden Flowers, Carrier Pigeon, Swallow, Cupid's Envoy, Knight Emblem, Rhine Flora, Alps and Little Puss papers. —the most of which were hand-painted with considerable taste. They were packed in neat boxes containing five assorted colors, or with the colors in distinct boxes. The 'Grey Foncé' and 'Dulled White Ribbed' were very chaste. But these Austrian firms put up their papers in boxes of fanciful designs, some of which were highly ornamented." It is to be hoped that the manufacturer's name is written properly, and that you will send a copy of THE STATIONER to the Library of this capital city of Styria. One of those officials connected with the Austrian court stated that the leading papers of Europe are taken there. He knew the *American Mail and Export Journal* and pronounced it to be the best trade paper in the world.

The jurors made no further comments under the head of "Fancy Stationery, Paper and Envelopes." They however, awarded the second order of merit to Fourdrinier, Hunt & Co., Ludgate square, London. These well known manufacturers, in a neat showcase, which I well know, had a nice display of writing and printing papers, envelopes and playing cards; and there is reason to hope that the jurors may raise them to the higher position.

The third order of merit was given in this class to W. Collins, Son & Co., Glasgow. This is a first class house, and its representative at the Exhibition cannot be complimented upon the manner in which the goods were placed before the jurors. It was different in Sydney, where the firm obtained two awards of the first degree of merit. When will people learn the value of the words, "What is worth doing is worth being well done?" Also, that the work of clever men should never be delegated to thoughtless boys. It is not surprising to those who are well acquainted with the merits of this firm and the worth of its principals as members of society that it is doing a large trade in Australia. The third order of merit in envelopes was obtained by Sands & McDougall, Melbourne, in this class; to Spicer Brothers, London; Hoffsummer Brothers, Düren, Germany; A. Binda, Milan.

OFFICE REQUISITES AND STATIONERY.

Under this head the jurors have included various miscellaneous office furnishings and stationers' hardware. The jurors, in their official report to the Commissioners, say that "Fairbanks & Co., St. Johnsbury, Vt., and New York, U. S., exhibited 'postal letter balances,' with both double and single beam and possessing that beauty and accuracy of finish for which this description of goods from the United States is so justly famed." This is the fourth award, each of the highest distinction, which has been given to the celebrated manufacturers of the United

States whose goods are recognized as most accurate in all parts of the world.

The competition, however, here in all weighing apparatus and letter balances is most formidable. The jurors' report says: "W. & T. Avery, Birmingham, Great Britain, exhibited letter balances of excellent design and pattern, suitable for office or private use. The higher grades display elegance of form and beauty of chasing, combined with great accuracy and sensitiveness. These goods are first class."

"S. A. Daniell, Birmingham," write the jurors, "showed a large assortment of copying presses of various sizes, also lever-embossing stamps. These goods were all in high-class and low in price; the parts fitted accurately and were well finished." This is a good compliment, besides an award of the first order of merit. This exhibitor is the proprietor of the Lion Works, Edward Street Parade, Birmingham.

Another Birmingham exhibitor in this class also obtained the first order of merit and the following record from the jurors: "J. S. Downing, Birmingham, exhibited an assortment of cabinet goods and stationers' hardware, consisting of stationery cases, inkstands, letter balances, of which latter his 'Ready patent letter balance' was a useful article, doing away with the trouble in connection with weights; also, safety ink bottles, combined memo-calendar and pen rack, letter clips of neat designs and date cases. A very useful article exhibited by this house was a combined stationery case inkstand and book rack, as was his 'Revolving shutter stationery case.'" Here we find three Birmingham men who obtained three awards in stationery articles, which must have cost in cases, freight, attendance and other necessary expense, not less than $10,000, and which they would not have lost for so many pounds sterling. Mr. Downing particularly, whose factory is known as the Crown Works, Commercial street, Birmingham.

The report of the jurors goes on to say that "A. Dubourguet (33 bis Boulevard Magenta), Paris, France, exhibited an extensive assortment of inkstands and letter balances of tasty design, both in ordinary plated ware and Japanese and Egyptian bronze. Their fountain inks were pretty articles for the library or office table. A Louis XV. inkstand, with globe in centre, and another with a bronze gong in centre, were both useful and ornamental. They exhibited also walking canes, combining pen and ink receptacles." This exhibitor was also awarded the first order of merit.

We are told that "rubber stamps were exhibited by W. T. Clark, Melbourne, Victoria, embracing a great variety from small crest or monogram to stamps for printing directly on tin cans, these latter obviating the trouble and expense attending the use of labels. This house exhibited a useful novelty in the shape of a self-inking pocket stamp which should have a general demand. All these goods were well finished and creditable samples." He obtained first order of merit.

Like an oasis in the desert we drop across an old acquaintance, though a new chum in Australia, and one that very soon will be colonized and as independent in the trade as exhibitor whose goods are placed within the building. The chairman of the jurors thus introduces his wares to the Commissioners: "An exhibit and an efficient compound, termed 'Puzzoline,' was made by the Puzzoline Company, Boston. This material possesses great strength and other features of superiority over the general run of this class of goods." This "cement of the ancients" obtained an award of the highest order of merit. Stationers are invited to correspond and no doubt many of those who have read the announcement in THE AMERICAN STATIONER here, coupled with the verdict of the jurors, will correspond. The address is plain and our friends will command a large trade in Australia.

The jurors make no mention in their report of those who have not been awarded first class. The owners of the "Russell's Common Sense binder"—Williams, Skillings & Co., New York—came in a most excellent second. The binders were shown as exhibited on the Lockwood Press publications, and were the only articles in connection with the pavilion of Howard Lockwood that did not get a first degree of merit. There can, however, be no doubt that it will lead to business which will make that handy article known in Australia. Perhaps already applications have been made for the agency in Australia or indents ordered.

In the second order of merit we find Shriver & Co., New York, copying presses. The name of T. Shriver & Co., of 333 East Fifty-sixth street, does not appear in the official catalogue of the United States court; and, as I could not find the exhibit, there must be something radically wrong—something that may account for the excellent manufactures of the firm being—to use a sporting term—in the ruck. Surely the copying presses of this firm, if catalogued or displayed either here or at Sydney, would not suffer by comparison with that of any maker in the world. The firm received the only medal awarded at the Paris Exposition of 1878, and it is well known that its presses are made of all sizes, from the smallest to the largest in use, of all styles, from the lowest price to the most elaborate finish. Explanation may be useful to the company.

Charles Bowman, 6 King street, Tower Hill, London, made a fair display of stencil ink, plates and brushes, marking ink and ink powder; obtained second order of merit.

J. Semple, Glasgow, showed self-inking indorsing stamp, and obtained second order of merit.

W. Peipers, Cologne, obtains second order for stationery.

Third Order of Merit—Cooper & Co., London, for vellum, parchment, quills, &c.

Hudson & Kearns, London, diaries and note books.

Weekes & Co., London, music portfolios.

A. Doubourguet, Paris, stationers' hardware.

F. W. Falke & Co., Mangelburg, Germany, pocketbooks, &c.

A. W. Faber, Nürnberg, Germany, office requisites.

The Philadelphia Novelty Company, stationers' sundries.

C. G. Roesler, Melbourne, rubber stamp.

Fourth Order of Merit—H. Harrett, Melbourne, copying presses.

Fifth Order of Merit—R. B. Turner, Brussels, rubber stamp.

Here in the class, which includes office requisites and stationery, we find six in the first order of merit, two of whom are Americans, one Victorian, and three from England. Of course, America has the best of it. In the second order of merit there are five—two British and two American, and the gentleman of Cologne. Here the Americans are again in good company—the best percentage. There are eight prize takers of the third order of merit—three British, one French and one American; the latter do not figure much in the rear ranks. In the fourth and fifth orders a Victorian and a Belgian are respectively masters of the situation.

None but those who have obtained the first order of merit will have medals; whether these decorations will be of gold, silver or bronze, the public does not know. All others will get certificates.

Many are preparing for the Adelaide Exhibition, which may be much better than some suppose. At all events, South Australia is a rising country, and its commerce is yearly increasing. There can be no doubt that the result of the Melbourne Exhibition will increase business relations between Victoria and the United States.

——— J. H.

MELBOURNE, April 18, 1881.

PUBLICATIONS OF THE UNITED STATES.

The chairman of the jurors—John Ferres, Esq., late government printer, Victoria—in his report to the Commissioners, has written as follows: "The United States court exhibited some superior specimens of printing and publishing. Howard Lockwood, proprietor of the Lockwood Press, Duane street, New York, ably represented the printing and publishing enterprise of the United States. He exhibited printing, publishing and photo-typography. This exhibit included THE AMERICAN STATIONER, the *Paper Trade Journal*, the *Musical and Dramatic Courier*, the *American Mail and Export Journal*, the *Millers' Journal*, the 'Stationers' Price Book' and 'Lockwood's Directory of the Paper Trade, 1880.' The *American Mail and Export Journal* is a high class trade medium, well printed, and meets an evident want in commercial circles. THE AMERICAN STATIONER is a useful publication for those in the trade, and is superior to any other similar publication. The 'Stationers' Price Book' is an annual, and as a work for immediate reference it is valuable to those in the trade. The *Musical and Dramatic Courier* was illustrated with vignettes of stage celebrities; is well printed and well posted with items of interest to those for whom it is intended. The photo-typographic exhibit was a copy of this paper, and though reduced one-ninth, every letter was as clear and as distinct as the original letter press. The 'Directory of the Paper Trade' is an annual and useful publication, as a work of reference to those connected with the trade. The specimens of job printing of the Lockwood Press embraced circulars, posters, books, &c., in English and German. The finish and style in all cases, whether the letter press or illustrations displayed tasteful design and superior workmanship, while the prices were exceedingly low. Then, THE AMERICAN STATIONER has been awarded two awards of the first order of merit—one for its printing, and another for its publication. However, leaving details aside, the Lockwood Press obtained an award of the first order of merit in the fine arts section—first order of merit for publications; first order of merit for printing, and first order of merit for typography.

"G. & C. Merriam, Springfield, Mass., exhibited their 'Webster Unabridged'—the standard dictionary of the United States. This work contains nearly 2,000 pages and over 3,000 engravings. The illustrations and printing were such as to place it in the first rank of English lexicons." Such is the report of the jurors, and they accordingly placed our friends in the highest position—first order of merit—a well deserved compliment.

The next is the report on books for children. The jurors say: "McLoughlin Brothers, New York, exhibited illustrated toy books, for which they received awards in publications and printing. They displayed in great variety many attractive novelties; the colors were bright, the illustrations artistic, and the letter-press clear

and distinct, while the prices were exceedingly low."

Daniel Appleton & Co., New York; Houghton, Mifflin & Co., Boston, Mass., were also awarded first order of merit for their publications; the special report and the recommendations of the jurors will appear in due course. The publications from the United States which were awarded second order of merit were those of George Barrie, 615 Sansom street, Philadelphia, to which my attention was never called. They may, however, form the subject matter of a few lines hereafter.

Another publication which was awarded the second order of merit was "Hill's Manual of Social and Business Forms," by the Hon. Thos. E. Hill, and published by Moses Warren & Co., 103 State street, Chicago. It is educational, social, commercial and legal. The representative of the exhibitors could have sold hundreds of copies to the leading visitors, but was precluded from entering into such business. The work is sold by subscription, and there can be no doubt that in a few weeks, when the subject is brought prominently before the public of Australia, there will be found enterprising men who will handle this work in Australia. There are lots of money in it, and it is a publication which will find a place on every table of people who read the English language.

BOOKBINDING.

In the United States court, D. Appleton & Co., New York, exhibited a collection of works competing in bookbinding, printing and publishing. "The books of this firm," says the official report, "were all of first-class merit. 'The American Cyclopædia' and 'Picturesque America' are two works issued by them which claim special mention. The typography is clear and the woodcuts and steel engravings were carefully and elegantly printed." This well known firm then have obtained three awards of the first order of merit—printing, book binding and publications.

The only other American exhibitor who obtained an award in bookbinding was the firm of Houghton, Mifflin & Co., Boston, Mass, which was placed in the second order of merit. This is singular—it has a high reputation, but possibly the best specimens of its workmanship were not before the jurors.

AMERICAN PRINTING.

In publication and printing the house of Houghton, Mifflin & Co., Boston, Mass., has obtained two awards respectively of the first order of merit, and yet in the special report of the jurors the names of these eminent publishers do not appear, neitherare their exhibits catalogued. This will have your correspondent's immediate attention.

"The United States public printer, Washington, D. C.," writes the chairman of the jurors, "exhibited a work in three large volumes entitled 'The Medical and Surgical History of the War of the Rebellion,' which was well illustrated; in the printing, care and skill had been displayed. The exhibits under this head of the 'Reports of the United States Bureau of Education' was also of equal merit." The public printer at Washington was accordingly awarded the highest distinction—possibly a gold medal.

From public skill the jurors turn to private enterprise. The chairman, in his excellent report, always gives merit where merit is due, and it is satisfactory to learn that "A small but tasty and well executed exhibit of color printing, displaying both skill and excellence in workmanship, was made by Matthews & Warren, of Buffalo, N. Y." This is one of the exhibits on the pavilion of the Lockwood Press, and was awarded the highest distinction. If the public printer at Washington obtains gold, so will Matthews & Warren, of Buffalo. Their show cards, printed from the colored inks of H. D. Wade & Co., New York, are simply equal to the rainbow in majesty of colors. Their exhibit has attracted the attention of visitors from all nations.

"Kelly & Bartholomew, New York, exhibited the *American Model Printer*, a high class serial publication, which was a splendid sample of the perfection attained by typography in the United States. The designs upon the covers and the illustrations and letter-press of each number were unsurpassed." These exhibitors were awarded first order of merit.

The other Americans who obtained the highest in printing were McLoughlin Brothers, New York; D. Appleton & Co., and Howard Lockwood, "Lockwood Press," New York.

CHROMO LITHOGRAPHY, &C.

In the division which embraced lithographic proofs, chromo lithographic proofs, photo-typographic proofs of engravings, the chairman, in the official report, states: "The American Bank Note Company exhibited colored engravings of bond coupons, share scrip, bank and government notes, and postage stamps, all well executed and artistically arranged." The company obtained highest order of merit—richly deserved.

"J. A. Lowell, Boston, United States," continues the official document, "displayed steel plate engraved cards printed by the 'dry printing process,' suitable for programmes, menu and other business purposes. The delicacy of shading brought out by this process was unsurpassed anywhere, and displayed general and mechanical excellence." This enterprising manufacturer obtained the highest award—first order of merit.

"Forbes Litho Company, Boston," writes Mr. Chairman Ferres, "exhibited colored lithographs and label work which were both cheap and good. Their large theatrical posters were excellent specimens of photo-lithography." This company obtained the highest order of merit.

Treating on the exhibit of L. Prang, Boston, the report says that he "showed a number of specimens exhibiting the perfection of chromo-litho work in a commercial point of view. One subject shown necessitated forty-five different paintings. The skill which was necessarily displayed in the accurate registering of such work and the gradations of tint were extremely meritorious." This prince in his business was awarded the highest order of merit.

The only other American exhibitor in this class who obtained an award of the first order of merit was Howard Lockwood, of the Lockwood Press, New York, for photo-typographs of the *American Mail and Export Journal* and of the *Musical and Dramatic Courier*.

Currier & Ives were placed in the second order of merit. These exhibitors showed specimens of their colored lithographs of New York, Boston, Philadelphia and other American cities. Their works are excellent and deserved to have the highest distinction.

PENS AND PENCILS.

The chairman, Mr. Ferres, treating on the pens and pencils shown in the American court, states that "Aikin, Lambert & Co., New York, United States, made a fine display of gold pens, penholders, and pencil cases. The pens were specially pointed and possessed many features of superiority over steel goods—durability and consequent economy being not the least. The designs were chaste and the ornamentation artistic." Of course the manufacturers were ranked in the highest order of merit.

Following up the report, the chairman tells the Commissioners that "D. MacKinnon & Co., New York, exhibited the 'MacKinnon pen.' The principal feature of this pen was the fountain or supply of ink contained in the holder, enabling an immense amount of work to be done in less time and with less fatigue than ordinary, and, though not suitable for stenography, it must prove a boon to all other classes of constant and rapid writers." Of course your friend, the MacKinnon Pen Company, was awarded the first order of merit.

PRINTING, WRITING AND COPYING INKS.

The chairman, in closing his report to the Commissioners, lays particular stress that "the jury took special care in testing the various exhibits under this head. The awards made show, in their opinion, the relative worth of the different exhibits, taking into consideration their various merits and prices. H. D. Wade & Co., New York, submitted a number of samples. Their book ink, job black, quick drying and extra fine book were good inks. The 'Rose lake' was ex tra good and very bright. The 'Oriental blue' and 'Cardinal carmine' were also extra good. The deep bronze blue, lake, carmine, extra fine red, and geranium scarlet were all very good inks. The deep blue and orange yellow, royal green and yellow gold size, were also very good." After such encomiums these exhibitors were awarded first order of merit for their black ink and first order of merit for their colored inks. This, indeed, was but what was well merited and after the most severe practical test.

Charles E. Johnson, of Philadelphia, also stood very high; he obtained an award in both black and colored inks, of the second order of merit. The best space that the executive manager, Mr. Pickering could give (in the main hall) was placed at his disposal, and even in the catalogue of the United States court, printed by Mr. Pickering, we find in it "Charles E. Johnson, Philadelphia, Pa., printing inks. This catalogue is printed with Johnson's ink." So that Mr. Johnson has nothing to complain of. No doubt Mr. Pickering will take great credit to himself for having secured so many awards; in fact, Wade's inks will reckon among the number. However, while acknowledging Mr. Pickering's general good management and the general courtesy of the secretary—J. C. Earle—it must be emphatically asserted, that the rank and file did their duty, and, in some cases, where he had failed, paid their guineas, demanded experts and obtained the highest award.

In Juvet & Co.'s time globes the same may be asserted. Of these, full information will be forwarded by the next mail. They, however, obtained three distinctions. The representative of the *American Mail and Export Journal* never worked harder, and it is well known that he had some unpleasant correspondence at an early period of the Exhibition, through a removal of showcases from one place to another.

Turning to the writing inks, the chairman of the jurors, Mr. Ferres, in his report, said: "Carter, Dinsmore & Co., Boston, Mass., United States, exhibited excellent samples of copying, 'combined copying and writing,' and black, and black and colored writing inks. The writing fluid for bookkeeping was commendable for being a good color, flowing freely, and throwing no deposit when exposed. The violet, black, boudoir, crimson and carmine were all excellent inks." These manufacturers obtained three awards of the first order of merit—one for black, one for copying, and one for colored inks. They also obtained the highest award for their mucilages. This is satisfactory.

Let me close this letter by thanking the gen-

tleman who represented the United States on the jury, Mr. Manson. Allow me to recognize the courtesy which I received from all members thereof and the gentleman who acted as their secretary, Mr. Sinclair, whose acquaintance extends over a period of eight years. Indeed, I am highly pleased with all of the officials of the Melbourne International Exhibition; they were all urbane, courteous and obliging. J. H.

Address Australian Correspondent AMERICAN STATIONER, Box 86 G. P. O., Melbourne; or Box 337 G. P. O., Sydney.

TORONTO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., May 28, 1881.

Upon the whole, we have had charming weather this month. A few very warm days, in which the thermometer touched ninety in the shade, made winter underclothes a nuisance and resulted in copious perspiration. But observant people, knowing something about the vagaries of our northern climate, suffered on, and in due course a change came, and a most agreeable and needed one, in the shape of a week of fruitful showers, which dropped their fatness upon the parched earth, transforming the face of the whole country into luxuriant verdure. Every tree and plant seemed to exult in the humid weather and unfolded their leaves with marvellous rapidity to catch all they could get of one of the most important elements of their existence. The woods and fields have put on their new dress, and a short run west last week made me long to get away from the noise and bustle of the city and enjoy for a little the quiet and beauty of the country.

We, like the rest of the world, have been on the *qui vive* for the long talked of revised edition of the New Testament, and every bookseller, from Dan to Beersheba, has been canvassed for orders long ago. But Mr. Briggs, the energetic manager of the Methodist Book and Publishing House of this city, perfected his arrangements so that he came in ahead, receiving his packages on Saturday, and they were employed until nearly midnight in delivering to anxious throngs. On Monday other houses received their parcels, and the old Book in its new dress is likely to find by far the largest sale of any publication this century or any other. And what about it? Every one will have his opinion. Every biblical scholar knows there were defects in the old rendering. But, it seems to me, while some of these have been remedied, a great many alterations have been made which are no improvement. "No man also having drunk old wine straightway desireth new, for he saith the old is better." I believe this to be true in this case. However, great good may come of it, for thousands will be induced to read the Word who have not done so, and when they are reading to make comparisons. It is to be hoped the truth may find a permanent lodgment in their hearts.

The failure of the well known firm of Hart & Rawlinson, in this city, was a great surprise. They have been for some time the most enterprising booksellers we had—carried a fine stock—had a select trade, and were looked to as the exponents of good taste in their way. It seems, however, that in the original purchase they acquired a large amount of old and useless stock, and not having capital enough to overcome this dead weight it has at last brought them down. The firm has the sympathy of the public. They were prudent, industrious men, and it is hoped that a settlement may be made which will enable them to continue with a prospect of success.

Last week's Ontario *Gazette* contains an application for a charter for the Toronto Paper Manufacturing Company, for the manufacture of fine paper. The capital is put at $250,000; of which $80,000 are already subscribed.

There seems to be no end to the new industries that are in progress and contemplated in the Dominion. A cotton factory in Halifax, with a capital of $300,000, all taken up; a cotton factory at Kingston, Ont., now being built; a company with a capital of $50,000 has been formed in Montreal for the manufacture of blankets; a manufactory for the making of lucifer matches, with a capital of $50,000, at Chatham, Ont. There are several beet sugar manufactories under way, and various other factories.

The first steamer of our new German line is now in Montreal. The Brazilian line will commence in June, and a line to France about the same date.

The York Envelope and Manufacturing Company is full of orders, and W. J. Gage & Co., who are now putting in machinery to make envelopes, expect to be at work soon.

Bingham & Taylor, printers, departed about two weeks ago on short notice, and have left a number of our people with balances on the wrong side of the ledger. They commenced without any capital, were good workmen, and succeeded in getting into quite a large business. But their progress was too rapid. The inevitable put in an appearance, and they vanished.

James Vannevar, bookseller, Yonge street, owing to the failure of Hart & Rawlinson, has been compelled to make an assignment.

The 24th of this month, which is kept throughout the Dominion as a holiday in honor of the birth of our gracious Queen, was a charming day, and our citizens enjoyed it in many ways. There were games, military display, excursions, fireworks, &c., which all passed off delightfully. But in our sister city of London, in the western part of the province, one of the most heartrending calamities of the century occurred by the upsetting of an overcrowded excursion steamer, by which more than two hundred lives were lost. The terrible accident took place between 6 and 7 P M., and was not generally known until the following morning. It has cast a gloom over the whole province. C. H.

"THE GREAT ROCK ISLAND ROUTE"
Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

INTERIOR VIEW OF CAR.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

FOLEY'S
Celebrated Gold Pens and Pencils
THE FINEST AND BEST.

CIRCULAR.—To those engaged in mercantile pursuits, any invention that will facilitate their labor is highly worthy of notice, as well as of extensive patronage. One of the most important inventions of the present age is that of a pen that possesses the necessary qualities of firmness in mark and durability in use. Pre-eminently such are those of JOHN FOLEY, Manufacturer of Fine Gold Pens and Pencils, No. 2 Astor House. Their superior value is tested by the long time he has been engaged in our city in their manufacture. We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

Extra Fine Papers

Manufactured by

Z. CRANE, Jr., & BRO.,

DALTON, MASS., U.S.A.

These Papers, which are acknowledged to equal the finest foreign manufactures, are presented in the following styles and qualities:

REGULAR QUALITY.

handsome Light Blue Packages containing one-quarter of a ream of Note Paper each, and bearing in blue letters description of contents.

In a separate Package of uniform size, is one-eighth of a thousand Envelopes corresponding in tint and quality to the paper.

EXTRA QUALITY.

In attractive Lavender Colored Boxes containing one-quarter ream of Extra Fine Paper each, with contents printed in red. Corresponding to this, in like Boxes, are Envelopes to match.

All this Stationery may be relied on to be according to representation. It is suited to the tastes of the most select trade.

In addition to the above lines, our other Specialties are put up with care, in attractive and substantial form. Goods can be seen at the Mill, or New York Office, *47 Beekman Street.* GEO. B. HURD, Gen'l Agent.

PERFECTED STYLOGRAFIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS,** the last, June 29, 1880, being the most important and giving the name **Perfected.** All cuts are exact size.

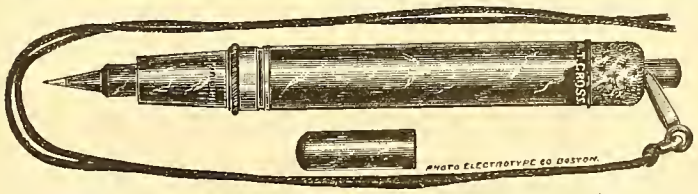
MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambler's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra long. Holds most ink, except the **Maximum.**

SHORT.—Most widely known and sold heretofore; but Maximum and Long are much better for desk or Hambler's Pocket. So this will be largely superseded.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined.

☞See Descriptive Circulars.



Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, all of which will have the new improvements.

☞See Descriptive Circulars.

GIANT, with Cord and Gold Ring. same price as Short.

LITTLE GIANT, Plain, - $3.00.
All Styles up to $4.50.

☞ **LITTLE GIANT.—The Ladies' FAVORITE.**

This Miniature Cut is for Agents' Cards,  Newspaper Advertisements, &c., &c., &c.

Bottle for Quarts, Pints, 8 oz. Packed One Dozen, in cases.

CAW'S BLACK FLUID

Is the only known Ink that is

Positively Non-Corrosive to Steel Pens.

Flows freely; does not thicken by exposure, and has the decided advantage of writing **BLACK AT FIRST.**

— WARRANTED —

To Write Black Instantly.

To Flow Freely.

Not to Fade.

Not to Mould.

Not to Thicken.

Not to Corrode Steel Pens.

☞ A Copy of the above is printed on all labels for **Caw's Black Writing Fluid,** for the purpose of attracting attention to each especial feature claimed. This is done to facilitate its introduction, and that the consumer, when using, may notice its merits, and thereafter use it in preference to the unsatisfactory thick, black inks, or pale, green writing fluids of the past.

NEW STYLE OF STANDS.

Packed 3 dozen in Case.

The above is the exact size of No. 1 Stand.
No. 2 being twice this size.

FOUNTAIN INKS.

These Inks are expressly prepared for use in Fountain Pens. Put up in two sizes of bottles. No. 1 containing the same as cones or other styles of bottles generally sold as 3 oz., the Stopper arrangement being very convenient for both Fountain and other pens. No. 2 is twice the size of No. 1, and has a new device for filling Pens that keeps the Bottle always corked and free from dust, even while open ready for use.

FOUNTAIN INK CO., Manufacturers, 192 Broadway, New York.

THOS. DE LA RUE & CO'S

Christmas and New Year Cards

FOR THE SEASON 1881-2.

Pattern Books of the above Fine Art Publications, containing a rich profusion of New and Elegant Patterns, Chromo-Lithographed in the Highest Style of Art, after Original Designs by Eminent Artists, are now ready.
N. B.—Shown by Principal Jobbers in the States.

PROSPECTUS TO THE TRADE.

GENTLEMEN—In offering our Pattern Book of CHRISTMAS AND NEW YEAR CARDS for the approaching Season to the attention of the Trade, we desire once more to express our acknowledgments to our Customers in the United Kiugdom, the United States of America, and many other parts of the world, for the increasing appreciation iu which our productions are held, and which has given them a position of pre-eminence wherever shown. This fact has been established by the concurring testimony of the Press, both at home and abroad; but it is perhaps most conclusively attested by the circumstance that the peculiarities of our style and treatment have found numerous imitators, whose endeavor it has been to give to their productions the closest possible resemblance to ours. The futility of those efforts is, however, assured beforehand, from the fact that we are fortuuate enough to retain, almost without exception, the EXCLUSIVE services of those eminent Artists to whose talent and skill we are indebted for the principal Designs included in our Collection.

In preparing the Patterns for the new Season, we have faithfully adhered to the same general principles as in former years, and have thus been enabled to secure both originality and unconventionality in our Designs. We have, at the same time, taken care to impart freshness and novelty to the subjects selected for treatment, with the result that the assemblage of Patterns now offered is of the most varied and attractive character.

Our Pattern Book is more extensive than on any former occasion, and, unlike most of the Pattern Books now in the market, contains not a SINGLE PICTURE that has been previously shown. Among the Series given, we may be permitted to call special attention to the following:

Embroidery Series.—These Satin Chromos have now an established reputation amongst ladies, and, when worked up as insertions in embroidery and other needlework, have a really splendid appearance. In addition to a fine display in the ordinary sizes, we this year offer an extra large Satin Chromo of "Cupid and Psyche," excellently adapted for a chair cover, cushion, anti-macassar, or other object in art needlework.

The Book-marker Series.—These are of a very superior and artistic character, highly suitable for presents.

Through the kindness of Sir Henry Cole, K.C.B., the originator of Christmas Cards, we are enabled to offer a FAC-SIMILE reproduction of the FIRST Christmas Card ever issued. These cards were published in 1846, from a design prepared by J. C. Horsley, R. A. When it is considered what an enormous extension the issuing of Christmas Cards has undergone in the thirty-five years which have elapsed since that time, this ORIGINAL card (Series No. 459) cannot but be regarded with great interest and curiosity. We have, therefore, reproduced it in a popular form, to retail at a low price, and would recommend its being made a prominent feature in every shop window. Awaiting the favor of your commands,

We remain, yours faithfully,

THOS. DE LA RUE & CO.

BUNHILL ROW, LONDON, E. C., May, 1881.

☞ Full Descriptive Price Lists may be had on application to

☞ Letters may be addressed to their American Representative, **Mr. A. J. PULSFORD** (P. O. Box 1590), **New York.**

N. B.—To prevent delay, all applications for Pattern Books should be made to Mr. Pulsford, as above.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

The fan trade for this season will soon be over.

N. A. Hanna, newsdealer, &c., Cadiz, O., has been burned out.

Thos. O. Jarvis, printer, Cincinnati, O., has assigned to J. H. Thomas.

Jacob Hahn, of Jacob Hahn & Son, dealers in notions, Philadelphia, Pa , is dead.

Mowat & Co., printers and publishers, Galt, Ont., Can., have sold out to James Young.

Siglin & Bennett, publishers and printers, Marshfield, Oregon, have dissolved partnership.

H. C. Stowell & Co., publishers of the *Democrat*, Crosswell, Mich., have dissolved partnership.

M. E. Marsh & Co., publishers of the *Journal*, Port Huron, Mich., have sold out to Henry Whiting.

D. M. Camp & Co., printers and stationers, Newport, Vt., have admitted Homer Thrasher to partnership.

The stock of E. H. Willey, newsdealer, etc., Odebolt, Iowa, has been attached. He is reported as having left town.

A. S. & T. P. Randall, manufacturers of paper boxes, Chicago, Ill., have dissolved partnership. Duck & Wilcox continue.

It is said that during the next month unusually large quantities of fancy cards will be shipped to this country from Europe.

Delaney & Smith, wholesale dealers in notions, Philadelphia, Pa., were advertised to be sold out by the sheriff on the 31st ult.

A. K. Loring, publisher and stationer, Boston, Mass., has suspended payment. He will call a meeting of his creditors at an early day.

Thomas J. Smith has associated with the firm of A. R. McCown & Co., wholesale dealers in notions, &c., Philadelphia, Pa. Style remains the same.

There will be quite a revolution in the photograph frame trade this year, as nearly all of the old designs will be superseded by new and more exquisite ones.

A. W. McCoy, Pittsburg, Pa., and Wells Southworth, Mittineaque, Mass., were among the visiting members of the stationery and paper trades to the city this week.

The advertisement of Parmenter & Walker, Waltham, Mass., to be found in another column, should be read by the trade. It refers to school crayons, white and colored.

Henry Bainbridge & Co. have just brought out a fine line of walnut stationery cabinets. These goods were made up on the special order of the firm, and are claimed to be just the thing for the purpose intended.

Reynolds & Reynolds, Dayton, Ohio, are the sole manufacturers of the "Consecutive" blank book. This, with their other specialties, the "Flexible" memo. book and cover, the "Economic" memo. book and cover, and their "Always Level" writing tablet, deserves the attention of the trade. Their advertisement will be found in another column.

Charles J. Cohen, 505 Chestnut street, Philadelphia, manufactures under his personal supervision a very superior grade of mucilage. The last batch produced has been specially put up for fine retail trade in white glass 3 oz. bottles, neatly capped with a new style of cover bearing the trade mark of the firm. This is put up in wooden boxes of one dozen bottles, each bottle wrapped in paper and accompanied with a fine brush and good metal cap. Only pure gum arabic of a high grade is used in the production of this brand, known as "Double Strength." It is also put up in quarts and pints for office use.

A new association, called the United States News Company, has been organized for the transaction of business in newspapers, magazines, periodicals, &c., on somewhat similar principles to the American News Company. W. M. Chapman, for eighteen years connected with the latter company, is manager, and several members of the association were also employees of that company. Business began at two o'clock yesterday morning. It is said that the prospects are bright for the new organization.

A. Weidmann, of A. Weidmann & Co., returned a few days ago from Europe, where he has been for some months selecting goods for the fall trade. He reports that there are more American buyers than usual at present on the other side, and that, were it not for them, trade would be rather dull. He refers to the fact that fancy goods and pencils are being greatly run upon by the Americans, and that the latter goods have been recently advanced in price on that account.

Koch, Sons & Co. have just finished their new goods for the coming season. They have been quite successful in producing a most attractive line and an entirely new departure. They have brought out many new designs in albums, scrap books, card albums, desks, backgammon boards, music folios, music cases and wrappers; in fact, have made great improvements in all the different lines of goods which they manufacture. Buyers are invited to pay the firm a visit to examine and see the goods for themselves.

The new version of the New Testament is having an immense sale in Philadelphia as everywhere else. A. J. Holman & Co. received 20,000 copies of the Oxford and Cambridge editions, which were sold in three days. The firm then ordered several thousand more, but as this order was exhausted in advance of receipt it cabled a third order for 20,000 additional copies. It is impossible to tell when the demand will begin to abate, as the orders continue to arrive in large numbers.

The attention of the trade is invited to two advertisements of the American Crayon and Slate Company in other columns. One of the advertisements refers to soapstone slate pencils, and the other to the general goods handled by the firm. A representative of the company has just returned from a flying trip to some of the largest cities in the United States, and reports prospects for trade good, and an increased demand for soapstone pencils.

The demand for Cooke & Cobb's "Favorite" letter file since its introduction has been far greater than the anticipations. This article will have to be seen to be appreciated. Samples can be had on application by forwarding postage.

Z. Crane, Jr., & Brother, Dalton, Mass., own the patent on "spinning wheel" covers for water mark, also for printing or stamping on paper. They claim that others cannot justly use it, as it is their exclusive property and trade mark.

L. Z. Watson, publisher, Watseka, Ill., has sold out.

Mrs. M. G. Wrisley, fancy goods dealer, Turners Falls, Mass., has sold out.

James Vanneva, bookseller and stationer, Toronto, Ont., has assigned in trust.

Frank A. Moriarty, publisher of the *Republican*, Council Grove, Kan., has sold out.

James Brown, publisher of the *Daily Herald*, Nashville, Tenn., has made an assignment.

Daniel Sweeney, of Hayward & Sweeney, paper stock dealers, New York City, is dead.

Tenney & Twitchell, paper manufacturers, Peterboro, N. H., have dissolved partnership.

S. M. Williams, bookseller and stationer, Minneapolis, Minn., is advertising his stock for sale.

In almost every line of the stationery business complaints are being made as to present dullness.

Wm. Gray, stationer and bookseller, San Francisco, Cal., is advertised to be sold out by the sheriff.

Barker, Smith & Owens, printers, St. Louis, Mo., have dissolved partnership. Smith & Owens continue.

The firm of Stephens & Perry, booksellers and stationers, Binghamton, N. Y., has been succeeded by G. S. Perry & Co.

R. E. Farnum & Company, booksellers and stationers, Flint, Mich., have dissolved partnership. R. E. Farnum succeeds.

Several houses are adding new lines to those handled by them last year, but are keeping the matter secret until they are ready to show the goods.

The new designs and styles in photograph frames now in course of preparation will, when exhibited, it is said, surprise those interested in this line.

The firm of Chase & Cassil, stationers, booksellers, &c., Mount Vernon, Ohio, has been dissolved by limitation. Austin A. Cassil will continue the business.

John Gibson is busy in the preparation of his new line of Christmas and New Year's cards. He is also hard at work on a new line of advertising cards, embracing upward of twenty different new designs.

The firm of Haas & Company, printers, Buffalo, N. Y., has been dissolved by the retirement of Chas. Hass. John W. Klein has been admitted and the business will be continued under style of Haas & Klein.

Paul Greutzmacher & Co., stationers and booksellers, Galveston, Texas, have sold out to William Terry & Co. Paul Greutzmacher remains a partner in the new house, and Emil Neumann is also admitted to partnership.

The "Publishers' Trade List Annual" for 1881 is in course of preparation. It will have some new features which will greatly add to its value, and it is certain that the publisher, F. Leypoldt, will make it indispensable to every purchaser and dealer in books.

Russell's blotting paper, made by the Russell Paper Company, Lawrence, Mass., and sold by Bulkley, Dunton & Co., New York, is an excellent absorbent. It compares favorably in price and quality with any blotting paper in the market, and is put up full weight. Try it.

J. H. Van Kirk & Co.'s new store, at 76 Beekman street, is very much more commodious than their old one, and the new location gives them greatly increased facilities for their business. They have three floors, 125 by 25 feet, well

lighted and ventilated. This firm is agent for Keith's ledger papers, Crane's bond papers, and many other well known brands.

The heirs of John W. Gladding, Philadelphia, offer for sale all of the stock, fixtures, and good will of the business. The goods have been appraised at a very low price so that buyers will have a chance for excellent bargains. The house has a very good range of custom and enjoys an excellent reputation in the trade.

Theodore V. Smith has formed a partnership with B. A. Lussen, under the style of Theodore V. Smith & Co., for the purpose of conducting the business of commission stationers, and manfacturers' agents, making a specialty of stationers' hardware. The new firm has taken the store No. 36 John street, New York.

The manufacturers of fancy and illuminated notepapers are preparing for the fall trade the most beautiful lines of goods ever placed on the market. The emulous spirit at present developed among these producers will, no doubt, be the means of bringing forth some excellent designs.

Ph. Hake's new designs of Christmas and birthday cards will surprise a great many people when they are shown. They are entirely different from anything of this kind seen heretofore, much of the credit for their originality being due to the artistic skill of Mr. Raisbeck.

Dean Brothers, stationers, of Chicago, have dissolved partnership, Bradley Dean retiring; C. Dean continues. This is an old and well kuown firm, and its dissolution is the cause of much comment in the trade.

The domestic manufacturers of leather goods are making strenuous efforts to excel their foreign competitors in the various lines they produce.

Thomas Marsh & Co., stationers, Boston, Mass., have published a new map of Boston, which is said to be very accurate.

Aikin, Lambert & Co. are bringing out a great many new styles in pencils, some of them being strikingly beautiful.

Chevalier & Drew, dealers in fancy goods, Cleveland, O., have dissolved partnership; Abbie Chevalier succeeds.

M. L. Keith, stationer and bookseller, Stephensville, Texas, has sold out, and is going to Palo Pinto, same State.

James Talbot, of the firm of Talbot & Son, publishers of the *Commercial*, Port Huron, Mich., is dead.

E. A. Hayes, publisher and proprietor of the *Register*, Torrington, Conn., has been burned out.

Several new designs in fancy easels will be among the new things soon offered to the trade.

Consignments of new goods for the fall season are now beginning to arrive from Europe.

Mr. Thorpe, of Winkley, Thorpe & Dresser, Boston, was in town during the week.

Certain improvements are, it is said, being introduced into the Vatican Library. All books published between the years 1824–81 are being arranged and catalogued. The Capponiano collection of rare and valuable books is being arranged according to the catalogue issued last century; and above three thousand incunabula —catalogued by Canon Zappelli—are being numbered and placed on the slelves. The Oriental books, also, are being classified according to the various languages; and, altogether, the library is being put in better order.

ESTABLISHED 1840. ESTABLISHED 1840.

FALL TRADE!

Standard Blank Books.

OUR NEW CATALOGUE of Blank Books, Memorandums, &c., is now ready, and we will be happy to mail one to any address furnished. It embraces many new and desirable styles, which all stationers should examine before ordering.

Our books are **CHEAP**, but well finished and attractive. With reduced prices on **STANDARD LINES** and **INCREASED DISCOUNT** for large purchases, we believe the advantages we offer to jobbers are nowhere else equaled. We print a **SPECIAL EDITION** of our Blank Book List, which we furnish with our customer's imprint when desired. Orders for them should be sent in before August 1st.

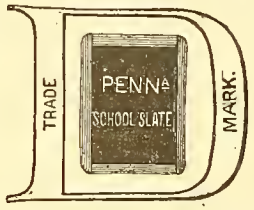
FORTY YEARS' experience in this manufacture, and the possession of every facility that an ample capital can procure, warrant us in promising to intending buyers **THE CHEAPEST AND BEST BLANK BOOKS** in this or any market.

☞ Send for a catalogue and test our assertion by seuding us a sample order for such styles as you think desirable.

VAN ANTWERP, BRAGG & CO.,

137 WALNUT ST., CINCINNATI.

SOAP STONE PENCILS.



AS Sole Agents, we are now prepared to fill orders for the **Celebrated Vermont Soap Stone Pencils.** No one need buy the remnant of the "Emery process" make of Pencils, as the quality of our goods now being offered is far superior to any ever before manufactured.

BRADSTREET'S

A JOURNAL OF

Trade, Finance and Political Economy.

THIS JOURNAL covers a ground the extent of which is occupied by no other publication, and forms an invaluable work of reference to the merchant and manufacturer.

REGULAR AND TRUSTWORTHY CORRESPONDENCE, furnished by experts, expressly for this journal, from all the principal trade centres of this country, is embraced in its columns.

THE CONDITION AND PROSPECTS of the various markets are carefully recorded, and the possibilities and opportunities for trade are demonstrated as by no other medium extant.

QUESTIONS OF COMMERCIAL INTEREST and importance are fully and ably discussed editorially, without prejudice, by some of the most responsible writers and statisticians of the time.

THE BUSINESS CHANGES occurring in the United States and Canada—such as failures, dissolutions of partnerships, chattel mortgages, etc., etc.—are printed in each issue, and the list is more complete and comprehensive than can be obtained through any other source.

THE CIRCULATION OF THIS JOURNAL being among the best merchants, manufacturers, and banking institutions of not only this country but many foreign, it presents an excellent advertising opportunity to a limited number of first-class banks, corporations, and business firms.

THE BRADSTREET COMPANY,

279, 281, 283 BROADWAY, NEW YORK.

TWO WORKS

OF

Great Value

TO

STATIONERS.

The Stationers' Price Book and Illustrated and Descriptive Catalogue, . . $2.00

Lockwood's Directory of the Paper Trade, . . . $2.00

EVERY STATIONER wants the above Works for the

FOLLOWING REASONS:

The **Price Book and Catalogue** furnishes Stationers information which, if they have at all, is usually scattered and never right at hand when wanted. As a book of immediate reference it will be found invaluable.

The **Directory** of Paper Manufacturers and Jobbers is a guide to **First Hands** in the Paper Trade. Any one who uses it intelligently can save many times its cost at once.

THE PRICE BOOK is deliverable in the cities of New York, Boston, Philadelphia, Chicago, Detroit and St. Louis, where purchasers can have it packed with any goods they may be buying.

THE DIRECTORY is sent post-paid.

All Stationers who wish to keep **ABREAST WITH THE TIMES,** must own these two books.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---$2.00 PER ANNUM.

Single Copies - - - - 10 Cents

NEW YORK, THURSDAY, JUNE 2, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

C. Haight	Toronto, Canada.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

PROBABLY no apology is necessary for the full report which is given of the celebration of the foundation of the Lockwood Press. Readers of THE STATIONER will doubtless share in the joy which attends the success of efforts which have raised this paper and its associates to the proud position which they occupy, and will, we are sure, add their congratulations upon the recurrence of this birthday. Perhaps, too, our friends will not be displeased to know something about what sort of fellows we are when the cares of preparing copy, making up and going to press, are off of our minds and we can sit down coolly and take our ease with dignity and take our dignity with something else.

LONDON trade does not seem to be of the brightest, and as London is undoubtedly the reflex of everything British, it may be assumed that everything is pretty generally dull in the United Kingdom. But of course there is, there must be something doing, and perhaps the dolorous complaints of dullness are only comparative when placed by the side of what our cousins would like to do. And what would become of them if we did not keep them alive? The stirring up which our competition excites and the market which this country affords, despite the fact that it is so abundantly able to provide for itself, exercises a great influence upon the trade of other countries and notably that of Great Britain. Let us hope for better times for every one, not even excepting our competitors in trade, and let kindly rivalry and exalted principles in business conduct us all to a brighter and joyous future.

IF the readers of THE STATIONER will carefully scan our advertising pages and remark the addresses of our different advertisers, they cannot fail to be impressed not only with the national character of this paper, but with its cosmopolitan featnres. Our *clientèle* is broad, and from one end of the earth to the other, across the widest expanse of the seas, THE STATIONER reaches out and brings within the grasp of its readers and patrons suggestions of business value and points of commercial advantage. It is known, therefore, all over the world, and we hope that it has been found as valuable as we have tried to make it. That it is esteemed aud appreciated we are well assured, and we, therefore, do not hesitate to again direct the special attention of the trade to every announcement which appears uuder its heading. If you read your paper well, you will read its advertisements and profit thereby.

NEVER does it rain but it pours is a proverb which quite frequently justifies itself, and certainly this week both the editor and the reader of THE STATIONER (and quite probably its publisher) will feel like saying, "Sure enough!" Besides our usual quantity of news, the report of the festivities of the Lockwood Press has borne heavily upon our columns, and an extra batch of correspondence has come in as a counterpoise to the account of our symposium. We have therefore been required to increase our dimensions. All good dinners are very filling —and we feel quite distended in consequence. Our correspondence this week presents many interesting bits of news, and in the Melbourne letter will be found a very full review of the results of the International Exhibition, with extracts from the official report of the jury which examined the stationery exhibits. As our correspondent remarks, American exhibitors have gained high distinctions, although in some instances we are sure that there have been mistakes which have operated to the disadvantage of individuals whom we all know have a right to claim and expect more than has been given them. Of the remarks anent ourselves we leave others to decide how well they are deserved, but we can truthfully say that we have tried to merit them. But we are not yet satisfied, and, adopting the motto of the Empire State, we shall strive more earnestly to look for results yet higher, and to give practical proof of our belief that there is no excellence that cannot be excelled.

OBITUARY.

A. B. RITTER.

A. B. Ritter, employed in the warehouse of J. G. Ditman & Co., Philadelphia, having entire charge of the bookkeeping and financial department, was killed by a railroad accident on May 30, at Trenton, N. J. The deceased left Philadelphia on the afternoon of May 28, accompanied by his wife and youngest child to visit his friends in New York, and was returning with them when the accident occurred.

Mr. Ritter was born in Philadelphia, and graduated at the High School there. After leaving school he secured a position with North, Chase & North, aud after several years' service secured a clerkship in the *Inquirer* counting room, where he remained for seven years. Since that time he had been employed by J. G. Ditman & Co. He was a member of Templar Lodge, No. 58, I. O. O. F., and was also connected with the Masonic fraternity, being a member of Columbia Mark Lodge and Mary Commandery, Knights Templars. He was thirty-nine years old at the time of his death, and, it is said that, for the position he occupied, he had no equal. He had many warm friends, all of whom lament his sudden and untimely fate.

LEARNING A TRADE.

A paper on the subject of "Learning a Trade" was lately read before the Polytechnic Association by T. P. Pemberton.

The importance of a judicious selection of an occupation was spoken of, and the ruinous mistakes often made graphically portrayed. Mistakes of this kind give us ministers who should have been farmers, and tradesmen who would have adorned the learned professions. Very frequently propensity, or liking, is mistaken for talents, and parents are led to a wrong selection for the child.

The strong aversion which many persons have to allowing a son to learn a trade was illustrated and strongly condemned. The Hebrews had all their children taught some trade by which they could support themselves, counting it a disgrace for a healthy man to eat his bread without hav-

ing first earned it. Even some of the rabbies spent a third of the day in manual labor, dividing the remaining portion between prayer and study.

The matter of learning a trade is an important one, not only to the individual, but to the country at large. Skilled artisans are wanted; the call of the day is no longer for capital, but for skilled labor. We must have no false ideas about the degradation of manual labor. Skill is what is wanted, and is honorable in all.

There are drawbacks and discouragements, it is true; the opposition by journeymen, long hours, the struggle for self-support, make young men dread the shop. These things, indeed, prove a need for a return to the old English apprentice system. The English system divides apprentices into two classes. The premium apprentice had to pay a fee at the time of signing the articles, while the common apprentice did not. The length of time for which he was bound varied from three to seven years.

The speaker detailed his own experience in a graphic manner. His father said: "Tom, you had much better be a good mechanic than a poor parson," telling him at the same time that he would give him something which could never be taken from him—a good trade. Some $500 had to be paid as a premium. The hours were 6 A. M. till 4.30 P. M. in the machine shop, and then in the drawing office the work was from 5 until 7 in the evening. There was no pay the first year, and only 5s. per week the second The last year 12s. per week were received. He then went into a locomotive shop at £1 ($5) per week; then to sea as supernumerary engineer with no salary, then as third, second, and last as chief engineer on pay.

The ordinary apprentice has no privileges beyond working in the shop; he often has much drudgery, and even rough usage. He is only a workman, and does not look higher. His chances for promotion are small.

As one of the important questions of the hour, the speaker submitted this question of premium apprenticeship for discussion. There are few apprentices in the country, and we are deprived of the means by which skilled artisans have been made in the past.

At Chicopee, Mass., they are doing something toward a return to the old system. The term of service is three or four years, and the men sign a contract to stay that length of time; the company agree to teach them the different branches of the business, so that they will be masters of the trade. Ten cents a day is kept from their wages till it amounts to $100. This is given to them at the end of the apprenticeship.

At Springfield, Mass., another system is under trial. It is intended to combine the practical with the theoretical education. Fifty-eight hours per week are devoted to the shop and nine to the school-room. The term is six years for those under twenty, five for those over twenty, and those who have worked in a shop before are advanced according to their proficiency. The rates of pay are graduated according to age and the length of time the men have been at work. The lowest is five cents per hour and the highest twelve cents. To those who finish the full term, two cents per hour extra is paid. For the six years of service this amounts to $400.

In St. Louis, foundries and machine shop rates for apprentices vary from $2.50 to $3.50 per week for the first year. The last years the rates are from $5 to $6. Those not over sixteen years of age are preferred.

There are obligations upon both the apprentice and the employer. The one is bound to teach; the other to learn. In the large cities there are abundant opportunities for the acquisition of knowledge, and it is the young man's own fault if he does not improve them. What is needed, however, is a greater number of manual training schools.

A very interesting account was then given of several of the more important training and technical schools of the country.

The Manual Training School, of Washington University, St. Louis, has a carpenter shop that will accommodate 20 workmen, a pattern shop with 9 speed lathes, and will soon have 16, and a blacksmith shop with 8 forges, &c., and full sets of tools. This school, under the supervision of William G. Elliot, Chancellor of Washington University, was opened in September, 1880.

Summing up he said that the most careful discrimination is necessary in order to avoid mistakes in the selecting of trades for our children. Likings must not be mistaken for genius, the dignity of manual labor should be recognized, the apprentice system in a modified form should be revived, and supplementary to it the apprentice should have the advantages of technical education; and, lastly, for those of limited means there should be industrial evening schools.

The need of these things was illustrated by extracts from a recent report of Mr. J. W. Clark, in which the very small proportion of American artisans able to work from a drawing was shown. The paper closed with a vigorous appeal for a wider and more thorough industrial education for our young men.

Mr. Blanchard spoke of the pleasure which the paper had given him and the justness of its remarks on most of the points treated. He had had a great deal to do with workmen of all nationalities, and his invariable experience had been that the best workmen and those who could adapt themselves most easily to all conditions were the natives of this country. The best routine mechanics are to be found among the foreigners. The best general workmen are the Americans, who take less time to adapt themselves to changes of circumstances or conditions. American boys can, if given the chance, learn a trade quickly—many trades in three or four months. It is hardly fair, then, to ask them to spend several years in an apprenticeship which is not necessary. It is, in fact, a sort of imposition upon a young man. The boys must be educated, and there is much for them to learn outside of the trade itself. They should cultivate gentlemanly habits and deportment if they would rise, and avoid the low and vulgar.

Mr. Beaman spoke of the rapidity with which a boy could pick up certain branches of a trade, and naturally the apprentice came in competition with the journeyman, to the latter's injury.

Mr. Moran said that he thought he belonged to the last batch of apprentices at the general trade. He found that there were specialists who could outdo a man who understood all branches. He then gave an instance of a boy at saw filing, who could set some twenty dozen saws per day. It is a matter of dollars and cents, and the man who can do one thing better than any one else is of more use to the employer than the general mechanic. In the factory the man must become a part of a huge machine.

Dr. Parmalee spoke of the disadvantage of learning only one branch of a business. Often when this was done and the man becomes an expert, he finds, when he loses his position, that there is no other place for him.

Phrenology gives us no little aid in selecting a trade for the boy, and in avoiding the mistakes likely to arise from the boy's persistent following of that one thing for which he has happened to be praised because of accidental superiority. Give the boys a short apprenticeship, and allow them a chance to rectify a mistake if one has been made.

Mr. Stetson—The loose apprentice system is, after all, rather in favor of the boy, since he has an opportunity to try various things. The importance of doing all things well—whether sweeping the floor or cleaning a glass case—was then most forcibly presented, and the young men were exhorted to do their work well.

Mr. Sutherland—Strikes and trade unions do more than anything else to kill the apprentice system. The strikers and unionists will not allow their own children to learn their own trades, thus taking the food from the mouths of their own offspring.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, June 1, 1881.

THE MONEY MARKET.—The money market is afflicted with a superabundance of idle capital seeking investment, which is likely to be increased by the Treasury disbursements in refunding the called bonds. Should the amount of money that is expected to be let loose by the Treasury Department within the next thirty or forty days, to seek other investments, be forced on the market, lower rates are not at all unlikely. Call loans are readily obtainable on sound collateral at 2@3 per cent., while the discount rates of prime mercantile paper are 4@5 per cent , with a very little offering. There has been something of a lull in the speculation in stocks, and prices have quite generally declined, though the market left off with a reactionary tendency. Government four per cents. continue firm, but the other issues closed weak. Government bonds have shown considerable irregularity and less strength. Railroad mortgages were fairly active, but the market was somewhat unsettled in tone. Foreign exchange is again fractionally lower, on a light demand. The actual closing rates for prime bankers' sterling were 4.83@4.83¼ and 4.85¼, with cables 4.85½@4.86. Prime commercial bills closed at 481½@4.81¾.

THE PAPER MARKET.—The market shows very little change since our last review. As is usually the case about the close of a month, when dealers experience a falling off in the number of orders received, the present month is no exception to the rule. The fact that there were very few manufacturers visiting the city this week would indicate that most of them are yet busily engaged on orders, and are not seeking any new business. There may be here and there instances of a lack of full employment for some mills, but as a general thing paper makers are fairly employed and have no great reason to complain, notwithstanding prices are not just what they would like to see them. We have before us the prospect of a long and dull summer; and if the production is not interfered with by drought or voluntary limitation of the manufacturers, there is no likelihood that current prices will be sustained. Values have ruled very steadily lately, and whatever changes may take place in the near future will come very gradually and unlike the sharp fluctuations following the period of the boom about this time last year.

THE STATIONERY MARKET.—We have now entered upon what is usually the quietest month known to the trade in the whole year; and outside of a limited number of Southern and Southwestern orders, very little activity is looked for during the month. Business during the month just closed, although dull, was fully up to the amount done during the same month last year. New goods for the coming season continue to make their appearance, and the more that is seen of them, by the favored few who are allowed the privilege, the greater is the impression of the great and growing versatility in their design and manufacture. Many of the new goods are an entirely new departure from old designs, and improvements in their manufacture have also been made. Prices throughout rule very steadily and no changes are reported.

THOS. S. DANDO & CO.,

13 & 15 Park Row, NEW YORK. | 307 Walnut Street, PHILADELPHIA.

ANNOUNCEMENT!

Our new line of Novelties for the Holiday Season is now complete, comprising the following:

200 series of Xmas and New Year's Cards (either plain or fringed).
28 series of Satin Embroidery Lithographs.
62 series of French Cards for advertising purposes and scrap books.
65 series of Birthday Cards.
108 varieties of Photograph Albums.
75 varieties of Imported Papeteries—colored hand.
100 varieties of Dean's Children's Toy Books.

NEW HAND-PAINTED WEDDING CARDS.

NEW HAND-PAINTED BIRTHDAY CARDS.

Porcelain Hand-Painted Birthday and Wedding Cards.

Besides the above we have an entirely new line of FRINGED CARDS, a Novelty never before offered to the trade. Very Respectfully,

THOS. S. DANDO & CO.

P. S.—Catalogues will be sent to any address on application; shall be pleased to have the trade who are visiting New York or Philadelphia call and examine our line.

THE LOCKWOOD PRESS.

ITS ANNUAL DINNER.

On Saturday evening, May 28, Howard Lockwood, proprietor of the Lockwood Press, gave his annual dinner to his editorial staff and heads of departments—Edward C. Anderson, Ralph B. Briggs, Col. Henry C. Lockwood, and Albert Weber being present as guests.

The names of the representatives of the Lockwood Press, together with the menu, were printed on Lowell's engraved covers in the following order:

1872—1881.

THE LOCKWOOD PRESS.

"The Paper Trade Journal,"
Ninth Anniversary.

"The American Stationer" ..... 7th Anniversary.
"The American Mail and Export Journal"..... } 4th Anniversary.
"The Millers' Journal"..... 13th Year.
"The Musical and Dramatic Courier"..... } 2d Year.

HOWARD LOCKWOOD,
Publisher and Proprietor.

Publication Department.

Thomas Walden, John C. Gallagher,
Wm. J. Arkell, Sam. L. K. Monroe.
Charles K. Hammitt, Chas. C. Walden,
P. G. Monroe, Chicago, J. Viennot, Philadelphia.

Editorial Department.

James A. Colvin, LL. B., Samuel Y. Allaire,
S. Austen Pearce, Mus Doc. Oxon., Wm. E. Nickerson,
Edwin E. Hooper,
Geo. A. Gordon, Robert Grimshaw, Ph. D.,
Michael Scanlan, Patrick Cunniam,
John D. Nolan, Wm. E. Simmons,
Henry W. Nicholl, Robert M Baxter,
Geo. E. Miles, Charles Kirchhoff.

Printing Department.

Oswald Maune, Henry Haefle,
Patrick O'Connor, Daniel F. Keenan.

A Dinner given by Howard Lockwood to his Staff, Saturday, May 28, 1881.

—:o:—

MENU.

Little Neck Clams.

POTAGES.

Consommé. Printanier.

HORS D'ŒUVRES.

Olives. Radis.

POISSON.

Striped Bass à l'Hollandaise.
Pommes à la Parisienne.

ENTREES.

Filet de Bœuf aux Champignons.

Squabs Sautés au Riz.

Ris-de-veau aux Asperges.

Macaroni.

PUNCH ROMAIN.

A la Zingarella.

ROTI.

Poulet de printemps au Cresson.

Salade Mayonnaise.

DESSERT.

Glaces. Tutti Frutti.
Fraises. Pâtisserie et Fromage.
Café Noir.

VINS.

Amontillado. Haute Sauterne. Chat. Dillon.
Pommery Sec.

The dinner was given at Martinelli's, Fifth avenue and Sixteenth street, and was served with all of the grace and care of which that well known caterer is capable. The appointments of the table were elegant. There was a profusion of flowers and a bouquet was placed at every plate.

After eating, a number of toasts were proposed and responded to. In introducing them Mr. Lockwood said:

GENTLEMEN—I thought I had a sort of iron-clad arrangement with my friend Colvin that, if I took care of the programme up to this time, he would see to the rest. He has done it by placing in my hands a list of toasts and sentiments, and I find myself called upon to respond to the first one.

"The Lockwood Press: Its foundation the paper and stationery trades; although founded on paper it has not remained stationary."

That distinguished damsel, Miss Sojourner Truth, who has sojourned in the flesh only 106 years, once said to one of her audiences, "You have come here to hear me say something. I have come here for the same purpose."

I feel that I am quite as unprepared to talk to you as Miss Truth pretended to be. I should, however, be able to say something about the Lockwood Press, although I am inclined to fall back on the remark of our great countryman, Daniel Webster, when he said of old Massachusetts, "There she stands—look at her."

It is often interesting to note what important affairs have their origin in comparatively small beginnings, and also what trifles sometimes influence such beginnings. I can well remember asking a friend, at that time a prominent paper maker, about the month of April, 1872, what he thought of a paper devoted to the interest of the paper trade. His answer, quick and sharp, was: "If well conducted, and by parties disassociated from the business, it is sure to succeed."

His opinion was based in a measure on my representations, but he gave it after he had indulged in a good dinner, and the question arises would he have expressed himself in this manner had he been called upon to do so before dinner?

Who can tell but that a nicely cooked chop or even a glass of beer was not the first link in a chain of circumstances which culminate in this meeting to-night. For I confess that a mere roaming idea in my mind began to take shape and form immediately after this encouraging opinion, and the "Paper Trade Journal" was started. Yes, the Lockwood Press had paper for its foundation, and that the language of this toast is not inconsistent, we have only to compare our establishment to-day with the one that began the work nine years ago. Mr. Allaire, who, of you all, is the only one here to-night who was in at the start, the Messrs Walden, Mr. Gallagher, and later Colonel Colvin and Mr. Maune are all in a position to make comparison as well as I.

The year just past has been in some respects an eventful year. I will not weary you by going into details and so will pass over in all respects save one particular. A whole year has passed without our attempting to establish a new newspaper. [Laughter]. It is the first year, I believe, in the history of the Lockwood Press of which this can be said. It has been no easy thing to avoid catching the old complaint. The atmosphere has been full of projects in a nebulous form. From all accounts I am afraid one of our staff has been attacked with the disease. I look upon his case as a serious one, and feel the necessity of all of us trying to pull him through safely.

The "Paper Trade Journal," whose ninth anniversary we celebrate to-night, like a sturdy oak, has spread its roots and taken a still stronger hold; it stands erect as of old, with enlarged limbs and new vigorous branches. Its first offspring, the "Stationer," is quite as tall as its sire, and bids fair to rival him in strength and usefulness. The "American Mail," whose mission is to enlighten the world as to affairs in this country, has done its work well during the past year, making friends for itself and American goods and American ideas in all countries and in all climes. The "Millers' Journal" has kept itself before its constituency in the most prominent manner, and to-day is recognized as one of the leading, if not the first, exponents of the vast interests centering in the grain and flour trades. The "Musical Courier," which I last year referred to as a bantling, has grown to full proportions, and is called the best journal of its class in the language.

In replying to this toast I should be remiss did I fail to refer to the high character of the work done by our printing department. I cannot do better than to read an extract from a letter just received by that prince of journalists, John Hogan, of Australia, who has represented our interests in that portion of the world for several years past.

Referring to our record at the Melbourne International Exhibition, he says: "Your publications have gained the following distinctions:

	First Prizes.
'American Mail and Export Journal'	4
'Musical and Dramatic Courier'	4
'Paper Trade Journal'	2
'The American Stationer'	2
'The Millers' Journal'	2
'The Paper Trade Directory'	2
'The Stationer's Price Book'	2
General job printing	1
Book printing	1
Total first prizes	20

"Of course I could only claim for four, but these four represent twenty first orders of merit, and the four awards but one exhibitor. This is the grandest achievement ever obtained by any single individual at any international exhibition since the creation of the world, or perhaps ever will be again."

I have no authentic information that any international exhibitions were held before the creation of the world, so, I suppose, we must be satisfied with this.

Before concluding, I will refer to a fact many of you may not be acquainted with, that I am in the habit of keeping a sort of complaint book, in which I note down every complaint made to me not only orally, but in the not less eloquent language of facial expression. And as it has occurred to me to refer to this book, I may as well read you some of the complaints it contains, and it must be stated that there is hardly anybody in the office but has made some complaint during the last year either by word of mouth or look.

Mr. Lockwood gave an amusing review of the series of complaints that he had received from the different departments of the Lockwood Press, and then continuing his remarks said:

Do not understand that I object to hearing complaints. I like to hear them, and I am not quite sure but that the entire science of business resolves itself into having the right men to notice and make complaints and then see that matters complained of are remedied. So, if I can arrange to relieve myself of the labors that finding wrong fonts and turned letters entails on me and the signing of checks, I shall develop more thoroughly a regular system of complaints; but I shall have them all put in writing, so that I would not have to draw on my imagination or deduce the truth from the troubled looks of our employees. But it is time that we should go through with this line of toasts; and, while again expressing my pleasure at seeing you all this evening, I would ask you to join me in a toast which may not be on the regular programme, inasmuch as it was not known that we would have a few friends with us this evening. I give you the health and happiness of our guests.

This sentiment was heartily honored.

The second toast, "American Trade—Domestic and Foreign," was assigned to Thomas Walden for reply. Mr. Walden said he had taken the precaution to write out his speech, and as he was suffering from a bad cold he would take the liberty of asking Colonel Colvin to read it for him. He then handed over a package of blank sheets.

Mr. Lockwood—This little ruse reminds me of the days long gone by, when I tried to exchange verses with young ladies. I passed verses, but got blanks in return. However, Walden is solid on the business question, and, for that reason, we will let him off.

Mr. Walden—If you will give us some more advertising pages I will promise to respond.

Mr. Lockwood—It takes two to make a contract, and if you will bring in the contracts for advertising I will guarantee that you can get the pages.

The third toast was "Music," and to this Mr. Lockwood called on Dr. S. Austen Pearce to reply. Dr. Pearce said:

In drinking the toast his mind naturally turned to those who had given music to the world. He then referred to the Chinese as the people from whom many of our musical instruments were first obtained; paid a passing tribute to the Muses, and reminded his hearers that, in drinking to "Music," they were really drinking to gods and goddesses. In conclusion he said that music had a certain stigma attached to it, from the fact that it professes to be a language, yet expresses nothing definite. But music is the language of the emotions, and it should be remembered that emotion is as much a fact as anything else.

To the toast of "Milling and Wri(gh)ting," John D. Nolan and Dr. Robert Grimshaw were assigned. The latter not being present, Mr. Nolan responded, saying:

He expected to be associated with another gentleman in reply to this toast, but that gentleman unfortunately was not present. He dwelt at some length on the difference between theory and practice, and said that, though practice and theory go hand in hand sometimes, practice generally gets the better of theory. The trouble with theory is that in the long run it costs too much for the other fellow to practice it. This was to be said, however, only of what generally passes for theory. True theory, in his opinion, could be nothing more than generalized practice. In conclusion he gave an interesting sketch of milling on the Liffey and the Shannon

On behalf of "Our Correspondents," James A. Colvin said:

"Put it down a we, my lord; put it down a we." Such was the remark said to have been made by a remarkable person upon a certain remarkable occasion. I may say here, in my editorial capacity, that this suggestion seems to have been the source of inspiration for the greater number, if not all, of the correspondents to the publications of the Lockwood Press. I do not intend to reflect injuriously upon the enterprising, energetic and kindly dispositioned gen-

tlemen who do us such valuable service; but the elder Weller has been so often brought to my mind when perusing the letters from correspondents, that I cannot refrain from giving expression to my thought. It is, I may say, an idiosyncrasy of most people who write to newspapers to put it down a "we," and thus express—much to their satisfaction, but greatly to the (I fear profanely expressed) distress of the editor—their partnership in the toils and their glory in the successes of the journal on which they expend their affection. It has, however, been an example which has had a salutary effect, not only upon myself, but also upon my coadjutors on our editorial staff. And here, permit me to speak a few words on behalf of the amiable, talented and beautiful gentlemen who constitute that editorial staff, and who give such valuable assistance in the various departments to which they are assigned. Lest I should not be in the fashion and should fail to show due appreciation of the importance of Mr. Weller's suggestion, I shall say "We" recognize the ability and executive force of the gentleman at whose invitation we are assembled, and speaking for ourselves and also for our army of correspondents, we tender him our hearty congratulations upon this anniversary and express the hope that he may be able to sit upon his foundation for many, many years to come.

But lest I may be thought to speak too boldly on behalf of my brilliant associates, I will suggest that they are like that embrowned seed of a well known leguminous plant so dear to the citizens of the modern Athens. Goodness knows they are verbose at times and should be fully able to speak for themselves on this occasion. It may be said that this is a digression; but as the body correspondent is the adjunct of the body editorial, the combination can scarcely be thought improper.

I cannot but express my indebtedness to our correspondents, particularly those who write in French, Spanish or German. An occasional Sanscrit, Italian or Portuguese is also a blessing to be—damned. Fortunately we have not reached the limit of the Mongolian tongues. But in whatever language they may write we have the assurance that they are active, earnest and faithful assistants, who prize their connection with the Lockwood Press higher than all other privileges—except, perhaps in the case of Chicago, whose first thought is embodied in that elegant, suggestive, but mystic Western expression "booze."

The Lockwood Press owes much to its correspondents. They spread its fame, extend its glories and add a great share of interest to its enterprises. In all, there are very near a hundred correspondents to the different publications with which we are associated. To name them would be too much. Philadelphia and Chicago, Boston and Cincinnati, stand high in our affections; but besides these, there are about eighty, whose labors are distributed all over the United States, from the Atlantic shore to the Pacific coast, from the Lakes to the Gulf; and I must not forget our Canadian correspondents, who, although they try to disclaim the fact of their being Americans, are nevertheless Yankees in thought and Yankees in action, whom we shall annex politically some day. Going abroad, we have a faithful representative at London, a genius of energy and hard work in Australia, a roaming contributor on the European continent, a representative in the Sandwich Islands, another in South America, still another in South Africa, and occasional contributors in Russia, Italy, Germany, France, Spain, Egypt, the Scandinavian countries, and indeed at various points which defy enumeration now. Then, too, I cannot forbear to mention those earnest friends, the consuls and representatives of the United States at foreign governments, who exert themselves to supply us with the earliest and most important information at their command.

I may add that arrangements are pending for the selection of regular correspondents at different centres in Continental Europe, and that possibly we shall be represented at the Eternal City by a lady whose ambition cannot reach its limit until it crowns itself with the laurel wreath of the Lockwood Press.

I have already said too much, but I join heartily in drinking the health of our correspondents—"May they live long and prosper."

To the next toast of "The Drama," George A. Gordon was assigned for reply; but, as that gentleman was unfortunately prevented from being present, the next toast was announced as follows: "The Printing Department: There is no art so diverse in its application or so prolific in its results as the art of printing." Responded to by Oswald Maune, who said:

To do full justice to the subject proposed would require the power of the best of orators; nevertheless, as he felt a great pride in his art, he could not refuse to say something in its behalf. In the first place, he would refer to the fact that the art of typesetting had given to the world innumerable eminent men in all stations of life. The printing press had now almost attained perfection, and the emanations of its literature had swollen into a deluge of books and newspapers, overflowing our libraries, schools and homes.

While the effects of lithographic, together with steel and copper plate printing, are both useful and beautiful, if no other process were known, books and newspapers would have been impossibilities. The art preservative of all arts was typography alone—its true field lying in the representation of thoughts and words, and here it was supreme. To it this and every civilized country was indebted for the diffusion of its literature, the constant flow of its streams of thought, the extension of its commerce, and the very security of its freedom as a nation.

He then referred briefly to the early history of the art, and continued: At the commencement of the War of the Revolution there were only thirty-four newspapers throughout the length and breadth of this land, not one of which was published more than once a week. To-night there are in the United States over 10,000 newspapers and periodicals, of which 8,000 are weeklies and over 900 dailies. It is doubtful if any greater incentive has been given to the art of printing than the discovery that it could be extensively and profitably employed for business purposes and also made useful in the everyday affairs of life—useful as well to the merchant and manufacturer in obtaining purchasers for their goods as to the mechanic in quest of a situation. It is not too much to say that, if the revenue derived by printers from the varied forms of advertising were taken away, three-fourths of their occupation would be gone. The first newspaper advertisement in this country was published, I believe, in the Boston *News Letter*, about 1794, and several successive issues contained but one or two advertisements. I think if the Lockwood Press had existed in those days its honored proprietor would not have been so willing to provide the bountiful repast that he has given us this evening.

Modesty compels me to say as little as possible concerning the progress of the printing department of the Lockwood Press during the past year. Upward and onward has been the rule laid down for us, and the success attained is well evidenced by the universal encomiums bestowed on the work emanating from our establishment. With a diploma of "honorable mention" from the Paris Exposition, 1878; with a gold and silver medal from the Sydney Exhibition, and with four first and highest awards from the Melbourne Exhibition, we are all justified in feeling proud of the achievements of the Lockwood Press. But to the extent we have succeeded we are indebted to the liberality, encouragement and constant criticism received at the hands of Mr. Lockwood, for the unfortunate turned u's, o's and s's that escape his unspectacled eyes are hardly worth mentioning. It is pleasant, however, to know that a freedom from egregious blunders is the general rule; and not employing "spawned" printers, the blushes of our genial editor are spared, and he has had no occasion, like a certain journalist, to make his readers understand that he did *not* write "Lean and Hungry Nigger" for "Louis Napoleon," nor "horns of the burning beast" for "thorns of the burning bush;" nor the word "permanence" for "dumsquizzle;" and I am sure our typos could not say "Grimshaw on Sores" for "Grimshaw on Saws," nor for "those gentle eyes bedimmed" "those gentle eyes bedammed."

At this stage of the proceedings Mr. Lockwood said that before proceeding further with the regular programme he would like to recall a personal reminiscence. It was only about fifteen or sixteen years since he had come to New York. The first job that he got was in a paper store, and it was not very long before he had to wait on a stranger, who, it was easy to see, had come from the country. It required no little effort to ask this stranger to go round the corner and eat for lunch a piece of five cent pie. But the effort was finally summoned and the invitation accepted. As they walked round the corner arm in arm he asked the stranger what had brought him to New York. "Well, to tell you the truth, Lockwood," he replied, "I am tired of picking stones in Albany County, and have come down to see what I can do in the paper business." Since that time the stranger referred to has been picking up not stones, but gold. I refer to a leading representative of the paper stock business who is present to night, my esteemed friend, Ralph B. Briggs.

Mr. Briggs said:

He felt flattered at the remarks made by his friend Mr. Lockwood. He also felt flattered in enjoying the privilege of being present on so pleasant an occasion. It was quite true, as Mr. Lockwood had just said, that he came to New York a few years ago in search of work. He found it, and he also found his friend Lockwood, of whom he felt jealous, and had reason to feel jealous, because Lockwood was getting two dollars a week more than he. He was afraid that this ratio was still maintained; for although both had prospered, he still believed he had occasion for jealousy, because he was sure that Mr. Lockwood was still getting that two dollars a week more.

As Mr. Lockwood, he continued, has just seen fit to honor me by referring to me as a representative of my trade, I can as truly honor him by saying that he is a representative of his trade in a truer sense even than I am of mine. Thanking you for the courtesy which has led to these remarks, I join my heartiest wishes for the continued prosperity of the Lockwood Press.

C. K. Hammitt replied to the toast, "The Mysteries, the Miseries and Joys of Advertising," by saying:

In holy writ I find this statement:

"There is that scattereth, but yet increaseth; and there is that withholdeth more than is meet, but tendeth to poverty."

In all affairs of life this truth holds good, but in none with greater force than in advertising; and he, who, in the field of advertising, solves the mystery of scattering thoroughly without waste, may become as rich as Crœsus, as famous as Napoleon.

Twelve years of experience, with my best thoughts in this channel, has convinced me that my lifetime must be too short to solve all of the mysteries connected with advertising.

Advertising is the life of trade.

When the mysteries of life are satisfactorily explained, then, I believe, the mysteries of advertising can be also. Without some kind of advertising (that is, making known in some way to possible buyers of the seller's ability to supply their wants), no business can live.

I do not say that no business can live and succeed without the aid of the newspaper press as a means of advertising; but I will say that no business of a general character can succeed as well without its aid as with it, nor unless some means of advertising or making known its wares is adopted can it live.

Let two men, of equal ability, honesty and capital, start side by side and manufacture articles of the same character, quality and style, having equal facilities in every respect, one studiously avoiding the use of money for advertising, the other spending one-tenth of his capital and one-tenth of his profits in a judicious use of newspapers, in ten years the one who advertises will so far distance his non-advertising neighbor that no one not knowing the facts would believe that they started equally in all respects. Further than this, the advertiser will have gained the favor of the community to a greater degree than his neighbor, his ideas will have become broad and liberal, while his neighbor's will have been growing narrow.

Look at our trade in any part of the country to-day. You will find the liberal and judicious advertiser selling goods of equal quality with his competitor, who does not believe in advertising, at lower prices, and yet after deducting advertising expenses, having his bulk of profits greater; his increased business, caused by advertising and attracting additional customers, having enabled him to buy cheaper, and the smaller profits on each sale to numerous customers amounting to more in the aggregate than the larger profits on the fewer sales of his competitor. Besides this, you will find the advertiser's stock always fresh and his styles new, his large patronage preventing the accumulation of stock, which is most certain to result without advertising.

Who are the men who will seriously consider investing $10,000, $20,000, $30,000, $50,000, and perhaps even $100,000 in a single year's advertising? Are they men who have never advertised? No, sir! They are those who know its worth from actual experience.

Among the mysteries, however, is the fact that so many business men who know its value so frequently neglect its use, and when occasion demands the reduction of expenses are most certain to begin here, though with similar conditions of trade a diminution of business is the invariable result.

Too many are apt to make the mistake of discontinuing their advertising in journals, because they have advertised in the past and built up a good trade thereby, believing they can save their advertising expense and continue their trade, not realizing how quickly they are forgotten when their advertising ceases. As well might one stop eating nourishing food because he is in robust health, having in the past fed himself well, and expect that his health would continue good, as to expect his trade will continue as good without as with advertising.

Would any wise farmer undertake to till his farm without fertilizers, because in the past he had fertilized liberally, and had his ground in good heart as the result? No, no; he knows it is far easier to keep his land productive while it is so, than to bring it up when once permitted to run down. What fertilizing is to the farm, advertising is to trade.

Would any wise horseman cut off the feed of his horse because liberal feeding had put him in good condition? No; though he would require less feed, he well knows it is cheaper to keep him in good condition than get him so when he is poor. What food is to the horse advertising is to trade.

The greatest mystery of advertising is the knowledge how to spend money so that the returns will warrant the expenditure. Two masterpieces of advertising recently may be seen in the sale of the newly revised Testament and the refunding of the national debt. In each case the maximum result is attained at the minimum cost—the great aim in all advertising. The desire to accomplish such an aim has led to the existence of the class publications, which have proved such valuable auxiliaries to advertising. By these it has become possible to impart knowledge concerning articles of great utility, but whose users form a very limited class, at an expense warranted by probable profits; and the class journal of to-day has become an important factor in trade, and without doubt gives greater value in proportion to expense than any other means of advertising.

I have dwelt so long upon the mysteries that I will but briefly mention the miseries and joys. The former methinks belong rather to the advertising agent than to the advertiser. What can cause greater misery than for the man who has been toiling patiently for years, perhaps, to convince business houses that their interests will be largely served by

the use of certain channels of advertising, to find that when he has succeeded his expected and hard-earned profits slip from his grasp, because some rival, who has done none of the work of educating, is satisfied with a smaller margin of profit, or, as is very likely to be the case, induces an expenditure in a different direction, simply on the ground of low price; and then be told very suavely by the advertiser that, if this experiment proves successful, he will give *him* a show, the chances being that the desire to save money has caused the seleetion of mediums, with very little to commend them as mediums for advertising, and results from which are decidedly problematic. The joys are experienced by the successful advertiser while receiving the returns from his investment, and by the advertising agent when his labors are appreciated, and in the thought that, through his efforts, the channels of trade are enlarged and the general good of business promoted.

Mr. Lockwood, it is with pleasure that I say that I regard your efforts and thoughts in the direction of progress in the advertising line entitle you to a share of the joy, unsurpassed by any; and I but express my heartfelt wish when I say, may it please God to spare your life and powers of enjoyment for many years, and may each year mark an advance in influence, usefulness and happiness greater than its predecessor.

To the next toast, that of "The Philadelphia Office," Jules Viennot responded in the following terms:

There was not much to be told about the Philadelphia office. Philadelphia is rather a slow place for advertising, but that was not to be wondered at, for it is peopled by Quakers; and it is in some way attributable no doubt to that fact that Philadelphians are always deliberate in their movements. He hoped, however, that the time was not very far distant when they would advertise largely. The piano men in particular, he said, might be induced to advertise, if it were not for the New York manufacturers who send so many pianos over there that the home makers could not get a fair show. If Mr. Weber would only keep out of the Philadelphia market more might be done in the piano advertising direction.

"The Western Office" was answered for by P. G. Monroe, who said:

I was enjoying myself on the topmost pinnacle of elysium when I heard Mr. Lockwood say, "Our Western office," and I came down, I assure you, quicker than a crow on a dead coon.

Here Mr. Monroe hesitated and said reflectively:

Excuse me, gentlemen, I have to refer to my manuscript, which, by the way, is not very perfect, as I have had only three weeks to prepare it. [Laughter.] We have listened this evening to the physic in music by the Oxon doctor, to the lamentations of the printing department, to the trials and tribulations of the advertising department from Brother Hammitt, who, by the by, is like a singed cat, better than he looks, and last, but not least, we have reveled with Professor Nolan in the delights of milling on the Liffey and Shannon. [Great laughter.] The fact is, gentlemen, you have a little "got the drop on me." I had thought up several brilliant things to say, but my predecessors have gobbled all of my thunder, and I find I will have to strike you on a new lead. I would like to make you quite a speech, but I hardly know what rôle to appear in, and then I am afraid if I let myself loose I would need a chilled steel attachment to the bosom of my pants to be able to retire with any degree of ease and comfort. You see, out on my Western stamping ground, there are so many of me. I am so promiscuously numerous, that I hardly know how to mix them up for the present occasion. At one time I am Commander in Chief Napoleon Lockwood, bravely planning my campaign or issuing orders to my lieutenants. At another time I am Admiral Farragut Walden, sailing in lashed to the rigging, bound to capture the forts whether or no. Next I am General McClellan Hammitt, doing any amount of spade fighting, but bound to get there if it takes all the summer. Then I am Horace Greeley Colvin, telling my correspondents, "Don't be so prolix, and for ——'s sake, don't send us cuts without articles or articles without cuts." At times, also, I am Treasurer Spinner Gallagher, telling my bookkeeper (he is the same fellow as the correspondent) —[Laughter]—"I note an error in your account as rendered of "two bits," please make the necessary corrections on your books. [Renewed laughter.] But the rôle that I appear to most advantage in, one most suited to my constitution, is that of a "Sherman bummer," raiding around the country, living off of the enemy. [Great laughter.]

Yes; the position I occupy is that of a skirmisher in advance, bold in the knowledge of the fact that there is a large and well disciplined army behind me, whose commissary department I can fall back on should the enemy give me the grand skip, and whose other departments aid and reinforce me all they are asked to do.

Sometimes I think I am a missionary, because I carry the tidings of the great joy of the Lockwood Press to many a benighted heathen who never before knew there was such balm in Gilead; and if some of this wicked and perverse generation do spurn this pearl of great price, remember that "while the lamp holds out to burn, the vilest sinner may return."

Recognizing the fact that "sleepin' in de fence corner don't fotch Crissmus in de kitchen," I assure you we have not been idle in the Western office. Since the first of January, 1881, I have personally taken advertisements as far east as Cincinnati, as far west as Omaha, and from Minneapolis to St. Louis, and before the end of the year I hope to get advertisements in Salt Lake City and San Francisco. The fact is, gentlemen, we have in the West a territory that is somewhat like Brother Hammitt, a good deal better than it looks, and I want you to understand that all your efforts aid and strengthen me in my field. To you of the advertising department I say every "ad" taken from a large and influential house or in a new field leads me to pastures new; to you of the printing department every handsome and well printed page assists me to so much business; to you of the editorial department, every well written article helps "him that's far awa," and I assure you, gentlemen, to hear me tell it in my country, each of you is, in your respective departments, a demigod. So then let us stand together, one for all and all for one, each proud of his position in the line, and the day is not far distant when your simple card, with the talismanic Lockwood Press attached, will gain you the attention and respect of every business man from Maine to Texas, from New York to San Francisco. And instead of some of us coming a thousand miles to attend these annual gatherings we will be brought together from every region where American commerce penetrates and American enterprise extends.

"Facts and Figures" formed the subject of the next toast, whereupon S. Y. Allaire said:

The company should not look for too high a standard of excellence in his remarks, as he had not, like the Western gentleman who preceded him, had three weeks to prepare them. He had, however, prepared some figures concerning the foreign commerce of the United States, which he would read; but, although it is a common saying that figures never lie, he should remind his hearers that an eminent Frenchman has said that nothing can be made to lie like figures except facts. Mr. Allaire then read the following:

STATEMENT, by Customs Districts, of the Total Values of Foreign and Domestic Merchandise Imported into and Exported from the United States for the Calendar Year:

	1880.	
DISTRICTS.	*Imports.*	*Exports.*
New York	$480,127,042	$416,062,772
New Orleans	11,661,342	102,749,227
Baltimore	18,637,592	74,410,069
Boston	68,649,083	67,838,296
Philadelphia	38,933,832	46,647,218
San Francisco	37,300,624	29,225,261
All others	41,496,735	153,747,306
Totals	$696,806,150	$890,680,149
Coin	$85,275,723	$16,045,901
Merchandise—Excess of exports over imports		$193,873,999
Coin—Excess of imports over exports		69,229,822
Increased wealth of the country		$263,103,821
Total emigration		souls. 593,703

SUMMARY of the Entrances and Clearances of American and Foreign Vessels in the Foreign Trade of the United States for the Calendar Year 1880 at the Port of New York.

	Entered.		*Cleared.*	
	Vessels.	Tonnage.	Vessels.	Tonnage.
American	9,291	3,323,379	9,291	3,387,771
Foreign	24,982	14,492,245	25,562	14,979,488
Totals	34,273	17,815,624	34,853	18,367,259

Now, gentlemen, these figures make a most lamentable showing for the commercial marine of the United States; but it is to be hoped that the changes of time will remedy all this, and that American shipping will so regain its importance that these figures shall be reversed.

Colonel Colvin took occasion to comment upon the figures presented by Mr. Allaire's statement, and said that in a letter from New Zealand, which will be printed in the June number of the "American Mail," a correspondent adverted to the fact that the merchants of that far-off country were generally disposed to buy American goods in preference to the manufactures of other countries; but that owing to the want of proper means of communication they were obliged to send their orders to England. This, he thought, it devolved upon every American to try to remedy, and that Congress should provide means, "subsidies" to speak boldly, whereby we could encourage commerce and provide American bottoms for American goods and regular and steady service.

Mr. Lockwood, taking up the same course of remarks, said that he fully agreed with the idea that steps should be taken for the recovery of our merchant marine, but that in the long ocean voyages now rendered necessary we wanted a large fleet of well built, swift and efficiently handled steamers, by which means only could our prestige on the seas be regained and our commerce extended. This was one of the most important considerations of the day for the advancement of American trade, and all political differences, disputes and miscellaneous legislation should be held subordinate to the one principle of extending our markets and pushing a knowledge of American products and manufactures in all parts of the world.

The concluding toast, that of "The Ladies," was responded to by John C. Gallagher as follows.

GENTLEMEN—In attempting a response to the toast of "The Ladies," I do so with a feeling of extreme diffidence and a profound sense of my utter incompetency to deal with the subject in a manner at all befitting its merits, or even approximately commensurate with its deserts. I might plead in extenuation of the inadequacy of my treatment that my knowledge of the fair sex is much more theoretical than practical; but I fear that such a plea would lack ingenuousness, and on its presentation there are doubtless gentlemen here who would solemnly lift their hands to heaven and vigorously aver that, with respect to woman, the density of one's ignorance was the measure of one's bliss. While, of course, it would be a matter of some difficulty to entirely dispense with woman, and decidedly ungallant to even harbor such a wish, still no sane person will contend that she has been to man a source of unmitigated good.

Even now we might be wandering about in a state of arcadian simplicity and basking in the supernal glories of a paradisiacal garden but for the weakness of woman in the person of Eve, who miserably succumbed to the wiles of the arch tempter and entailed upon man a heritage of labor. The curiosity of Pandora tempted her to open the jar of Epimetheus, and allowed to escape therefrom all the evils incident to man. The faithlessness of Helen compassed the destruction of Troy, while the shrewishness of Xantippe was indisputably a prime factor in prompting the wise and benevolent Socrates to drink resignedly the juice of the hemlock, and implore benedictions on the head of his executioner. In all times and in all climes the masculine heart has quailed beneath the scorpion lashings of the feminine tongue, and multitudinous male heads, destitute of hirsute covering, attest the moving powers of female digits recklessly applied in moments of abnormal exasperation.

But, gentlemen, this is merely one standpoint from which to contemplate a very diverse question. If woman, individually and collectively, is weak, and vain, and frivolous, and faithless, and curious, and shrewish, these qualities unfortunately do not inhere in her exclusively; neither do they bound the limit of her capacities, nor the extent of her capabilities. That she fully shares the higher attributes of the race is food neither for conjecture, nor polite concession. No extensive research is necessary to multiply instances of her display of heroism as grand, self-sacrifice as great, patriotism as lofty, devotion as supreme, constancy as tireless, as were ever met by like achievements on the part of her assumed superior, man. The incubus she has always rested under is, the tendency to repression, which man has ever and remorsely exercised; a tendency which has dwarfed her faculties, subordinated her personality, destroyed her self-reliance, and fettered her aspirations, till she has actually come to believe in the absolute verity of her own insignificance. It is true that, ostensibly among all civilized peoples, woman has in one sense occupied an exalted position. Poets in melodious measure have delighted to sing her praise. Orators have applied to her their choicest panegyrics; inspired by the magic influence of her beauty, gallant knights have performed prodigies of valor; while the "lords of creation" in general, have united in according to her a certain deference, which with lordly dignity they style "chivalric devotion." In other words they treat her with a condescending kindness; lavish upon her endearing appellations—call her angel; invest her with attributes which her humanity inexorably precludes her from possessing, while in matters of moment they calmly ignore her claims to consideration; when lofty principles, involving important issues, are at stake, they politely thrust her aside, with benign complaisance assert their own imaginary superiority, and all this they delight to call chivalric devotion. For a long period of time, woman has occupied this anomalous position, and it is only now, after the lapse of centuries, that there seems to be dawning upon her mind a faint perception of the fact, that she was created for a nobler purpose than to be the inane nonentity which law and custom have made her.

In this century of enlightenment, of advanced ideas and expansive views—in this age of liberal progressiveness—there has originated a movement, rapidly gaining strength, which ere long will overturn the dogma of woman's inferiority to man, dispel the long entertained, illusive idea of her inability to cope with man in the various fields of labor—a movement which will break loose the fetters that now bind her, overthrow the barriers of antiquated fogyism, and from the gloom of an oppressive despotism woman will emerge vindicated and triumphant. In that not far distant day, when woman shall be endued with the right of suffrage and become a potent element in the body politic, there will be inaugurated for her a brighter era and opened to

her an infinitely broader sphere of action. The senseless restrictions of the past will be swept away, and, breathing a nobler ether, reveling in a delicious sense of unimpaired freedom, she will soar above the petty longings that hampered her hitherto—*petty* through the misfortunes of her training, and not from the faults of her nature.

Then welcome be the Golden Age, replete with promise so alluring. Welcome the happy hour that shall witness the consummation of our cherished hopes, in the realization of an ideal republic, where might will not be right, and where will be uniformly observed a just equality, unfettered by the narrow distinction of sex. All hail millenial day, that shall usher in a new epoch in the world's history, opening to all alike every avenue of advancement, when woman, with her intuitive faculty of perception, will explore the realms of science and reveal its hidden mysteries. Beneath the touch of her deft fingers Art will glow with a more radiant beauty. Every field of labor befitting her strength will bear testimony to the fruitfulness of her exertions. To legislative halls her presence will lend dignity and decorum, though subsequent orators, descanting upon the acquirements of the future woman, may possibly be forced to an unwilling acknowledgement of her unrivaled capacity for running a primary and packing a caucus, of organizing a bolt and "cribbing" an election, for making wholesale promises anent the distribution of federal patronage and conveniently forgetting to fulfill them.

Now, having discharged the duty which devolved upon me in the regular order of business, pardon me if I make a digression and, invoking the aid of the muse, pay my tribute to

THE LOCKWOOD PRESS.

No tale of deeds performed by Trojan heroes,
Told in hexameters of Homeric grace;
No kindling epic of some modern Æneas,
To fire with daring zeal a later race;
Nor yet a song of romance mediæval,
Trill'd in dactylic measures blithely gay;
Nor rhyming idyl of the leafy woodland,
Evokes the tribute of my stately lay.

To Petrarch's facile pen and fervent fancy
We owe rich treasures of poetic lore—
Fair Laura's charms embalmed in fadeless mem'ries,
Her virtues great, extoll'd, a glitt'ring store.
At Dante's shrine we bow in rev'rent homage,
And own him, 'bove all questioning, sublime;
As awed, yet charmed, with minds intent, we ponder
The wonders of the Comedy Divine.

On Milton's brow is placed the wreath of laurel,
For concept rare, for grandeur vast attained;
The bard whose genius bold evolved the story
Of Paradise once Lost, anon Regained.
In Byron's "Pilgrimage," the rhythmic cadence
Of imagery bright and diction chaste
Enchants the mind, as erst thrall'd mortal palate
That did the nectar of Olympus taste.

But 'tis no ideal form enchains my vision;
Naught care I terrene loveliness to paint,
Inferno's horrors, heaven's transcendent splendors,
Nor e'en the touching woes of Harold's plaint:
My muse its flight wings in a realm prosaic,
And doth, content, its lesser goal confess—
To sing, albeit not in fitliest numbers,
The course triumphal of the Lockwood Press.

Though not from ashes, like the fabled Phœnix,
Rising in magic strength our wonderment to tax;
Nor famed Athena, sprung, complete accoutred,
From brow of Jove when cleft by Vulcan's ax;
Still marvelous thy growth, matured thy being,
Perfect and full the works thine imprint bear,
The typo's art, the pressman's crowning finish,
Consummate skill attest, and anxious care.

From thy prolific fount come, sure and speedy,
Journals of sterling worth and useful aim;
The Paper Trade, high influence exerting,
The Stationer, commanding weight to claim,
The Mail, Briarean in its proud aspirings,
The nation's wealth and prowess to extend;
To many lands and distant climes, conveying
Knowledge, of utile force, and practic end.

The Miller, to voice the giant industry
Which moves the homage of a mighty throng;
The Courier, fair messenger, to herald
The art of Thespis and the Muse of Song.
These but the choicest of thy many products,
Thou Protean minister to Titan trade;
Organs that have, with melodic intoning,
Thy glories spread, thy reputation made.

Persever in thy mission tried and fitting;
With stride colossal tread thine august way;—
As Hercules puissant labors finished,
So conquer thou to undisputed sway.
E'er be thy lofty standard proudly waving,
Victorious borne on Competition's field;
Success attend each well deserved endeavor,
For good a pow'r supreme be thine to wield.

On him whose patient toil and inborn wisdom
The heights of this symmetric structure crown,
Be Fortune's favors show'r'd in brave profusion
And bounteous meed of glory and renown.
Not Fame, so void of meritorious honor
As clings to him who fired the Ephesian Dome;
But name of Benefactor, living ever,
Aglow with lustre earth ne'er yet has known

And when the "potent sleep that knows no waking"
O'ertakes the mind now rife with virile thought,
And Nature, regal sov'reignty asserting,
Her mandate issues, with life's ending fraught—
On monumental shaft, love's care betok'ning,
Recounting deeds that shall his mem'ry bless,
Inscribed will be, to farthest time enduring,
The legend, Founder of The Lockwood Press.

Several speeches were made to impromptu sentiments, and the line of toasts was interspersed with songs by W. E. Nickerson, stories by S. L. K. Monroe and J. Viennot, and instrumental solos and duets by Dr. S. Austen Pearce and H. W. Nicholl, the piano used being a Weber upright kindly tendered for the occasion by Albert Weber. The evening was heartily enjoyed by all who were present, and thus closed upon a pleasant celebration of the ninth anniversary of the foundation of the Lockwood Press.

CHATTEL MORTGAGES.

[In the appended list R. signifies a renewal of a pre-existing mortgage; B. S., bill of sale; and Real, a mortgage on real estate.]

NEW YORK CITY.

Mortgagor.	*Amount.*
W. Lowey	$600
G. M. Spidell	750

NEW YORK STATE.

Geo. K. Zachariasen, Milwaukee, Wis	500
Caroline Safdi, Cincinnati, O. (B. S.)	500

Useful Soldering Fluid.—Small pieces of zinc are immersed in muriatic acid and left in it until the acid is saturated with it, which may be known by the cessation of ebullition of the acid, and also by the zinc, after that stage, being left undissolved; add spirits of ammonia, about two-thirds of the quantity of the acid; thin with a little quantity of rain water. When, at the time of adding the zinc, if the muriatic acid is heated to a low degree, the solving of the zinc will be achieved sooner. This fluid does not cause rust on iron or steel, and is excellent for all purposes, even for tinning.

To blue small steel articles, make a box of sheet iron, fill it with sand and subject it to a steady heat. The articles to be blued must be finished and well polished. Immerse the articles in sand, keeping watch of them until they are of the right color, when they should be taken out and immersed in oil.

ANSWERS TO CORRESPONDENTS.

F. C. N. Co. asks—1. Where can we buy a paper like the sample inclosed? 2. By what name is it known? 3. Is it of American manufacture? 4. At what price can it be bought?

Ans.—1. Of wholesale stationers. 2. Double rep. 3. Yes; it is made by the Owen Paper Company, Housatonic, Mass. 4. That depends upon the quantity you want to buy, $10 per ream being about the jobbing price in large lots.

B. & C. want to know who manufactures or sells a stamp canceler, William Simpson patentee?

Ans.—We find that the canceler you refer to is almost an unknown—or forgotten—quantity in the trade. We are told that it is almost obsolete. It was formerly made in Newark, N. J., but nothing has been heard concerning it lately—some say for at least five years. There are other cancelers now more prominent in the market.

An expert in microscopy has recently succeeded in tracing on glass the wonderful curves called after Lissajou. He has traced these in lines of 55,000 to the inch, and finds that they are much better for testing the power of a microscope than straight lines. Aside from their great beauty, and the necessity of skillful illumination to see them well, the intersection of some lines and the gradual approximation of others, arising from the variation in the figures, where every degree of the sharpness of a curve is obtainable, from a line returning almost upon itself at an exceedingly acute angle, to curves so flat as to present in parts virtually the appearance of parallel straight lines—all this combined with a knowledge up to a certain point of the nature of all lines cut in glass, renders these rulings more instructive, perhaps, than the markings on diatome valves, in regard to which there is much question. A curious feature of some of these figures is that, though all the lines would seem to be in the same plane, it sometimes happens that an alteration of focus is requisite to bring out the transverse lines.

WALTHAM CRAYONS.

White and Colored.

WE are keeping our Celebrated Waltham Crayons up to the very excellent standard which they have borne for the last thirty-five years, and we shall at all times be pleased to send a sample of our Crayons free by mail, to any dealers, that they may test them and judge for themselves as to their strength, fineness, color, &c.

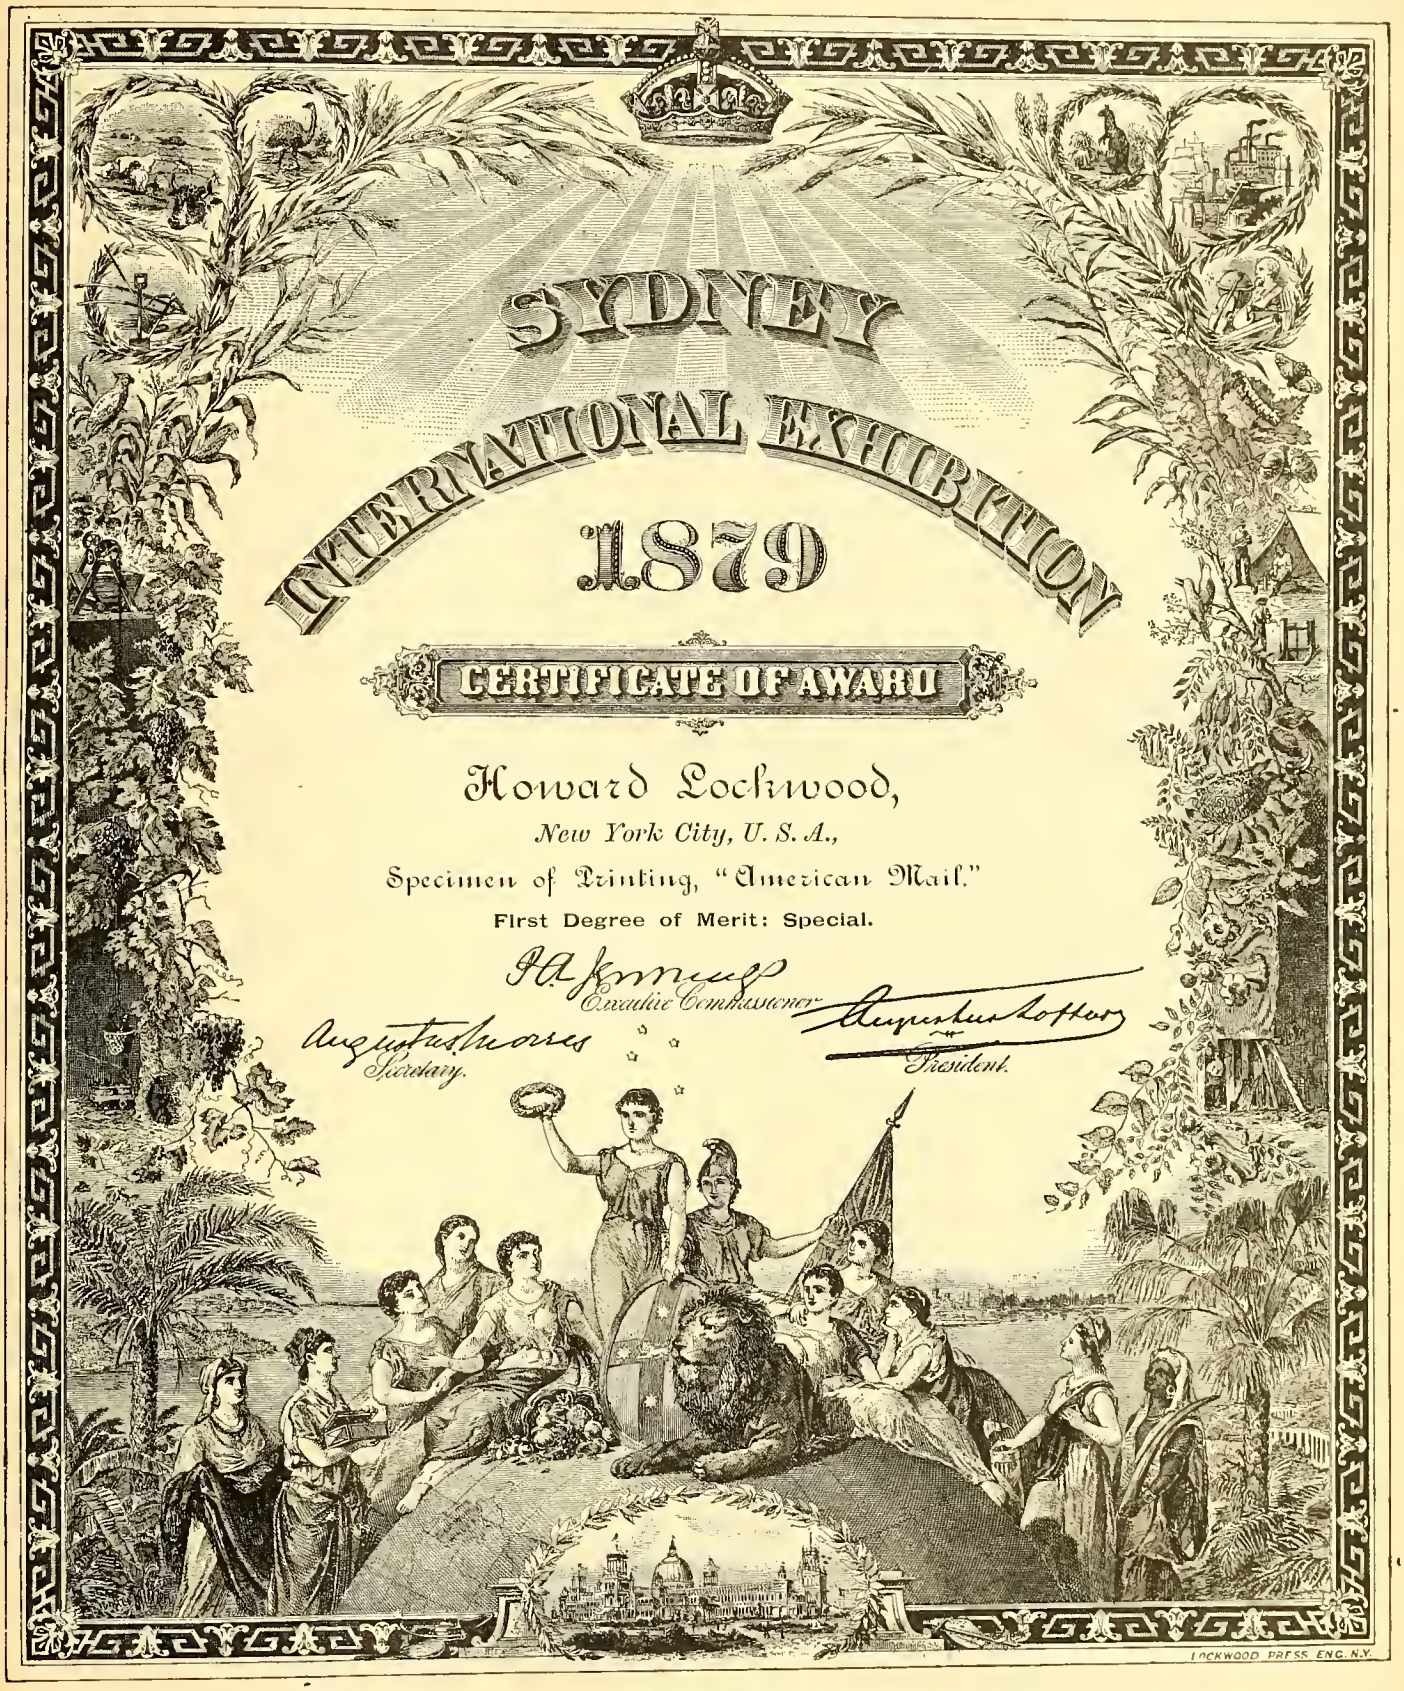
PARMENTER & WALKER.

Waltham, May 25, 1881.

WANTED—A YOUNG MAN OF EXPERIENCE in the printing and stationery business. Only such need apply to J. S. RIVERS, 74 Camp street, New Orleans.

FOR SALE.

Good will, stock and fixtures of the extensive blank book store and manufactory, 32 South Fourth street, Philadelphia, late of John W. Gladding, deceased, now in active operation and complete order. Address GUARANTEE TRUST AND SAFE DEPOSIT CO., Philadelphia.



IN AWARDING the **First Degree of Merit (Special)** to HOWARD LOCKWOOD, Proprietor of the LOCKWOOD PRESS, New York, the Jury at the SYDNEY INTERNATIONAL EXHIBITION used the following language: "This exhibit is equal to anything produced in London or indeed anywhere else. The type is sharp and distinct; the wood-cuts so artistically brought up and worked that they resemble steel engravings; the paper has a beautiful glazed surface, and the ink, which is a copy black, is distributed with perfect uniformity." This high and flattering indorsement is fully confirmed by the Juries at the INTERNATIONAL EXHIBITION now being held at MELBOURNE. Advices just received from Melbourne announce that the Lockwood Press has been

AWARDED FOUR FIRST-CLASS PRIZES, In Printing, Engraving, Art, and Periodicals.

THESE ARE THE HIGHEST HONORS AWARDED TO ANY EXHIBITOR FROM ANY PART OF THE WORLD.

A. J. HOLMAN & CO. PHILADA.

Family, Pulpit & Reference Bibles

WITH FINE COLORED LITHOGRAPH MAPS,

Equal to the Best London and Oxford Editions, at Half Their Price.

PHOTOGRAPH ALBUMS,

Stronger Bindings, Handsomer Styles, Lower Prices than the flimsy Foreign Goods.

VELLUM-CLOTH GUARD JOINTS AND PATENT CHAIN-BACK BINDINGS for BOUDOIR, CABINET and CARTES-DE-VISITE PICTURES.

We have adopted new designs, selecting the most desirable and artistic patterns. Our Albums are made in the strongest manner possible, with vellum-cloth guard joints, and when open lie perfectly flat. They are greatly superior to foreign manufactured Albums, both as to style and prices, and are adapted for the best retail trade. ☞ New Catalogues mailed on application.

JAPANESE HANDKERCHIEFS AND NAPKINS

For the Season of 1880.

WE are now prepared to furnish these goods in from Twenty-five to Thirty patterns, in new and elegant designs. They are as soft and pliable as silk, and their cost is less than that of washing linen or cotton. They are especially adapted for use at Public Dinners, Picnics, Hotels, Steamboats, Restaurants, &c.

Aug. Leonhardi's (Dresden) Celebrated Alizarine Writing and Copying Ink.

THIS Ink combines the qualities of a Writing and Copying Ink in a manner unsurpassed by any other make in the market. As a Copying Ink it will make a distinct copy even several days after, and if required two clear copies can be taken. As a Writing Ink it excels for its intense blackness. It never fades, nor does it blur. **It is used in all Government Offices on the Continent of Europe**

We are enabled to quote this Ink far below the prices of other Copying Inks.

A PAPER MAKER'S TRIP AROUND THE WORLD.

[Taken from THE PAPER TRADE JOURNAL from the *Papier Zeitung.*]

FREIBURG (Baden), April 7, 1881.

After safely arriving here some weeks ago, I at times wished for some of the surplus heat of the tropical countries lately visited in order to moderate somewhat the damp cold of this valley of the Black Forest. I wrote you in December last while perspiration was streaming down my face; but here, in April, we cannot dispense with a good fire, if we would feel comfortable. Notwithstanding this change, I hasten to give you some description of the paper manufacture of India and Egypt, to the extent of the observations I was able to make.

Ceylon does not make paper, everything in that line being imported. In the temple of the "holy tooth of Buddha," at the library connected with it, in the ancient capital Kandy, I noticed some holy books written in the Pali language, of a peculiar shape and of unusual material. Between rich, silver spangled covers there are bound strips of paper, made from bamboo leaves, on both sides of which there are engraved Singhalese characters, these sheets measuring 7 centimetres in width by 50 centimetres in length. This paper is of great durability, and is said to have been produced at very little cost. These are its advantages, but it burns like tinder. A curious paper, you will say; but it is all fibre, and "pure" fibre, and so it belongs to our handicraft.

About domestic paper manufacture in India I cannot communicate anything; there were no mills on my route, and a trip there is not as easily carried out as in Japan. Besides this the Hindoos, as I found them, did not stimulate my zeal to come into contact with them more than I could help. If I had had at my disposal ten interpreters, I feel sure that my queries would still have been only imperfectly answered. Only people who have spent a long time in their country, and speak Hindustanee fluently, who have moreover become apathetic themselves under the influence of the heat so as not to get into a rage about the laziness and sluggishness of the natives, can ascertain something worth knowing about paper making there.

Only five paper mills after the European system are to be met with in India; one each in Calcutta, Lucknow (building) and Allahabad, and two in Bombay. They only make common printing and wrapping paper. At Calcutta, furnished with a personal introduction to the manager, I took a ride to the Bally Paper Company's factory, but to my astonishment was refused admission, and I wonder what secret arts are performed there! The Lucknow paper mill, property of a Hindoo company, was still building. When I was at Bombay, I did not care to expose myself for a second time to another refusal, and consequently abstained from a visit to the factories there. But I shall recapitulate what I learned in a short conversation with the manager (while calling at a near-by jute mill which I was allowed to visit) about the raw material on the one hand and wages on the other. The chief stock used at the Bally mill (and also at the Bombay works) is jute waste from the jute factories near at hand and, besides, the very much worn, high colored calico rags of the Hindoos. But these calicoes are of such soft texture that they are hardly capable of standing a thorough bleaching. Jute, on the contrary, furnishes an excellent pulp; but it is impossible to bleach it perfectly white. This is the reason why the few classes of

printing paper, of the Bally Paper Company for example, turn out no better than a light yellow, and consequently the paper makers in India find it difficult to compete with low graded Belgian and English printing paper, sold at ridiculously low figures at Calcutta. The Bally Paper Company, on the other hand, furnishes a very good wrapping paper, which does not sell very readily, for in India the American principle of always using the strongest and best wrapping paper is not followed. The Lucknow Company intends to chiefly avail itself of a sort of reed-like grass, which grows abundantly in the vicinity, as a material for pulp.

As you may suppose, these paper mills are arranged and conducted upon the English model, only steam is resorted to as a motive power, while the operatives are Hindoos. While the steam power is expensive, wages are extremely low; thus the latter are paid 2.75 to 3 marks per week! or about 6 to 10 cents per day. The best hands do not get over 1 mark (24 cents) per day. Only one man is paid proportionately better, *i. e.*, the carpenter, who, in all factories in India, is a Chinaman—an intelligent, quiet, serious individual, always at work, and who keeps everything under his management at all times in the most perfect order and who, therefore, forms a striking contrast as compared with the lazy Hindoos; but then his wages are 2 to 3.50 marks per day. The manager is an Englishman, and he draws a high salary after the true style of India. However, in spite of these incredibly low wages, and notwithstanding the fact that there is a sufficient quantity of rice straw and the grass I have alluded to and jute, paper makers in India have not got beyond a yellowish printing and wrapping paper, although the demand is enormous. The common sorts of paper come principally from Belgium, and medium and fine grades from England. I do not think that the Germans can do much there except, perhaps, in fine paper, for prices have been run down low, and the freight to the ports of distribution would be considerable. I asked a wholesale merchant at Calcutta how it was that German writing paper, which is as good as English, did not sell. He answered that the German "laid" paper is frequently too much calendered, while they want it to show the "ribs" distinctly, and he held it against the light. If this is the case, they may easily be suited, and as there are various first-class German firms at Calcutta I feel sure that they would be willing to undertake to introduce German paper. As for the general impression I received of the condition of the paper industry and trade in India, it was anything but favorable.

The trip from Bombay to Suez takes twelve days, and in the Arabian Sea I had the rare chance of observing a so-called "milky sea." At Cairo I visited the last of the non-European paper mills built in Egypt, erected at the time by order of the ex-Khedive, Ismael Pasha, in connection with a type foundry and printing establishment, in the Boulac suburb. It presents a most distressed aspect. It was built by a well known English firm for the trifling amount of £115,000 (for this I do not vouch), in the most extravagant style, and tolerably well, if we except the coal entrepôt, turning out six tons on two 70-inch machines as a maximum, and at one time going on swimmingly, but I found the mill idle. The reason for this is that "there is no money and that the mill has to suspend operations till the paper on hand is sold." The mill had been standing idle for about a fortnight, and a good many employees were lounging about, half elegantly and half shabbily dressed. In the paper warehouse some activity was noticeable. To whatever questions I put I received a polite answer, nor was the traditional cup of coffee wanting. I saw writing, printing and wrapping paper of all grades, at moderate prices, but indifferently well made; a fancy paper, from banana leaves, was very remarkable, for it still showed the veins on it. But the interest it provoked was merely negative, for I could not help deploring that a factory got under way at such enormous expenditure, should have fallen to such a pitiful condition; it indeed furnishes us a counterpart of the country as it is. Next door, in the Egyptological Museum of Boulac, are to be found, carefully preserved behind glass, several papyrus rolls, thousands of years old. They seemed to me so beautiful that it seemed like a mockery to hold against them the miserable samples from the Boulac paper mill, and thus compare the advancement our age has reached in this line of industry and art with these ancient specimens of flourishing science and artistic skill.

Although these Oriental people are within the bounds of European influence, and in constant intercourse with our Western countries, they have accomplished nothing, for, on the one hand, they lack skill and, on the other, perseverance in performing work as we do it in Europe; their only talent is apparently the one of letting everything run to waste and ruin.

How different from them are the populations of the extreme East, say the Chinese and Japanese, and how quickly the latter appreciate the advantages which civilization offers them. While rapidly adopting our methods, these Chinese and Japanese combine therewith their national peculiarities with remarkable cleverness, and thus work on indefatigably. I do not hesitate to say that of all the Eastern countries I visited during my trip, Egypt is to all appearances the one furthest off from the road to real progress, and that the character of its inhabitants by no means answers the requirements of a vigorous development.

Europe received me with a wintry cold salutation. I am now at work to familiarize myself again with my former occupation, but do not deny that on many occasions a yearning overcomes me when I remember the enviable manufacturing circumstances in the United States. As you may imagine, I have made quite a collection of paper samples during my travels, and I should be really glad to exhibit them to you in the event of your getting into this neighborhood. Meanwhile, receive my greetings on German soil.

OSCAR FLINSCH.

THE PAPER TRADE IN THE CITY OF NEW YORK.

[Continued.]

It was early in the year of 1862 when the outlook for the paper trade seemed particularly gloomy, and old heads wagging with the semblance of wisdom said it was "a bad time to begin," that two young men who were clerks in a paper house prominent then determined to set up in business for themselves. Prophets, like politicians, however, are sometimes mistaken in their predictions, and so it proved in this case. Hardly had Hand & Elsworth, the young firm referred to, opened their store before a complete change came over the horizon of the trade. The clouds broke away and the sun of a new era shone where they had been. The great war boom set in; the demand for every kind of paper rose in excess of what had ever been known before, and, as the consequence, the trade expanded in every direction. The young firm, therefore, was borne upward and onward as upon a flood tide of prosperity, and is to-day one of the solid houses of the trade.

Allen F. Hand and Eugene Elsworth, both natives of this city, about the same age and now in the meridian of manhood, entered the paper trade about the same time, the year 1857, as clerks in the same house, Braman, O'Connor & Hard. They opened a store and began a general jobbing trade in paper at 164 William street, May, 1862. Shortly after they began, Mr. Braman withdrew from the firm of Braman, O'Connor & Hard; and though never actually becoming associated with them in business, took a desk in their store and exerted his influence in their favor. Their business career has been comparatively uneventful, continued and increasing prosperity being its chief feature. Since 1867 they have been more or less engaged in manufacturing as whole or part owners in mills. They now have a mill at Peekskill in which they make white and colored tissue paper and fine specialties in that line. Their "Anchor" tissues have become celebrated in the market. In 1871 they moved from 164 William street to their present stand, 51 Beekman street.

[To be Continued.]

IMITATION INLAYING.—Suppose an oak panel with a design inlaid with walnut is wanted. Grain the panel wholly in oil. This is not a bad ground for walnut. When the oak is dry, grain the whole of the panel in distemper. Have the paper with the design drawn thereon, the back of which has been rubbed with whiting, place it on the panel, and with a painted stick trace the design. Then with a brush and quick varnish trace the whole of the design. When the varnish is dry, with a sponge and water remove the distemper, where the varnish has not touched. This, if well executed, presents a most beautiful imitation of inlaid wood. Marbles are executed in a similar manner.

IMITATION IVORY.—Make isinglass and brandy into a paste with powdered eggshell, very finely ground. Give it any desired color. Oil the molds into which the paste must be poured which must then be slightly warmed. Leave it in the mold until dry, when its appearance resembles ivory.

For a dead finish for black walnut prepare the wood by filling, and then give it three or four coats of shellac or oil finish, and when dry rub with fine ground pumice stone and raw linseed oil, using a woolen or hair cloth. Clean with old cotton rags. Care must be used not to rub through to wood.

BLOTTER TABLET PATENTED

PADS OF PAPER WITH BLOTTER ATTACHED.

ELEGANCE. ECONOMY. CONVENIENCE. CLEANLINESS.

THE paper is tableted, so that each sheet may be freely removed, leaving a perfectly clean, smooth edge. No paper is wasted. The sheet on which you write is always clean, being protected by the blotter. The blotter, of the full size of the paper, is so attached at the top of the pad that both sides of it may be used, and will last out the entire contents of the pad, being always at hand, and perfectly clean.

The blotter is kept clean, and also from wearing, by the card board cover, which is made of a highly polished stock, perfectly smooth, and that will not catch dust or dirt from the desk. The cover is richly ornamented on every pad, giving the whole a neat and elegant appearance. All kinds of paper and printed blanks are put up in this form at prices as low as if loose; making the most complete line of staple and elegant stationery ever offered to the trade.

CEMENTINE.

WE desire to call attention to a new article which we are just now introducing to the trade. It is a liquid glue, cement and mucilage combined. In our own business we experienced so much difficulty in finding an adhesive that would make our labels adhere to the tin cover of the Hektograph, that we gave a commission to one of our most distinguished chemists to compound for us an article which would answer our purpose. After months of labor the result has been the production of an adhesive so far superior to anything heretofore made, that we have decided to manufacture and offer it for sale, and are now ready to supply it in any quantity. It is without doubt the best article of the kind for family and general use ever offered to the public. For repairing China, Glassware, Furniture, Rubber, Leather, Books, Billiard Cues, or pasting labels upon tin or other metal or for any use where glue, cement or mucilage is required, it is unrivaled. For warm climates we make an article expressly adapted for use there. We supply it by the gallon or barrel, and for family use it is put up in bottles, with brush, at 25 cents. Samples will be sent free to large consumers.

CARTER, DINSMORE & CO., Boston and New York.

BYRON WESTON

DALTON, MASS.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST and ONLY AWARD** given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition*, *Massachusetts Charitable Mechanics' Association*, *Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission*, *Medal of Progress American Institute*, *1877*, *and Medal of Improvement and Progress, Boston*, *1878*. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

☞ **Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.**
Each sheet is water-marked with name and date.

VOL. IX.---NO. 23. NEW YORK, JUNE 9, 1881. WHOLE NO. 311.

Correspondence.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BOSTON, Mass., June 6, 1881.

Trade among the stationers during the past week has been dull, so to speak, although its volume has not been below the usual amount afforded at this season of the year. City retail trade continues good, and near-by trade quite satisfactory. A visit among the leading dealers has elicited no special features.

Summer stationery has made its appearance in great variety, covering bills of fare, dinner cards, and orders of dances. The greenwood tree and the roar of the sounding wave are seen or heard in summer stationery.

Plain white cards, with the guest's name elegantly written upon them, are always proper; but most persons prefer something ornamental. The dinner cards are pretty pictures in dark rich colors, and the guest's name is written in a blank space in the lower right hand corner. The smallest of cards are little squares, with fan sticks on two sides and bright fringe on the other two, a fan handle projecting from one corner, and a little pen and ink picture occupying the place of the fan mount. These are cleverly done trifles.

Some engraved bills of fare are very artistic. On one card the lady waiter is shown bringing in a turkey with the sweetest of simpers; on another she figures as "the maid who means business," with her braided hair flying out behind her as she rushes along towards the guest to whom she is bearing his dinner. These clever conceits are intended for the summer hotels.

Oblong cards, ornamented with pen and ink work, have a vine leaf, palette or fan cut out in cardboard, and pasted at one end and afterwards covered by a landscape or figure piece. There are also square cards upon which convivial passages from Shakespeare are illustrated in pen and ink.

Among dance cards, American and English productions, are numerous painted cards, which have pretty floral devices and a blank space for the name. A dinner card is square scored across the corners, so that it may be folded over to conceal the bill of fare and have a satin De La Rue picture pasted on its back.

Cards especially intended for private picnics and garden parties have clover and vine leaves cut from cardboard and fringed, and also a little bird with real feathers in one corner.

The new birthday cards include a set of pretty Du Maurier girls, black stockinged and fashionably frocked, and playing ball or battledore or jumping rope. Others show pretty designs in the same line of artistic thought. Effective cards are also painted on birch bark, slips and eggshell papers.

Lee & Shepard, publishers, have removed to chambers over their former store, 47 Franklin street.

The members of the Massachusetts Press Association, with their wives, will go to Bar Harbor on June 22.

The menu card which set forth the elaborate spread of the Boston Law School Alumni was designed by a lawyer and printed on parchment.

James R. Osgood, publisher, sails for Europe on Thursday next and will be absent three months.

Rand & Avery are printing a large edition of the New Testament revision.

Commercial travelers in the stationery trade continue to report a good feeling all around. The prospects of a large fall trade were never more favorable than now.

I hear that some changes are contemplated in the trade here, but have been unable to trace them to a reliable source.

The wholesale stationers and jobbers now close up at two o'clock on Saturday afternoon. This rule will remain in force until September 1.

L.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, Ill., June 4, 1881.

Now that a full report of the pleasant entertainment given last Saturday night by Mr. Lockwood to his affable and brilliant staff, has been spread across the waiting continent, it must not be imagined that the affair was alone enjoyed by the participants. No, wherever dwells a man bearing upon his card the "talismanic legend of the Lockwood Press,"—wherever lives and breathes a correspondent of that institution, there also the glowing speeches have been read and enjoyed—the lofty sentiments have been drunk and encored. Speaking for "Chicago," so affectionately alluded to by the managing editor, I can say the occasion was one calling forth all the enthusiasm imprisoned in his "swellin' 'art," and was enjoyed—as by a war-horse, who "smelleth the battle afar off." One correction, however, I wish to make—and that without alluding to "people who live in glass houses"—which is, that after due consideration, I think "Chicago" may also be safely set down among those "who prize their connection with the Lockwood Press higher than all other privileges," not excepting even the "thought embodied in that elegant, suggestive, but mystic Western expression, 'booze.'" That error corrected, here's to the Lockwood Press, and "long may she wave!"

And so, filled with the inspiration afforded by the event, I hasten gladly to my duties as trade chronicler.

After a slight falling off in some branches the Fourth of July season approaches, with its regular tide of trade and helps some of our dealers to quite a respectable boom in pyrotechnic and kindred goods.

Schweitzer & Beer are about two weeks behind on orders—a condition due principally to the great rush on the manufacturers and their inability to meet the demand. The house is doing a large business this season in bicycles, its two brands, the "Ætna" and "Fairfield," being prime favorites, while in goods for the Fourth the extent of its trade is astonishing. This house is in every way courteous and reliable and well deserves its extended patronage.

While mentioning bicycles and vacation goods, it would be remiss to omit John Wilkinson, 77 State street, whose business in this line is quoted as nearly double what it was last season. Special increase is noted in the demand for archery goods—an increase probably accounted for by the retirement of the smaller houses from the ranks of competition. Whatever may be the cause, the business of the house in these goods is something surprising, as it is also in hammocks, camp chairs and similar summer luxuries. The camp chair sold by Mr. Wilkinson is a marvel of cheapness, and sales are consequently large. I may also mention the almost indispensable hammock hook as a very necessary convenience for those who wish to enjoy a quiet siesta without a half hour's trouble in fastening up the hammock.

The Dennison Company moved, on May 1, from 102 Madison street to 155 and 157 Dearborn street, where it has pleasant and roomy quarters.

A new firm, in a needed line, is that of Henry Burkhart & Brother, just opened for jobbing in fine brushes and pencils, at 39 Monroe street. It keeps a full supply of these goods for every class of work from portrait to coach painting, and merits patronage.

Dunwell & Ford, "The Society Engravers," 50 Madison street, can seldom rest for any length of time without producing some elegant novelty with which to tempt the purses of their patrons. The latest is a tasteful line of embossed, colored and illuminated military cards, consisting of a fine, heavy beveled edge *carte*

de visite, with a correct epaulette in the upper left corner. The sets rank from corporal to general, including the non-commissioned staff, and are destined to become "the thing." The set also includes the Veteran Union League and the G. A. R., making a very complete line.

The Elwood files are now manufactured by Adams & Kimball, 38 Madison street. Since they were purchased by Adams & Kimball they have been improved greatly in quality and appearance, and are destined to be very popular. A visit to their factory showed your correspondent that there must be a large sale for these files, as a large force is constantly employed and the demand is increasing. They are sold by the News Company and Jansen, McClurg & Co. here, by the commercial stationers generally, and by the large jobbing trade throughout the country.

H. A. Taylor, the affable manager here for the Stylographic Pen Company, had a very scurvy trick played upon him last week by an enterprising Chicago lad. The trick was no less than an order for samples of the Livermore pen, forged on the Chicago Music Company. With his usual complaisance, Mr. Taylor made up a fine line of samples in a morocco case and delivered them to the boy. After the discovery of the fraud, Mr. Taylor went quietly to work, "liming twigs," until, I am happy to state, he has caught the boy and recovered the value of his pens. Less fortunate have been some other victims to whom similar requests for the Livermore were sent, and who palmed off other goods upon the "innocent" youth. As a contemporary remarks, "people will have these Livermore pens, even if they must steal them."

H. W. Livermore, of Providence, left that city on Tuesday, and if he has not got lost upon the way will probably arrive here "one of these fine mornings." Pens are expected to take a fresh start about that date. G. B. H.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, O., June 6, 1881.

Rains have fallen and soothed the buried seed and encouraged the growing grains and grasses. After all, the favor of the elements is indispensable to trade. Much of the dullness in the retail trade has been due to the seasons, past and present—in the past the recklessly rigorous winter—the dropping of spring out of the procession of the seasons—the uncertainty of the weather at the closing of May and about the beginning of June. Everywhere business men—wise men—held their breath and looked up. A cloud no bigger than a man's hand was big enough to inspire hope and the bounteous showers that fell like manua from heaven to feed the hungry grain and gushed from the slaty clouds like fountains struck from rocks in the desert to quench the thirst of the parched fields, were enough to call forth shouts of gladness.

Bankers in Cincinnati say that the evidence of prosperity, in the shape of drafts, bills of exchange and the like, was never so strong at this time of year as it is in this month of June. Men are paying debts promptly, and remitting frequently. Production and consumption must be keeping up the state of equilibrium required by the laws of nature, else we should not see such indications as these. Such is the justifiable inference.

Retail dealers say that trade is dull, but not more so than is to be expected ordinarily in June. The month is normally dull. Manufacturers say that business is brisk, and they express the opinion that summer retail trade will be unusually brisk to make up for the dullness of the spring—that is, the late winter and early summer. Within a month we shall know what to expect of the wheat crop of the entire country, and within six weeks corn will be far enough advanced to enable us to form an estimate of this year's yield. Millions of men in this nation are waiting to see what the probabilities are before they will buy stocks. If they are favorable, the purchases will be made all the more freely. It is perfectly safe to say that the good time coming will soon be here—perfectly safe it is to say this, since we have a climate which can be depended upon. In fact there is not, and has not been any suspicion of the times—any fear of an interruption in the rise and flow of our tide of prosperity. There are no rocks on which that tidal wave might break. With full faith that business in this country is fuller of life and vigor and that it enjoys greater vitality and more rugged health than ever before, men are making mills hum and anvils ring all over the land.

The strikes are not, however, taken into the account, and just now six iron and steel rolling mills in Cincinnati have stopped on account of a strike by the mill men. This throws two thousand operatives out of employment and, counting their families, exposes at least seven thousand people to the mercies of a precarious way of obtaining means of subsistence. The mills have stopped and the men are idle. Here are two thousand men, whose weekly earnings were $25,000 per week, doing nothing. This loss of time is already two per cent. reduction of their wages. But you cannot cut off from labor here at the rate of a million and a quarter a year without making many people feel the effect of this reduction. I do not stand as judge between employer and employee, but I sincerely deprecate these clashes of interests, supposed or real. They are embryo shoals, whose growth threatens to impede the flow of prosperity which now gladdens the nation. Perhaps these clashes, too, are governed by law, and must come and go, and are an inevitable factor in our industrial economy.

At Middletown, Wardlow, Thomas & Co. have completed arrangements for a new paper mill 200 hundred feet long, two stories high, and four tons capacity.

In this city Krebs & Co. have turned off an illuminated circular for the coming ninth Cincinnati Industrial Exposition which is the best thing of its kind ever executed here—a real work of art.

George Gibson, who recently set up a lithographing establishment on Home street, is having all of the work he can do. He is reaching out and a brilliant success is already assured. He is a veteran in the business, but is new in his present enterprise in the respect that he has no partner.

Among the recent additions to the stock on sale among stationers in this city are roller skates and hammocks. PRINCE WILLIAM.

CAMEO CUTTING.

Cameo cutting is one of the most profitable arts to engage in. There are but a few cutters, and there is a steady demand for all they can produce. The cutters are very secretive, and greatly dislike to talk about their work. Most of the cameos are produced from sea shells. A visit to a cameo cutter's workshop found him seated at a table covered with tools, varying from a strong, triangular shaped steel instrument to the most delicate pointed bits of steel wire fastened in handles. Very fine files and knitting needles, set in wood grips and ground to infinitesimal points, figured in the lot. On a pad of leather, before the cameo cutter, was a block of wood just big enough to be grasped with his hand, and cemented to the middle of it was an oval object that looked like a piece of alabaster, just big enough to make a seal for the finger of a man who did not object to wearing large rings.

Upon this the artist was just finishing a copy with a pencil, pointed to needle fineness, of a photograph in profile of a gentleman which was leaned against a little photograph easel before him. Having finished the outline, he laid his pencil by, and taking up a fine wire tool he scratched the pencil mark around with it. Then he took a darning needle with a sharp point and scratched the line deeper. He worked with a magnifying glass at his eye, and stopped continually to inspect the progress of his work with critical minuteness. Then he went at it again, working slowly, scratching over the same line again and again and always examining after each scratch. He changed his tools as he went on, and from the darning needle descended to a trifling little fragment of steel wire, not as thick as an ordinary sewing needle, set in a slender handle. With this he scratched and rescratched until the lines he had drawn with his pencil had quite vanished and a thin, fine streak of a dark color had marked the outline of the head he had been tracing his way around.

Next he took one of his burin-like tools and commenced again. This time he worked on the outside of the outline, cutting and scraping at the surface until the white turned gray, then brown, and finely vanished, leaving the face in relief, surrounded by a black ground—that is, the portrait remained intact in the white substance which formed the outer layer of the cameo, while it had been cut away around it to the lower or dark layer. The portrait or figure is then modulated upon its surface until it assumes the roundness of nature. The edges are left square to the dark ground. This is necessary, as if they are gradually rounded down the outline becomes undefined toward its juncture with the relieving surface, owing to the white of the raised portion being partially transparent and permitting the dark to show through it when it is thinned down. Care is taken to finish this dark surface as much as possible with the cutting tools and so separate the white from it as to leave it smooth and unscratched.

A final polish is given it, however, with putty powder, applied dry with a stiff brush; but the utmost care is necessary in this operation, as the slightest slip will ruin the work. This is the cameo cutter's work, the mountings being the jeweler's. The cameos sell, unmounted, for about $25. Italy is the home of cameo cutting, and the finest work of art in that line is still turned out there. Genoa and Rome are the centres of production. There is a colony of cameo cutters in Paris who produce some very good work. The cameos made abroad are, as a rule, fanciful works, copies of statues, mythological figures and the like. The shells used in cameo cutting are of several sorts, but all are ordinary sea shells or conchs. Some come from the East and some from the West Indies. Many are imported, as there is commonly only enough material available in each one for a single cameo. These shells all have a white surface, but the inner layer is red, black and dark claret in color, according to the species. The pieces to be used by the artist are sawed from the shells and shaped into the square or oval form required on a grindstone. Then they are ready for the artist.—*Ex.*

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD BERKSHIRE MILLS **LINEN LEDGER PAPER** Will stand the severest test of COLOR, CLIMATE, INK OR WEAR.

Being **Triple Sized** (a process entirely our own) and **Loft Dried**, can be erased and written upon the fifth time distinctly. None genuine without the water-mark and date, thus—**Old Berkshire Mills Linen Ledger, 1881.**

THE "PERFECTION" FILE.

The illustration shows the design of the "Perfection" file in its improved form as manufactured by George W. Plummer, 23 Park row, New York. This and the "Perfection" cabinet file are simple and easy to work, and, it is claimed, have advantages that other files have not.

NEW PATENTS.

No. 241,713. Method of Preparing Paper, &c., for Reproducing Drawings and Designs.—Henry Pellet, Paris, France, assignor to Clarisse Zoe Joltrain, same place. Patented in France November 23, 1877, in Belgium November 26, 1877, and in England December 6, 1877.

No. 242,101. Book Stitching Machine.—William F. Barnes and John Barnes, Rockford, Ill. Filed April 30, 1880. (Model.)

No. 242,120. Tray for Displaying Hand Mirrors.—George Eastman, Cambridge, Mass., assignor to the Diatite Company.

No. 242,139. Toy Money Box.—Louise Kyser and Alfred C. Rex, Philadelphia, Pa.

No. 242,174. Temporary Binder.—Edwin Whiting, Jersey City, N. J., assignor to William A. Amberg, Chicago, Ill.

No. 242,187. Toy Bowling Alley.—John H. B. Bryan, Philadelphia, Pa., assignor of one-half to Charles T. Thompson, same place.

No. 242,192. Book and Card Corner Rounding Machine.—Henry P. Feister, Philadelphia, Pa.

No. 242,210. Construction of Dolls.—Henry H. Mason and Luke W. Taylor, Springfield, Vt.

A device for uniting the head of a doll to the body thereof, constructed with a flange, which forms the neck of the doll, and a bearing for the head on the body and a groove, in combination with a pin, whereby the head is fixed to the body and permitted to turn thereon.

No. 242,217. Gold Pen Tray.—James Morton, New York, N. Y.

The card of a gold pen tray, having a spring formed of a single wire, flat or round, made zigzag at the back of the card, and with loops of a soft ribbon or cord passing through perforations in the card, the single wire forming a continuous spring for all the loops and the single cord a string of loops for all the pens on the card.

No. 242,244. Stereotype Plate Holder.—Henry E. Allen, Indianapolis, Ind.

No. 242,258. Press.—John H. Brinkop, Quincy, Ill.

No. 242,259. Sealing Press.—Edward J. Brooks, East Orange, N. J., assignor to E. J. Brooks & Co., New York, N. Y.

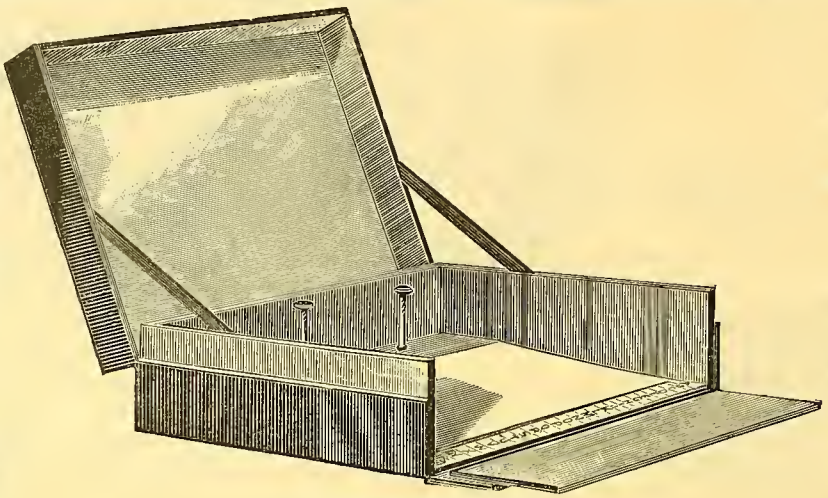
In a sealing press, a pair of die-jaws supported within a yoke frame or head, with faces toward each other, in combination with a pair of working levers pivoted within the head behind the respective die-jaws, and constructed with cams at their pivot ends adapted to actuate the respective die-jaws by equal, or nearly equal, direct pressure in a central plane, for simultaneously pressing or stamping two seal surfaces by independent die action.

No. 242,262. Paper Box.—Charles D. Brown and Jedediah A. Pratt, Portland, Me.

No. 242,273. Pen and Pencil Case.—Richard M. Collard, New York, N. Y.

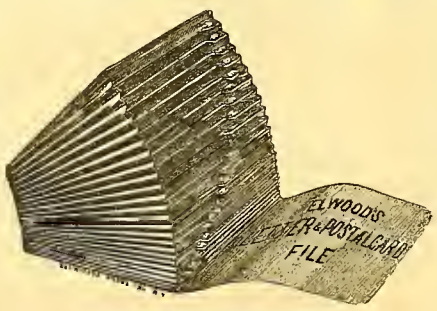
No. 242,280. Machine for Cutting Card Board.—Jules De Beauvais, New York, N. Y.

1. The combination of longitudinal cutters or slitters and feeding rollers or devices for feeding continuously one or more sheets or webs of suitable material with a shear frame, transverse shear blades carried by the shear frame, and mechanism for opening and closing the blades, and for advancing them while cutting with a uniform speed corresponding with that of the feed rollers or devices. 2. The combination, with a reciprocating shear frame, of a fixed and a movable shear blade carried by the frame, and one or more cranks and connected devices, independent of the mechanism for reciprocating the shear frame, for operating the movable shear



THE "PERFECTION" FILE.

blade. 3. The combination, with a reciprocating shear frame and transverse cutter or shear blade fixed thereto, of a movable cutter or shear blade working in guides on the frame, links connected with the movable cutter by means of hinge joints, and mechanism for raising and lowering the cutter or blade through the links. 4. The combination of the movable shear blade with bars or guide pieces to which the blade is attached, the upright to which the fixed blade is secured, the spring, the anti-friction rollers, and the adjusting screws.



THE "ELWOOD" FILE.

No. 242,281. Pocket Book Frame.—Robert Debacher, New York, N. Y., assignor to William Schimper, same place.

The combination, with the two hinged sides or halves of a pocket book frame, of a tubular cap covering the whole or a portion of the joint between the sides or halves when the frame is closed, and composed of separate parts attached to the sides or halves, and brought into line with each other by the closing of the frame, one of the parts having a sliding bolt or bolts arranged within it, and the other part or parts forming a keeper or keepers for the bolt or bolts.

No. 242,309. Adjustable Writing Table.—John A. Harriman, Bellaire, Mich.

No. 242,415. Toy Pistol.—Edward R. Ives, Bridgeport, Conn., assignor to Ives, Blakeslee & Co., same place.

DESIGNS.

No. 12,258. Album Cover.—Charles Wagenföhr, New York, N. Y., assignor to Thomas Kelly, same place. Term of patent, three and one-half years.

No. 12,259. Game Board.—Daniel L. Wilcox, Pawtucket, R. I. Term of patent, seven years.

No. 12,262. Font of Printing Type.—David Wolfe Bruce, New York, N.Y. Term of patent, fourteen years.

No. 12,263. Font of Printing Type.—Herman Ihlenburg, Philadelphia, Pa., assignor to David Wolfe Bruce, New York, N.Y. Term of patent, fourteen years.

Nos. 12,270 and 12,271. Font of Printing Type.—August Will, Jersey City, N. J., assignor to David Wolfe Bruce, New York, N. Y. Term of patents fourteen years.

No. 12,283. Toy.—Reuben A. Smith, East Weare, N. H. Term of patent, seven years.

No. 12,289. Font of Printing Type.—John K. Rogers, Brookline, Mass. Term of patent, three and a half years.

No. 12,290. Inkstand.—William E. Taylor, New Roe, Ky. Term of patent, fourteen years.

No. 12,291. Font of Printing Type.—August Will, Jersey City, N. J., assignor to David Wolfe Bruce, New York, N. Y. Term of patent, fourteen years.

LABELS.

No. 2,460. Title: "Phosphor Bronze Paper Fasteners."—William J. Brown, Jr., Philadelphia, Pa.

THE "ELWOOD" FILE.

Herewith is given an illustration of the "Elwood" letter, invoice and note file, which, although before the public only a short time, is said to be rapidly making its way into popular favor and to be in large demand wherever it has been introduced. It combines the merits of simplicity with strength and convenience for ready reference, and is low in price. It is made of the best No. 1 manilla paper, with heavy covers, and is said to have a capacity of from two to four times that of any other file made. It does not require the use of a filing case, as the file itself is marked and set away when filed; and, as the file costs less than the index and case used with other systems, an important saving is effected in this direction. This file is now made by Adams & Kimball, of Chicago. They announce their intention to make the "Elwood" the leading letter file in the market, and will employ only the best material and workmanship in its manufacture. The files are sold by the makers and also by the leading jobbing houses throughout the country. Liberal discount is made to the trade.

TO POLISH BRASS.—Pulverize a sufficient quantity of sal ammoniac very finely and moisten it with soft water, rub the paste on the brass, which should be warmed meanwhile over some clear coals of wood; then rub dry with a soft leather, dusted with a mixture of bran and Spanish white. Another method is to wash the brass with a solution of one ounce of alum boiled in a pint of strong wood-ash lye; when dry, polish with fine tripoli on a soft chamois leather.

NEW GOODS! Manufactured and Just Offered to the Trade by **NEW GOODS!**

ACME STATIONERY AND PAPER COMPANY,

117 Fulton and 52 Ann Sts., New York.

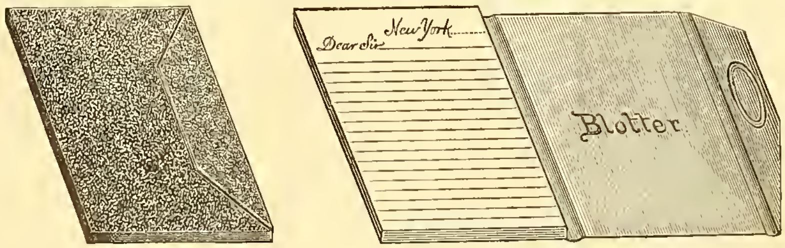
LAWYERS' BRIEF BOOKS.—(Copyrighted December, 1880.)

Made of our best Manilla writing paper in four sizes, bound in heavy paper covers, with an index printed on one side, and a filing blank on the other, so as to fold like a Lawyer's Brief. These have been highly approved by many prominent lawyers as meeting a want long felt by the profession, and will find a ready sale when brought to their attention. Size, 8x10 inches, oblong, 24, 40, 60 and 100 pages.

PORTFOLIO TABLETS.—(Patent Applied for.)

THE attention of the trade is particularly called to this **new line of Fine White Writing Papers** in Tablets, handsomely bound in PORTFOLIO STYLE, with a sheet of best blotting Paper attached.

Decidedly the BEST, MOST CONVENIENT and HANDSOMEST package of Writing Paper in the Market.



CLOSED. OPEN FOR USE.

THIS Portfolio Tablet has been highly approved by every one in the trade who has seen it, as an article that will sell at sight, and that will be needed in the stock of every stationer.

SIZES AND STYLES.

Billet, Octavo, Commercial, Packet Note, Bath and Congress Letter.

WHITE DESK OR SCRATCH PADS. (Unruled.)

No. 101, 2¼x4 inches; No. 102, 3x4¾ inches; No. 103, 3⅝x6 inches; No. 104, 4x6¾ inches; No. 105, 4½x7¼ inches; No. 106, 5x8 inches; No. 107, 6x8½ inches; No. 108, 8x10 inches; No. 109, 8x12½ inches.

PARCHMENT COPYING BOOKS AND COPYING PAPER,

POSSESSING THE FOLLOWING ADVANTAGES OVER ALL OTHERS:

The paper is a Rich Lemon Color. Is stronger than any other. It is thick, and can be readily handled while damp. Can be written upon with pen and ink. Makes a perfect and instant copy. The paper being pure, and free from injurious chemicals, insures a permanence to all copies.

Regular Sizes of Books and Paper always on hand.

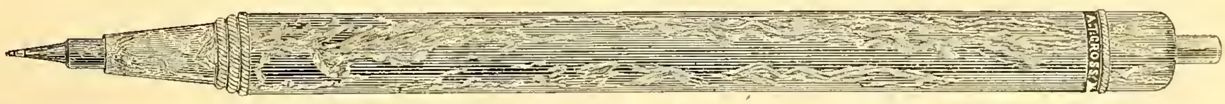
Celebrated Neutral Tint Papers,

For PROFESSIONAL and EDUCATIONAL Purposes.

☞ **For Price Lists and Discounts address as above.**

PERFECTED STYLOGRAFIC.

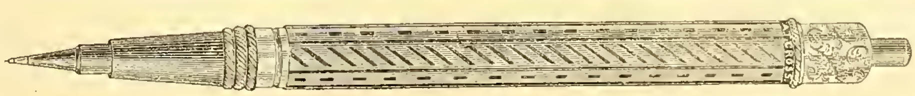
The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS,** the last, June 29, 1880, being the most important and giving the name **Perfected.** All cuts are exact size.



MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambler's Pocket. Same price as Long.

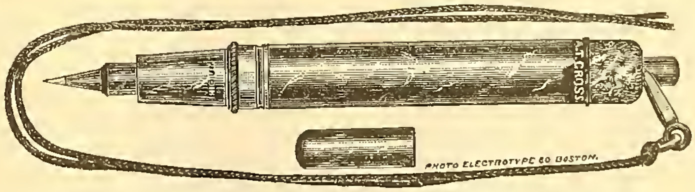
LONG.—The famous Desk Pen. Extra long. Holds most ink, except the **Maximum.**

SHORT.—Most widely known and sold heretofore; but Maximum and Long are much better for desk or Hambler's Pocket. So this will be largely superseded.



Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined.

☞See Descriptive Circulars.



Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, all of which will have the new improvements.

For the Season 1881—82.

CHRISTMAS AND BIRTHDAY CARDS.

IN commending my elaborate line of Christmas and Birthday Cards for the coming season, I desire to particularly call the attention of the trade to the fact that my series are not only original in design and novelty, but are also of the most varied and attractive character. The trade will also see the necessity of placing their advance orders as early as possible, to enable me to fill orders with promptness and dispatch.

THE CHEAPEST, SIMPLEST AND BEST.

These Files have been before the public but a brief time, but have been received with great favor and are in quick demand wherever they have been introduced. We have lately improved them in style and quality, and offer them to the trade at a liberal discount. Sold by the leading jobbers throughout the country, and by

ADAMS & KIMBALL, Manufacturers, - - 38 MADISON STREET, CHICAGO, ILL.

THOS. S. DANDO & CO.,

13 & 15 Park Row, New York. ***307 Walnut St., Philadelphia.***

OUR NEW GOODS for the **HOLIDAYS** are now ready, and will be submitted to the trade by our travelers. Our line consists of Xmas and New Year Cards, Birthday Cards, French Cards, &c.; Photograph Albums, Papeteries, Satin Embroidery, Lithographs, Xmas Fans, Self-Supporting Panel Mounts, Hand-Painted Wedding, Birthday and Porcelain Cards. Catalogues sent on application.

Very respectfully, THOS. S. DANDO & CO.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

J. A. Beecher, printer, Newark, N. J., is closing up.

Joseph Merritt, publisher of the *Argus*, Castroville, Cal., has sold out.

E. & H. T. Anthony & Co. will soon have their line of goods for the fall trade ready.

Augustus Maxwell, of Maxwell & Co., Bloomington, Ill., was in town during the week.

J. H. Bufford's Sons have again added several new series to their already large line of cards.

King & Malone, printers, Waterbury, Conn., have dissolved partnership. L. E. King continues.

William Hurley, publisher of the *Times*, Benton Harbor, Mich., has sold out to William H. Marston.

Alexander M. Le Vino, of the firm of Davis Brothers, Le Vino & Co., importers of notions, New York city, is dead.

W. H. Roger, printer, Reading, Pa., has formed a partnership with W. A. Welsh, under the style of Roger & Welsh.

John Gibson's employees will have their annual excursion on Thursday, June 16. The trip will be made to Biegen's Park on the Hudson.

Henry Hoe, the United States agent for Joseph Gillott & Sons' steel pens, Birmingham, England, sailed last week for Europe, and will not return before about September 1.

Charles H. Wright, of Philip Hake, has just returned from his vacation, and is now hard at work on his samples, and will be out early this fall with the finest line of goods he ever carried.

J. S. Fleming, late of the firm of Fleming, Miller & Ussing, paper dealers, is at present acting as sales agent for the Adams Paper Company and other manufacturers, and has his headquarters at 51 John street.

E. P. Coby, of the well known firm of commercial stationers and printers, E. P. Coby & Co., of William street, will leave for a trip to Europe in about two weeks, to meet his wife, who has been there for about a year.

Daniel Slote & Co. have just made up on the order of a customer a scrap book, 25 by 27 inches, with a 5-inch back. It is made up in a most substantial manner. A derrick ought to be furnished with each book of this size in order to handle it.

G. W. Leman & Brother, of William street, notify to the trade that they can purchase Harrison & Bradford's pens at present at their establishment. They have about sixty numbers on hand amounting to about eight thousand gross in all. In order to obtain the favorite numbers the trade must send in their orders immediately, as the stock will not be replenished.

R. Fideau, 16 Beekman street, is very busy at present filling large orders for his patent hammocks, also good orders from jobbers for his Unparalleled school bags, which he is offering at 10 per cent. cheaper prices than heretofore. Mr. Fideau's school bags are made without the use of starch or paste, and are considered the best and cheapest open-work bags in the market. Price list and sample will be furnished "free to the trade on application."

In September, 1877, the late Frank Leslie made an assignment of all his property for the benefit of his creditors on condition that it should be restored to him in three years, 80 per cent. of the net profits to be meanwhile applied to the liquidation of the claims against him. On March 20, 1879, a majority of the creditors agreed to accept 55 per cent. of their respective claims in full settlement thereof, and Mr. Leslie sought for an accounting from the assignee and the release of the assets held in trust by the latter. Exceptions being taken, the whole matter was referred to Henry H. Anderson to take testimony and report to the court as to whether, in his opinion, the composition deed of March 20, 1879, was properly executed, and as to what creditors were bound by its terms. Pending the inquiry Mr. Leslie died, leaving a will in which he bequeathed all his property to his widow. Upon the admission of the will to probate the reference was reopened, when, greatly to Mrs. Leslie's amazement, as she asserts, she found herself opposed by the very creditors who had been parties to the composition agreement. These creditors disputed the validity of the agreement and insisted that it should be set aside. Despite their opposition, however, the referee last March made a report sustaining the composition deed, which was confirmed by Judge Beach. Having paid the 55 per cent., Mrs. Leslie has obtained possession of the property, and will henceforth conduct the business of Frank Leslie's publishing house.

Among the visiting members of the stationery and paper trades who have been in the city this week were: James J. Chapman, Washington, D. C.; John Glenn and Mr. Ireland, of Marcy, Ward & Co., Philadelphia; C. J. Cohen, Jr., representative of Charles J. Cohen, Philadelphia; George Nelson, of Nelson Brothers & Co., Grand Rapids, Mich.; Samuel Alvord, of Alvord & Co , Denver, Col.; M. Brown, of Brown Brothers, Toronto, Canada; G. W. McClellan, St. Georges, Bermuda; George Holden, of the Holden Manufacturing Company, Dayton, Ohio; Caleb Loud, Easthampton, Mass.; William Moore, Poughkeepsie, N. Y.; and Mr. Ackerman, of Ackerman Brothers, San Francisco, Cal.

Langfeld, Turner & Andrews, Philadelphia, are in full blast. All of their travelers are out on the road with samples of all of their novelties, and orders are flowing in from all sides. From all appearances the fall and winter season will surpass all preceding seasons with this house, and will prove to be one of the most important in their line of manufacture.

N. S. Otis, of the Acme Stationery and Paper Company, is about leaving on his regular summer trip to the West. He carries with him a full line of school exercise books and other school goods.

The firm of Janeway & Co., dealers in wall paper, New Brunswick, N. J., has been dissolved by the death of W. R. Janeway. The remaining partners continue under the same style.

Hasbrouck & Watson are about issuing a new trade circular and reduced price list of their M. & H. blotter tablets, which will be out in a few days.

Obpacher Brothers will have their samples of Christmas cards ready for inspection by June 15.

Gatewood & Shorley, publishers, Cozad, Neb., have removed to Plum Creek, same State.

L. H. Daniels, printer, Ipswich, Mass., has sold out to I. J. Potter.

Thos. Digons, stationer, New York city, is dead.

J. P. McDonald, publisher, Meredosia, Ill., has sold out.

Raymond Brothers, dealers in notions, Boston, Mass., have failed.

J. D. Brown, dealer in stationery, Portland, Oregon, has sold out.

W. Ward Fuller, printer, Providence, R. I., has made an assignment.

H. S. Hughes, printer, Dresden, Ont., Can., has sold out to Colville & Hughson.

Mr. Boland, of Shorb & Boland, of St. Louis, is expected to be in the city in a few days.

Maune & Brother, fancy goods dealers, Brooklyn, W. D., N. Y., have had their stock damaged by fire.

Charles W. Blew, publisher of the *Coal Gazette*, Mauch Chunk, Pa., has been closed out by the sheriff.

L. P. Thayer, publisher of the *Vermont Farmer*, Montpelier, Vt., has sold out to Geo. H. Richmond.

James S. Stewart & Co., printers, Middletown, Conn., have dissolved partnership. James S. Stewart continues.

McCarty & Hasberg will soon introduce their new school bag to the trade. Full particulars will appear in a later issue.

Kramer, Loth & Co., wholesale dealers in notions, St. Louis, Mo., have dissolved partnership. Kramer & Loth continue.

E. B. Hotchkiss, manufacturer of paper boxes, Newark, N. J., is advertised to be closed out at chattel mortgage sale to-day. He will discontine business.

The trade are requested, when ordering goods for fall delivery, to examine critically samples and prices of the United States Treasury mucilage and colored inks manufactured by William A. Davis, Boston, Mass.

The Stationers' Board of Trade is investigating the affairs of A. K. Loring, the Boston publisher and stationer, who has suspended payment. A number of claims have been placed in its hands, and a meeting of creditors will be called in a few days.

A. Weidmann & Co. are now busy with their fireworks for the celebration of July 4. The firm's stock of these goods is at the old store, 244 Grand street, where it can be seen during business hours. The firm handles only hand-made torpedoes and the best brand of crackers and fireworks.

Thos. S. Dando & Co., of Philadelphia, have lately published a new and improved form of cricket score book. It has been prepard by eminent cricketers, and is perfectly correct. The book contains all of the features that are found in the English and American score books heretofore printed, and, in addition, a number of others that are wholly original.

Ph. Hake's new line of Christmas and birthday cards embraces silver board fringed, ornamented with embossed flowers; engraved designs on satin, hand-painted flowers fringed, satin pendants, with chénille trimmings; satin sachets, with elegant chromo designs with flowers, birds, &c.; embroidered designs on satin, all with appropriate Christmas and birthday verses. The embroidery on satin is a new feature never before attempted in this country, and will be appreciated by all lovers of artistic novelties. On account of the great demand for these goods it will be necessary for the trade to give advance orders to enable Mr. Hake to fill all orders with dispatch. There is no hesitancy in saying that this line comprises novelties entirely differ-

ent from any ever offered before here or elsewhere.

Charles Orr, of Wheeling, W. Va., has made an assignment.

J. C. Orr & Co., dealers in wall paper, Wheeling, W. Va., have made an assignment.

Delany & Smith, wholesale dealers in notions, Philadelphia, Pa., have been sold out by the sheriff.

Felix B. Muldrew, printer and publisher, Healdsburg, Cal., has advertised to close out his business.

James Vannevar, bookseller and stationer, Toronto, Ont., is offering to compromise at 50 cents on the dollar.

George H. Jones, of Berlin & Jones, is about to leave the city on his annual vacation to Lake George, and will be gone about three months.

Stevens & Messmore, publishers of the *Democrat*, Grand Rapids, Mich., have dissolved partnership.

Orcutt & Bumbarger, printers, Monticello, Mo., have dissolved partnership. Orcutt & Co. succeed.

Paul Buchler, of Boorum & Pease, left here on Tuesday for a trip West. A. S. McDade has just entered the employ of this house, and starts on Saturday for a Southern trip.

J. Rosenfeld, wholesale dealer in notions, Galveston, Texas, has admitted Daniel Borchard to partnership, under the style of J. Rosenfeld & Co.

Geo. E. Van Syckle, musical instrument dealer, &c., Bay City, Mich., has bought out the stock of books, toys and stationery, held by Frank Crandell, of that place.

Goodwin & Smith, 179 Jefferson avenue, Detroit, Mich., have opened a warehouse for the sale of printers' materials, flat papers, and blank books.

Notwithstanding the general dullness complained of by the trade, one house reports having received $30,000 worth of orders in one day this week.

D. B. Brooks & Co., Boston, Mass., who make a specialty of games, &c., are now busy with their croquet, which is taking very nicely with the trade.

William H. O'Grady, with M. A. Reay, has been quite ill at home for the past week or ten days suffering from inflammatory rheumatism; but his condition is now better, and he is expected to be able to be at his post again in a few days.

Robert W. Skinner, of Jones & Skinner, paper dealers, on William street, this city, was married on Tuesday evening to Mary G. Snare, of Philadelphia. The happy couple have gone off on a trip to Niagara Falls to spend their honeymoon. Congratulations are extended.

The Springfield City Paper Company, Springfield, Mass., has removed to larger quarters by taking in seven and a half floors in the Albion block. Business is very good, and orders are coming in very nicely. Mr. Birnie is traveling through the West, and is sending in good orders, and finds trade very good at this time of the year.

The Holyoke glazed paper works have been unable to keep up with their steam chromo label and lithographic plate papers, although they have been running sixteen hours per day. These goods have proved so great a success that the concern has contracted for additional machinery, which it is expected will be delivered early in July. Arthur Bott is no longer in the employ of the concern.

FALL TRADE!

Standard Blank Books.

OUR NEW CATALOGUE of Blank Books, Memorandums, &c., is now ready, and we will be happy to mail one to any address furnished. It embraces many new and desirable styles, which all stationers should examine before ordering.

Our books are **CHEAP**, but well finished and attractive. With reduced prices on **STANDARD LINES** and **INCREASED DISCOUNT** for large purchases, we believe the advantages we offer to jobbers are nowhere else equaled. We print a **SPECIAL EDITION** of our Blank Book List, which we furnish with our customer's imprint when desired. Orders for them should be sent in before August 1st.

FORTY YEARS' experience in this manufacture, and the possession of every facility that an ample capital can procure, warrant us in promising to intending buyers **THE CHEAPEST AND BEST BLANK BOOKS** in this or any market.

☞ Send for a catalogue and test our assertion by sending us a sample order for such styles as you think desirable.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

tationery and Fancy Goods Trades.

WEEKLY---$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, JUNE 9, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

FALL trade is expected to make good the alleged deficiencies of the spring season. As to the deficiencies named there may be some dispute, and perhaps the falling off, after all, only exists in the thoughts of those who had raised their anticipations too high. At the same time it must be admitted that there was reason to expect something unusual in the way of spring business. Averaging it, the trade have probably done very well.

No combination among the manufacturers of envelopes is likely to be effected. This statement is made by a member of one of the leading houses. Yet if matters are as represented, there is no telling when an agreement on prices will be effected, since it is positively alleged that quotations for some grades of envelopes are under cost. If this is true it cannot be expected that the manufacturers will very long go on cutting up their trade and making sacrifices, although it may be a trial of endurance in which some may get hurt. Such things have been known, but is there any danger now?

GLOWING hopes seem to mark the Western horizon. Our correspondents encourage the belief that with the change from summer dullness there will be a lively time in the stationery trade. Manufacturers everywhere are certainly working on the assumption that there will be and, as has been said before, there is strife to secure as much novelty as possible in all lines of goods so that the public will be tempted to buy. There are, as usual, differing opinions. Some people are born pessimists and find their greatest delight in looking on the wrong side of the commercial future, or they find so many faults in the picture that it loses its brightness and expression. Others are too hopeful. But between these extremes there is a fair prospect of good business. The worst feature yet apparent is the labor strikes, which if continued and prolonged will make trade halt and help the culmination of disorder. These had much to do with the disasters of 1873, and repressed enterprises which would have materially aided the industrial classes to struggle through the troubles which affected the whole country.

A RECENT decision of the United States Supreme Court, of which an abstract is given in another column, is interesting, and it seems to be applicable to the whole question whether any State can impose a special tax on the goods manufactured in another State, or can compel the traveling agent of a house located in such other State to take out a license and pay for the privilege of transacting his business and selling his goods. In the cases presented to the court the points at issue were whether a State had power to tax a manufactured article which is made under a patent, and to require a license to be taken out for its sale; and also whether a State could discriminate in favor of its own citizens by forbidding the sale of articles manufactured in another State, unless a license for such sale was taken out. Upon the issues so raised the court decided that a tax so imposed, whether laid upon the agents of a manufacturer in the form of a license or directly upon the articles sold, would be a regulation of commerce in the articles between the States, and that any interfering action by legislation of such a discriminating kind must give way. The opinion was written by Justice Field, and seems to us to be broad enough to be applicable to the whole question as to the right of a State to impose a tax on the citizens of other States when engaged in the pursuit of their calling as commercial travelers. This decision is certainly, in any of its phases, very interesting to manufacturers and merchants who send out travelers, and it would not be amiss for the Board of Trade to take advice and inquire if it is not general in its application. If the decision may be considered definite and final in every case where the issue is as to the right of a State to impose a tax and enforce a discrimination against the citizens of foreign States when engaged in the prosecution of their business, it is certainly important that it should be made known and published.

CHATTEL MORTGAGES.

[In the appended list R. signifies a renewal of a pre-existing mortgage; B. S., bill of sale; and Real, a mortgage on real estate.]

NEW YORK CITY.

Mortgagor.	*Amount.*

A fire broke out on May 30 at Newark, O., in Franklin Brothers' crockery and wall paper establishment. Franklins' loss on wall paper and crockery will be nearly $2,000; fully insured.

AN ANCIENT BIBLE.—A remarkable old Bible is likely soon to arrive in England from Germany. It was printed in the year 1533, under the direction of Daniel Bomberg. It then passed into the possession of Andreas Wesling, who obtained from his celebrated contemporaries, Luther and Melanchthon, autograph commentaries on certain theological subjects, and these are found bound up in the volume, the binding being of wood. Martin Luther wrote three octavo pages in Latin, and Melanchthon two pages and a half. This Bible was once in the collection of the celebrated Count Zinzendorf, the founder of the sect of Moravian Brethren, who received considerable attention from John Wesley when he visited England.—*Academy.*

CONVENTION OF THE NORTHWESTERN BOOK AND STATIONERY TRADE.

[BY TELEGRAPH TO THE STATIONER.]

CHICAGO, June 8, 1881.

The first convention of the booksellers and stationers of the Northwest was held at the Grand Pacific Hotel in this city at 11:30 A. M. to-day.

H. H. West, of Milwaukee, was elected president; Mr. Grosvenor, of Dubuque, vice president; True S. White, of St. Paul, Minn., secretary.

A committee of three was appointed to wait personally upon the Chicago trade and request their attendance. Messrs. Watson, Merrill and Grosvenor were designated as this committee. The following committees were then appointed: Miscellaneous and Juvenile Books—L. Y. Bowen, Wesley Redhead, Charles Humphrey, H. G. Allen and H. E. Hooper. School and Text Books—E. L. Jansen, D. D. Merrill, R. H. Allen, J. M. White, V. M. Coryell. Stationery—W. H. Watson, T. E. Brown, T. S. White, A. J. Santee, M. A. Saulsbury.

Letters were read from Harper Brothers and D. Appleton & Co., expressing themselves in sympathy with the movement and their willingness to coöperate.

The convention adjourned at 12:30 and reconvened at 4 P. M. The Committee on Miscellaneous and Juvenile Books reported as follows:

Resolved, That, in the opinion of this convention, it is to the interests of publishers that their books be supplied to the public through the local booksellers, and that a bookstore therefor should be maintained in every community; that to secure this we recommend: First, that publishers place reasonable retail prices on their books, and adhere strictly to those prices on all sales, except to the legitimate booksellers; that they make a discount to the retailer sufficient to afford him a reasonable compensation, and such additional discount to jobbers from the commercial centres as will warrant their carrying a large stock for distribution; second, that publishers and booksellers add postage to the retail price on all books sent by mail, and that they print in their circulars and catalogues the amount of postage required on each book in connection with its retail price.

These propositions were adopted *seriatim*.

The Committee on School and Text Books reported as follows:

Whereas, The interests of the publishers of school text books are largely identified with those of the booksellers; therefore,

Resolved, That we request the publishers of school text books to make only net list prices from which no discounts shall be made to others than legitimate booksellers, and that in all cases where the books are sold or supplied to others than booksellers, except single copies for examination, an addition of fifteen per cent. to said net prices shall be made to cover the expense of postage.

This was adopted.

The general feeling is that these resolutions should be referred to publishers in a pacific and gentlemanly spirit, allowing their sense of justice to dictate action.

A committee on permanent organization was appointed as follows: Robert Shields, L. B. Brett, I. B. Kiertly, J. R. Pigman and H. H. West.

Letters expressing sympathy, commendation and support, from all sections of the country, were read.

The Chicago Stationers' Board of Trade will banquet the visiting delegates at the Grand Pacific to-morrow evening.

About one hundred persons attended the convention, including Mr. Lockwood, of THE AMERICAN STATIONER.

The convention adjourned until 10 A. M. to-morrow. A permanent organization will then be effected, and a full report will be rendered in next week's STATIONER. G. B. H.

PAINTING ON BROWN PAPER.

Painting on brown paper is now all the rage. Concerning the new craze the London *Queen*, says: "Brown paper of the darkest shade and thickest texture and gray paper of a cool granite tint are just now much in demand as materials for painting upon for dados, panels, cornices, and book covers and other things. They give a background on which the light and shade are at once relieved; and, while gray paper is the softest, brown paper, partly by the contrast of the rough surface, gives the most relief. The best brown paper for the surface is the stout continuous kind used by the paper hangers and upholsterers for backing, which can be had at all the carpet warehouses in any quantity. The colors are oil paints in tubes or water colors, well ground with Chinese white, used with fine bristles or red sable brushes. Another method is to lay on the Chinese white, well ground to the consistence of thin cream, and when it is dry to paint over it with ordinary water colors. Red sable brushes are also the best for both the latter. Minute finish is out of character with this kind of work; the effects should be put in broadly, and the designs be distinct and of a few large objects. In connection with this subject it may be appropriately mentioned that the 'Angry Swans,' two of the finest of Turner's drawings, which are on exhibition at the National gallery in London, are painted on common brown paper, which had been used as the wrapper of a parcel."

COMPRESSED MOTHER OF PEARL.

A Frenchman, named Duvochel, has invented a compressed kind of nacre or pearl made of the pulverized shell of the halotis, solidified with gelatine. Thus prepared it will serve for inlaying or mounting in cabinet work, cartonnage, tablature, and other industries, and the manufacture of fans, buttons, &c. This product can be figured, stamped, molded by pressure, poured out in the liquid state, and in fact takes every kind of form desired. It can be dyed in any color, polished and varnished by the processes used for tortoise shell, mother of pearl, and other analogous substances. To render the shells thin and friable, they are submitted to a strong heat, which separates them into thin scales; these are then pressed in the cylinders of a flattening roller, and afterwards pounded in a mortar. It is then sifted to get rid of the dust, and the powder is treated with gelatine and shaped into any form required.

A copy of the oldest newspaper known was recently found in the library of the University of Heidelberg. John Carolus, of Strasbourg, is thought to have printed this copy, which is in the form of a quarto volume, and bears the date 1609. Much of the contents is extremely interesting, and consists principally of letters written by correspondents. These letters, when coming from Rome, were twenty-one days on the route, from Venice fourteen to seventeen days, and from Vienna about eight days. When there was not sufficient matter to fill out the sheets blank spaces were left. One of the incidents mentioned was the manufacture of a telescope by Galileo. Some of the news was of a very bloody character, and pictures a lawless state of society: one item relating to the confession of seven criminals, who acknowledged that "on the 18th of this month they threw about fourteen persons into the water, and that their band numbered eighty, who for the most part were natives of Prague."

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, June 8, 1881.

THE MONEY MARKET.—Money continues superabundant and the rates of interest low. That amid the present plethora of money the national banks should be increasing their circulation, is a puzzle to many who are not well acquainted with the intricacies of finance. But to those who have a thorough knowledge of financial laws the matter is simple enough. An extremely easy money market promotes speculation, and speculation calls into active employment funds which otherwise would be idle. Much of what is called business, when money is plenty and cheap, is simply betting on the prices of stocks and speculative commodities. The speculation in stocks has been comparatively tame, with prices irregular and generally closing lower. The same is true of railway bonds, and even governments are a little off. Whether the culminating point in the long period of advancing prices has finally been reached, or whether the present lull is merely a breathing spell preparatory to another upward movement, is a question upon which opinions differ. The leading "bulls," as a matter of course, are sanguine of still higher prices, while the leading "bears" are equally confident that there are breakers ahead for their opponents. The market for foreign exchange was not active, and was only fairly steady at advanced rates. The posted rates for prime bankers' sterling are now \$4.85 and \$4.87; the actual rates are \$4.84@4.84¼ and \$4.85¾@4.86¼, with cables selling at \$4.86¼@4.86¾. Prime commercial sterling is \$4.82½@4.82¾. Continental exchange is dull, and the actual rates are about as follows: Francs, 5.21¼ and 5.19⅜; marks, 94⅜ and 94⅞, and guilders, 40¼ and 40.

THE PAPER TRADE.—We have little to add to what we noted last week as regards business with the jobbing trade, the class by whom the largest portion of the production of paper is handled The trade, at least in this city, are experiencing thus early in the season almost the quietude of midsummer, and expect to see very little improvement until the fall is reached. With manufacturers, however, it is quite different, as all of them seem encouraged by the number of orders they yet have to fill. That history repeats itself in the paper trade as well as in other things is shown by a comparison of the present with that of the period intervening between 1869 and 1872, when the manufacturers had a little the advantage over the jobbing trade, as now is the case. This period was followed by a state of things just the reverse. So it may be when a reaction takes place in the present condition of the two branches of the trade. Prices of fine book papers rule steady and firm, although not so much can be said of low grade print and wrapping papers. We hear of a contract for extra machine finished book, which was taken for a year from July 1 of last year at 11c., having been renewed at 9¼c. for six months from July 1 next.

THE STATIONERY MARKET.—We have still no change to note in the line of staples. Everything is in expectancy for the fall season, and very extensive preparations are still going forward toward getting up stocks of new goods. Many believe, from present indications, that the season will open very early this year, while there are others who think that no very great amount of activity need be looked for before August. All, however, agree as to the probability of one of the most prosperous seasons that the trade has ever experienced. The principal reason given for this is, that the spring movement in the West and Northwest during the winter and spring months fell short of the usual average, owing to the unpropitious weather influences. The industrial affairs of those sections are in a generally prosperous condition, and it is reasonable to suppose that whatever shortage in trade there may have been during the spring will be compensated for by increased purchases through the summer to meet the demand for fall business. Prices generally are steady.

OBITUARY.

JOSEPH SABIN.

There has been no name in this country more broadly associated with American literature than that of Joseph Sabin, the bibliophile and publisher of Nassau street, who died at ten minutes to nine on Sunday night at his residence, Weirfield street and Broadway, Brooklyn, after a long illness. For about two years his health had been gradually failing. His physicians told him that his ailment was the result of over work, and prescribed absolute suspension from labor; but as he soon felt better he entered with renewed grit upon the completion of his "Dictionary of Books Relating to America," his great life work as for years he was in the habit of designating it, and regarding which he was, in fact, so enthusiastic that he was often heard to say that his only desire was to live long enough to finish it. This longing of his life—and with him it was literally a ruling passion strong in death—was not destined, however, to be gratified, and the loss to bibliography in this country will be most seriously felt, as it is doubtful if anyone can be found who will complete the volumes with the same spirit of untiring enthusiasm and painstaking fidelity with which he prosecuted the work. In the last few months he had visited his place of business but occasionally, but was not confined to his house till about the first of May. The immediate cause of his death was Bright's disease; but there was a general breaking up of the system and, though he received the best of medical care, it soon became evident that he could not long survive.

Mr. Sabin was born at Brereton, Northampton, England, on December 9, 1821. His father was an humble mechanic and only able to give him the opportunities of a limited common school education. At the age of sixteen, with his father's consent, he was apprenticed to Mr. Charles Richardi, the bookseller and publisher at Oxford. The instrument of indenture has for years hung in a frame over Mr. Sabin's desk at his late place of business, No. 64 Nassau street. The apprenticeship was for seven years, and with its impress of seals and signatures appears a very forcible and binding document, which it certainly was at the time. The fact may be stated, as a memento of his apprenticeship days, that his wages, which did not include board and clothing, were two shillings a week for the first year, with a general increase to six shillings a week the last year. He faithfully served the full term of his apprenticeship, and then opened a similar establishment of his own at Oxford. This, however, did not prove a financial success. In 1843 he came to the United States, hoping in the New World to better his fortunes. He first went West, and buying a farm in Iowa settled there; but he soon abandoned agricultural pursuits and, coming East, took up his residence in Philadelphia, where he found employment in the publishing house of D. Appleton as salesman. After remaining there several years he came to this city and entered the employ of Bangs & Co., the book auctioneers, which he soon supplemented by entering upon the same line of business on his own account, his place of business being the corner of Broadway and Fourth street. He did not continue in this avocation long. In 1865, having bought out Mr. Michael Noonan, he went into the book and print business at No. 84 Nassau street. He remained here about four years, and then removed to No. 64 Nassau street, where he continued the same business, meantime having taken in two of his sons as partners, his other

two sons being proprietors of a kindred establishment in London up to the time of his death. There have been few book and print stores in this city that have enjoyed more extended patronage. It has been the great Mecca of literary men in search more especially of books of quaint and forgotten lore connected with the literature of this country. His collection of prints is a rare museum of antique curiosities in this line.

The cataloguing of libraries was a specialty of Mr. Sabin, and few were endowed with more ample facilities for doing the work well. Among the more important libraries catalogued by him were those of S. F. Jarvis, 1851; E. B. Corwin, 1856; E. A. Donglas, 1856; G. R. Hazewell, 1850; W. E. Burton, 1861; Edwin Forrest, 1863; John Allan, 1864, and W. R. Coleman's Waltonian library, 1866. He also, as early as 1844, at Oxford, published "Thirty-nine Articles of the Church of England, with Proofs and References." As stated, however, the great book of his life has been his "Dictionary of Books Relating to America." It is a most important and exhaustive work and will give to Mr. Sabin lasting perpetuity as a compiler. The work is carried down to the letter P and embraces thirteen large octavo volumes of about six hundred pages each. He began this work about twenty-five years ago, and was for years in the habit of rising at four o'clock in the morning and working several hours before entering on his other daily duties. He has left a large mass of memoranda, which will render the task of completing the work comparatively easy. It was this incessant labor, as already intimated, that finally undermined his health. He gave great attention to the reprint of rare American works and was also publisher of "Sabin & Son's American Bibliopholist, a Literary Register and Monthly Catalogue of Old and New Books and Repository of Notes and Queries." He was in addition a frequent contributor to the *American Publishers' Circular*, the *Rechabite Magazine*, and *Temperance Advocate*.

Shortly after completing his apprenticeship Mr. Sabin married a Miss Winterborn, of Oxford, and he leaves surviving him his widow, four sons and two daughters. He was a man of large and liberal impulses and most upright and conscientious in his dealings. Next to his devotion to his "Dictionary" was his devotion to the cause of temperance. He never tasted liquor in his life, and was a most ardent advocate, and frequently on public platforms, of teetotalism. He and Father Mathew were most warmly attached friends. A source of great personal pride to him was the exhibition of a silver medal presented to him by Father Mathew, as also a temperance pledge signed by Father Mathew. He was a member of the New York and Long Island Historical societies and of the American Geographical Society. His life has been one of unobtrusive labor and usefulness, and his genial countenance will long be missed at the old Nassau street store, where during the last twelve years it has been so long and familiarly known by the leading literary men of this country.

BRONZING.—To bronze wood, proceed as follows: First stain the parts black; take japanners' gold size, with a little Roman ochre and Prussian blue; go over the black part lightly, then let it dry till it feels just sticky to the fingers, but does not come off; then a with hard ball of cotton dipped in any of the bronze powders rub those places, and if you think proper give it a thin coat of japanners' gold size; then with spirits of turpentine.

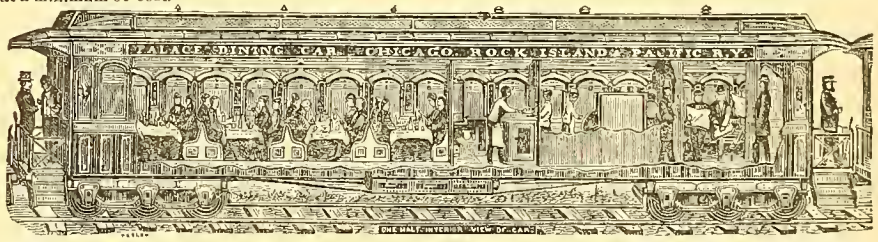
"THE GREAT ROCK ISLAND ROUTE"
Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.



That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

INTER-STATE COMMERCE.

The power of a state to tax a manufactured article which is made under a patent, and to require a license to be taken out for its sale, was considered by the Supreme Court of the United States, on May 2, in Webber vs. the State of Virginia. There was also under examination the right of a state to discriminate in favor of its own citizens by forbidding the sale of articles manufactured in another state, unless a license for their sale was taken out. Judge Field, in the opinion, said: "It is only the right to the invention or discovery—the incorporeal right—which the state cannot interfere with. Congress never intended that the patent laws should displace the police powers of the state, meaning by that term those powers by which the health, good order, peace and general welfare of the community are promoted. Whatever rights are secured to inventors must be enjoyed in subordination to the general authority of the state over all the property within its limits. Under the statute, the agent for the sale of articles manufactured in other states must first obtain a license to sell, for which he is required to pay a specific tax for each county in which he sells or offers to sell them, while the agent for the sale of articles manufactured in the state, if acting for the manufacturer, is not required to obtain a license or pay any license tax. Here there is a clear discrimination in favor of home manufacturers and against the manufacturers of other states. Sales by manufacturers are chiefly effected through agents. A tax upon their agents when thus engaged is, therefore, a tax upon them, and if this is made to depend upon the foreign character of the articles, that is, upon their having been manufactured without the state, it is to that extent a regulation of commerce in the articles between the states. It matters not whether the tax be laid directly upon the articles sold or in the form of licenses for their sale. If, by reason of their foreign character, the state can impose a tax upon them or upon the person through whom the sales are effected, the amount of tax will be a matter resting in her discretion. She may place the tax at so high a figure as to exclude the introduction of the foreign article and prevent competition with the home product. It was against legislation of this discriminating kind that the framers of the constitution intended to guard when they vested in Congress the power to regulate commerce among the several states; and where power is exclusively vested in the federal government, and its exercise is essential to the perfect freedom of commercial intercourse between the several states, any interfering action by them must give way."

BLOTTER TABLET PATENTED

PADS OF PAPER WITH BLOTTER ATTACHED.

ELEGANCE. ECONOMY. CONVENIENCE. CLEANLINESS.

THE paper is tableted, so that each sheet may be freely removed, leaving a perfectly clean, smooth edge. No paper is wasted. The sheet on which you write is always clean, being protected by the blotter. The blotter, of the full size of the paper, is so attached at the top of the pad that both sides of it may be used, and will last out the entire contents of the pad, being always at hand, and perfectly clean.

The blotter is kept clean, and also from wearing, by the card board cover, which is made of a highly polished stock, perfectly smooth, and that will not catch dust or dirt from the desk. The cover is richly ornamented on every pad, giving the whole a neat and elegant appearance. All kinds of paper and printed blanks are put up in this form at prices as low as if loose; making the most complete line of staple and elegant stationery ever offered to the trade.

HASBROUCK & WATSON,

SOLE MANUFACTURERS. 51 NASSAU ST. NEW YORK.

FANS.

The best fans are of silk, satin, feathers, tortoiseshell, ivory and lace. Point lace is generally seen laid on white satin with pearl sticks, but point appliqué is shown simply mounted on ivory or pearl sticks in the same manner as silk. An exquisite fan is of black satin, with carved ebony sticks. The upper portion is embroidered in white silk to perfectly simulate lace, while two plump cupids are dancing upon it, one looking heartbroken at the rent he has made in the lace. Oriental designs continue popular, being generally shown on silk fans with ivory sticks. A fan of ivory, smooth and yellow, and one of tortoise shell, and one of clear amber, are beautiful and costly. A painting on silk of a Nile-green shade delineates the mischievous fascinations of Circe. Fans made in Milan are generally of silk, covered with embroidery in imitation of the ancient work at Delhi. Being Oriental, the coloring is as gorgeous and the design as intricate as only Oriental work can be. One made at Milan, the work of the celebrated Fenelli, was presented to Adelina Patti. It is extremely large, and is finished with a feather edge and long tassels of scarlet silk.

Chinese books for girls (says a writer in the popular English magazine) consist chiefly of exhortations to discharge all their duties as daughters, wives, mothers, sisters and especially daughters-in-law. If you go into a Pekin book shop to examine what books are devoted to female training, you will find a little volume called "Nu er ching," which describes the daily routine of a girl's life before and after marriage. A larger work is "The Girl's Four Books," in two volumes. This contains the best results of Chinese thinking on how the female mind ought to he trained. The duties of daughter, wife and mother, are here explicitly laid down and illustrated by examples. The boys have their Four Books, which they read before the study of the Five Classics. These were fixed upon in the Sung dynasty, 700 years ago. A century of Mongol rule followed, when the family of Genghis Khan held the the throne. Then came the Ming dynasty, which ruled for nearly three centuries. It was at this time that the little collection of works called "The Girl's Four Books" was made. Emperors wrote prefaces to two of them, in order to give to them greater authority. Since that time these books have been much used as a sort of educational course. In what does this work consist? In moral instruction. The girl may read it herself, or its lessons may be taught her by an instructor. The publication of those works was not intended as a curriculum for use in girls' schools, but in families. Girls' schools were not thought of then, and it is only now, after the commencement of Christian missions, that the question whether China should have girls' schools or not has come up.

NEW VARNISH.—Fr. Theie, of Bissendorf, prepares a varnish, consisting of 100 parts of rosin, 20 parts of crystallized carbonate of soda, and 50 parts of water, by heating these substances together and mixing them with a solution of 24 parts of strong liquor ammonia in 250 parts of water. With the mass thus obtained the pigments are levigated without the addition of linseed oil or turpentine; the paint dries readily without the aid of a drier and looks very well, especially when varnished. The paint keeps well, even under water, and becomes very hard. The cost is said to be about one-third that of ordinary oil paints.

POLYTECHNIC ASSOCIATION OF THE AMERICAN INSTITUTE.

At the regular weekly meeting, June 2, the general discussion of miscellaneous topics was opened by the president, T. D. Stetson, who took up the subject of syphons, and detailed at length some experiments which he had recently made.

The regular subject for the evening was inks, and as the gentleman who had undertaken to prepare a paper was unavoidably detained, the president called upon Mr. Partridge to speak, who began by drawing a parallel between ancient and modern inks, and showing how the requirements of the times very materially changed the character of the fluid used for writing. The ancient inks were as a rule very black, and almost indelible by time alone, or chemical action; simple washing, however, easily removed them. This was owing to the fact that their bases were carbon and gum. The modern inks are, as a rule, chemical blacks, and, while they withstand washing to a most extraordinary degree, are easily removed by chemical means. They are not proof against the ravages of time, the iron salts, of which they are largely composed, gradually losing their color.

Ancient inks, used with broad pointed pens, were thick and flowed slowly. The great speed of the modern hand writing, with the fine pointed pens now used, made an entirely different ink necessary. It must be fluid or it will not flow with sufficient rapidity, and great specific gravity is an aid to this.

For the sake of safety, when records or other documents are to be preserved for a long series of years, it is best to use the inks or writing fluids of one of the three or four great ink making firms (Carter's, Stafford's, and Arnold's of England were mentioned) of the country. The necessity of this is seen when the fact is considered that it takes about fifteen years to thoroughly test an ink in ordinary letters and record books.

While desirable on account of durability, it is practically impossible to go back to the old carbon inks. The amount of gum necessary to hold the carbon in suspension is so great that the ink would not only be thick, but would clog the pen rapidly. In writing upon parchment the thickness of the ink was rather an advantage. The varnish-like substance making writing much easier than it would be with a modern limpid ink.

Much of the fault found with ink on account of its fading was chargeable to the paper rather than to the ink itself. Old papers in the speaker's possession showed very different results. Some documents were fading, while others were permanent, and yet both were written with the same inks. It was often possible to get entirely different results from the same ink by using different kinds of copying papers. It seemed probable that chemicals remaining in the paper had much to do with this change of color. The weather frequently makes a change in the durability of copied documents and, the speaker thought, of the original writing also; but of this he could not be perfectly certain.

If great durability was wanted when there was nothing to be feared from alteration, then there could be nothing better than India ink. This is composed of a gum or size and a very pure lampblack. A trace of soda or, better, carbonate of ammonia would tend to correct its "greasiness" and make it flow better.

The cheap "school" inks ought never to be used for valuable documents, and, above all things, the aniline inks should be avoided. So far as is now known, all these inks are very fugitive. Some of them will show signs of

fading within a year or two. None of these are to be trusted, whether they be red, black, blue or violet. All the hectographic copies may be expected to fade, as they are made with aniline inks. Aniline has the greatest coloring properties of any known substance, and on this account is the best suited for this purpose. It is very unfortunate that it is so fugitive.

A gentleman said he had attempted to make some imitations of stained glass by the use of paper stained with aniline and placed between sheets of plain glass. The color, however, faded rapidly in the sun.

He called attention to the fact that the Declaration of Independence was becoming illegible. It went first to Philadelphia and then to Baltimore to be copied in fac-simile, and it has been handled and traced so often that many of the names can no longer be seen. The old inks have stained through to the back.

Mr. Partridge said this was not due so much to the fading of the ink as to the absolute robbing of the surface by the old processes of tracing employed before the days of photography. There is probably not a line left, the surface of which the signers ever saw.

Mr. Stetson.—Some French gentlemen told the speaker that one of the French government departments keeps its records in an American ink.

Dr. Parmalee was called upon by the president to speak upon the chemical character of the paper and its probable effect upon ink. He said that no test for paper could be suggested, from the very nature of the case. As Mr. Partridge has said, some ten or fifteen years are needed to test the effects of the paper upon ink, and of course the amount of any reagent taking that length of time to produce observable results would be very small, and we would hardy hope to detect such a minute quantity.

Manufacturers are not always to be blamed for putting an article upon the market not exactly like what they had made before. It takes time to find out the value of an article, and this is one of the greatest difficulties in the way of manufacturing.

In reply to a question he said that there were printing ink copying pads in the market the impressions from which were durable.

If printing ink could be removed from paper the invention would be of the greatest value: it would enable us to make a good white paper from old printed papers, a thing which cannot now be done.

He did not think that the blue in paper would have any injurious action upon ink—at least there was no chemical reason to lead to such a conclusion. The soda and alkalies used in the process of paper making are likely to be agents which cause the ink to discolor. Common salt, as found in the atmosphere, might also be among the causes.

The Doctor then gave an outline of the action which the various gases found in the air might have upon inks after a paper had been folded up or a book closed in an impure atmosphere.

The Doctor said that there was a great need of a bronze printing ink—that is, an ink with which the bronze could be mixed and printed at a single operation like any other ink.

In reply to several gentlemen, it was said that in general the inks "that write black at first" are logwood inks. These are very good when fresh, but are liable not only to undergo spontaneous thickening or coagulation, but are liable to be changed by the slightest causes. If a black ink is wanted the best way to obtain it is to buy a good writing fluid and allow it to stand exposed to the air until it gains color, adding fresh as evaporation takes place. It is only by oxidation that an iron ink gets its full color, and this may be hastened by exposure to the air before putting it upon the paper.

In reply to questions concerning the quantity of ink used in the United States, it was stated that an idea might be gained in regard to it from the fact that 11,000,000 (eleven million) copy books of twenty-four pages each are annually printed in the city of New York alone.

DALTON, MASS.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST and ONLY AWARD** given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition, Massachusetts Charitable Mechanics' Association, Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission, Medal of Progress American Institute, 1877, and Medal of Improvement and Progress, Boston, 1878.* Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

☞ **Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot. Each sheet is water-marked with name and date.**

The American Stationer

A Journal Devoted To the Interests of the Stationery & Fancy Goods Trades

"The Stationer"—Every Thursday—$2.00 Per Annum.

VOL. IX.---NO. 24. NEW YORK, JUNE 16, 1881. WHOLE NO. 312.

Correspondence.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, Ill., June 11, 1881.

In addition to the information telegraphed you of the first day of the Booksellers' and Stationers' Convention, I may add a few details.

The registered attendance was as follows: W. H. Watson, Aurora, Ill.; T. S. White, of T. S. White & Co., St. Paul, Minn.; H. H. West, of West & Co., Milwaukee, Wis.; D. D. Merrill, Minneapolis Book House, St. Paul; H. H. Denison, Elgin, Ill.; S B. Brett, Topeka, Kan.; Chas. Humphrey, Adrian, Mich.; A. J. Santee, Clinton, Iowa; H. G. Allen, of Eaton, Lyon & Co., Grand Rapids, Mich.; Robt. Gibboney, Polo, Ill.; Robert Shields, Bloomington, Ill.; W. Redhead, of Redhead & Wellschlager, Des Moines, Iowa; S. B. Kirtley, Columbia, Mo.; Geo. H. Fawell, Lincoln, Neb.; H. E. Hooper, Alvord & Co., Denver, Col.; H. L. Bovell, city; H. J. Ramsey, Fairbury, Ill.; F. E. Bellamy, Kankakee, Ill.; D. H. Davis, Coldwater, Mich.; J. A. Marsh, Detroit News Company; J. S. Green, Morrison, Ill.; James G. Daniels, city; Geo. L. Hoffe, city; E. A. Riddle, of Kraeger & Little, Aurora, Ill.; C. C. Sallitt, city; Mr. Grosvenor, of Grosvenor & Harger, Dubuque; S. P. Bowen, of Bowen, Stewart & Co., Indianapolis, Ind.; E. L. Donaghho, Streator, Ill.; W. S. Gates, Streator, Ill.; Madison Finch, Knoxville, Iowa; I. N. White, Waukesha, Wis.; V. M. Coryell, Western News Company, city; Mr. Gartside, of J. Anderson & Co., city; M. A. Saulsbury, Valparaiso, Ind.; J. R. Pigman, Lafayette, Ind ; R. H. Allen, of Allen, Wilson & Co., Iowa City, Iowa; H. O. Pinther, city; C. R. Overman, city; R. A. Wilson, Monmouth, Ill.; H. T. Brooks, of Sallee & Brooks, Mexico, Mo.; H. Sheperd, Kansas City; C. R. Vernan, city; Wm. Lewis, city; W. S. Gratis, Streator, Ill.; Geo. P. Sexton, city; Thos. H. Brown, Jr., of Brown, Pettibone & Kelly, city; Amos Pettibone, of Culver, Page, Hoyne & Co.; E. L. Jansen, of Jansen, McClurg & Co.; John H. May, representing Porter & Coates, Philadelphia; C. D. Perry, city; J. B. Carnichad, Davenport, Iowa; P. M. Crume, Peru, Ind.; H. T. Wright, Kansas City Book and News Company, Kansas City, Mo; J. S. Ford, city; Mr. Amberg, of Cameron, Amberg & Co., city; W. H. Redington, secretary Sanfer Manufacturing Company, city; J. Fred Waggoner, *Stationer and Bookseller*, city. THE AMERICAN STATIONER was represented by Howard Lockwood, New York, P. G. Monroe, T. W. J. Long and G. B. Heckel, Chicago.

In taking the chair Mr. West made a few appropriate remarks, in the course of which he said, that he had been a bookseller for the past twenty-five years, and that during this period the business has been growing constantly worse from evils with which the convention was only too well acquainted. To mitigate these evils was the object of their assembling, and he hoped that some means would be found of making their calling one of which they might be proud, "bequeathing it as a rich legacy unto their issue."

In the course of the forenoon other remarks were made by various representatives, showing the general temper of the meeting to be in accord with Mr. West's opinions. Various examples of "book butchering" were cited againt different prominent houses, and the publishers present replied by showing their side of the case, in which it was shown that the Chicago houses have fought manfully against the evil. The principal defects seem to be want of faith, want of unity, and want of organization.

At the afternoon session, outside of the regular business already reported, there were individual remarks made of great interest, but all going to show the present tendency of the trade to force legitimate dealers into "book slaughtering." The point was also made that there ought to be no such thing as a discount to professions; the retail price ought to be reasonably low and strictly adhered to.

Letters to the number of seventy-five were read, recommending the objects of the meeting and promising support.

The second day's proceedings, on June 9, were as follows:

The convention was called together at 11 A.M., with a markedly small attendance, owing to business interests outside.

The following report was submitted by the Committee on Stationery:

Whereas, The practice, on the part of manufacturing stationers and jobbers of stationery, of selling their goods indiscriminately and without uniformity as to prices and terms works great injury to the trade: and

Whereas, There is a practice of cutting the prices on many staple goods to a point below what any dealer doing a legitimate business can afford to sell at,

Resolved, That we, the booksellers and stationers of the Northwest, commend the practice of some of the leading manufacturers in selling their goods in such a manner as to protect the dealer and assure a legitimate profit; and we urgently request all manufacturers of staple goods to adopt such a plan, and we assure all that do it of our hearty co-operation.

A committee, consisting of Messrs. Kirtley, Shields and Allen, was appointed to devise plans for a retail catalogue. A telegram was sent to Mr. Leypoldt, of New York, asking terms for same, and the committee waited on the Chicago trade to see how many such would be needed.

After some discussion of plans for organization, the convention adjourned at 12:45 P. M.

The convention reconvened at 5:45 P. M.

A communication was received from the president, Mr. West, stating that he had been called home on telegram, but expressing his accord with all done in convention. The vice president took the chair.

A committee, consisting of R. H. Allen, Morris S. Green and W. H. Watson was appointed to devise plans to effect immediate organization.

The committee, to whom the retail price list had been assigned in the morning session, submitted the following report:

A telegram from Mr. Leypoldt reads thus: "Too expensive and necessitates new catalogue; but if you obtain immediately publishers' consent, will publish whole edition." The committee report that if Leypoldt refuses they can get them up themselves on subscription from the dealers. "We have waited on Jansen, McClurg & Co. and the Western News Company, and they express a willingness to co-operate with us in issuing a retail price list, made by adding twenty per cent. to the wholesale prices quoted in the educational catalogues. We further request all Western jobbers to issue retail catalogues of school books with these prices instead of the wholesale prices now published."

A committee, consisting of R. H. Allen, E. L. Jansen, and S. Y. Bowen, was then appointed to confer with publishers and jobbers for the purpose of attaining the objects of this report.

The Committee on Permanent Organization recommended the present officers as permanent for the year. Carried, as follows: H. H. West, Milwaukee, president; G. B. Grosvenor, Dubuque, vice president; True S. White, St. Paul, secretary and treasurer; Executive Committee, General A. C. McClurg, Chicago; D. D. Merrill, St. Paul; V. M. Coryell, Chicago; S. P. Bowen, Indianapolis; H. Sheperd, Kansas City. These were unanimously elected, and the association was permanently organized under the title of "Northwestern Booksellers' and Stationers' Association."

The Committee on Resolutions submitted a report thanking the various trade journals represented for their courtesy and attention. Also another, thanking the officers and committees, and also the following:

Resolved, That this convention is under especial obligations to Messrs. Jansen, McClurg & Co., and the Western News Company, for their aid and encouragement, fully given the projectors of this meeting, and that we, individually and collectively, thank them for their assistance. Also,

Resolved, That to the Chicago Stationers' Board of

Trade, for courtesies extended to members of this convention, we tender our warmest thanks.

All of which were unanimously adopted.

The time and place fixed upon for the next annual meeting is the second Wednesday in July, 1882, at the Grand Pacific Hotel, Chicago.

A committee was appointed, consisting of one member from each State, to secure membership, &c., and so forward the interests and objects of the association. Following is the Committee: Minnesota, Mr. Whittoll, Minneapolis; Iowa, A. J. Santee, Clinton; Wisconsin, A. J. Park, Madison; Illinois, Robt. Shields, Bloomington; Missouri, H. T. Brooks, Mexico; Michigan, H. G. Allen, Grand Rapids; Indiana, P. M. Crume, Indianapolis; Colorado, H. E. Hooper, Denver; Nebraska, J. S. Caulfield, Omaha; Ohio, T. S. Brown, Toledo; Kansas, B. B. Crew, Leavenworth.

The convention adjourned at 6:30 P. M.

BANQUET.

The labors of the two days were finely counterpoised by an elegant banquet given to the convention by the Chicago Stationers' Board of Trade. The invitations and programmes, gotten up in Culver, Page & Hoyne's best style, were out early in the afternoon. The list included several invited guests, and comprised some 125 or 150.

The tables were loaded with baskets of fruits and flowers, with a buttonhole bouquet to each guest. The menu, elaborately gotten up on fine gilt-edged cards with satin fringe, comprised everything in the way of style and taste, and was duly appreciated.

The guests assembled to the strains of a "Grand March Triumphant" by A. Maskin; after grace by Rev. Doctor Kittredge, J. W. Butler, president of the board, made a pleasing address of welcome, and the guests "fell to," finishing off on fine samples of "La Flor de Henry Clay."

Regular sentiments were then proposed and responded to as follows:

"Outlook".....S. T. Bowen, Indianapolis, Ind.
"Stationery".....R. H. Allen, Iowa City, Ia.
"The Butcher".....Robt. Shields, Bloomington, Ill.
"Trade Journals"....Howard Lockwood, New York.
"The Retailer".....E. L. Donaghho, Streator, Ill.
"Chicago Trade"....Chas. Humphrey, Adrian, Mich.
"The Publishers"... ...J. Fred. Waggoner, Chicago.

Many of the remarks were witty, eloquent or practical; I have, however, space for only two speeches, which I quote in full. The first was by Mr. Lockwood, of THE STATIONER, in response to a sentiment with which no man living is better acquainted than himself, as follows:

I don't know why; but I was never able to make what I might term a satisfactory response to this toast. Newspaper men are always ready to have something to say about everything except what most directly interests themselves. However, we are not great talkers, and I really believe that the most of us would rather write five columns about some subject of which we know very little than talk five minutes on one we are fully posted about.

The press, the general press, is frequently on the list of toasts at many public dinners. The trade press is not so often specially referred to. In reply to the press one can easily indulge in some glittering generalities very closely resembling some article recently put in type, and it will answer. But when business men call on one to talk about such an eminently utilitarian subject as trade journalism, it is quite another thing.

Trade journalism is not generally understood or appreciated even by those most interested. There are many who, for reasons of their own, openly wage war on trade journals. For the purposes of certain parties the trade paper tells too much and tells it too early and too often. There are merchants, now in business in this age of progress, who would like to see railroads destroyed, ocean cables torn up, telegraph wires pulled down, steamships sent to the bottom of the ocean—and trade papers suspended for all time.

From the same town a publisher of a trade paper often gets from one house the message, "Continue your paper. Can't get along without it;" and from another house in the same town as follows, "We consider your paper a curse to the trade. Stop it, for God's sake." Now, it seems to me that any element which enters into business calculations and causes such extreme and feeling criticism must be in itself important.

Trade or commercial journalism, in its distinct and separate form, is of quite recent date. When I speak of this class of papers I refer to journals of standing, published by responsible houses, and whose management is practically in the hands of persons in no way associated with the business interests to which the paper caters. It may be readily understood why the introduction of such papers did, for the time being, cause some disturbance in commercial circles. But they have come to stay and there is no reason why all classes of merchants should not adapt themselves to the new order of things. I have no doubt, however, that there are gentlemen here this evening who listen more or less incredulously to what I am saying and think that I am magnifying the importance of this phase of the subject. Had I the time I could instance hundreds of cases, not alone in my own experience, to prove that, in every line of trade, commerce or finance, in which first-class trade or commercial journals are published, their first introduction, in many instances, brought about many radical changes in the methods and ways of purchasing and selling goods, and that such influence is still exerted, and that in all cases the changes brought the greatest good to the greatest number. Is it surprising that there are a few who oppose trade journals!

Again, trade journals are treated with a sort of lofty contempt by the general press of the country, especially the daily press. Before the days of trade papers all the New York dailies carried the standing cards of all large wholesale jobbing, importing and manufacturing houses. To-day this business has been transferred to the trade papers in different lines. Does any one ask why we don't get full justice from the daily press?

Again, every one posted on the subject knows that Henry Watterson told me the truth when, some years ago, he said that, to succeed in writing for or editing a daily paper, one must be superficial. The superficial writer and editor is not wanted in trade journalism. We have no use for him. We make use of careful, painstaking specialists and experts. Men with brains, experience, and the faculty of imparting useful and practical knowledge.

We are in the business of editing and publishing not literary luxuries, not sensational statements, called news, written off in readable style, whether from the pulpit, the bench, or the rostrum, but business documents, every line of which is practical and useful. This is the difference between general and trade or special journalism.

I do not wish to be understood as saying aught against the character of the work put on the general press. There is a demand for just such papers as are made, for just such news, written in just such style, and the daily press gives it to the public in this country, and particularly in this great West and Northwest, with a lavishness that is commendable from every standpoint. I only wish to draw a broad line of distinction between the character of the work put on the two classes of papers—one rapid, brilliant and superficial, the other slow, solid and practical. And, further, I wish to claim, that trade journalism, treating, as it does, the most important interests that can possibly affect the material progress of our mercantile and manufacturing classes and eschewing all other distracting and irrelevant subjects, is the highest and best degree of journalism, inasmuch as it is the most practical and utilitarian.

And right here I wish to make another claim for the trade journal, and in this instance it relates to one class of trade papers. I refer to those which have carried the name and fame of American goods and American products to the four quarters of the globe. No local paper of any kind ever has had a hand in this great work, or, for that matter, ever could. This great triumph is one belonging solely and purely to special journalism. And further, the country little knows or appreciates to-day the importance of this movement toward opening up abroad markets for our present and growing surplus. The trade newspaper has set the ball rolling and we trust in time will reap a reward.

Another thought occurs to me, and I should be, perhaps, remiss in not referring to it, viz.: The relations existing between the trade paper and trade associations. In the great work of association, it seems to me that the trade press has had its influence, and in many cases made association possible. When we consider how necessary it is to form public opinion and trade opinion, prior to obtaining the co-operation of the masses with the labor of a few leading and active workers, who usually inaugurate these movements, there seems no need to argue that the trade paper which gives voice to the views of the few, and carries the tidings far and wide, performs a work that could not have been easily done in any other way.

You know, gentlemen, that association has had its up and downs, so far as the book and stationery trades are concerned. Speaking for myself and the journals under my control, and for the trade press generally, I would say that we have not lost faith in the final usefulness of association. We look upon every attempt in this direction with favor, and shall always advocate in the strongest possible manner that true, proper association—no other will ever succeed—whose object, first, last and all the time, is and should be the greatest good to the greatest number.

In response to the last regular sentiment, "The Publishers," J. Fred Waggoner, publisher, bookseller and stationer, Chicago, said:

MR. PRESIDENT—The motto of Donnybrook fair, I believe, was, "Whenever you see a head, hit it!" and it may be that from this booksellers' convention an idea may get abroad that its members have aimed their shillalahs at the heads of the publishers as the fancied cause of all their grievances. I am sure that no such feeling prevails among the booksellers in regard to the *legitimate* publishers.

The evils and demoralization under which the retail trade suffers are due largely to misunderstandings, and are the result of competition into which the regular publishers have been driven by unscrupulous parties. The convention just held has developed the facts that the leading book publishers, East and West, are as desirous of maintaining friendly relations with the retail booksellers and stationers as are the latter anxious to keep the good will of the publishers, and that such relations are feasible and practicable when the exact character of the evils complained of have been ascertained. The interests of the publishers and booksellers, if not identical, are so closely allied as to render them necessary to each other.

The book publishers of the United States comprise an intelligent, liberal and public spirited fraternity, which has done great service to our literature, often without hope of reward. We have seen that the booksellers and stationers of the West are not behind the members of any business or profession in their ability to comprehend their position and responsibilities, and that they have determined to control the trade that legitimately belongs to them

When two classes of men like these, mutually dependent upon each other for success, come together for the purpose of adjusting their business relations, failure is out of the question. An understanding of the exact situation having been reached, the removal of the evils and difficulties that surround you becomes only a question of detail, a task which, I am sure, you can satisfactorily accomplish. In fact, the work is already more than half done; and the spirit, zeal, and good judgment shown by your convention, are the best possible omen of successful results.

Irregular sentiments were responded to by E. L. Jansen, W. H. Watson, Mr. Grosvenor, E. L. Donaghho (who made the most elaborately funny speech of the evening, the speaker being at the time "just chock full" of——humor!) F. A. Havely, representing Young & Co., New York, wants to see the sign put up and adhered to in every bookstore, "One Price Only!" Colo-

nel Davis, of Jansen, McClurg & Co., in response to "The Authors," made a few remarks, and read with great success Saxe's poem, "The Puzzled Census Taker." Amos Pettibone, of Culver, Page, Hoyne & Co., told a funny story, about himself and Mr. Butler, that "brought down the house."

Following selections were played during the evening by Pound's orchestra: Paraphrase of "Rosaline im Thale" (C. Franke); selection from "Olivette" (Audran); song (solo for cornet) (Suppé); fantaisie (Tempo de Bolero) (Audran); selection from "La Mascotte" (Audran); Polka di Concert (Miller); selection from "Billee Taylor" (Soloman).

At about 12:30 A. M., the convivial meeting broke up amidst general congratulation and satisfaction. G. B. H.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BOSTON, Mass., June 13, 1881.

I have nothing new to write pertaining to the stationers' trade this week; but business moves along moderately, as it always does, at this "between" part of the year. Stocks are ample for the season, especially in the novel and ornamental lines, the chief demand being for paper and light stationery.

Next season's trade, according to all reports, will be unusually large on account of the partial failure of the spring trade to come to time, per force the backward season, floods, &c. Our dealers are therefore making arrangements accordingly. Manufacturers are calculating upon even larger business than they experienced last year; but the novelties and designs will be more numerous and as much more artistical as possible, especially in the lines of fancy cards, albums and holiday goods generally; and all this in order to meet the improved taste for goods partaking strongly of the æsthetic and useful.

The interior trade is only moderately active and small orders suffice.

The red two-cent stamp and a blue one-cent stamp mania, among young ladies, has reached Boston. This combination, in place of the usual three-cent stamp on the white background, is supposed to symbolize "union."

A Boston man has invented a machine, which is in successful operation, that turns out twenty paper boxes from the pulp every minute, and each box is seamless.

Dealers in paper stock here believe that bottom prices have been reached.

A Boston man has invented a new kind of paper stock for printers' use, but he lacks capital in order to utilize his discovery.

"Loring's" is a household word in Boston, and until lately he occupied the store corner of Washington and Bromfield streets. His liabilities are said to be $20,000; nominal assets, $14,000.

H. O. Houghton, of the Riverside Press, has been wined and dined by London publishers in that city.

Ebenezer Clapp, seventy years of age, bookseller and stationer about forty years, died in the Dorchester district a few days since.

Lawrence & Co., printers and stationers, who failed several months ago, have been sold out.

Charles A. Clapp, of the firm of E. P. Dutton & Co., returned from Europe last week.

Hon. Alex. H. Rice, will be married abroad in a quiet way; the bride being Mrs. Cora Powell, of New York.

A new use for cards has lately been devised by employing them in country houses as a substitute for tiles. For this purpose are made sets of light, square cards, which have the daisy, water lily, sunflower, and aster printed in colors on their silvered surface, the back and front of each flower being represented.

Stationery prepared especially for the season is ornamented with flights of dragon flies and bees and birds in the corner of each sheet and card—and this in spite of the cool, wet weather.

There has been an unusual demand for tinted and Irish linen papers of late.

The printer who set it, "What is so *raw* as a day in June?" did not get far from the truth. Overcoats have been in demand in Boston during the past week. L.

BALTIMORE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, Md., June 14, 1881.

As a correspondent of the Lockwood Press I perused with pleasure the account published of the annual banquet given by the proprietor to his editorial staff and heads of departments. How "we" should have liked to have been present! Hold, now; don't be in a hurry with that blue pencil. By the "we" I allude to your correspondents all over the country and not to myself individually. When I came to the post-prandial speeches, Mr. Colvin's kindly remarks on the "we" reminded me of "the three tailors of Tooley street," and I congratulated myself on the fact that I never resembled them even in the wording of my humble correspondence, and never will be likely to do so in view of the graceful warning conveyed in the remarks alluded to.

There is nothing new under the sun to record here in Baltimore. In fact there has been very little sun itself, and the heavy and continuous rain of the past ten days have put a decided damper upon trade, which is now, if not absolutely dull, anything else but brisk.

John B. Piet has for the past month or so suffered much inconvenience through the putting up of a partition between the store he occupies and that used by his next door neighbor. He kept his stock from damage by thick canvas curtains, which covered the unseemly gap made by the workmen.

The members of the trade here are in receipt of the New York Blank Book Company's new catalogue, the arrangement of which is considered first class. A customer can find at once what he wants without looking through the entire catalogue. The book is handsomely bound in cloth, stamped in gold on the side.

A new political paper, entitled the Baltimore *Tribune*, has made its appearance, and will be issued weekly in support of the Old Line Democrats recently organized here in opposition to the Democratic ring.

That story gotten up by Peck's *Sun* anent the little boy who blew up the paper bag his mother used for a bustle has been republished in many of the papers here. The good lady, it appears, tied the bag on and did not know it was loaded (with wind) until she sat down in church and startled the congregation by the report that followed. Her husband was wild with rage, and the boy who fixed the bustle got a trouncing he will never forget. If paper bags are so prolific of trouble, I suppose the manufacturers will have to discontinue their make or else use nothing but non-explosive material in their establishments.

My friend Viennot's allusions to the slowness of advertising in Philadelphia applies equally to Baltimore. There are, to be sure, only few specialties here in the stationery line that need to be made known throughout the country; but the piano men, who would find it to their advantage to buy up some space in the *Musical and Dramatic Courier's* advertising columns, are really blind to their own interests in preferring to live on the limited orders received at home rather than increase their business tenfold by letting the public elsewhere know what they manufacture. W. P. M.

MASSACHUSETTS NOTES.

[CORRESPONDENCE OF THE STATIONER.]

SPRINGFIELD, Mass., June 10, 1881.

Trade with our large concerns is very good. I made the rounds to-day and find them all very busy.

H. H. Merriam is showing up a beautiful line of papeteries.

The Morgan Envelope Company is running over-time to fill its orders.

I was very much surprised when I called upon the Springfield City Paper Company, which is doing an immense business, and on some grades of goods it is pushed very hard. As I entered the door I met Chas. W. Keiser, who showed me the establishment from cellar to garret. The house occupies the large four story building, Nos. 251 to 257, and is crowded for room. It is shipping goods all over the world.

I found the National Papeterie Company heels over head in business.

When strangers visit this city they should not fail to call to see Gill's "art store," as it is one of the finest places in New England. BANNING.

LUMINOUS PHOTOGRAPHS.

Self-luminous photographs are, at the present moment, attracting much public attention in Vienna, and will undoubtedly make handsome additions to house decoration in the future. When these are examined by daylight they look like ordinary paper photographs; but in the dark they are beautifully phosphorescent in the high lights, have a more or less feeble glow in the half tones, and in the deep shadows possess no luminosity.

The preparation of these self-luminous photographs is very simple. A silver print on albumen paper, or a collotype is rendered transparent by brushing over it a mixture of equal volumes of castor oil and oil of turpentine. The superfluous oil is removed by means of cotton, wool or a linen rag, and the phosphorescent paint is then put on. The paper thus prepared is then dried, and afterwards mounted with its reverse side on cardboard. So soon as it has been exposed to the daylight, and the light penetrates through the transparent or semi-transparent parts, the phosphorescence of the luminous paint underneath is excited, and in the dark the image is seen with all its gradations; brilliant pictures and moonlight landscapes give especially good results.

These self-luminous photographs were first introduced to the Vienna public at a ball given by the chemical students of the Technical High School on March 3 last. The ladies' ball programmes were decorated with a self-luminous picture, representing an alchemist at work in his laboratory.—*Oil and Drug News.*

TO RENDER IVORY FLEXIBLE.—Ivory is readily rendered quite flexible by immersion in a solution of pure phosphoric acid (specific gravity 1.13) until it loses, or partially loses, its opacity, when it is washed in clean cold water and dried. In this state it is as flexible as rubber, but gradually hardens by exposure to dry air. Immersion in hot water, however, restores its softness and pliancy. The following method may also be employed: Put the ivory to soak in 3 ounces nitric acid with 15 ounces of water. In three or four days the ivory will be soft.

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD BERKSHIRE MILLS

LINEN LEDGER PAPER

Will stand the severest test of COLOR, CLIMATE, INK OR WEAR.

Being **Triple Sized** (a process entirely our own) and **Loft Dried**, can be erased and written upon the fifth time distinctly. None genuine without the water-mark and date, thus—**Old Berkshire Mills Linen Ledger, 1881.**

STAFFORD'S UNIVERSAL WRITING INK!

A PERFECT BLACK WRITING FLUID.

It contains no gum, and flows very freely, making a smooth, even mark.

It positively will not corrode Steel Pens.

Writes darker than any known ink, and turns at once jet black.

Being a perfect chemical solution, it cannot thicken or deposit a sediment.

Never moulds in any climate. Freezing does not injure it.

Never changes in color or consistency while in use in the inkstand.

Resists Acids. Is more permanent than any other ink.

It will be found more economical than any other ink, as it can be used to the last drop.

One of the most valuable and remarkable features of this Ink is the extreme rapidity with which it dries on the paper, it being seldom necessary to use a blotter. This quality should recommend it to bookkeepers.

In the United States, this Ink has completely superseded the old fashioned pale black inks, and has to a great extent taken the place of the faint green writing fluids.

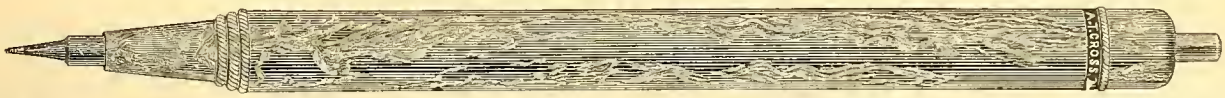
Mr. J. Adee Hepswith, the eminent English Chemist, says:

"I find S. S. Stafford's Universal Ink to be proof against all acids; and, from my knowledge of its ingredients, I believe it to be the most permanent ink in existence, as it cannot **rust out** like **other inks** that are prepared from **galls** and **iron.** As it seems to be entirely **free from any tendency** to **thicken** or **corrode steel pens,** and is **BLACK AT ONCE,** I cannot but regard its invention as a valuable discovery."

S. S. STAFFORD, Chemist, No. 218 PEARL STREET, NEW YORK.

PERFECTED STYLOGRAFIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS,** the last, June 20, 1880, being the most important and giving the name **Perfected.** All cuts are exact size.



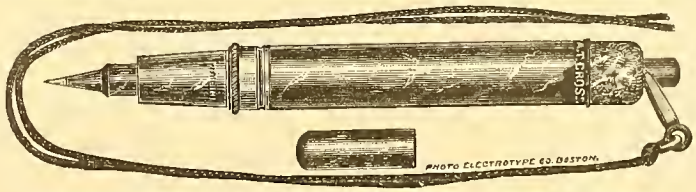
MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambler's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra long. Holds most ink, except the **Maximum.**

SHORT.—Most widely known and sold heretofore; but Maximum and Long are much better for desk or Hambler's Pocket. So this will be largely superseded.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined.

☞See Descriptive Circulars.



GIANT, with Cord and Gold Ring, same price as Short.

Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, all of which will have the new improvements.

☞See Descriptive Circulars.

LITTLE GIANT, Plain, - $3.00.

All Styles up to $4.50.

☞ **LITTLE GIANT.—The Ladies' FAVORITE.**

FOLEY'S

Celebrated Gold Pens and Pencils

THE FINEST AND BEST.

CIRCULAR.—To those engaged in mercantile pursuits, any invention that will facilitate their labor is highly worthy of notice, as well as of extensive patronage. One of the most important inventions of the present age is that of a pen that possesses the necessary qualities of firmness in mark and durability in use. Pre-eminently such are those of JOHN FOLEY, Manufacturer of Fine Gold Pens and Pencils, No. 2 Astor House. Their superior value is tested by the long time he has been engaged in our city in their manufacture. We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

John Lindsay, type founder, New York city, is dead.

O. P. Gurdy, newsdealer, Lawrence, Mass., has sold out.

The Illustrated Advertising Company of this city has dissolved.

S. W. Moore, publisher and printer, Scandia, Kan , has sold out.

M. A. Reay is preparing several new styles of goods for the fall trade.

Wert & Degginer, printers, Alexandria, Neb., have dissolved partnership.

John Kane, printer, San Francisco, Cal., has filed a petition in insolvency.

John D. Bridge, publisher of the *News*, Colebrook, N. H., has sold out to Haney & Claflin.

Samuel Young has succeeded S. Young & Son, publishers of the *Valley News*, Zelienople, Pa.

Dudley & Co., booksellers and stationers, Atlantic City, N. J., have sold out to Samuel Haslett.

C. A. Pierce & Co., printers, Bennington, Vt., have dissolved partnership. Charles A. Pierce continues.

There seems to be a better feeling among the trade this week than last as to the prospects of the coming season.

Thomas P. Diggs, publisher of the Clayton, Mo., *Democrat*, has sold out to John H. Diggs and Walter Payne.

Geo. Waterston & Sons, London and Edinburgh, manufacture the "bee brand" sealing wax. To know it is to love it.

Langfeld, Turner & Andrews, Philadelphia, are constantly getting out something new in pocketbooks, purses and fancy leather goods.

Reynolds & Reynolds, Dayton, O., manufacture the "Consecutive" blank book, besides the "Flexible" and "Economic" memo. books and covers.

A. H. Goetting will make this year a very brilliant display in his warerooms. His various lines, it is said, will surpass all previous efforts of the house.

The American Lithograph Stone Quarrying Company, of Indianapolis, Ind., has filed articles of association. Capital stock, $500,000, with 10,000 shares at $50 each.

The Executive Committee of the Eastern Straw Wrapping Manufacturers' Association has decided to close down all of the mills for thirty days, beginning on July 1.

E. P. Coby & Co.'s pad calenders for the ensuing six months, commencing Juiy 1, and which have been very favorably known, are now ready for the trade Attention is called to their advertisement in another column.

J. B. Lippincott & Co., of Philadelphia, have just received from P. & J. Arnold fifty casks of their celebrated inks, and are now prepared to fill all orders for that standard article. This house is manufacturing a "Perfection Duplicate Tablet," a handy article for the desk or pocket, which, being useful as well as convenient, is meeting with a favorable reception.

The Mead & Nixon Paper Company, Dayton, Ohio, is advertising to sell out its works, plant, water privileges, &c., at auction. The sale is announced for July 13. The property includes two paper mills and one chemical fibre factory, all supplied with improved and suitable machinery. The owners are about to retire from business. Other particulars will be found in the advertisement of sale.

B. E. Pike, with M. A. Reay & Co., has just returned from an extended Western trip, during which he took very heavy orders for the fall delivery. Mr. Pike says that he found things lively everywhere he visited as far as his own lines are concerned, and reports that the expectations of the trade generally are that the coming season will be very prosperous.

Despite the unfavorable weather for the last seven days, R. Fideau, 16 Beekman street, has been very busy filling quite a number of large orders for his patented hammocks and "Unparalleled" school bags. Mr. Fideau has also shipped lately about 500 cases of school slate.

Jas. R. Crompton, Elton paper mills, Bury, Lancashire, England, manufactures the celebrated "grass bleached" and other tissue paper for which the Dennison Manufacturing Company, Boston, is agent.

J. H. Brown has been on a trip to Pittsburg, Philadelphia, Baltimore and Washington, with Tuck's Christmas and New Year cards for Willy Wallach, and was very successful in taking orders.

A. Hamerschlag has retired from, and Simon Kohn has been admitted to, the firm of Frankenthal, Bachman & Co., dealers in fancy goods, San Francisco, Cal. Style unchanged.

Sherman Brothers, booksellers and stationers, and F. W. Andrews & Co., newsdealers and stationers, Ludington, Mich., had their stock damaged by fire on the 12th inst.

The firm of A. Z. & L. M. Boda, publishers of the *People's Journal*, Columbus, Ohio, has been dissolved by the retirement of L. M. Boda. Boda & Galer succeed.

Myers Brothers claim to have the largest variety of De La Rue's cards in this market, and they guarantee a uniform price to all buyers.

The liabilities of A. K. Loring, the Boston stationer and publisher, are reported at about $20,000, and his assets are valued at $14,000.

Page, Spaulding & Co., stationers, &c., Boston, Mass., have dissolved partnership. N. H. Spaulding continues alone under old style.

Carroll S. Bartram, publisher of the *Daily Morning News*, Ray City, Mich., has sold out to Jacob G. Coates.

Boardman & Hall, printers, Augusta, Me., have dissolved partnership. S. L. Boardman continues.

James A. Crozier, publisher of the *Herald*, Menominee, Mich., has sold out to H. O. Fifield.

D. B. Brooks & Co., Boston, manufacture Brooks' record ink, besides other specialties.

The Novelty fastener can be ordered of Hasbrouck & Watson, sole agents, New York.

The American Crayon and Slate Company is sole agent for Vermont soapstone pencils.

T. M. Simpson, Philadelphia, offers eighty different series of cards for collectors.

A. T. Weinburg, fancy goods dealer, Baltimore, Md., has made an assignment.

F. M. Bourell, dealer in notions, Olney, Ill., has made an assignment.

J. S. Sweet, newsdealer and stationer, Dewitt, Mich., is dead.

Waltham crayons are standard goods.

J. M. Wotawa, dealer in notions, Cuba, Mo., is selling out at auction.

Eaton & Conlee, printers, Lincoln, Neb., have dissolved partnership.

H. E. Pratt & Co., paper dealers, New York city, have dissolved partnership.

A second-hand paper cutter is for sale at THE STATIONER office. It cuts 32 inches.

William G. Clements, dealer in notions, Cincinnati, Ohio, has made an assignment.

H. A. Cropley, bookseller and stationer, Fredericton, N. B., has sold out his bookbindery.

The Atlantic Works, East Boston, Mass., manufacture the Dooley paper cutter. Send for circular.

The J. G. Shaw Blank Book Company, New York, keeps busy turning out all kinds of blank books.

H. L. Lipman, Philadelphia, controls Hover's manuscript writing paper and the Lipman eyelet machines.

Twelve tons of fine papers and bristols (elegant goods) are turned out of the Whiting Paper Company mills every day.

The new "Peerless" letter file is Cameron, Amberg & Co.'s triumph in the way of files. Don't forget the Chicago house.

J. S. Rockwell & Co., 101 Duane street, New York, have all varieties of leather for bookbinders and leather goods manufacturers.

G. Carlyle, 11 Waterloo Buildings, Hanover street, Liverpool, England, manufactures carbon, tracing and copying papers, and all goods in this line.

Spalding & Hodge, paper makers, 145 Drury Lane, London, Eng., keep in stock and make to order all kinds of papers. They invite sample orders.

Linen record and ledger papers, made by Byron Weston, took the "grand prize" at Paris in 1878. These papers are made just as good today. Send for samples.

John C. Allen, formerly with John Gladding, has connected himself with George McDowell & Co., Philadelphia. He is now in Cleveland, Ohio, and is doing well.

The Holyoke Glazed Paper Works make a specialty of high grade enameled and plated goods in fine tints. Special attention is called to their lithographic papers.

George McDowell & Co., Philadelphia, who are sole American agents for the Clothier pen, forward their descriptive and price list, which presents several new styles of this well known and popular pen. Sample cards are ready.

A. H. Reed, buyer of stationery goods for John Wanamaker, Philadelphia, has gone to Europe, where he will purchase all of the goods which this house will import this year. The stock which this house will offer will be larger this season than it has ever been.

Chapman & Bloomer, engravers, New York, have moved from 42 to No. 48 Fulton street. This firm makes a specialty of fine engraved work, cards, wedding goods, &c., and has made this change after a continuance at its old location for nearly twenty years. It has considerably enlarged its facilities for business.

As this time of the year dealers in school supplies lay in stocks of liquid blackboard slating; and as this article is one of the specialties of the New York Silicate Book Slate Company, the attention of the trade is called to the very superior article offered by this concern, orders for which

should be sent in as early as possible. Blackboard cloth is also very much in demand.

The "Elwood" file is made by Adams & Kimball, Chicago.

C. T. Woodrow & Co., Cincinnati, make a specialty of printing.

Bradner, Smith & Co., Chicago, Ill., manufacture and deal in all kinds of papers.

Send to the Marseilles Paper Company, 117 Lake street, Chicago, for samples of papers.

Thomas S. Dando & Co., Philadelphia, have their new holiday goods ready for distribution.

L. Prang & Co.'s new birthday cards are very handsome. Xmas samples will soon be ready.

Hard & Parsons, New York, are always ready to supply the trade with fine papers and envelopes.

T. Sinclair & Son, Philadelphia, Pa., have a great variety of new designs for advertising cards.

The Warrington Steel Pen Company's pens are controlled by Theo. L. Warrington, Philadelphia, Pa.

Ruling machines are made by W. O. Hickok, Harrisburg, Pa. This is a good thing to remember.

The Plimpton Manufacturing Company, Hartford, manufactures an extensive line of envelopes, &c.

Copying paper and copying books have been made famous by Mann. Wm. Mann is at Philadelphia, Pa.

The J. W. Stoakes automatic shading pen can be had of J. D. Whitmore & Co., New York. Send for circular.

The Sanford Manufacturing Company, Chicago, Ill., invites examination of its inks, mucilage and sealing wax.

Clark, Friend, Fox & Co., Chicago, Ill., manufacture and deal in all kinds of papers. Send for catalogues and samples.

The Perfected Stylografic can only be had of the Readers and Writers Economy Company, Boston, New York and Chicago.

William Pedrick, 942 Market street, Philadelphia, will undertake agencies for manufacturers, and invites correspondence.

Van Antwerp, Bragg & Co., Cincinnati, have their new catalogue ready, and are offering their standard blank books for the fall trade.

The Old Berkshire Mills ledger papers will stand the severest tests. Carson & Brown Compauy, Dalton, Mass., are the manufacturers.

Grosvenor, Chater & Co., 68 Cannon street, London, E. C., England, deal in papers of the best quality. They took high rank at Melbourne.

The Platner & Porter Manufacturing Company, Unionville, Conn., will quote prices of its well known specialties in writing, envelope and account book papers, on being asked therefor.

The Pocketbook Makers' Association, of Philadelphia, will make an excursion on July 27 to Atlantic City, via Camden and Atlantic Railroad, by special train. This society, which is a mutual aid organization, extends assistance to its members whom accidents or sickness prevent from earning their living. It is of recent formation. Its purposes are praiseworthy and are appreciated in Philadelphia. As they meet with a great deal of sympathy from all classes of society, it is expected that this excursion will be a great success, particularly as it will be the best managed affair of the season.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---$2.00 PER ANNUM.

Single Copies - - - - 10 Cents

NEW YORK, THURSDAY, JUNE 16, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE meeting of the booksellers and stationers of the Northwest was so fully attended that it is apparent that they have had more than ordinary reason to complain of their treatment by publishers and manufacturers.

SINCE the dissolution of the association which it was once fondly hoped would create a perfect bond of union in the book trade and harmonize many differences, there has been a falling away from good resolutions, and booksellers are probably as badly off now as they ever were.

COMPLAINTS of the troubles caused by "butchers" are general, and these extend to the stationery branch as well. It is useless to go over the whole ground; but the point is that if goods are not sold at uniform prices something is wrong, and when cost or below cost is quoted it is to be decided who is to suffer. Perhaps there will be a few insolvents. Who knows? In this respect trade seems to be tending in the direction which calls for creditors' meetings and no assets.

BUT we leave the discussion of this to those most interested. They understand the situation; and if they cannot pause to think and remind themselves of the past, they must needs go to ruin. It is to be hoped that the meeting at Chicago will be a reminder and a warning. The resolution calling on manufacturing stationers to protect the retail trade is timely. It is scarcely too late; but there is no question that competition has been running ahead of discretion. Uniform prices are desirable and necessary, even if they are high. This constant cutting in prices retards business. Fluctuations prevent sales, and nobody can forecast whether he is to gain or lose in making a purchase. By all means let us have uniform prices. If we don't get them on a paying basis they will work down to a uniform system of sacrifice, and then somebody, perhaps several somebodies, has got to go under. A retail price list of books is asked for. It is a just demand and ought to be sustained.

THE official call for the annual meeting of the American Paper Makers' Association appears in this issue of THE STATIONER. There ought to be a good attendance at Saratoga. Many important subjects should come up for consideration at this meeting, and the most important is that of our foreign commerce. There are several paper makers in Congress, and all of them belong to the association. Mr. Russell, lately a member of the Committee on Commerce of the House of Representatives, has had occasion to formulate the views of his committee on the foreign trade of the United States, and his report ought to be taken up, considered and passed upon. American paper makers must push their export trade. Several of them realize this, and have begun to work in that direction. They should be largely reinforced. If our paper makers shonld form an export association, pledging funds enough to send out agents to available points, and should keep samples constantly in the hands of agents, they could doubtless make the effort pay. They must learn, however, to establish uniform prices, and to adhere to them through thick and thin. They will then secure a steady trade, which, no matter what the vicissitudes or fluctuations of the home markets may be, will not fall away from them when they need it the most. One of the most active and enterprising of our consuls, now home on a brief leave, gives a very vivid statement of the way in which American goods sell in his consular district. He told us, only a few days ago, that anything American would sell on sight, provided that it was of guaranteed origin and no sham. He cited the instance of an article which had been sent over as a sample. The merchant who handled it asked him if it was certainly American and made by a reliable manufacturer. Having been assured of this, he went out and sold it, after testing it, for $150. The manufacturer's price was about $30. The same gentleman also said that he received a letter from an English consul at a post not far distant from his own. It was written on American paper and the Englishman commented on the fact, saying that it was excellent paper, that he conld not procure any other at the point where he was located and that the people there would not buy any other. We might give several other instances which go to confirm the statement that American goods will sell; but it is unnecessary. If we have not given illustration enough to stir up and impress the paper makers of this country with the value of a foreign market for their surplus output, it is not likely that they can be moved if we heap up good, substantial proof of this kind. But what we have most desired just now to impress upon the paper trade is a thorough study of the necessities and demands of our foreign trade, not only in their application to paper, but to all other manufactnred products. The trade is fully and ably represented in Congress, and as an industry it ought to take an important part in shaping legislation or in the proposition of methods for extending our commerce in every direction.

AMERICAN PAPER MAKERS' ASSOCIATION.

ANNUAL MEETING.

SPRINGFIELD, Mass, June 10, 1881.

The third annual meeting of the American Paper Makers' Association will be held at the Grand Union Hotel, Saratoga, ou Wednesday, July 27, prox., at 11 o'clock A. M. Manufacturers of all kinds of paper, paper boards, &c., are invited to attend. A full attendance is requested.

Per order Central Executive Committee,
C. O. CHAPIN, Secretary.

P. E. Reynolds, stationer, &c., 43 Elizabeth street, Melbourne, Australia, wants to sell American goods. See his advertisement.

Letters patent have been issued this week for the perfect skiving or paring of fine leather, whereby they are rendered useful to pocket-book makers, bookbinders and shoe manufacturers. It has long been the desire of every one connected with these trades to invent something whereby the annoyance of imperfectly skived leather would be overcome, and the working of leather into the many fancy articles rendered comparatively easy. This may seem like a small matter to those not acquainted with the difficulties of working fine leathers, but all manufacturers can testify to the great inconvenience caused by imperfect skiving, and will find it to their interest to investigate the improvement and satisfy themselves of this advancement. The device consists of a rotating abrading wheel, and the leather to be skived is held against the wheel by a steel roller, adjusted by springs to overcome the inequalities in the surface of the leather. It has been in successful operation for several months, and the patent was not applied for until the fact of its usefulness was fully demonstrated. As usual, the enterprising and progressive firm of Langfeld, Turner & Andrews, of Philadelphia, has been the first to avail itself of this great improvement, and the demand of its hands for work done by it, is a sure indication of its merits. The patentees are A. Y. Audrews, of the above named firm, and Henry Burk, a thoroughly capable and inventive machinist of Philadelphia.

The Merriam Manufacturing Company, Durham, Conn., makes all kinds of stationers' tin goods, such as cash boxes, bond, deed, and post office boxes, bill head and envelope cases and the like. It has just made up a new grade of sunk handle cash boxes and postal card holders which are offered at low prices. Besides these goods the company manufactures a great variety of other articles in tin. Send for catalogue and price lists.

Owing to increase of business, C. C. White, manufacturers' agent for manilla and toilet papers, has taken part of the premises 104 Reade street for storage purposes. He, however, still keeps his office at the old place, No. 40 same street.

OBITUARY.

PAUL CHÉRON.

The death is announced, at the age of sixty-two, of Paul Chéron, a well known French literary man and contributor to the *Gazette des Beaux Arts*. He was born in Paris on March 11, 1819, died at his father's house, at Sannois, and was buried in the village cemetery. M. Chéron was at his post at the National Library, where he had passed the greater and best part of his life, until a few days before his death. He commenced life as a student of medicine, but entered the service of the government in the National Library, and devoted himself to the study of bibliography and the history of literature. He became head of the service of the public reading room, which he had been charged to create and organize. One whole volume of the old *Journal de la Librairie* is due to his anonymous collaboration. Many years later, from 1855 to 1858, he printed for his friend Jannet a "Catalogue Général de la Librairie Française de 1800 a 1855," which A. de Montaigion says, in the *Gazette des Beaux Arts*, was unfortunately discontinued, after the third volume, from circumstances over which the compiler had no control. Among the works he edited are the little account of his gallery of paintings by the Comte de Brienne; the life of Francis Chaveau, by Papillon, in 1854; the "Mauon Lescaut" of Abbé Prévost in 1858, the first of which is based on the text of the edition of 1753; the writings of Boileau, with the notes of M. Berriat Saint Prix, in 1861; a fine issue of the "Candide" of Voltaire, after the original edition of 1759, in 1869; and an elegant one in five volumes of the masterpiece of Rabelais, in 1876 and 1877. The work in which he was most interested was the faithful reproduction in three volumes, which are already rare, of the original editions of the plays of Molière. He had a fine library, a greater part of which is composed of a valuable collection of books relating to the great dramatist. Much of his collaboration for the *Gazette des Beaux Arts* was in the shape of bibliographical information, and the half-yearly bibliographical tables of works of art iu that admirable journal were drawn up by him. M. Chéron was by nature very obliging, and his learning was at the service of all readers in the old reading room at the National Gallery when he occupied the central desk. He was a great friend of Sainte-Beuve, who made much use of his knowledge in the preparation of the celebrated "Causeries du Lundi."

Among the visiting members of the trade in the city during the past week were: Johnson Armstrong, New Orleans; W. B. Carpenter, W. B. Carpenter & Co., Cinciunati; Mr. Brooks, Brooks & Sussman, Colusa, Cal.; Charles Herzog, Herzog & Brother, Memphis, Tenn.; S. C. Abbott, formerly of the Omaha Book Company, Omaha, Neb.; Mr. Boland, Short & Boland, St. Louis; Mr. Wilken, Strobel & Wilkeu, Cincinnati; George S. Birrel, of Moore, Wilstach & Baldwin, Ciucinuati; A. K. Hawkes, Austin, Texas; J. S. Barr, of J. S. Barr & Co., Springfield, Ohio.

The Hektograph Company reports that "a judgment has been entered up in England by Justice Kay, against the Chromograph Company, of London, for infringement of its pateuts there. The Hektograph patents have now been sustained by the courts of Germany, Austria and England, and the company hopes soon to have a decree by the courts of this country to put a stop to the many infringements here. Its patents have been persistently fought throughout the world, but so far have been sustained wherever it has been able to reach a decision by the courts. It is pushing its cases here as fast as possible."

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, June 15, 1881.

THE MONEY MARKET.—The money market worked smoothly, and the majority of loans on pledge of stock and government collateral were effected at 2@4 per cent. Time loans, sixty days to run, were reported at 2@4½ per cent. In the discount market prime mercantile paper sold at 3@4 per cent., according to date of maturity. The stock market has betrayed a bullish feeling, especially as regards the leading railway shares; but the fluctuations were, as a rule, confined within comparatively narrow limits. Government bonds, which were rather weak and irregular at the close of last week, have shown increased activity and rising prices under a brisk inquiry from the banks, which bought freely of the low-priced issues to be used as a basis for new circulation. In the late transactions there was also a brisk movement in the 4s, which are a favorite form of investment, owing to the length of time the bonds have to run. Railway bonds have been moderately dealt in, and prices have been subject to no very wide fluctuations Foreign exchange has ruled steady on a light demand and supply. The season now seems too far advanced to look for much, if any, higher rates for bills, and a decline similar to that which took place a year ago is by no means improbable. The actual rates at the close were $4.83¾@4.84 and $4.85½@4.85¾, with cable transfers at $4.86@4.86¼, and prime commercial, $4.82@4.82¼. The market for Continental exchange was a little more active, actual rates being as follows: Francs, 5.21⅞@5.22½ and 5.18¾@5.19⅜; marks, 94¼@94⅞, and guilders, 39⅞@39 15-16 and 40⅛@40 3-16.

THE PAPER TRADE.—The present week has developed no improvement of any importance with the jobbing trade. Under the pressure of sharp competition, instaaces are reported of very low prices being accepted for print papers and wrappings; but these, it must be understood, do not rule the trade generally, and are quite exceptional. As a general thing, full prices are being obtained on the current run of orders for fine book and writings—at least, prices that give both the manufacturer and jobber a fair living profit. On contracts expiring with July 1, while some manufacturers are disposed to make a concession on prices made a year ago and to extend contracts at curreat figures until the end of this year, they are unwilling to lengthen the time beyond the beginning of 1882, except at an advance, in cases ½c. being asked. We hear of 6¼c. being quoted for a very fair quality of news. There is only a moderate amount of business doing in straw wrappings, and notwithstanding that the Eastern manufacturers have a fixed schedule of prices, considerable cutting in rates is indulged in, and values are to some extent merely nominal. The straw wrapping mills will close down for thirty days, beginning with July 1.

THE STATIONERY MARKET.—Some small improvement is to be noted in the demand this week, although this is only as compared with the general condition of business for some weeks past. A few buyers from the West and several from the Southwest are to be seen in the city in quest of goods, but no active movement is looked for until after the first week in July at the very earliest The moist and disagreeable weather of late has been a great drawback to the city trade, but upon the resumption of clear and seasonable weather to-day, quite an impetus to trade was given, many of the large houses visited by our reporters saying that it was a decided improvement upon any previous day for some time past. Salesmen from many of our prominent houses are about leaving for the West, South and Southwest, with attractive samples of new goods, and the time is now thought to be close by when the fall campaign will be fairly inaugurated. We do not hear of any changes having been made in prices.

CHRISTMAS AND BIRTHDAY CARDS.

IN commending my elaborate line of Christmas and Birthday Cards for the coming season, I desire to particularly call the attention of the trade to the fact that my series are not only original in design and novelty, but are also of the most varied and attractive character. The trade will also see the necessity of placing their advance orders as early as possible, to enable me to fill orders with promptness and dispatch.

BRADSTREET'S

A JOURNAL OF

Trade, Finance and Political Economy.

THIS JOURNAL covers a ground the extent of which is occupied by no other publication, and forms an invaluable work of reference to the merchant and manufacturer.

REGULAR AND TRUSTWORTHY CORRESPONDENCE, furnished by experts, expressly for this journal, from all the principal trade centres of this country, is embraced in its columns.

THE CONDITION AND PROSPECTS of the various markets are carefully recorded, and the possibilities and opportunities for trade are demonstrated as by no other medium extant.

QUESTIONS OF COMMERCIAL INTEREST and importance are fully and ably discussed editorially, without prejudice, by some of the most responsible writers and statisticians of the time.

THE BUSINESS CHANGES occurring in the United States and Canada—such as failures, dissolutions of partnerships, chattel mortgages, etc., etc.—are printed in each issue, and the list is more complete and comprehensive than can be obtained through any other source.

THE CIRCULATION OF THIS JOURNAL being among the best merchants, manufacturers, and banking institutions of not only this country but many foreign, it presents an excellent advertising opportunity to a limited number of first-class banks, corporations, and business firms.

No. 23 MAIDEN LANE, NEW YORK.

COLOR HINTS FROM FLOWERS.

Hitherto it has been generally supposed that the various colors observed in plants were due to so many different matters, each color being a different chemical combination without relation to the others. Now, however, Prof. Schnetzler shows by experiment that when the color of a flower has been isolated by putting it in alcohol, one may, by adding an acid or an alkali, obtain all the colors which plants exhibit. Plants of pæony, for example, yield, when macerated in alcohol, a violet red liquid. If some acid oxalate of potassa is added the liquid becomes pure red; while soda changes it, according to the proportion used, into violet, blue or green. In the latter case, the green liquid appears red by transmitted light, just as a solution of chlorophyl does. Further, it is stated that the transformation from green into red, observed in the leaves of many plants in autumn, is due to the action of the tannin which they contain on the chlorophyl. Thus, without desiring to affirm it absolutely, Prof. Schnetzler supposes that there is in plants only one coloring matter, chlorophyl, which, being modified by certain agents, furnishes all the tints that flowers and leaves exhibit.

The contract for envelopes for the Post Office department was awarded a few days ago at the following prices per thousand, being the lowest bid, viz.: No. 1, letter size, $1.01; No. 2, extra letter size, $1.21; No. 3, official size, $1.85; No. 4, extra official size, $2.50; No. 5, for returning dead letters, $1.21; No. 7, tag envelopes for registered packages, $2.95; No. 8, for international money order advices, $2.60. The lowest price bid for registered package envelopes was $3.75 per M. The total of the bids this year is about $40,000 under the amount paid last year, showing that very close bids were made. A peculiarity of the bids is that for the registered package envelopes, of which about 11,000,000 were used last year, two bidders from the same city submitted proposals at $3.75 and another at $15 per M. The bids for the envelopes for the use of postmasters, including those to conduct the correspondence with the department at Washington, will be opened to-day. The total quantity called for is about 500,000.

The members of the trade handling fancy cards are said to be very uneasy, owing to the immense competition in this line likely to be inaugurated during the coming season. Representatives from several houses are now in Europe hunting up the latest novelties, while others started off quietly last week in quest of the newest goods. Some of the latter left strict injunctions on their employees to not impart the secret of their mission to any outsider on any account.

W. H. Hill, Worcester, Mass., has a new envelope machine of his own invention, and it is considered the most original machine yet invented and the biggest thing out. Instead of being complicated in construction and difficult for girls to run, as most newly invented machinery is, it is very simple indeed, and any girl can run it.

Among the visiting members of the trade to the city during the week were J. S. Barr, of J. S. Barr & Co., Springfield, Ohio; W. B. Carpenter, of W. B. Carpenter & Co., Cincinnati; Johnson, Armstrong, New Orleans, and Mr. Siemon, of Siemon & Brother, Fort Wayne, Ind.

Nothing can constitute good breeding that has not good nature for its foundation.

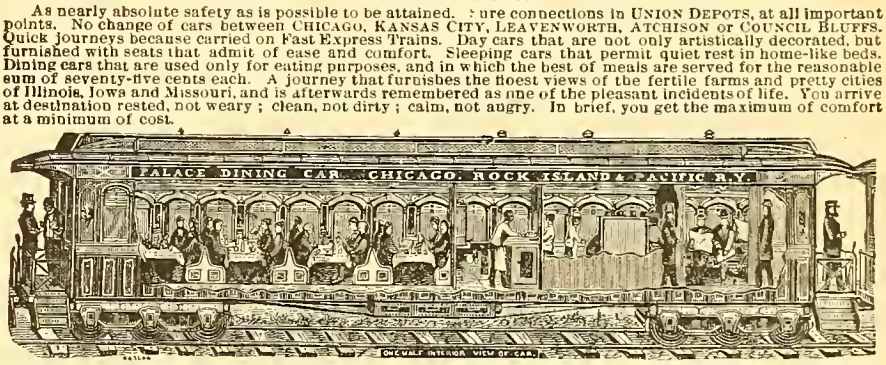
"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.



That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

93 & 95 William St. NEW YORK.

CEMENTINE.

WE desire to call attention to a new article which we are just now introducing to the trade. It is a liquid glue, cement and mucilage combined. In our own business we experienced so much difficulty in finding an adhesive that would make our labels adhere to the tin cover of the Hektograph, that we gave a commission to one of our most distinguished chemists to compound for us an article which would answer our purpose. After months of labor the result has been the production of an adhesive so far superior to anything heretofore made, that we have decided to manufacture and offer it for sale, and are now ready to supply it in any quantity. It is without doubt the best article of the kind for family and general use ever offered to the public. For repairing China, Glassware, Furniture, Rubber, Leather, Books, Billiard Cues, or pasting labels upon tin or other metal or for any use where glue, cement or mucilage is required, it is unrivaled. For warm climates we make an article expressly adapted for use there. We supply it by the gallon or barrel, and for family use it is put up in bottles, with brush, at 25 cents. Samples will be sent free to large consumers.

LIBERAL DISCOUNT TO THE TRADE.

☞ **SEND FOR DESCRIPTIVE CIRCULARS AND PRICES.** ☜

FLUXES FOR GLASS PAINTING.

Fluxes or means of fusion for glass painting are for the most part very elementary—highly fluid mixtures of litharge and quartz, or, instead of the latter, pulverized glass. We obtain very good means of fusion by melting together 1 part of pulverized quartz (flint or fine white sand) and 2½ parts of litharge, or, according to another prescription, 10 parts of crystal glass shard, 7 parts of litharge, 2 1-10 parts of borax (deprived of water).

Salvetat recommends as having great power of resistance a flux produced by melting boracic acid, sand and litharge in the proportions of 1 part of sand, 3 parts of boracic acid, 6 parts of litharge.

According to Salvetat, this flux is suitable for all pigments with the exception of gold purple, for which he recommends another mixture of 10 parts of sand, 7½ parts of litharge, 15 parts of borax.

These compositions before they are applied must all be melted white in the wind furnace, then chilled in cold water and triturated as fine as possible.

Even with the qualification mentioned, Salvetat can hardly be correct in thinking any one flux adapted to all circumstances or conditions. The pigments, in most cases metallic oxides, heighten the fluidity of the colors, and therefore when the particular hue aimed at necessarily demands a large alloy of the flux with metallic oxide, we are required to use a flux less basic, and thus somewhat less fluid. In fact, if we would bring all colors to the same degree of fluidity, we should have to select for each pigment a differently compounded flux.

COATING OF METALS.

To protect metals against the oxidizing influence of a damp atmosphere has long been an object of research of great practical importance. It is well known that a bright sheet of zinc, such as is used in covering roofs, very rapidly gets covered by a thin layer of oxide, and that this thin film becomes so thoroughly united to the metal below that it forms a firm coating and protects the metal against further oxidization. A precisely similar object has been followed by several inventors with regard to iron when they endeavored to provide it with an adhering coating of black magnetic oxide of iron. This was done successfully in 1860 by Thirault, who employed a solution of chloride of iron, which was well rubbed upon the metal and gave it a black lustre, when the artificial rust was converted into the black oxide after having been dipped in boiling water. In 1862 a similar result was obtained by Sauerwein, who used, besides chloride of iron, chloride of antimony and gallic acid, while another method was to cover the surface of iron with linseed oil and to expose it then to a dull red heat. By the process of Barff, in 1877, such a coating is obtained by subjecting iron heated to a dull red for six to seven hours to dry steam, when a black fast-adhering coating will be formed. Another method, of Mr. Bower, came in use, and it is now carried out on a large scale by a French company, the Société Française d'Inoxidation, which has its works at Val d'Osne. The coating of the iron articles is produced by first cleansing their surfaces and then by heating them in a furnace to a light red heat, when successively currents of carbonic oxide and carbonic acid are passed through it. In this way a bluish-black oxide of iron is formed upon either cast iron, wrought iron, or steel. This oxidized surface, on being polished with oil, takes a beautiful

lustre, and it is further ornamented by scraping some parts of it free from the coating, which are then either covered with a thin layer of bronze, gold or platinum by galvanic action, after the invention of M. Dode. Many articles made by the Société d'Inoxidation, such as statues, vases, fountains, bas-relievos, fire grates, stoves, balconies, candelabra, railings of staircases, and others, are really of a very beautiful appearance.—*Engineering.*

CHROME INK.

There are a number of recipes given for making chrome ink, or Runge's ink, as it is sometimes called, from the name of the chemist who first proposed it. Boettger, a well known chemical technologist, gives the following directions: Take of extract of logwood 15 parts; water, 1,000 parts; crystallized carbonate of sodium (common washing soda), 11 parts; neutral chromate of potassium, 1 part. Dissolve the logwood extract in 900 parts of water, allow it to deposit, heat to boiling, and add the soda. Lastly add, drop by drop, with constant stirring, the chromate of potassium, dissolved in the residual 100 parts of water.

The following recipes are recommended by Krüger: (1.) Dissolve 1 pound of extract of logwood in 15 pounds of water, add 1 ounce of alum, and ¼ ounce of yellow chromate of potassium. (2.) Boil 10 pounds of best rasped logwood with 100 pounds of water down to 80 pounds. When cold, add 1½ ounces of yellow chromate of potassium, previously dissolved in .5 ounces of water. There are some peculiarities about this ink which are worth noticing. The action of chromate of potassium on logwood almost instantly produces a deep blue-black liquid (or dye), suitable for writing purposes. But it is found that on exposure to the air, the liquid frequently decomposes and deposits its coloring matter in the form of large black flakes, leaving the supernatant liquid almost colorless. This peculiar behavior, which doubtless has been observed by all who have made or used this ink, is its great fault, though in other respects it has all the qualities requisite for a good writing fluid. It is cheap, readily prepared, does not corrode steel pens, and makes a permanent stain on paper which can only be removed with great difficulty.

To avoid the clotting or gelatinizing of this ink, is the object of the addition of soda or alum in two of the above recipes; but they are not always effective. It is probable that the quality of the logwood may have much to do with the rapidity with which clotting occurs, and on this account it will be found best to use logwood chips instead of the extract, which varies greatly in quality. Again, it will be best to make only a little of the ink at the time. By following these directions, the trouble above named will be generally avoided.

DESIGNS BY CRYSTALLIZATION.

The curious arabesques produced on window panes by frost, have suggested to a French inventor a system of obtaining designs for printed stuffs by crystallization. He has made experiments with solutions of sulphate of zinc, copper, iron, alumina and magnesia, into which plates of glass were steeped, and then allowed to dry slowly at different temperatures. The crystals thus deposited formed a great variety of fanciful figures, flowers, feathers, stars, &c. These may be fixed by an addition of albumen or gelatine. If copper plates are used, the design thus obtained may also be made permanent by electrotyping. The great difficulty is to obtain continuous patterns to be produced on the cylinders used for printing; but that may be overcome by using cylindrical plates of copper and turning them on their axis while the evaporation is going on. The crystallization is, however, frequently irregular and leaves blank spaces, which spoil the harmony of the design, but that defect will probably be overcome by experience.

A CURIOSITY OF LITERATURE.

The special interest that Castell's Polyglot Bible gives to book collectors is the following curious incident with respect to its dedication:

Oliver Cromwell was so much interested in its publication, that he ordered the paper to be imported free of all duties, and the work was dedicated to him. A large number of copies, however, remained unsold on the accession of Charles II., and the thrifty and prudent publisher continued to make them available by canceling the last two pages of the dedication, adding three new ones, and inscribing the whole to Charles. The ingenuity of the alterations to suit the time has rendered the book one of the curiosities of literature, the Commonwealth copies being very scarce, and the Restoration ones numerous.

BRONZING LIQUID.—Ten parts of aniline red and five parts of aniline purple are dissolved in one hundred parts of 95 per cent. alcohol, on the water bath, and the solution, after the addition of five parts of benzoic acid, boiled (five to ten minutes) until it has changed its greenish color to light bronze brown. Applied with a brush upon leather, metal, or wood, the liquid produces a magnificent bronze coating.

Aug. Leonhardi's (Dresden) Celebrated Alizarine Writing and Copying Ink.

THIS Ink combines the qualities of a Writing and Copying Ink in a manner unsurpassed by any other make in the market. As a Copying Ink it will make a distinct copy even several days after, and if required two clear copies can be taken. As a Writing Ink it excels for its intense blackness. It never fades, nor does it blur. **It is used in all Government Offices on the Continent of Europe**
We are enabled to quote this Ink far below the prices of other Copying Inks.

—— No. 18 High Street, Boston, Mass. ——

THE CARD MANIA.

"Will you give me a card, Mister?" asked a tiny voice at the store of one of our leading booksellers.

"No cards given away here!" curtly replied the clerk behind the counter; and, as the little fellow turned away, a picture of disappointment, the clerk's attention was called to the presence of a lady customer, who had picked up a handsome card from the showcase.

"What is the price of this birthday card, sir?" inquired the lady.

"One dollar, madam," was the polite reply.

"Have you nothing more expensive, suitable for a present?"

Queries and answers, like the foregoing, illustrate the present tendency of the business in chromo-cards.

When, a few years ago, cards began to attract general attention, the selections offered were limited, and the specimens comparatively poor in conception and design.

They were introduced as Christmas and New Year favors. Easter and birthday cards came next, and there has already sprung up a demand for valentine cards, in place of the cheap-looking, flashy valentines of days gone by.

From the day of their first appearance chromo cards have steadily risen in favor, and their promoters and publishers soon found themselves enabled to employ first-class talent in their production. To-day you will find among these attractive commodities works of rare merit in design and finish, destined to cultivate the taste of the masses, who eagerly grasp for every little gem as soon as it makes its appearance.

The illuminated advertising card is the offspring of the species above mentioned. There always has been a demand for small pictures; but it used to come from children, who are naturally fond of colors and illustrations.

Shrewd dealers began to see a point. They advertised their wares on picture cards, and by giving these away to the little ones succeeded in penetrating the very hearts of the families.

Of late the collecting of cards has become a fashionable pursuit—a mania indeed. It seems to have first broken out in Boston, and from there to have spread to New York with astonishing rapidity. It is now prevailing in Philadelphia, and appears to be taking its course westward like the epizoöty. The fair regions of the South seem to be in imminent danger of contagion, and it looks as if it were to sweep the country.

Seekers for the beautiful have long since realized that art cards cannot be had for the mere asking, and are quite willing to pay handsomely for them. One of the most costly collections is said to have been made by the wife of one of the vice presidents of the Erie Railroad, and another by a lady whose husband is one of the leading officers of the New York Central road.

To young people of leisure chromo cards have become a new revelation. They have given the first impulse to the fashionable pursuit of decorating many articles adorning the household, for which purpose they generally serve as studies. Thus stimulating a wholesome ambition, they have become in some measure a safeguard against the morbid fancies of protracted idleness, or the deleterious influence of frivolous pastimes.

"How long is this rage going to last?" is the question often asked; "And what will be the end of all this?"

There will be no end to it! The public will support chromo cards as long as their publishers will act the part of promoters of real art, and

the words of the immortal poet may here be quoted:

"A thing of beauty is a joy forever."
—Hugo H. Plaut in *Forney's Progress.*

A HORN BOOK.

The following account of a horn book recently found when pulling down an old house at Newbury, Berks, may interest some of our readers. It consists of a page of letter press, which measures 2⅛ by 2¼ inches, mounted on a piece of oak of slightly larger size, the lower end of which is shaped as a handle. It is covered with a sheet of transparent horn, which is kept in its place by means of narrow strips of thin brass, fastened with small nails. The letter press, which is surrounded by an ornamental border, consists of the alphabet, preceded by a -|-, first in small letters and then in Roman capitals. Next are, on one side of the middle line, the vowels alone, followed by the vowels with the consonants *b, c, d;* on the other side the same reversed. Following is, first, "In the name of the Father," &c., and, lastly, the Lord's Prayer.—*Notes and Queries.*

A NEW USE FOR ELECTRICITY.—A recent number of *Comptes Rendus* tells how M. Grandt has constructed an apparatus for giving movement to ships. An ordinary steam engine will set in motion several eletro-dynamic induction machines. The current is transmitted to a voltameter containing acidulated water, which is decomposed into oxygen and hydrogen. These two gases are conducted into a tube, and escape by an aperture near the keel. A little above this aperture there are two platinum points, isolated from each other and in communication with an induction coil. When the gas escapes a spark explodes it, and this explosion moves the ship.

WOOD CUT VS. PROCESS BLOCKS.

Owing to the increasing demand for pictorial illustration, less inexpensive methods are constantly sought after. To meet this growing want various processes for producing printing blocks have been patented, foremost among which are the various photo-engraving processes, producing stereotype or electrotype blocks suitable for ordinary press printing. These processes have cut into the prices of wood engraving, and it is asserted by the holders of them that photo-engraving is the engraving of the future. There are, however, some little drawbacks to their statements, which it may be well to mention. As photo-engraving has been in operation only a comparatively short time, there are few draughtsmen who can make proper drawings for process work; this, of course, is a defect which time will remedy to a certain extent. Making their drawings, as they do, two or three times the required size of the engraving, there is lost, to some degree, that delicacy of touch which is the beauty of the illustration. It seems impossible to produce on paper as soft effects as are obtained in the highest class of wood engraving.

Fig. 1

Fig. 2

Then, again, if they make their drawings the natural size they cannot get the lines thin enough to produce delicacy of tone without making them gray, and gray lines will not photo-engrave.

These are minor drawbacks; there is a sharpness possessed by wood cuts that is too often lacking in photo-engraving. This want of sharpness may be due to the process itself or the way it is conducted. A glance at a series of magnified lines as obtained by wood engravers and process men may be of interest. The lines made by engravers are represented in Figure 1, that portion which has been cut away being a V-shaped trough. This gives a perfectly sharp line and even and regular white spaces. Fig. 2 shows the same character of line only made with round-nosed graver. Now if we compare them with the principal types of lines obtained by process work, represented in Figs. 3, 4 and 5, we shall see the difference, the characteristic shape is given by these three illustrations. Fig. 3 shows marked lines, requiring rubbing down to get a good printing surface. Fig. 5 shows common type line of swelled process work. This is of course a little exaggerated. Fig. 6 shows the reason for this shape.

Let us suppose a beam of light passing through a transparent part of the negative (a line for instance), and impinging on the surface of a gelatinized plate D. By the laws of optics it will on encountering the denser medium be refracted and spread over the gelatine as shown in the figure producing chemical change over the points of impingement. If now this plate is swelled and cast in plaster, cement, wax, or some other medium, lines of this character, only in relief, will be obtained and the resultant printing block will possess this defect. The tendency of lines of this character is to become mashed in the press, rounding at the edges and looking anything but sharp, as shown in Fig. 4.

The faults of washout process lines are that they are apt to be ragged and broken and to have the long straight lines badly warped. The weather has a good deal to do with the promptness with which work is delivered. A rainy week will nearly ruin a photo-engraver unless he possesses an electric light, which most of them do not.

These are a few of the disadvantages of photo-engraving. It is not a fair deal to give a one-sided story; and since we are sufficiently acquainted with the bad points of photo-engraving not to become too enthusiastic about its merits, a few of these may be safely mentioned. There are some classes of work that can be done as well by photo-engravers as by wood engravers, and the former being much cheaper should, therefore, have the preference. Crayon drawings on stipple paper, such as we see in *Scribner* and other first-class magazines, make very pleasing illustrations when photo-engraved. For reproduction work we have nothing to take the place of photo-engraving. The plates of the American edition of the "Encyclopædia Britannica" are largely reproduction by photo-engraving of the original plates. For catalogue work, process work answers very well, being cheap, and they are more perfect in detail than the average wood cut.

Fig. 3.

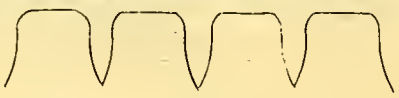

Fig. 4.

Fig. 5

As the real cost of an original photo-engraved block is the drawing necessary; after this is made, the rest of the process is comparatively inexpensive. Now it often happens that two or three sizes of the same cut are needed or slight variations of the same cut are necessary, and it is just here that photo-engraving is ahead of wood. As has been stated before, for reproduction of wood cut prints, lithographs, steel or copper plate proofs, working drawings, &c., there is nothing to take the place of photo-work as it renders an exact fac-simile of the original and at a much less cost than it could be copied by any other method. They have not, however, as yet succeeded in producing any original plates which will compare with the illustrations in Dante's "Inferno," "The Wandering Jew," or "The Ancient Mariner." There is a softness of tone, a delicacy of touch, which the hand alone can impart, that the photo-relief engraving has never equaled, and the time it will is, probably, far distant.

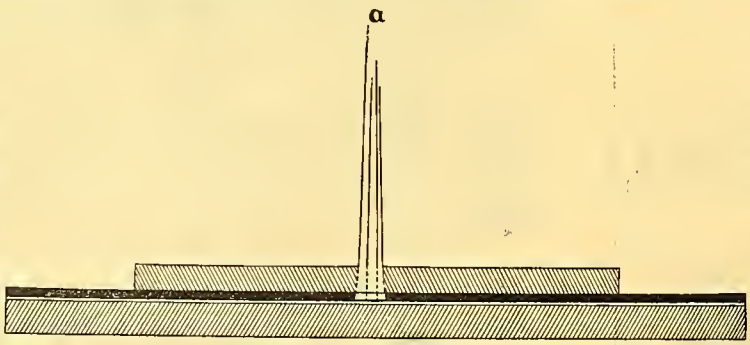

Fig. 6.

COLOR RECIPES FOR GLASS PAINTING.

White enamel colors are obtained either by triturating a suitable flux with oxide of tin, arsenical acid or white-burnt bones; or better, by melting together with litharge finished enamel glass intensely opaque and of a quality not easily liquefiable. The amount of litharge to be used is regulated by the comparative fluidity which the white color should possess.

With colors obtained by the first of these methods, one is never able to produce, especially in thin layers, so delicate and equable a white as the second method yields with entire certainty. A mixture of oxide of tin and a flux, after being laid on and burned in, appears white, as the finely divided white tin oxide; or if instead of it white-burnt bones have been used, the fine particles of the osseous matter are mechanically suspended in the flux as it melts to a colorless transparent glass. But if the flux and the pigment, or, which amounts to the same thing, if white enamel glass with litharge, had been first melted during a long time at a high temperature, then the oxide of tin, the white-burnt bones, or whatever else had been applied as coloring additament would have been perfectly dissolved in a white heat, but at a lower temperature would have been for the most part again separated. To this atomically fine precipitate or deposit firmly held by the rigid enamel, the colors thus obtained owe their uncommon uniformity and whiteness, which united with great delicacy and softness can be employed to produce the most beautiful effects.

No. 1 *White.*—2 parts carbonate of potassium, 1 part oxide of tin, 3 parts pulverized quartz, 1 part boiled borax. The ingredients must be melted together in a Hessian crucible at a high temperature to a clear liquid, then poured into water, pulverized and finally ground with a muller on a glass plate.

No. 2 *White.*—3 parts pulverized quartz, 1½ parts oxide of tin, 6 parts litharge, 2 parts boiled borax. The mixture to be treated like No. 1.

No. 3 *White.*—The white fusible color of commerce, the same used in enamel painting, can also be applied to the purpose of painting on glass. Should the melting point lie too high, this unfavorable condition is removed by remelting with some litharge.

No. 4 *White.*—Mix 2 parts of bone glass with 1 part of litharge, melt them in a covered Hessian crucible in the wind furnace; then pour out the contents into a vessel full of pure cold water, pulverize the cooled mass and grind it fine upon a glass plate with a muller also of glass.

No. 5 *White*—Is obtained by rubbing together upon a glass plate 1 part of white-burnt bones and 2 parts of crystallized lead.

No. 6 *White*—Is produced by rubbing together 1 part of white oxide of zinc and 2 parts of flux.

The MacKinnon Pen or Fluid Pencil,

HAS JUST BEEN GRANTED THE HIGHEST AWARD AT THE MELBOURNE INTERN'L EXHIBITION OF 1881.

FULL LENGTH, POCKET SIZE.

FOUR AWARDS!

All of them the Highest Given, at the Australian World's Fair, Melbourne, 1880-81

Library of U S Patents Office

TWO AWARDS OF FIRST DEGREE OF MERIT—for Copying, Black and Colored Inks, respectively.

ONE AWARD OF THIRD DEGREE OF MERIT—for Mucilage.

☞ This last, although of the Third Degree, was the Highest and *ONLY* Award made for Mucilage.

No other American Inks received a higher award than the Third Degree of Merit.

CARTER, DINSMORE & CO., Boston and New York.

BYRON WESTON

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST and ONLY AWARD** given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition*, *Massachusetts Charitable Mechanics' Association*, *Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission*, *Medal of Progress American Institute*, *1877*, *and Medal of Improvement and Progress*, *Boston*, *1878*. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

☞ **Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.**

Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 74 Duane Street, New York.

The American Stationer

A Journal Devoted To the Interests of the Stationery & Fancy Goods Trades

"The Stationer"—Every Thursday—$2.00 Per Annum.

VOL. IX.—NO. 25. NEW YORK, JUNE 23, 1881. WHOLE NO. 313.

Correspondence.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BOSTON, Mass., June 20, 1881.

I must confess to a decided summer dullness, so far as the stationers' trade is concerned. Business during the past week, in the midst of decidedly summery weather, has been dull, and therefore I have no special features of news to communicate.

In the absence of a rush of customers, however, it must not be understood that the trade lies dormant far from it. Dealers are quietly getting ready for the next season's trade, and this preparation covers a good deal of ground, permeating all departments of trade, from the manufacture of cheap envelopes to the execution of the most artistic and expensive goods usually sold by the trade.

Among the manufacturers of art novelties, L. Prang & Co., I hear, are preparing to "out-do" themselves. Their next Christmas goods will embrace many rare specimens of art peculiar and almost monopolized by this great house, and whose manufactories now extend throughout both the United States and northern Europe.

There is a slight movement in the school book trade, preparatory to the fall trade, and in anticipation of the usual changes in school books.

Anent the action of the recent convention at Chicago pertaining to "cuts" and other divers irregularities among publishers, I find only one expression here among the publishers, and that is that the practice alluded to is a miserable one, to say the least; but that it is an evil which cannot be remedied at once or completely. A uniformity in prices, such as was outlined at the convention, is a great desideratum, and its observance strictly would be of great advantage to all concerned. Boston publishers will be among the first in the country to recognize any just system of selling books.

The committee appointed to investigate the affairs of A. K. Loring, dealer in books, stationery, &c., will report in a couple of weeks.

The style of the dissolved firm of Page, Spaulding & Co., now N. H. Spaulding, is the same as before. Mr. Page is about to take up his residence in New York, where he has been elected secretary and treasurer of the Vicksburg Meridian Railroad; he will also act as private secretary of Fred. Wolff.

Boston stationers are advertising very little at present.

The bright summery weather has caused a stampede of our citizens to the seashore and the mountains. Among the opportune publications in connection with summer travel is Osgood & Co.'s "White Mountains."

There will probably be no changes in the stationers' trade here this year. The business now seems to be in the hands of just about the requisite number of parties, and the local and New England demand is amply supplied. Of course, New York has its regular customers from this section, and that city will hold them in spite of any inducements that can or may be held out by our dealers.

It is noticeable, in this connection, that Boston is doing less trade with Chicago and the West than in former years. This can be accounted for only from the fact that Chicago and the West now possess special and effective facilities of their own for producing many of the lines of goods that they formerly purchased at the "Hub." However, there are certain lines of goods, as well as certain kinds of machinery, that are monopolized here to a considerable extent.

Quite a number of New York gentlemen have been in town during the past week with specimens of new goods and fresh novelties.

The *Star*, a penny paper, has grown to the use of a Bullock press. L.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, Ill., June 18, 1881.

During the busy winter season there is little besides trade doing to chronicle, but "in the spring a young man's fancy lightly turns to thoughts of love." So your readers can be only pleased at a notice of two recent social events in the trade.

On the morning of June 7, John Amberg and Mary E. Plamondon were married by Rev. P. J. Conway, of St. Patrick's Catholic Church. The ceremony was very impressive. Solemn nuptial mass was celebrated after the ring had been blessed and placed upon the bride's finger. The Rev. Father Conway was celebrant. Both bride and groom then received the sacrament of the eucharist. The offertory of the mass was made very beautiful by the singing of Berger's "Ave Maria" by Mrs. Antonie McGuire. The church was more than filled with interested spectators, who witnessed the imposing ceremony. The bride was attended by Kate Amberg, sister of the groom, Sarah Mackin, of Rock Island, and Nettie Plamondon, sister of the bride. The groomsmen were: John Carroll, Theodore Amberg, brother of the groom, and George Plamondon, brother of the bride. Stephen O'Brien, Will Brenan, T. E. Coughlin and M. C. Markham acted as ushers. The church was beautifully and profusely decorated with flowers and plants.

A reception was given after the ceremony at the residence of the bride's parents, 36 Throop street, where music was furnished by Pound's orchestra as follows: Selection, "Olivette" (Audran); paraphrase, "Das Röslein im Thale;" selection, "La Mascotte" (Audran); "Gruss Ans Herzliebchen" (Bohme); selection, "Billee Taylor;" serenade (Bley); "Juanita" (Strauss); selection, "Chimes of Normandy" (Planchette); fantasia (Clarens). An elegant collation was served in artistic style by Eckhart, the caterer.

The dresses of the ladies were very elegant; and the bride was the recipient of a dazzling array of presents, comprising a list too lengthy for enumeration in my letter. Mr. Amberg is well known in the trade from his connection with the firm of Cameron, Amberg & Co., while the father of the bride is equally well known in milling circles, being an old and long established mill furnisher. The newly wedded left the city in the evening for their future home in New York, receiving the parting well wishes of their friends—wishes which I am sure will find an echo in the hearts of all who know them.

On the same evening H. H. Hoffman, the well known and popular blank book maker and bookbinder, of Chicago, celebrated his silver wedding amidst a circle of congratulating and well-wishing friends. Mr. Hoffman's twenty-five years of wedded life have all been passed in Chicago, and during the whole period he has been increasing his business and friendly relations with the trade, so that there are many who will join with me in wishing him as happy a celebration of his "golden honeymoon."

C. W. Livermore has visited our city and departed for the East. During his stay the gentleman, accompanied by his Chicago manager, who is accomplished in such matters, "did the town." The Pen is to have a new office ere long.

Country dealers can now buy from the Chicago Carpet Company its remaining stock of wall papers in job lots at merely nominal prices. It might pay to send for samples and get some prices.

Claude D. Myers, 168 Randolph street, is prepared to furnish the trade with an exquisite novelty in mourning cards. The black borders are printed on both sides of a fine, heavy beveled-edge card, and the white bevel sets off the border beautifully. The borders are made of any width, and the cards, when introduced, will carry a mark of ton. Mr. Myers also makes

the ordinary bordered mourning card very cheaply, as he claims to be the only stationer in the West who owns a bordering machine.

Not content with the claim of selling more ink than all other American manufacturers put together, Carter, Dinsmore & Co. employ advertising agents in all the principal cities of the United States. Chicago is ably represented by O. M. Packard, with headquarters at room 3, *Tribune* building, who makes this his entire business, and is now canvassing the city by blocks, scattering calendars, samples and good advice gratuitously.

Adams & Kimball report a brisk trade in their Elwood files. This firm is showing commendable enterprise in bringing its file into prominence, and deserves the success which it has met. The file is showing a great improvement over its former shape, is stronger, neater and better every way, and is being called for from all sections of the country from Maine to California.

The same enterprising firm has lately added to its list a set of handy interest tables. These are so simple and at the same time so cheap and convenient, that the wonder is that some one had not thought of something of the kind before. This firm is showing a great deal of enterprise in bringing out new and desirable articles for the trade. The tables are meeting a very favorable reception, the fourth thousand being already exhausted.

E. L. Stevenson & Co., 39 Monroe street, are doing a large framing business at low figures. A fine piece of work has just been delivered by them to Mr. Gale, of the Chicago Club. It is finely carved in heavy oak, with a beautifully carved monogram "C. C." at the top. Their new illustrated catalogue of moldings, gold and hard wood frames, is now ready, and may be had on application.

L. W. Noyes, manufacturer of dictionary holders, has removed from 86 Market street to 99 and 101 West Monroe street, where, with increased facilities, he is doing a greatly enlarged business.

E. W. Carr & Co., who removed on May 1 from 16 Calhoun place to their present quarters in the new building 90, 92 and 94 Franklin street, by the strict adherence to their guarantee, "All work finished when promised," are doing a large business in pamphlet and general binding, etc.

Madison Finch, bookseller at Knoxville, Iowa, will remove about October to beautiful new quarters especially arranged for his use on the northwest corner of "the Square."

Buxton & Skinner, 215 and 217 Chestnut street, St. Louis, Mo., are now luxuriating in their handsome new four-story building, built and owned by the firm. The first floor is occupied by the salesrooms and offices; upon the second floor are the composing, stock and engraving rooms. To their press room, which occupies the third floor, they have just added two of the largest size new Cottrell presses—one a stop cylinder, the other a two-revolution press. Any of the trade who may chance to visit "the town at the other end of the bridge" cannot spend an hour more profitably than by calling upon the firm and receiving their courtesies, while learning how complete and enterprising an establishment can be made.

Cline & Lian, blank book makers and paper rulers, are a new firm, at 164 Clark street. Both gentlemen are practical and experienced, Mr. Cline having been connected with the trade for the past fourteen years, at one time with the J. W. Butler Paper Company, and more recently with A. R. Barnes & Co. Mr. Lian's experience extends over about the same period. They are running two first-class ruling machines of the latest improved pattern, and are prepared for filling orders neatly and promptly.

I have to thank J. Fred. Waggoner for a copy of his neat little pamphlet, "Trade Hints." It contains some very pertinent suggestions for the trade, to whom Mr. Waggoner will mail it on receipt of ten cents. G. B. H.

CINCINNATI NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

CINCINNATI, O., June 20, 1881.

"Who says sales are slow?" asked Wm. H——, one of the largest paper dealers in the Western country. I had just remarked that there was a complaint among retailers of sales being somewhat slow, and the question I have just quoted was elicited by my remark. It was uttered in sort of half surprise and half good natured indignation.

I remarked that the complaint was quite general among retailers, but that wholesale dealers universally testified to a real brisk and exceedingly satisfactory business, and I explained that the dullness was not complained of as serious, but rather as a falling short of anticipation. "Well," replied W. H——, "These complainers will complain forever, if they wait for better business to stop their complaining. The explanation is that they are not satisfied. They are all doing well—never better, and still they grumble."

I asked the gentleman how about his collections. "Never better," was his emphasized reply.

All of the mills in this region are running on full time and have demand for all they can turn out. The opinion among dealers here is that prices of paper will not rule any lower than at present. The prices of raw material are firm and the demand is steady. I am sorry to report that on June 15 an execution was issued on the Clinton Paper Mill Company, A. Hartje president, Steubenville, Ohio, for $50,700, at the suit of J. C. Mueller, Pittsburg, and the property will be advertised for sale by Sheriff Smith. The business, however, will not stop.

Van Antwerp, Bragg & Co., of this city (one of the largest school-book publishing houses in the world) have abandoned all business outside of their own line of manufacture, which is school books and blank books. They are now pushing the blank book department. For this branch of the work they have secured the best machinery and appliances known to the business. Their field is in the West, South and Southwest. Mills in the Miami valley furnish the paper. Every variety of account and memorandum book is included in the list of their products and about every class of blank book required in a store, warehouse, depot, manufactory, butcher store, common grocery, schoolroom and family.

Robert Clarke & Co. have received from the State of Ohio the contract to edit and publish the Memoirs of General Arthur St. Clair, of revolutionary name and the first governor of the great Northwest Territory. Robert Clarke & Co. are not of those who complain of dullness in business. They find it exceedingly brisk and satisfactory.

I should not be surprised if, after all, "dissatisfaction" and not "dullness" is the word that should be used by the grand army of complainers. They were spoiled by the boom last year, and, unlike Oliver Twist, grew fat and, very like him, asked for "more," without any such a reasonable basis for their whetted appetite as the poor lad Oliver had for his.

There are grounds for suspicion that there is in this country a band of bears organized for the purpose of getting up and disseminating false reports of business and of crops to forward their own schemes of speculation. It has not been more than a fortnight since a telegram went to New York from the far West reporting the death of Jay Gould. This was stopped by J. W. Simonton, the wary agent of the New York press, and was not suffered to get into print. There are traces to be seen every day in the specials to the daily press that exhibit marks of having been originated by these suspected schemers. The very vagueness of the dreary news marks it as suspicious. It is well for business men to look out for this species of fraud. It may be imposed upon newspapers and their correspondents if reasonable skill is used and not detected until much mischief has been done.

PRINCE WILLIAM.

OHIO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

DAYTON, O., June 20, 1881.

Warm, damp weather has had the effect of taking what little energy is left in the trade, and things are very quiet. The fears of a drought are dissipated by our heavy rain, and crops of all kinds are in a promising condition. The straw yield will be about two-thirds of an average, but hay will be a full crop, and farmers will have more of the former to sell. Our paper mills do not look for any advance in price for the next year.

The question of timber supply is becoming a very serious one throughout the West, and it behooves our paper men to utilize their product for purposes to which wood is now applied. The consumption of wood for pulp in the aggregate is very large, although the wood used is not of much account for manufacturing purposes. The substitution of barbed wire fencing for boards is becoming universal. The paper mills ought to make enough substitutes for wood to at least pay for the amount of wood pulp used by them.

Commercial travelers are not very plenty. J. F. Hitchcock, of the Morgan Envelope Company, was here last week, and displayed some very nice goods in papeteries. Frank Coffin, of the J. G. Shaw Blank Book Company, also put in an appearance. A representative of Koch, Sons & Co. was also in our city. C. E. Hopkins, of Leibenroth, Von Auw & Co., is daily expected with an array of goods that will worry Charley's adjectives, in describing their culminating beauty and cheapness. G. W. Holden, of the Holden Manufacturing Company, is back from his Eastern trip, and is now ready to meet all demands in his line.

None of our booksellers attended the Chicago meeting last week, and they are not very enthusiastic over any benefit arising from the convention. Too many outside dealers in their line, who make a leader of books, &c., have, they say, killed the business. Every one who can get away for the summer to the seashore is leaving the

MIAMI VALLEY.

TORONTO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

TORONTO, Ont., June 18, 1881.

I presume it will be in order under the circumstances for a Canuck to congratulate the "Lockwood Press" on having reached another anniversary. It seems from the account to have been a most satisfactory and enjoyable affair, and I hope many other equally pleasant returns may come round to the principal and staff. As a Canadian and for some time a contributor to

the popular exponent and representative of the stationery trade, THE AMERICAN STATIONER, I feel an interest in its success, not that my scribbles have added a particle to it, but even a hod carrier may take some pride in the imposing structure which owes something to his toil. For my own part I appreciate Colonel Colvin's playful allusion to the Canadian correspondents, but would remind him in the same spirit that, while Uncle Sam has for a time overshadowed the American continent and has come to be known as "the American," this sort of thing won't do. The fact is, he is no more American than we are, and Sitting Bull has a better title than either, and we object to the title on the ground that outside barbarians have come to understand that North America means the United States, and everybody a citizen thereof, which we are not. America is a goodly sized place, and our esteemed Uncle has got a tolerable slice of it; but there are a few tribes south who hold some of it, and there is a country to the north known as Canada, which has a much larger acreage. It is true that a good deal of it is not suitable for growing oranges and "sich," but there is a very large space which produces thews and sinews to perfection. We are content with our Dominion and our Canadian cognomen, and we are building up a country which is bound very soon to take a front place. As to our being "Yankees in thought and action," we do not demur to that, so long as the thought which prompts the action is worthy of imitation. I wish the "Lockwood Press" still greater success because it is worthy of it.

At this season of the year, which is the turning point in our agricultural look out, every business man is anxious to learn what the crop prospects are. For a number of years the *Globe* and *Mail* and the Grand Trunk Railway officials have given exhaustive reports on this matter. The *Mail* has just done so—a little too early, perhaps, for a satisfactory statement. Yet it serves to allay the anxiety as to the probable result. As is always the case some localities are not up to the mark, fall wheat has been winter killed, &c. Very much of which is owing to want of proper drainage and cultivation. However, the prospect just now is that we shall have an average crop. The winter was a remarkably severe one with a heavy snowfall, and the early spring was cold and dry. But the latter part of May and June, so far, have given us plenty of rain and charming weather.

Jeff. Davis has been making us quite a protracted visit, said to have had something to do with his forthcoming history of the war in which he figured so largely. As the book is copyrighted on both sides the Atlantic, there will be no chance for a cheap edition, and I am under the impression that it will find a very limited sale with us. He left for the South a few days ago.

A destructive fire, by which Taylor's Don paper mills were destroyed, occurred on Saturday night last. It is supposed to have originated spontaneously among a quantity of rags stored in the top story. The main building, together with the stock of rags, &c., was entirely destroyed; but the manufactured paper and machinery room were saved. The loss will be heavy. Amount insured, $9,000.

The stock of James Vannevar, bookseller, has passed into the hands of Piddington at 65c. on the dollar, eighteen months.

Business is a little quiet just now, although our dealers anticipate a first rate fall trade, and are making preparations for it. The time for a brief breathing spell is approaching, and numbers are even now taking themselves away to favorite resorts, and larger numbers will follow later. The numerous small lakes to the north of us, with the wild and charming scenery, good fishing, and pure air, are attracting more and more attention, and greater numbers visit them every year. It seems a little more rational for an overworked city man to look for rest and enjoyment in the fresh beauty of these retired places than in the crowded hotels of fashionable resorts. If some of your jaded scribblers in THE STATIONER office will try a few weeks north, and take a hand daily at the paddle, tramp the woods, or whip the streams for trout, you will go back well satisfied, and ready for any amount of work.

C. H.

IRIDESCENCE.

The iridescent glassware which has of late attracted so much attention obtains its popularity from the remarkable examples of glass recovered from the ancient ruins of Cyprus, around which the mystery prevails, yet undecided by the scientific as well as the most learned antiquarians, touching the question of production by artificial methods by the ancients, or whether time and the action of subterranean influences have imparted to these glass vessels the inimitable prismatic colors which are so much admired and which have given rise to unlimited activity among artificers of the present day in a zealous effort to reproduce, if possible, like effects. Much of the old glass brought to light from the buried cities of Pompeii and Herculaneum, from Roman tombs, and more recently from the treasures of the Cypriote cities or temples, possesses the curious property of iridescence, by means of which it reflects light with all the colors of the rainbow. Concerning the question whether this glass was iridescent when made, or whether it acquired the quality subsequently through some supernatural agency, Mr. Peligot, the celebrated French chemist, expresses an opinion that the glass, originally plain, became iridescent from long exposure to the action of the air and moisture at a high temperature, these conditions being admirably fulfilled in the old Roman tombs, where most of this glass is found. All glass has a tendency to become iridescent under certain conditions, but in some kinds this tendency is more strongly marked than in others. In glass for optical instruments a tendency to become iridescent is regarded as a serious fault, and different kinds of glass are combined to form a perfectly colorless lens. Modern chemists and glass makers have long been endeavoring to discover the art of making glass iridescent by some more speedy means than that of burying it in a damp soil for the benefit of a thankless posterity.

With all the progress made in kindred branches of the art, nothing of note was done in this direction until two French chemists quite recently succeeded in artificially producing iridescence of a certain quality. The process adopted is described as consisting essentially in submitting the glass, under a considerable pressure and at an elevated temperature, to the action of water containing 15 per cent. of hydrochloric acid. Only certain kinds of glass are suitable for this process. The action of this acid is thought to be analogous to that of the elements upon the older glass in dissolving the alkaline silicates and leaving the surface of the glass finely ridged or corrugated, and thus capable of refracting the light with prismatic colors, very much on the same principle by which the colors of the opal are refracted. It is a noteworthy fact that the modern glass thus treated is proof against ordinary abrasion, but if the exposed surface be but cut or ground off, the iridescent effect is instantly lost, showing that its cause is merely superficial. The Bohemian glass is said to be peculiarly adapted for receiving iridescent effects; it will resist a greater degree of heat than other kinds; is clear and transparent, and is peculiarly adapted for receiving various shapes. One of the great charms of iridescent glass is its infinite variety and freshness. No two pieces are alike in color, and no piece remains the same when its position is changed or is viewed from another point. All show a greater or smaller range of the spectrum, curved or bent, according to the shape of the glass; but while some pieces flash with red and yellow, others are tender with a silvery blue or rich golden gray, and still others exhibit all the colors of the rainbow.

The iridescent trimmings for ladies' wear, in the form of buttons, beads, etc., are an attractive adjunct of costume which has attained wide popularity of late. The finest grade of buttons of this description are composed of carved and inlaid pearl, with iridescent colors.

Apropos of this subject, it is worthy of notice that certain fabrics have of late been made consisting entirely of glass. A glittering ball-room dress made of strands of spun glass has been exhibited in San Francisco. The weaving was accomplished by means of an ordinary hand-loom, the warp being nineteen feet long, and the woof four feet, a number of colors being worked in so as to produce a bright glass fabric. The dress is *en panier*, with loop sleeves and square neck, according to the description, ornamented with box-plaiting, and bound in blue.

A well known artist and glass spinner, Prengil, of Vienna, has established at Gaudenpel a manufactory for making glass carpets, cuffs, collars, veils, etc. It is said that he not only spins but also weaves glass with such facility that he is enabled to change the brittle substance into pliable thread; and with this material makes an excellent article of warm clothing. This is said to be accomplished by changing the entire nature of the glass by introducing into it certain ingredients. Ladies' hats, of softest glass feathers, and white curly glass muffs are even produced. This new material is said to be actually lighter than feathers, and wool made of it is stated to so closely resemble the genuine article that it is scarcely possible to distinguish one from the other.

One of the most remarkable of textile products is that which is made from the "byssus" of the pinnas of the Mediterranean—the fin shells or sea wings, as they are called. These shells, which are usually very fragile, resemble in form some of the larger species of mussels, being long and tapering. There are some twenty or more species of the genus, which produce in large quantities a very fine sort of silky byssus or braid known as lanna-pinna.—*Crockery Journal.*

BINDINGS FOR HAND PAINTING.—The prevailing taste for amateur decoration is offered a new channel for display by means of a series of presentation books just issued by Nimmo & Bain. The subjects of the volumes will readily suggest pictorial symbolization to amateur painters, such as "Flowers of Contemplation," "Flowers of Christian Graces," &c. The books are bound in parchment or in fine smooth cloth of neutral shades, on which may be painted designs in oil or water colors, and the end papers also admit of similar decorations, heavy drawing paper having been employed to adapt them to that use. The idea will certainly commend itself to ladies. A book tastefully decorated by the hand of the giver must always possess special value on that account, apart from any other claim it may have.—*Bookseller.*

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

OLD BERKSHIRE MILLS

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

NEW FRAMES.

E. & H. T. Anthony & Co. have just introduced a large line of photograph frames in new designs. The accompanying cuts illustrate two of them. No. 737 is an oak frame, engraved in black and fitted with a satin and velvet mat and a nickel rim. No. 729 is an engraved gold frame, fitted with a hand-painted mat, and suitable for the imperial picture.

NEW PATENTS.

No. 242,584. Game Table.—Moses Bensinger, Chicago, Ill.

A game table having a level bed and an inclined bagatelle extension separated from the level bed by a perforated transverse partition.

No. 242,590. Toy.—James H. Bowen, Philadelphia, Pa.

A toy consisting of a figure of a bird, animal, &c., having a movable mouth and tail and a sound-producing device, the latter being operated by a shaft or axle which is passed through the same and operates means which impart motion to the mouth and tail of the figure.

No. 242,625. Proportional Parallel Ruler. — Joseph Gardam, Brooklyn, N. Y., assignor of two-thirds to William Gardam and Frederick W. Gardam, same place.

A pivoted blade, adjustable at any angle, is moved on the head in either direction by the operation of a double set of friction-toggles actuated by a lever. The throw of the lever is limited by a pair of stops regulated by micrometer-screws. The head is in two parts hinged together, and held positively at right angles, the blade working in either.

No. 242,635. Game Counter.—Le Roy B. Haff, Englewood, N. J.

No. 242,662. Paper Bag.—Felix W. Leinbach and Clarence A. Wolle, Bethlehem, Pa., assignors to said Wolle.

No. 242,664. Paper Bag.—Charles A. S. Lockwood, Haverstraw, N. Y., assignor to himself and William H. Knapp, Red Bank, N. J.

No. 242,709. Dissected Toy Picture.—Walter Stranders, New York, N. Y., assignor to Charles C. Shepherd, Passaic, N. J.

The combination, with a dissected toy picture, of one or more substitute sections to be introduced into the picture to convey something additional to the original.

No. 242,748. Printer's Galley.—James A. Burke, Chicago, Ill., assignor to himself, Chas. F. Blakely, Chas. E. Tuerk, and Robert Buckingham, all of same place.

No. 242,751. Indexing Machine.—Seth D. Carris, Washington, Iowa, assignor of one-half to William R. Adair, same place.

No. 242,753. Machine for Calendering Printed Sheets.—Cyrus Chambers, Jr., Philadelphia, Pa.

In a machine for calendering paper, the comination, with a roller turning in fixed journal boxes, of a roller having its journal boxes adjustable horizontally for the purpose of giving the rollers a variable inclination to each other.

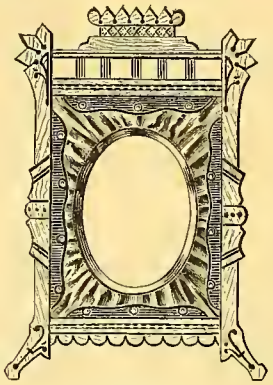
No. 242,810. Tuck for Pocketbooks.—Leverett Brainard, Hartford, Conn., assignor to the Case, Lockwood & Brainard Company, same place.

No. 242,819. Hammock Frame.—John R. Dickinson, New York, N. Y.

No. 242,830. Combined Stereoscope and Graphoscope.—William H. Lewis, Brooklyn, N. Y., assignor to E. & H. T. Anthony & Co.

No. 242,839. Anti-Tarnish Paper and the Process of Manufacturing the Same.—George S. Page, Stanley, N. J.

1. A process of saturating and drying tissue paper and other thin fragile fabrics by passing the same through the saturating material and through a drying apparatus when supported and carried by a web of heavier and stronger material. 2. A compound for saturating paper or other like material for the protection of metals from tarnish, the same consisting of crude carbolic acid, light oil of coal tar, and coal tar. 3.

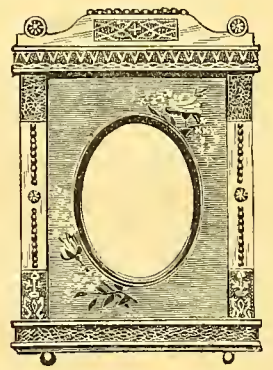


No. 737.

As a new article of manufacture, paper or other fabric saturated with the compound described.

No. 242,840. Manufacture of Paper for Packing and other Purposes.—George S. Page, Stanley, N. J., assignor of three-fourths to Charles E. Booth, New York, N. Y.

1. A compound for saturating or coating paper, felt, woven fabric, or similar material,



No. 729.

the same consisting of salicylic acid, resin, par affine, crude turpentine and pine tar. 2. As a new article of manufacture, paper or similar fibrous or textile material saturated with the compound described.

No. 242,854. Plate Printing Press.—Walter S. Appleton, New York, N. Y.

The combination of a fibrous wiper-belt and a vibrating doctor therefor.

No. 242,913. Picture Molding Hook.—Mason B. Franklin, Providence, R. I.

No. 242,914. Cylinder Printing Press. — Edward J. Frost, Philadelphia, Pa., assignor of two-thirds to Robert H. Toppan, New York, N. Y.

The combination of a type bed driven at a varying speed, a cylinder driven during the period of impression directly from the type bed, and a system of irregular gears driving the cylinder continuously, but conforming during the period of impression with the irregular movement of the type bed.

No. 242,916. Paper Cutting Machine.—Richard Furnival, Manchester, county of Lancaster, England. Patented in Great Britain, May 28, 1879.

No. 242,919. Apparatus for Producing Copies of Writings.—David Gestetner, South Kensington, county of Middlesex, England. Patented in England July 3, 1880.

No. 242,937. Writing Pen.—Alexander M. Kirkwood, New York, N. Y., assignor to Mabie, Todd & Bard, same place.

A pen having two nibs of unequal width, and having the under side of the wider nib beveled upward and outward from the slit toward the upper surface of the pen.

No. 242,970. Book Case.—Jno. W. Pauly, St. Louis, Mo.

No. 242,972. Clamp for Book Cutting Machines.—John Penrose, Newark, N. J., assignor to T. W. & C. B. Sheridan, New York, N. Y.

No. 242,977. Printing Machine.—Fredk. E. Porter, Baltimore, Md.

In a machine for printing an endless or continuous sheet, an impression cylinder, a type cylinder and an inking cylinder adapted to feed the ink through perforations to a felt or ribbon, the surface of the inking cylinder beneath the ribbon being grooved, whereby the ink is evenly distributed.

No. 242,978. Ticket Box.—Matthew Prior, Boston, Mass.

No. 242,989. Stereotype Block.—Frederick Schley, New York, N. Y., assignor to himself and Ferdinand Wesel, same place.

In a stereotype block, a solid one-piece main part or body, in combination with hooked extension strips arranged at one side aud end of the same, and with adjusting screws, nuts and pinions, whereby the extension strips are set close to or farther away from the solid main block.

No. 243,003. Toy Pistol.—George W. Street, Westfield, N. J.

No. 243,044. Apparatus for Manufacturing Types.—Jno. M. Hepburn, Long Acre, county of Middlesex, England. Patented in England February 27, 1880.

No. 243,048. Toy Money Box.—Rudolph M. Hunter, Philadelphia, Pa.

REISSUES.

No. 9,755. Envelope Machine.—Abram A. Rheutan, Worcester, Mass., assignor to Wade H. Hill, same place. Original No., 151,158, dated May 19, 1874.

No, 9,765. Method of Mounting Show Cards, Maps, &c.—William J. Quarry, Cincinnati, O. Original No. 189,903, dated April 24, 1877.

DESIGNS.

No. 12,303. Pen Holder.—Robert D. Simpson, New Haven, Conn. Term of patent, 3½ years.

No. 12,314. Globe Holder. — Charles M. Mitchell, Waterbury, Conn. Term of patent seven years.

No. 12,316. Toy Money Box.—John H. Parmelee, Bridgeport, Conn., assignor of one-half to Friend W. Smith, same place. Term of patent seven years.

TRADE MARKS.

No. 8,303. Playing Cards.—Russell, Morgan & Co., Cincinnati, Ohio. "A figure of the Goddess of Liberty inclosed within the periphery of one of the ace-spots of cards."

COMPOSITION BOOKS.

(Copyrighted, June, 1881.)

Something entirely new and attractive for the School Trade. One of the best selling books published. They are printed on our best manila paper, bound in heavy covers with rounded corners. At the head of each page is printed a cut of some simple subject for the children to write about. The name, ***"Pretty Stories."*** will cause almost every child to want it. The hook is recommended by the best primary teachers in the country. FIRST SERIES, 6½ × 8 inches, 24 pages, per 100 books, $8.00. Put up in packages of 25 books each.

We have added to our ***Portfolio Tablets*** a line of ***Fine Linen Paper,*** bound in Leatherette, with stamped covers, very handsome; and also are putting up a new style of Tablet in ***Fine White Writing Paper,*** bound in ornamental flexible covers, with stiff back, which we call our ***"TOURISTS' TABLETS,"*** in Commercial and Packet Note, and Congress Letter Sizes.

PERFECTED STYLOGRAFIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS,** the last, June 20. 1880, being the most important and giving the name **Perfected.** All cuts are exact size.

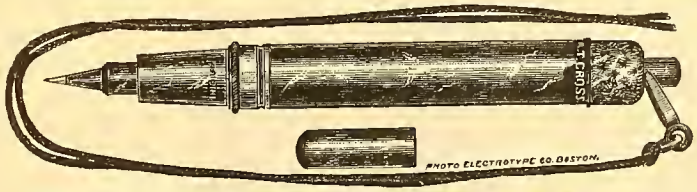
MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambler's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra long. Holds most ink, except the **Maximum.**

SHORT.—Most widely known and sold heretofore; but Maximum and Long are much better for desk or Hambler's Pocket. So this will be largely superseded.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined.

☞See Descriptive Circulars.



GIANT, with Cord and Gold Ring, same price as Short.

Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, all of which will have the new improvements.

☞See Descriptive Circulars.

LITTLE GIANT, Plain, - $3.00.
All Styles up to $4.50.

☞ **LITTLE GIANT.—The Ladies' FAVORITE.**

This Miniature Cut is for Agents' Cards, Newspaper Advertisements, &c., &c., &c.

CHRISTMAS AND NEW YEAR CARDS.

Beautifully produced by the latest and most approved method of Chromo-Lithography, by the most eminent art publishers in England, especially designed for us by the leading Canadian Artists.

SUBJECTS:

1—"Snowshoeing."
2—"Running the Rapids."
3—"Tobogganning on the Ottawa."
4—"The Milldam."
5—"A Holiday Drive."
6—"The Old Homstead."
7—"Rapids above Niagara."
8—"Tobogganning Rendevous."
9—"Suburban."
10—"The City."
11—"Niagara by Moonlight."
12—"The Wigwam."

The series consists of 12 designs, a marvel of cheapness and artistic excellence, and entirely distinct and different from anything in the Xmas and New Year Card line yet seen. Containing mottoes appropriate for and emblematic of the festive season.

To large jobbers these Cards will be shipped at remunerative prices direct from our London House. Samples and terms can be obtained on application.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

E. A. Tiffany, stationer, &c., Mankato, Minn., has failed.

Isaac Ellis, paper manufactnrer, Norwood, Mass., has failed.

James Armstrong, news dealer, &c., Petaluma, Cal., has sold out.

Geo. L. Garland, dealer in periodicals, &c., Nashua, N. H., has sold out.

Chas. G. Reynolds, newsdealer, &c., Syracuse, N. Y., has sold out to Frank S. Geer.

Randall & Coleman, publishers of the *Journal*, El Paso, Ill., have dissolved partnership.

A. A. Cassill, has succeeded Chase & Cassill, booksellers and stationers, Mount Vernon, O.

U. H. Patterson & Son, dealers in paper hangings, Binghamton, N. Y., have made an assignment.

Leger & Robinson, printers, Waterville, Me., have dissolved partnership. E. O. Robinson continues.

The firm of Cornell & Dean, printers, Grand Rapids, Mich., has been changed to Stevens, Cornell & Dean.

Orwing & Pennock, dealers in wall paper, Akron, O., have dissolved partnership. L. D. Orwing succeeds.

M. B. Bannister & Son, paper stock dealers, Syracuse, N. Y., are compromising at twenty-five cents on the dollar.

The style of J. J. East & Son, dealers in wall paper, Allegheny, Pa., is now J. J. East & Son (Limited); capital, $6,529.

The new leather goods shown by James D. Whitmore & Co. are marvels of beauty and low prices. They far exceed those of any former years.

The Acme Stationery and Paper Company desires to call the attention of the trade to a new line of school composition books, the announcement of which will be found in the advertising columns.

Leo N. Leslie & Co., dealers in notions, Kansas City, Mo., have dissolved partnership. J. C. Crocker and W. C. Stevens have retired, and D. R. Edwards has been admitted. The style remains unchanged.

William C. Horn, of Koch, Sons & Co., has just returned home from a very enouraging trip in the West. It is whispered around among some of his friends in the trade that Mr. Horn will not make another trip until October, when he will go on his wedding tour.

James D. Sloan, representing Marcus Ward & Co., has started for the West with the new samples of this house. Mr. Sloan will visit the cities of the extreme West, including Omaha, Denver, Leadville and Salt Lake City, where Marcus Ward & Co. have many customers.

The Elwood files, Adams & Kimball manufacturers, Chicago, are commending themselves to popular favor. They are now made of the best materials and are vastly improved in appearance since Adams & Kimball have been making them. They are handled by the leading jobbers and are sure to command large sales. A sample is sent to any address for fifty cents.

T. Sinclair & Son, Philadelphia, whose successful prize competition for advertising card designs closed recently, are now busy reproducing the sketches bought by them and are ready to offer about fifty new and original series of advertising cards. The system under which these are sold is as follows: A dealer wishing any particular series of cards is required to order an edition of 5,000 sheets or more, making, according to size, 200,000 to 500,000 cards, the purchaser being given the exclusive control of the market for the designs bought. The result of this system (which was adopted at the beginning of this year) is that the purchaser is protected from an unscrupulous dealer who, for the sake of furthering his own ends, cuts the price and breaks the market. Buyers are invited to consult Sinclair & Son and get samples and estimates at an early day. For the fall trade samples of their previous productions can be had of A. M. Collins, Cope & Co., Goodman & Schanck and Robert Gair & Co., New York; T. M. Simpson, Chas. Beck, A. M. Collins, Son & Co., Philadelphia, and many other larger dealers. O. J. Ramsdell, formerly with Carter, Dinsmore & Co., has engaged to represent the outside interests of Sinclair & Son and will be pleased to hear from all his old customers in the trade. Estimates and sketches for chromo cards will be furnished by Geo. M. Hayes, manager of the chromo card department of Sinclair & Son.

"Nana's Daughter" is a sequel to Zola's world-famous "Nana," and in many respects superior to that work. Intense and continuous action characterizes it throughout, and every page is of absorbing interest, while there is no lack of refinement and fine feeling. The aim is to show that evil instincts are not hereditary. The translation of "Nana's Daughter" is by John Stirling, who has done his work conscientiously well. It is published in a large square duodecimo volume, paper cover, in uniform style with Peterson's editions of Emile Zola's and Henry Greville's works. T. B. Peterson & Brothers, Philadelphia, Pa., are the publishers.

That America has come rapidly to the fore in the manufacture of fancy goods is very apparent to any one in passing through the showroom of James D. Whitmore & Co., in Beekman street. Their marvelously fine display of new productions must be seen to be appreciated. The goods of this house have a world-wide reputation. The firm gives close attention to details in all it undertakes, and hence the merit of its productions.

William Mann, Philadelphia, at the solicitation of his numerous customers in New York, has opened here at 51 Liberty street a branch of his house, under the style of William Mann & Son. Joseph H. Mann will have charge of the management of the New York house, and will always have on hand samples of the same goods as are handled by the house in Philadelphia.

T. M. Simpson, of Philadelphia, has in hand a portion of his stock of advertising cards for the autumn. These consist of more than one hundred different series, of four to eight designs in each series. Prices range from 60 cents to $20 per thousand. Millions of these cards are sold and Mr. Simpson has already received orders for three millions.

Geo. T. Ristine, publisher of the *Sun*, and A D. Row, publisher of the *Review*, Galion, Ohio, have consolidated under the style of the *Galion Sun-Review*.

Hunter & Warren, booksellers and stationers, Nashville, Tenn., have dissolved partnership. Hunter & Co. continue.

M. T. Hatch, printer, Troy (North), Vt., has sold out.

A. H. Smythe, Columhus, Ohio, was in town during the week.

R. C. Brown, publisher, Tucson, Arizona, has been burned out.

G. J. Gebhardt & Co., lithographers, Montreal, P. Q., have assigned in trust.

J. B. McCarty arrived home from Europe on Sunday per steamship Britannic.

E. A. Taylor & Co., booksellers and stationer, London, Ont., Can., are closing up.

Joseph A. Wilcox, of the *Globe* Printing Company, Danbury, Conn., has sold out to T. Donovan.

Henry Levy and Frederick J. Levy returned from Europe on Sunday by the steamship Britannic.

The paper mill of Taylor Brothers, paper manufacturers, Toronto, Ont., has been partly burned out.

A. S. McDade, Boorum & Pease's new traveler, is meeting with success in taking orders. He is in the South at present.

W. B. Carpenter, of W. B. Carpenter & Co., Cincinnati, has returned home after visiting the paper mills and the trade generally in the East.

E. P. Coby, of E. P. Coby & Co., of William street, sailed for Europe on Wednesday in the steamer France. A number of his friends gathered on the steamer and bade him *bon voyage*.

James D. Whitmore & Co. report that the demand for their deservedly popular leather goods is far ahead of former years. The trade will be wise in placing their orders early to insure prompt delivery.

Hard & Parsons' goods are meeting with remarkable success. The jobbing trade have ordered them largely. The firm is obliged to increase its manufacturing facilities owing to the increased demand for its goods, and is preparing an elegant line for the holiday trade.

Samuel Hobbs & Co., for the past ten years with L. F. Lawrence, Adams & Co., 169 Devonshire street, Boston, have leased the store formerly occupied by the last named firm, and will continue the business at the old stand. They will deal in staple and fancy stationery of all kinds.

D. B. Brooks & Co., 17 Franklin street, Boston, have got out something new in the archery line, which they say is an improvement on the bow and arrow and can be used for lawn or parlor amusement. It is said to require skill and can be sent by mail. It is advertised in another column.

J. Arnold, formerly of the Mt. Tom mill, Holyoke, Mass., was arrested at the Grand Central Depot, this city, just as he was leaving for his home about two weeks ago, at the instance of a creditor who claims that in a certain business transaction he made representations which were subsequently ascertained to be untrue. Mr. Arnold was released on $10,000 bail for his appearance at trial, which will take place in this city as soon as the case can be reached.

The National Printers' Warehouse Company, 10 Barclay street, is doing a very satisfactory business in the sale of presses, in which it has recently made a number of important improvements, which it claims is now one of the most desirable presses in the market, although the price is very much lower than that of most other makes. In addition to the manufacture and sale of its presses, it has a large stock and ample fa-

cilities for furnishing printing offices with their entire outfit.

H. B. Watson, publisher of the *Californian*, Monterey, Cal., has sold out.

E. & H. T. Anthony & Co. have their fall line complete and are ready to show samples.

Fred. W. Horn arrived home from Europe on Saturday, after an absence of nearly three months. He is in good health and spirits.

The American News Company has takon the business of the Denver Book and News Company, and has opened an office at Denver, Col.

Among the visiting members of the trade to the city during the week were Mr. Dayton, of J. R. Dayton & Co., Quincy, Ill.; J. K. Gill, Portland, Ore.; C. J. Cohen, Philadelphia, and B. Kalmus, of B. Kalmus & Co., Boston.

E. & H. T. Anthony & Co. have placed on the market a new picture, styled "Little Ethiopians." It is a comic cabinet, showing twenty heads of negro children, and is a companion picture to "Night and Morn." It sells very well. This house also shows new cabinets of Mrs. Scott Siddons, Pauline Markham and others.

Van Antwerp, Bragg & Co., Cincinnati, have just issued a new catalogue and price list of blank books of their manufacture. They have adopted a new series of numbers, and have added many new and attractive styles to their line of goods. Making a specialty of blank books, they invite the trade to send for this catalogue.

Some of the fancy card houses report that the jobbing trade are pushing for samples in order to get ready early for the coming season. It is expected that trade in Christmas cards will begin much earlier this year than usual, owing to the prevailing "collecting mania," and that the goods will be offered for retail in October and exhibited as early as September.

James Campbell & Son, Toronto, Ontario, Can., have published a pretty series of Xmas and New Year cards. The designs have been produced by well known Canadian artists, and embrace landscapes of natural scenery with which many are familiar. Views of Niagara, skating and tobogganing scenes, shooting the rapids, &c., give a real and enlivening character to the cards.

Ivison, Blakeman, Taylor & Co. have just introduced a new nickel plated box for the purpose of sending samples of Spencerian pens through the mails. Each sample so sent contains twenty different pens, adapted to every kind of writing, and costs only twenty-five cents. The box is in reality a match box, and is intended for such when emptied of its pens. This house has just received for the coming season a large supply of cork penholders, made by hand, and can furnish to the trade Perry's ten-cent sample box in any quantity after July 1.

Hasbrouck & Watson, New York, have issued a circular notifying to the trade that they are sole owners of the M. and H. blotter tablet, and that it is not an infringement on the Hodder blotter tablet. They also say that no person has any claim to the Hodder patent except John H. Hodder, who has only sold the right to his tablet to different parties under territorial limits, Hasbrouck & Watson owning the right for New York. Under these circumstances Hasbrouck & Watson have the same right to make and sell the Hodder tablet as any one else, and as they are the sole owners of the M. and H. tablet, they guarantee to protect their customers against any unfounded claim of interference.

Adams & Kimball, Chicago, invite the attention of the trade to their handy interest tables. These supply a long felt want for a simple and at the same time a correct method of making computations in interest. They are designed for general use—for those unfamiliar with interest rates and methods and the expert accountant and banker as well. They are warranted accurate and are sold at a price so low as to bring them into popular favor at once. The tables are so arranged that the interest on any amount, for any length of time, can be seen at a glance. Over 12,000 different computations are given, each amount having its separate square, and the eye is not wearied by running down long columns, but can follow out the squares and find the wished-for amount with the greatest ease. The price is twenty-five cents, with a liberal margin to the trade.

Myers Brothers are now opening their invoices of De La Rue's cards.

J. H. Hanson, fancy goods dealer, Park Hill, Ont., is offering to compromise at forty cents on the dollar.

William Mann, Philadelphia, has concluded contracts with the Treasury Department and the Department of the Interior at Washington for supplying his copying books, which are used in these government offices.

The American Crayon and Slate Company, 43 Dey street, this city, reports an increasing demand for all of its lines of goods, and particularly for its soapstone slate pencils, and also for the "Triumph" blackboards, for which it is not able to fill its orders. It makes one of the finest displays, in its show window, of its various kinds of goods that can be seen anywhere.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---$2.00 PER ANNUM.

Single Copies - - - - 10 Cents

NEW YORK, THURSDAY, JUNE 23, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE Lockwood Press has established a library which has attained very respectable dimensions. Special arrangements have been made for the indexing and care of all catalogues forwarded to this office for this specific purpose. The trade are invited to send duplicate copies of their catalogues addressed to the publisher of this paper and marked "For library."

A SCOTCH contemporary remarks that it has frequently had occasion to note that an exchange of the surplus stock held by members of the retail book and stationery trade would be advantageous. We have had the same thing made plain to us more than once, and the question has been how to do it. One dealer may have a surplus of a particular line of goods or extra copies of an edition which another would like to buy or exchange, and thus a mutual service could be effected. A case in point, which came up only lately, was where one wanted a particular kind of slate pencils, and after inquiry we found another who wanted to get rid of a surplus of those very goods. We suppose that all this might be effected regularly through the columns of THE STATIONER, and that thus we might not only expedite the wants of our correspondents, but be relieved from a good deal of labor in looking up information. Has any one any suggestion to make?

THE Commissioners of the Melbourne International Exhibition have decided to distinguish all of the exhibitors who have been awarded the "first order of merit" with medals. They have, however, economically concluded to make only a few of them of gold, others of silver, and the remainder of bronze. These medals, they announce, will only be given to those who receive first awards, and in cases where more than one first honor is awarded in a particular class, the exhibitor, while receiving certificates for each award, will get only one medal, but each certificate will read, "First order of merit, with medal." The honor, therefore, is equal whether the medal shall be gold, silver or bronze, the distinction only being made upon an estimate of the importance of the exhibit. This seems to us rather odd, although we suppose that is gauged somewhat upon the difference between a first class bucksaw and a watch, both being of the highest grade in their way. All awards under the first degree will receive certificates without a medal, or words to that effect.

A FRIEND takes exception to the statement that members of the trade handling fancy cards are uneasy in view of the competition in this line, and thinks that it is intended to discourage the trade. He is mistaken. No discouragement is intended. We expect to see a larger number of cards sold this season than ever before; but there is no denying the fact that a great many new people are rushing into the business, not at all to its advantage, inasmuch as some of them offer goods that are not up to the requirements of good taste, either as to design or finish. Like every other branch of business which proves to be a success, the card trade is being seized upon, and we may expect, as has been said, a very lively competition. Some of the goods will not be worth buying; others will suit the fancy of those whose tastes have not yet attained cultivation; but we believe that artistic cards will find their market and be readily bought, if extravagant prices do not rule. There is no thought of discouragement, except that we advise people who expect to make money, by selling the "cheap and nasty" styles, not to put faith in an utter lack of intelligence on the part of the public.

THE United States Senate Committee on Judiciary is asking for suggestions on the question of establishing uniform laws on the subject of bankruptcy. It inquires whether, "in the opinion of those most interested, the commerce and business of the country requires the early enactment of a permanent national bankrupt act," and then it asks if in any measure that may be adopted hereafter, as compared with the law of 1867: 1. Should the officers be compensated by fixed salaries or by fees? 2. Should the powers of registers be increased or diminished? 3. Should the amount of indebtedness authorizing the filing of a petition in voluntary bankruptcy exceed three hundred dollars? 4. Should composition settlements be continued? 5. Should the discretionary powers of the court relative to the granting of discharges be enlarged?" An expression of opinion on these points, together with other practical suggestions, can be communicated to the Hon. John J. Ingalls, chairman of the sub-committee, &c., Atchison, Kansas. We presume that the Stationers' Board of Trade will be heard from on the points suggested. It is the duty of business men to evince their interest in this matter.

ANSWERS TO CORRESPONDENTS.

A. C. B. wants address of H. W. Ellsworth, manufacturer of the reversible copy book?

Ans.—H. W. Ellsworth, 21 Park Place, New York, is the manufacturer.

Among the visiting members of the trade in the city this week were Mr. Weil, of Weil & Woodleaf, San Francisco, Cal.; M. J. Riegel, Easton, Pa.; H. B. Glover, of H. B. Glover & Co., Dubuque, Iowa; J. B. Laley, of J. B. Lippincott & Co., Philadelphia; G. R. Hanford, Watertown, N. Y.; J. K. Gill, Portland, Ore.; Mr. Banghorn, of Menecke & Co., Milwaukee, Wis.; M. Strickland, Strickland & Co., Galveston, Tex.; Mr. Mallory, of Bradley, Gilbert & Mallory, Louisville, Ky.; A. H. Smythe, Columbus, Ohio; John Bremond, Austin, Texas; F. Kaltmeyer, of F. Kaltmeyer & Son, San Antonio, Texas; A. K. Hawkes, Austin, Texas.

Members of the trade recently arrived from Europe report that manufacturers there are now very busy, and that the prices of various lines are rising rapidly.

Gossip About Christmas Cards.

BALTIMORE, June 18, 1881.

To the Editor of The Stationer:

I have just returned from a trip through Great Britain, visiting several English and Scotch cities, including the metropolitan cities of London and Edinburgh.

Business has been far from good there for the past two or three years. Recently it has been very indifferent, and it was certainly bad enough while I passed over the country. But considering the time of year, that was not so extraordinary. Still, as a general rule, it must not be overlooked that business in ordinary average years is far less dull there than in the United States, as so many businesses in the latter come almost to a standstill through the summer heat, causing all who can afford it to betake themselves, for months at a time, to the seaside, to resorts in the mountains, or to any quiet well-shaded country retreat within convenient reach. The same influences do not cause such a thorough depopulation of British cities in summer as with us, because the climate is hardly ever so hot and the hottest period is of short duration.

The only trade we stationers are interested in that seemed to me to show any signs of vitality was the commencement of the Christmas and New Year card season among the publishers and jobbers. This year the different publishers of these pretty congratulation cards have been making the most unprecedented endeavors to cause their customers among the larger members of the trade to believe that their special and particular line is the best, the newest, the most extensive, the most original and artistic assortment that has ever been shown since Christmas cards were invented. Some firms in England have been publishing those very popular goods for periods of from seven to even twenty years; others again have jumped into the trade within the last three or four years; but, strange to say, the most noise and greatest pretensions are made by several concerns in the latter category, not *bona-fide* manufacturers at all, but which yet pose as such, not having a single designer, draughtsman or printer of any kind in their employ, much less an establishment in which to produce the goods. Such mushroom concerns get their work done, or intend to do so, by giving it out to chromo-lithographers, generally dividing it among different houses. Thus the work is necessarily produced under imperfect supervision, and devoid of uniformity in the execution.

It is not to be expected that work so contracted for can be equal to that designed, drawn and printed from fifteen to twenty different times, under the eyes of the publishers themselves. But judging from the loud profe ssions of these new-fledged publishers of limited experience, one would think it was the easiest thing in the world to produce six hundred or seven hundred entirely new and original designs of first class merit, and in the highest style of execution.

I am convinced that there are three times as many publishers of such cards, in England and Scotland, as there were four or five years ago, which is most surprising when we bear in mind how bad general business has been there during most of the same period.

It is about twelve years ago since this trade began to assume important dimensions. Every year since then has shown a rapid increase, which has had no parallel in any other article forming part of the stationer's stock. Only one year—1879—showed a slight falling off from the year preceding, which was owing to a bad harvest, commercial depression and countless bankruptcies, all culminating in a complete panic over the country. But the season of 1880 more than made amends for this temporary relapse, it being the most successful one, everybody admitted, in Christmas cards experienced since their origination.

From this, English stationers are justified in their conviction that 1881 will exceed all of its predecessors in the sale of such goods. I heard, when in England and Scotland, the American cards praised as superior in many respects to the European in originality, perfect execution, and faithful reproduction of the most beautiful flowers. They have had, every season, a constautly increasing sale there; but many complained they could not get near as many as they could sell, which may be because they are so much in request at home. While in England I heard that Prang had been awarded "the highest order of merit" at the Melbourne International Exhibition in Australia, and that is most creditable to the house, as it would be in competition with the greatest firms in the world in its line of business. From what I heard I understand that every English maker of any consequence will adopt ways and means to show his samples in the United States and Canada, so that the trade in this country will be able to judge for themselves. Anyhow, it seems to me that designs produced by Americans ought to be, as a whole, more in sympathy with our customs, social life and surroundings, while our flowers and our children should be better portrayed than they can possibly be by foreigners, who have never set foot in the country.

I confess, however, I feel sorry for the latter when I remember that a duty of 25 per cent. on the value must be paid to Uncle Sam before the foreign cards can reach the dealers' hands. This enhances the price very considerably, as a profit must be made on this outlay by both jobber and retailer, and therefore it is within the mark to say, that this is really equal to an advance of 60 per cent., instead of merely 25 per cent. The importer will put on at least 40 per cent. solely for the duty he pays, while the retailer will lay on for the 40 per cent. he is charged at least 60 per cent., but more likely 70 per cent., besides the regular percentage on what is the price of the goods! Many cards are bought at retail in this country to send to friends in Europe. Of course everybody here would prefer to send American cards, instead of returning cards made there.

I doubt not, from the immense number of *recherché* patterns coming on for this season, as well as from the interest the public take now in such works of art, together with their being more able and willing to pay good prices for first class patterns, that the trade will reap a harvest during the last two months of the year such as they never experienced the like of before. It is now generally admitted that fancy cards in general are really most important factors in creating a knowledge of art and a taste for it among the people. It is amazing what good judges of pictures even children become, as is observable in their correct criticism of the different grades, after a comparatively short experience. No doubt about it, the present fashion or "craze" (or whatever you like to call it) tends toward the art education of the American people, gradually preparing them to appreciate every kind of art, whether applied to painting, sculpture, house decoration, dress, &c., even as children gradually acquire a taste for reading by commencing with such erudite works as the "History of Cock Robin," "Puss in Boots," or "Jack the Giant Killer," gradually passing onward to what will prove more useful if not more interesting.

KNICKERBOCKER.

Chas. J. Cohen, Philadelphia, Pa., has recently added new machinery to his envelope factory for the rapid production of envelopes, suitable for church weekly subscription purposes. These goods have to be sold at an exceedingly low price; hence the importance for the use of the most improved and rapid machinery. Mr. Cohen is also building at his factory an improved elevator to raise and lower heavy weights, which will greatly facilitate the daily handling of many cases of paper.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, June 22, 1881.

THE MONEY MARKET.—The monetary situation was characterized by ease throughout the week, although in exceptional instances borrowers paid as high as 6 per cent. for accommodation The majority of loans on pledge of stock collateral were effected at 3@4 per cent. Transactions in time loans were reported at 2½@4 per cent. In the discount market prime mercantile paper sold at 3@4 per cent., according to date of maturity. Stocks are irregular and uncertain. Governments hold firm with a good investment demand, while railway mortgages have become comparatively dull. The sterling exchange market was active and firm throughout the week, and the nominal asking quotations were advanced. The posted rates at the close were $4.84½ and $4.85 for sixty-day, and $4.86½ and $4.87 for demand drafts. The actual rates for Continental exchange are as follows: Francs, 5.21⅞ and 5.19⅜; marks, 94⅜ and 94⅞, and guilders, 40 and 40¼.

THE PAPER MARKET.—The distributive movement in paper is, so far, ahead of the usual June average. This may be accounted for partly by the fact that the comparatively light trade during the spring months has extended the demand beyond the usual limit of the spring season proper. The low prices of paper-making materials produced by the late quietude, which has almost bordered on to depression, form a favorable basis for a remunerative and satisfactory business to the manufacturer. Fine book and writings appear to be the only grades in which the demand keeps very close to the production, and in which prices show any great amount of firmness. Even tissue manillas, which have shown snch an encouraging trade for the past eight months, have now lapsed into a dormant condition, and some manufacturers are accumulating their product. It is said that a prominent member of the Eastern Straw Wrapping Association who took an active interest in fixing its recent schedule of prices, made a sale of 10,000 reams of paper at 2c. per ream below the schedule rates inside of a week after the rates were agreed upon. In accordance with the decision of the Executive Committee, which met here last week, all the mills belonging to the organization will close down during the month of Jnly.

THE STATIONERY MARKET.—Bnsiness has undergone a little improvement during the week. This improvement has been very gradually developing for the past fortnight. Although trade has gained very little headway as yet, a few out of town buyers are arriving, and by the expiration of another fortnight fall trade, it is generally anticipated, will begin to show a considerable amount of animation. It is said that a large portion of the dealers who are visiting the city at present embrace the opportnnity presented just at this time of the year to buy job lots of wall papers, which they can purchase at something under the combination rates owing to the expiration of the time fixed for its maintenance. Prices of staple goods hold to a steady line of value, and we hear of no changes having taken place.

"THE GREAT ROCK ISLAND ROUTE"
Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

R. R. CABLE,
Vice-Pres't and Gen'l Man'gr, Chicago.

E. ST. JOHN,

TOYS FROM PAPER PULP.

Various toy wares, such as dolls' heads, &c., are made from paper pulp, the method being to roll out a flat cake of the pulp, then press it, piece by piece, with the hand, in the proper mold, till all the outer contours are covered. The mold and inclosed mass are quickly dried and the molded parts are then put together. The process is slow and the articles have not the strength desirable in children's toys. Herr Escher has lately patented a new process, which is as follows: 50 per cent. of finely powdered clay slate is mixed with 20 per cent. rag paper pulp, 30 per cent. burnt gypsum and sufficient water; and the well stirred pulp is poured into the closed and hollow molds (which have been first penciled over with finely bruised gypsum, or the like). After standing a few minutes, the superfluous pulp is poured off and the product is then taken out of the mold, dried, and further treated in the usual way. The advantage of the method is, that the mixed pulp is poured direct into the closed molds and quickly hardens in them.

Much trouble can often be saved by marking tools with their owner's name, which can be easily done in the following manner: Coat over the tools with a thin layer of wax or hard tallow, by first warming the steel and rubbing on the wax warm until it flows, and let it cool. When hard, mark your name through the wax with a graver, and apply aquafortis (nitric acid); after a few moments wash off the acid thoroughly with water, warm the metal enough to melt the wax, and wipe it off with a soft rag. The letters will be found etched into the steel.

The subject of an international copyright between China and Japan is now under consideration. Chinese authors complain that their works are not only printed in Japan, but that cheap editions of them are imported into China and sold to their detriment. On this subject, says the *Athenæum:* "Japan stands in relation to China in almost the same position as the United States do to this country. It is worthy of note that the Chinese authors have perpetual copyright in their productions, and that any infringer of an author's rights is punished by receiving a hundred blows and being transported for three years."

The fusibility of soft solders is increased by adding bismuth to the composition. An alloy, of lead 4 parts, tin 4 parts, and bismuth 1 part, is easily melted; but this alloy may itself be soldered with an alloy of lead 2 parts, bismuth 2 parts, and tin 1 part. By adding mercury a still more fusible solder can be made. Equal parts of lead, bismuth and mercury, with 2 parts of tin, will make a composition which melts at 122° F.; or an alloy, of tin 5 parts, lead 3 parts, and bismuth 3 parts, will melt in boiling water. In mixing these solders melt the least fusible metal first in an iron ladle, then add the others in accordance with their infusibility. To cast strips of solder, pour the molten metal on a flat surface of stone or metal.

A well attended meeting of the creditors of Aaron K. Loring, dealer in books, stationery, &c., 542 Washington street, Boston, was held last week. Mr. Kendall, of Rice, Kendall & Co., was chosen chairman, and Mr. Churchill, of Rockwell & Churchill secretary. Before submitting a statement of his affairs to the meeting, Mr. Loring said he had hoped to prepare a more detailed and elaborate exhibit, but that he had not had sufficient leisure since stopping payment to do so. According to the figures he presented to the meeting, the liabilities aggregate $26,130.51, of which $2,412.63 are overdue notes and drafts and notes and bills (including rent) coming due this month, $1,277.34 notes falling due in July, $1,399.61 ditto in August, $734.62 ditto in September, $1,040 borrowed money, $1,955 back rent on the building at the corner of Bromfield and Washington streets, $200 taxes on the same (estimated, and perhaps may be increased), $8,761.83 back rent on 369 Washington street, $949.48 taxes on the same, $200 taxes on stock at the debtor's present store (estimated), $3,000 copyrights, and $4,200 open accounts. The assets nominally aggregate $20,755, being made up of $12,495 in stereotype plates (what it is thought they would bring at the New York trade sale next fall), $1,500 manufactured stock, $1,500 stationery, $800 miscellaneous books, $2,160 library, $2,000 open accounts, and $300 cases, &c. Mr. Loring submitted no proposition toward settlement, and it was voted that affairs be put into the hands of a committee to investigate and report at a future day—C. A. B. Shepard, S. H. Sanborn, Edward E. Clark, and H. R. Brigham being appointed as the committee.

Alfred Ireland, manager for Marcus Ward & Co., of London and Belfast, sailed on the 22d inst. by the Scythia for a short visit to the other side, where he intends to combine business with recreation, preparatory to the fall trade, which, from all indications, he thinks, will be very heavy.

William Landers, fancy goods dealer, Berkley, Cal., has been burned out.

OBITUARY.

Sir Josiah Mason.

By cable the death is announced of Sir Josiah Mason, the great penmaker and philanthropist. He was the founder of the Mason Scientific College, at Birmingham, England, and will be most widely remembered by that foundation. But he was long before that time an illustrious example of the use of well won fortune for the good of others. He was born at Kidderminster, February 23, 1795, of poor but worthy people. When a boy he worked as a shoemaker, then as a baker, and next as a carpet weaver. At the age of twenty he went to Birmingham and worked hard for ten years as a jeweler and gilt toy maker. At thirty he was connected with the manufacture of steel split rings and key rings, in partnership with Samuel Harrison the inventor, and at his death he succeeded to the business and added to it the manufacture of steel pens. In 1829 a superior steel pen of his gained an introduction into the market, won a high repute and enormous sales. He went into the business of electro-plating and gilding, then into copper smelting, establishing for this latter industry in 1850 a large manufactory at Pennbury, in Wales, which grew up under his enterprise from an obscure village, to a flourishing town. He divides with Gillott and Mitchell the credit of perfecting the modern steel pen. In 1874 he had over 1,000 workmen, consuming over three tons of rolled steel weekly. By his numerous manufactories he amassed enormous wealth. His first great work of benevolence was the erection and endowing of almshouses and an orphan asylum for boys and girls at Erdington, near Birmingham. This was done at an expense of $300,000 on the erection of the buildings alone and he afterward endowed the institution with real estate valued at $1,000,000. Neither race nor religion is allowed to exclude the little ones who need its care. In addition to this noble charity he established and richly endowed a college for the study of practical science, with a distinct application to the industries of the midland district, in which his life had been spent and his fortune made. In recognition of his many benevolent and philanthropic works, in 1872 Queen Victoria conferred on him the honor of knighthood. He had passed his eightieth year when he announced the matured and well considered plan of his science college; and, being still vigorous and active in body and mind, had the satisfaction of seeing its buildings and equipments completed under his own eye, an able faculty selected for it, and of hearing from Professor Huxley an admirable setting forth to the public of its purpose and plans, on the occasion of its opening, on the 1st of October, 1880. The college is a magnificent Gothic edifice, with frontage on Edmund street of 148 feet. The buildings cover an area of about two thousand four hundred square yards, but in the course of time, when the original plan of the founder is carried out, they will occupy nearly double that area. This institution he also endowed to the extent of $1,000,000. It should be remembered that all departments of the college were thrown open by its founder to both sexes on the same terms; and also that, with the absolute exclusion of party politics, theology and mere literary instruction and education from its curriculum, there is given to its trustees a large freedom of action to secure, with whatever changing conditions of the future, a sound, extensive and practical scientific knowledge to all who may need and seek its benefits. Beyond the fact that Sir Josiah's noble gift must become of incalculable value to the great, crowded

midland manufacturing district of England, lies the wider one of the practical example it gives to other men of wealth the world over, who having, like him, risen "from the ranks," may desire to bestow efficient aid on those who come after.

The most simple and best stain for mahoganizing cherry is ground burnt sienna, mixed in benzine or turpentine. Apply with a brush or sponge, let it stand for a short time, and clean off with a cloth. It will be better to let it remain in this condition until the following day before commencing to finish.

Envelopes, Papeteries and Linen Papers.

SAMUEL RAYNOR & CO.,

117 William Street, - - - New York,

Beg leave to announce that they are constantly increasing their facilities for manufacturing Envelopes, by adding new machinery for folding odd sizes, so they can now make any size wanted, at short notice. Their stock of paper embraces every kind, from the common Manilla to the very best plated papers, in white or tints. They also carry a large stock of Linen Papers, two qualities, their Trade Mark being

"Pure Irish Linen" and "Imperial Linen" Papers,

IN NOTE SIZES AND FOLIOS, WITH ENVELOPES TO MATCH.

☞ Also a large assortment of PAPETERIES. Price List and Samples sent when requested.

BRADSTREET'S

A JOURNAL OF

Trade, Finance and Political Economy.

THIS JOURNAL covers a ground the extent of which is occupied by no other publication, and forms an invaluable work of reference to the merchant and manufacturer.

REGULAR AND TRUSTWORTHY CORRESPONDENCE, furnished by experts, expressly for this journal, from all the principal trade centres of this country, is embraced in its columns.

THE CONDITION AND PROSPECTS of the various markets are carefully recorded, and the possibilities and opportunities for trade are demonstrated as by no other medium extant.

QUESTIONS OF COMMERCIAL INTEREST and importance are fully and ably discussed editorially, without prejudice, by some of the most responsible writers and statisticians of the time.

THE BUSINESS CHANGES occurring in the United States and Canada—such as failures, dissolutions of partnerships, chattel mortgages, etc., etc.—are printed in each issue, and the list is more complete and comprehensive than can be obtained through any other source.

THE CIRCULATION OF THIS JOURNAL being among the best merchants, manufacturers, and banking institutions of not only this country but many foreign, it presents an excellent advertising opportunity to a limited number of first-class banks, corporations, and business firms.

Standard Blank Books.

OUR NEW CATALOGUE of Blank Books, Memorandums, &c., is now ready, and we will be happy to mail one to any address furnished. It embraces many new and desirable styles, which all stationers should examine before ordering.

Our books are **CHEAP**, but well finished and attractive. With reduced prices on **STANDARD LINES** and **INCREASED DISCOUNT** for large purchases, we believe the advantages we offer to jobbers are nowhere else equaled. We print a **SPECIAL EDITION** of our Blank Book List, which we furnish with our customer's imprint when desired. Orders for them should be sent in before August 1st.

FORTY YEARS' experience in this manufacture, and the possession of every facility that an ample capital can procure, warrant us in promising to intending buyers **THE CHEAPEST AND BEST BLANK BOOKS** in this or any market.

☞ Send for a catalogue and test our assertion by sending us a sample order for such styles as you think desirable.

CURLS IN WOOD AND VENEERING.

In nearly all cases they are to be met with at the top part of the tree commonly called the butt (or trunk), at that part where the division of the arms or limbs commence their outward tendency from the trunk. Their source of growth is at that point where the sap diverges from its first source into two or more distinct channels, which ultimately promotes and supplies the first limbs of the tree with their attendant offshoots. Instances are numerous of a plurality of arms from the butt of the tree; these are of a confused character, of root like growth, and are not so extensively used. They are of less value than the double arm curl, which is more single in growth, much richer in figure, and of greater value to the cabinet maker for enriching his work.

If the butt is sawn through between the fork of the limbs the feather of the curl will be much less than if the cut is made transversely or laterally. Instantly we see a large surface quite as rich in quality, which must be of greater service for our purpose; therefore the latter is the best mode of converting. Now, seeing the different growth of curls, the grain at the broad end of the feather has quite an opposite grain to that of the narrow end. The broad end being one grain by natural growth, we must be careful in applying any materials capable of expansion and contraction. The narrow end of the feather is not so easily affected, and, being naturally interwoven, is more flexible, not so brittle, not so easily acted upon by heat or cold. To give a direct idea of the growth of the broad end of the feather, lock your hands together, taking your right arm for the trunk, and with the fingers and thumb of the same make an opening for the left hand, and they will give you the manner of growth in the broad end of the curl. So transverse is the growth that you can whittle it with perfect ease in solid form with your pocket knife.—*The Cabinet Maker.*

COATING IRON AND STEEL WITH IRIDESCENT COPPER.

This important invention, says the *Revue Polytech*, is the work of Dr. Weil, of Paris. The inventor has found that the best mode of preparing the metalizing bath and the best proportion of ingredients are indicated in the following directions: First, 35 parts of crystallized sulphate, or an equivalent amount of any other salt of copper, are precipitated as hydrated oxide by means of caustic soda or some other suitable alkaline base; this oxide of copper is to be added to a solution of 150 parts of Rochelle salts, and dissolved in 1000 parts of water; to this 60 parts of best caustic soda, containing about 70 per cent. NaO, is to be added, when a clear solution of copper will be formed.

The object to be coppered is to be cleaned with a scratch-brush in an alkalino-organic bath, attached as a cathode, immersed in the coppering bath, and treated with the usual precautions, when it will become rapidly coated with an adherent film of metallic copper. As the bath gradually loses its copper, oxide of copper, as above prepared, should be added, to maintain it in a condition of activity, but the quantity of copper introduced should not ordinarily exceed that above prescribed as compared with the quantity of tartaric acid the bath may contain. If the quantity of copper notably exceeds this proportion, certain metallic irisations are produced on the surface of the object. These effects may be employed for ornamental and artistic purposes. According to the time of the immersion, the strength of the current, and the pro-

portion of copper to the tartaric acid, the iridescences may be produced of different shades and tints, which may be varied or intermingled by shielding certain parts of the object by an impermeable coating of paraffine or varnish, while the iridescent effect is being produced on the parts left exposed. All colors, from that of brass to bronze, scarlet, blue and green, may be thus produced at will. If it be desired to deposit nickel the only modification of the above process requisite is the substitution of precipitated oxide of nickel for the oxide of copper, produced by precipitation as above mentioned. In the above process it will be observed that the introduction of sulphuric acid into the bath is avoided, at least except in such insignificant quantities as may still adhere to the precipitated metallic oxides.

A Filler for Porous Hard Woods.—Use boiled oil and corn starch stirred into a very thick paste. Add a little japan and reduce with turpentine. Add no color for light ash. For dark ash and chestnut use a little raw sienna; for walnut, burnt umber and a slight amount of Venetian red; for bay wood, burnt sienna. In no case use more color than is required to overcome the white appearance of the starch unless you wish to stain the wood. This filler is worked with brush and rags in the usual manner. Let it dry forty-eight hours, or until it is in condition to rub down with No. 0 sand paper, without much gumming up, and if an extra fine finish is desired, fill again with the same materials, using less oil but more of japan and turpentine. The second coat will not shrink, it being supported by the first coat. When the second coat is hard, the wood is ready for finishing up in any desired style or to any degree of nicety by following up the usual methods. This formula is not intended for rosewood, and will not be satisfactory if used therefor.—*T. F. Page, in the Coach Painter.*

ENGLISH PRINTERS' DEVICES.

Bydell, living at the sign of our Lady of Pity, took a female figure pouring from one hand Gratia, and from the other Charitas. Copeland, residing at the Rose Garden, garlanded his monogram with roses. Rastell, of the Mermaid, quartered that fabulous marine animal in his device. Lawrence Andrew, at the Golden Cross, contrived a small pun out of the cross of St. Andrew. Scholar, of Oxford, displayed a volume wide open. Hugh Singleton took a single tun for his emblem, and called his dwelling "The Golden Tun." William Middleton put "W. M." in the middle of a tun, with supporting angels on each side. Richard Grafton assumed a grafted tree growing out of a tun, with the motto, "Receive the engrafted word." William Norton inscribed a tun with the syllable "Nor," which served as a root to a full-blossomed sweet william. William Griffith followed on the same track, with a griffin holding a sweet william in its mouth. Richard Harrison used a sheaf of "rye" surmounted by a full "sun," and resting on the head of a "hare." The Barkers exhibited a man barking a tree. Thomas Pavier pictured a pavior at work, with the motto, "Thou shalt labor till thou return to dust." Dexter strove to mingle piety with punning in a right hand pointing to a flaming star, with the legend, "Deus imperat astris." John Wight used his own portrait, surmounted by the words, "Welcom the Wight that bringeth such light." Reynard Wolf pressed a fox and wolf into service as supporters. John Day surpassed his contemporaries in taste as well as skill with his labored device of a landscape illuminated by a rising sun, while in the foreground a sleeping figure is aroused by an angel, and the whole pointed to the dullest understanding by the words, "Arise, for it is Day." Garret Dewes pictured a house where two persons in a garret threw deuce at dice; and the joke could hardly be worse if it is true that his name was not "Garret," but Gerard.—*Paper and Print.*

All of them the Highest Given, at the Australian World's Fair, Melbourne, 1880-81

THREE AWARDS OF FIRST DEGREE OF MERIT—for Copying, Black and Colored Inks, respectively.

ONE AWARD OF THIRD DEGREE OF MERIT—for Mucilage. ☞ This last, although of the Third Degree, was the Highest and *ONLY* Award made for Mucilage.

No other American Inks received a higher award than the Third Degree of Merit.

CARTER, DINSMORE & CO., Boston and New York.

BYRON WESTON

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST and ONLY AWARD** given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition*, *Massachusetts Charitable Mechanics' Association*, *Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission*, *Medal of Progress American Institute*, *1877*, *and Medal of Improvement and Progress*, *Boston*, *1878*. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

☞ **Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.**
Each sheet is water-marked with name and date.

VOL. IX.---NO. 26. NEW YORK, JUNE 30, 1881. WHOLE NO. 314.

Correspondence.

PHILADELPHIA NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

PHILADELPHIA OFFICE OF THE LOCKWOOD PRESS,
407 Walnut Street,
PHILADELPHIA, Pa., June 29, 1881.

Mr. Kimball, of L. Prang & Co.'s Philadelphia agency, has shown us the new designs for Christmas and New Year's cards for the season of 1881–1882. The line is larger than ever and shows marked improvement on last season in originality of conception and skill in execution. Exclusive of the prize cards, the line for Christmas alone is in thirty-four numbers; but as many of these are put up in four different forms, the total is by that much multiplied. With the exception of five or six designs, the collection is entirely new and includes some that were in the prize competition. The prices range from two cents to one dollar per card at retail. The reports and criticisms relative to the prize cards which filled the papers immediately after the award leave but little to be said now, and I will pass them for the present. All will remember the great success attending the "Easter Dove" brought out by this firm, and I predict a still greater "rush" for its "Christmas Dove," which will be produced in a similar style. There are several new humorous designs—cats, frogs, owls, &c.—which are fine in their way.

Some of the other most noticeable styles I will mention. No. 911 is "Baby Elephant" and the "Modern Santa Claus." The former shows the old lady presenting her baby with a Christmas present in the shape of a toy elephant on wheels; the latter represents a portion of a carriage from which is alighting a lady who has just returned from shopping, and near the door stands her colored footman, who is absolutely loaded down with toys of every description, from a bycicle to a toy drum. No. 907 is a new gilt horseshoe, with a variety of flowers (four designs)—a very charming card. No. 915 is "Christmas Carol" and "Christmas Greens," by F. S. Church—very striking. No. 917 shows four baskets of different shapes placed carelessly upon cushions and each basket filled with choice flowers. No. 919—winter landscapes, vases and plaques—is very beautiful and original. No. 920 is Christmas morning (children), &c.; the three designs in this set will surely remove the impression that L. Prang & Co. do not produce good faces. No. 923 shows two new designs in birch bark ornamented with bright flowers. No. 924, fans with silk fringe and cord and tassels. No. 925, two designs, roses and pansies, by Mrs. O. E. Whitney; and I predict for this card a sale equal to the No. 5 valentine with its unequaled azalias. No. 927, Love, Faith and Charity, by R. G. Birch. No. 928, Birds in Winter, by W. Hamilton Gibson. No. 929, Christmas daisy and Christmas bells (children). These cannot be excelled. The faces are charming, natural and lovable. I do not know the artist; but think the pictures make up one of the finest sets in the line. No. 932, Christmas Bubbles and Awaiting Santa Claus, is also much to be admired. No. 933, Christmas bric a-brac, in two designs, rich in color, and the artist's name should produce a sale (Thomas Moran).

If space permitted I should like to call attention to the other designs and give those mentioned a more detailed description. Mr. Kimball informs me that sales in his territory are more than double those of last year, and in view of this fact he expects to have his hands full. He has urged me to use my influence with the Canadian weather prophet to increase the length of the days to thirty hours instead of twenty-four; I don't think it can be done, but am certain Kimball will need it. JULES VIENNOT.

BALTIMORE NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BALTIMORE, Md., June 28, 1881.

Trade has improved but little here since I last wrote you, and nine-tenths of the houses are busy taking stock, to ascertain how much money they have made or lost during the past season. I think, however, I can safely say that with most of the members of the trade, the balance has been on the "make" side of the ledger, as everyone seems in good spirits—a sure indication that times have been the reverse of bad.

Piled upon a pier on Light street wharf a few days ago, I noticed a number of heavy bags, the shape of which attracted my attention. The end of one of the receptacles being open, I had no difficulty in finding that they were packed with books. A closer inspection revealed to me the fact, that the books were a lot of United States reports from the various departments. Each volume was in its original cover, as when it left the government printing office at Washington. All were in good condition, being in fact new, for some were reports for 1879 and 1880. The lot aggregated about five hundred volumes. These books are sent by the general government to the various representatives of Congress for distribution. This lot had evidently escaped, for a tag at the end of one of the packages bore the address of a prominent paper manufacturing firm here, and a memorandum on the same card showed that 1,619 pounds of carefully compiled statistics were going to the paper mill for 2¾ cents per pound for the paper and ½ a cent per pound for the backs. The books were shipped to this city from the eastern shore of Maryland.

The novel ceremony of blessing a business building was witnessed in this city on Wednesday last, when Rev. George Schauer, the principal of the Redemptorists, preceded by two acolytes, went sprinkling holy water through all the departments of Kreutzer Brothers' new publishing establishment on North Calvert street, within a stone's throw of the Battle Monument. Kreutzer Brothers, it will be remembered, had to vacate their old quarters in order to make room for the new post office. Their present structure is built of Baltimore pressed brick with stone trimmings. It is four stories in height, 29 feet front and about 100 feet deep. On the first floor, in front, is the store of the firm. Immediately in the rear of this is the press room, where are a large Wharfedale two-feeder press for the *Katholische Volks-Zeitung*, an Adams double medium press, 24 by 38 inches, for book work, and a Babcock press, 20 by 26 inches, for job work. In the rear of the press room is the engine room, and in the rear of that is the coal bin. On the second floor, the editorial rooms occupy the front portion. Immediately behind these rooms is the job printing office. The third floor contains in front the rooms of the clerks connected with the office; in the middle, the mail room, and in the rear the composing room. The fourth floor is used for the storage of printing paper, which is taken up from the basement below by a steam elevator. On the occasion of the dedication of the building, Barbara Kreutzer, widow of the late Christopher Kreutzer, presented $500 to St. Anthony's Orphan Asylum, and announced her intention to continue the same annually. She also presented the builder of the structure with a gold watch and $500.

The School Board of this city has received nine bids for the supplying of the school desks for the ensuing scholastic year, but the award has not as yet been made. The Board has also advertised for proposals for books and stationery, to be opened on Friday next.

John B. Piet's latest publication is the second series of "Patron Saints," by Eliza Allen Starr. It is a handsome quarto volume, of nearly 500 pages, beautifully illustrated, and bound in silk muslin, lettered in black and gold. This makes the second or third volume from the Piet press within the past month, and I understand several more are on the way, and will shortly make their appearance.

Oliver Braden, representing Thomas S. Dando & Co., Philadelphia, has been in town the past

week with a splendid line of holiday goods, comprising Christmas, New Year and birthday cards; also a handsome lot of photo albums and other novelties. Among his Christmas cards are found some of the best description, viz., De La Rue's full line of hand-painted French, German and English subjects in great variety. Mr. Braden was this time, as in his past visits to Baltimore, favored with large orders from the trade.

Prang & Co.'s energetic representative, J. R. Hope, is also in town with a full line of Christmas and New Year's cards, embracing all the new and novel designs for the coming season. The prize cards of the firm are far superior to those of last season, and Prang & Co. deserve great credit for their enterprise.

The Board of Public School Commissioners of Baltimore city has adopted the Moore patent pencil-holding slate in place of the Hyatt wire-bound slate. It has also added to its list of requisites the New York Crayon Company's chalk crayon.

The pencil sharpeners, manufactured by Geo. A. Ogle, have made good progress in the stationery market and continue to grow in popularity.

J. M. Dulaney, of W. J. C. Dulaney & Co., stationers and book sellers, is again out for the second branch of the City Council in the Twentieth ward. His chances of success are good. J. M. Denny, a member of the School Board, aspires for the first branch of the Council for the same ward.

The following named representatives have been here within the past few days: George A. Coolidge, of the Heliotype Printing Company, of Boston; Lee Adler, of Kaufman & Co., New York; R. H. Stuart, of Stuart Brothers, Philadelphia; J. V. Smith, of the New York Tag and Label Manufacturing Company, New York; Z. A. Devoll, of the Noscochague Manufacturing Company, Philadelphia, and Frank Loehr, of Loher & Koerner, New York. W. P. M.

BOSTON NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

BOSTON, Mass., June 27, 1881.

The stationers report an unusually good trade during the past week—a trade better than its average for this time of the year. The continued cool weather has tended to somewhat change the current of business, many persons apparently having made up their minds to remain at home and pursue the even tenor of their luxurious way. No doubt the cool weather has interfered with the plans of many people. But business seems to be the gainer by it.

Hooper, Lewis & Co., Winkley, Thorp & Dresser, and other leading dealers and manufacturers tell me that the demand for blank books and staple stationery is excellent, even for June, one of the dullest months in the year. This demand is attributed to the absence of the usual volume of trade last spring. Among the jobbers the situation in this respect is quite encouraging and is a good thing in the way of bridging over a dull period of the year.

Trade is, in a few words, at least 25 per cent. better than it was at the close of April, notwithstanding the decidedly dull spells that have been experienced in the past two months.

Dennison & Co. still continue to have a good run on the specialties which they deal in. There is no end to the styles and varieties of their tags, and their imported tissue papers meet with a great sale, the demand being almost unlimited. The tissue papers imported by this firm deserve special mention. Their colors stand unsurpassed. I know of no concern in the United States that can produce the reds, the greens, &c., equal to those produced by mill 39—*Labore, non astutia.* The fabric of which these tissues is composed is also very fine and firm, and this is an element of strength which renders them very desirable. The uses to which Dennison's tissues can be put are almost numberless. This firm also reports a good trade in all of its other lines of goods. Reports from its numerous agencies are of the most confident character, and a large fall trade is expected. In fact this tone of trade is characteristic of the reports received generally by dealers in stationery and fancy goods.

King & Merrill, 29 Hawley street, report an increasing demand for their "Nonpareil," "Office" and fine Cumberland lead pencils and office pens. The last five weeks attest to the largest business this house has done since it went into the trade. This establishment also keeps a large and well selected stock of blank books and stationers' goods.

Ward & Gay, Devonshire street, find no fault with trade for the month of June. The multiplication of styles of papers and envelopes seems to have created an increased trade—which shows that buyers want a change. The public taste easily and quickly tires of "old styles." Something new and fresh is in demand all the time. There is nothing like novelty, bordering even on to the unique.

Dealers in cards, I hear, are preparing to deluge the market with new styles in the fall for the winter trade. The card craze, it would appear, is only at its minimum. Bromfield street continues to be the headquarters for cards.

William Walker, formerly with Lawrence, Adams & Co , has associated himself with Gunn & Bliss, printers, Nos. 30 and 31 Hawley street, and has charge of the new stationery department of its business. The new firm is now Gunn, Bliss & Curtis. One of the finest and most artistic specimens of wood engraving and printing, with varnished face, in the Boston Directory for 1881, was executed by this firm. The firm reports a pressure of business, its presses running day and night.

Samuel Hobbs, for nine years connected with the late firm of Lawrence, Adams & Co., having purchased considerable of the stock of that sold-out firm, now continues the business at the same place. L.

CHICAGO NOTES.

[FROM OUR REGULAR CORRESPONDENT.]

WESTERN OFFICE LOCKWOOD PRESS,
8 LAKESIDE BUILDING, CHICAGO, Ill., June 25, 1881.

H. Hartt has just put up a web press for the Detroit *Post and Tribune.* One is also going into the office of the *Star*, Washington, D. C. On his return trip he expects to make arrangements for supplying one to the *Courier-Journal*, Louisville, Ky., making three large and important contracts during the month.

W. F. W. Hall, just in from a trip, quotes me the following large orders for the MacKinnon pen. In Kansas, six dozen; Missouri, three dozen; Iowa, four dozen, and Western Illinois, eight dozen, making a total of twenty-one dozen.

Tuerk Brothers & Johnston have just received from Tuttle & Co., official printers aud stationers for the State of Vermont, an order for one of their largest-sized motors. The firm is also now engaged in building one each of the same size for the Burlington *Hawkeye* and the Hawkeye Printing Company, Burlington, Ia.

Dunwell & Ford, 50 Madison street, are hard to beat at engraving or illuminating. Their work must be seen to be appreciated.

G. B. H.

AQUEOUS SHELLAC VARNISH.

About the solution of shellac in water by means of borax, Dr. Geissler makes the following remarks: A varnish for covering maps, photographic prints, &c., can be readily prepared, as I have found by experiments, by merely shaking together two parts of a saturated solution of borax and one part of pulverized shellac, applying no heat. Solution will be effected in two or three days. In three parts, however, the shellac is easily soluble. Bleached shellac must be preserved under water, and must be dissolved immediately after being powdered; for if the powder be exposed to the air for several days, it will dissolve only with great difficulty, and perhaps not at all. If in preparing the varnish a higher temperature than 50° or 60° C. is employed, the liquid is apt to assume a faint reddish color; the finished varnish, however, bears heat very well. Now, this varnish may not only be used for rendering pictures, prints, maps, &c., glossy, but it forms an excellent starch gloss. In fact, this varnish will be found much more adapted for laundry purposes than any of the starch glosses found in commerce.—*Pharm. Centralle.*

BLEACHING IVORY.—An English paper gives the following as a receipe in Sheffield for bleaching ivory for cutlery handles. The mode of procedure is as follows: Place, say, 2 quarts of peroxide of hydrogen in a stone pot, adding 4 ounces liq. ammon. fort. 880°, immerse the handles, and put over a common shop stove for twenty-four to thirty hours; the handles are then taken out and gradually dried in the air, not too quickly, or they would split. The deep color of the ivory is removed and a beautiful pearly-white ivory results when polished. The ivory is previously treated with a solution of common soda, to get rid of greasy matter and open the pores.

STEEL-FACED COPPER PLATES.—A new method of depositing a film of steel upon a copper plate for printing has been invented by Herr Böttger, professor of chemistry, of Frankfort-on-the-Maine. One hundred parts of ammonia-ferrous sulphate, together with 50 parts of sal-ammoniac, are dissolved in 500 parts of pure water, a few drops of sulphuric acid being added to acidulate the solution. The copper plate is connected to the negative pole of a battery of two or three Bunsen elements, an iron plate of equal size being employed as an anode. The solution is maintained at from 60° to 80°. The deposit of iron is of a hard, steel-like quality, and is very rapidly formed.

Charta Bombycina, or cotton paper, which preceded linen paper, was discovered in the empire of the East towards the end of the ninth or the beginning of the tenth century. Its construction was the first transitory step from vellum and parchment. The most ancient manuscript in cotton paper with a date is in the National Library in Paris. It bears date 1050; another in the Emperor's library in Vienna bears the date 1095. Manuscripts in cotton paper without a date are much more numerous than those with a date; and Father Montfaucon, who is a great authority on the subject on account of his diligence and the extent of his researches, says that most of these undated cotton paper manuscripts belong to the tenth, and even the ninth century.

OLD BERKSHIRE MILLS

DALTON, MASS., U. S. A.

One party writes: "The two hundred RECORD BOOKS, for 83 of the 99 Counties, now on exhibition at the Iowa State Fair, at Des Moines; and all, but four (!) of them, made from your 'OLD BERKSHIRE MILLS LINEN LEDGER,' Medium, 40lb., make a splendid show."

[The above cut is a fac-simile of the wrapper used on the Linen Ledger Paper.]

We will pay for any book rejected on account of fault in the paper. Send for Samples, test them in comparison, and see that your books are made from paper thus water-marked.

CEMENTINE.

WE desire to call attention to a new article which we are just now introducing to the trade. It is a liquid glue, cement and mucilage combined. In our own business we experienced so much difficulty in finding an adhesive that would make our labels adhere to the tin cover of the Hektograph, that we gave a commission to one of our most distinguished chemists to compound for us an article which would answer our purpose. After months of labor the result has been the production of an adhesive so far superior to anything heretofore made, that we have decided to manufacture and offer it for sale, and are now ready to supply it in any quantity. It is without doubt the best article of the kind for family and general use ever offered to the public. For repairing China, Glassware, Furniture, Rubber, Leather, Books, Billiard Cues, or pasting labels upon tin or other metal or for any use where glue, cement or mucilage is required, it is unrivaled. For warm climates we make an article expressly adapted for use there. We supply it by the gallon or barrel, and for family use it is put up in bottles, with brush, at 25 cents. Samples will be sent free to large consumers.

LIBERAL DISCOUNT TO THE TRADE.

General Manager, Chicago.

Trade Novelties.

[We will be glad to receive samples of all novelties issued in the trade, and will notice all such which possess merit free of charge. It is desirable to accompany descriptions with cuts whenever possible.]

OFFICE INDEX LETTER FILE.

The cut illustrates Kletzker's Office Index Letter File, manufactured by Albert J. Kletzker, St. Louis, Mo.

The filing box has a hinged cover as usual. At the back (inside) of the box are permanently attached the alphabetical or numerical division sheets, between which are placed the sheets of paper, &c., which are desired to be filed away. These division sheets are folded twice, so as to form each sheet with a square back, with a distinct space left between the sheets, so as to be readily and permanently attached to the inside of the back of the box. These division sheets are striped with glue or mucilage for attaching permanently smaller matter, such as postal cards, &c. A spring or clip fastened to the top and bottom sides of the box is provided, which bears on top of the matter filed, so as to retain the same in its proper place, and at the same time allow for ready removal, when required, by holding up the clip with one hand when the half lid or cover is open.

This file or case is made in a neat, substantial manner; it is self-indexing and self-binding at the same time. Any letter can be referred to without taking out or disturbing other filed matter. The file will hold 1,000 letters securely, and keep them clean and free from dust. It is not necessary to take out and replace new indexes or filed matter into other cases. Letters can be taken out or replaced at pleasure without tearing or mutilating the papers. The index leaves are fastened together in the case. When filled, the file can be put away in any position for future reference.

NEW PATENTS.

No. 243,065. Slate Pencil Sharpener.—Chas. L. L. Emery, Biddeford, Me.

No. 243,068. Cardboard Cutting Machine.—Philipp Hake, Hoboken, N. J.

No. 243,096. Toy Piano.—Edmund C. Bailey, Chicago, Ill.

No. 243,110. Process of Engraving on Glass, &c.—Samuel H. Crocker, Railton, colony of Tasmania. Patented in English colony of Victoria, November 8, 1880.

Process of engraving on glass or glassy surfaces by drawing thereon with a hot pen or with any other heated drawing instrument, which melts and maintains fluid an ink capable of resisting the subsequent action of fluoric acid.

No. 243,120. Toy.—Charles M. Gormly, Pittsburg, Pa.

A rotary humming toy, consisting of a shell, of any desired form, having one or more sound-producing openings therein, in combination with interior connecting tubes, passing through the shell on either side of its centre, and double or endless cord.

No. 243,158. Toy Whistle.—Charles E. Rector, New York, N. Y.

In a whistle the combination of a tube, an enlargement placed at the end thereof and at an angle thereto, having an aperture for the escape of air, and a piece of cork or other substance placed in the bulb or enlargement, for the purpose of causing the whistle to give forth a trilling sound.

No. 243,193. Hanging for Walls.—Frederick Beck, New York, N. Y.

A new article of manufacture consisting of cotton velvet or velveteen backed or lined with paper or other equivalent material and embossed or printed.

No. 243,194. Game Board.—Albert Benson, Melrose, Mass.

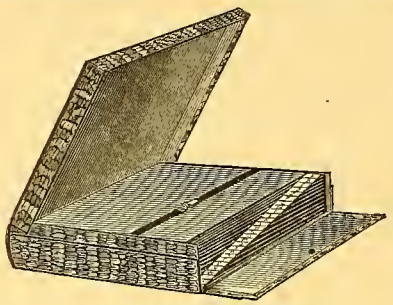
No. 243,197. Envelope Machine.—Louis P. Bouvier, Toronto, Ontario, Canada, assignor of one-half to John Fitzallan Ellis, same place.

No. 243,221. Liquid Stamp-Canceling Device.—Armistead M. Darrell, Washington, D. C., assignor of one-half to Alexander M. Kenaday, same place.

A stamp-canceling device consisting of a reservoir handle and a cap, provided with a dropper tube, a spring-actuated valve, and a recess filled with fibrous blotting material, the stem of the valve projecting beyond the outer end of the tube, so that, on striking the device upon the face of a stamp, a limited quantity of liquid to destroy the stamp is deposited thereon and spread.

No. 243,248. Combined Ruler and Rotary Blotter.—Arthur R. Hall, Prompton, Pa.

The case of a rotary blotting cylinder, made of sheet metal concaved and flanged to receive



File Filled and Open.

the roller or blotter cylinder, extended rearwardly to form a handle, and provided in front with a rule or straight edge supported on side flanges.

No. 243,255. Pen Holder.—Daniel Hepp, Chicago, Ill.

No. 243,319. Telescopic Holder for Pens.—Jas. B. Smith, New York, N. Y., assignor to Aikin, Lambert & Co., same place.

In a telescopic holder, the combination, with inner and outer barrels, a slide working between them to carry the pen or other article, and a sliding rod or stem working within the inner barrel, of sheaves or pulleys pivoted between the inner and outer barrels, one near each end thereof, and a chain or other flexible connection passed arouud both sheaves or pulleys, and attached at both ends to the slide and connected with the rod or stem.

No. 243,342. Process of Producing Writing, &c., on Paper, and the Manufacture of Paper Therefor.—Alfred Ford, 22 Gloucester Crescent, Regent's Park, county of Middlesex, Great Britain.

1. A method or process of producing writing or other marks on paper, consisting in imparting to the paper the property of producing or developing (when subjected to moisture) dark lines or marks, and applying to the surface of paper so made or prepared, by means of a pen or other instrument, water or other liquid not being either a strong acid or an alkali or an alcohol. 2. As a new article of manufacture, paper bearing the appearance of ordinary writing paper, but having within it the elements of ink capable of development by water or other liquid applied to the surface of such paper. 3. The combination, with paper, of iron and tannin, or its equivalent, whereby such paper is rendered capable of producing or developing dark lines or marks by the application of moisture to its surface. 4. As a new article of manufacture, paper containing iron and tannin, or its equivalent, not in combination, but which may, by the application to the paper of moisture, be caused to combine in such manner as to produce on the paper writing or other marks.

DESIGNS.

Nos. 12,323 and 12,324. Font of Printing Type.—Herman Ihlenburg, Philadelphia, Pa., assignor to MacKellar, Smiths & Jordan, same place. Term of patents, 14 years.

No. 12,329. Font of Printing Type.—August Will, Jersey City, N. J., assignor to David Wolfe Bruce, New York, N. Y. Term of patent, 14 years.

CHINESE PRINTING.

The blocks are all of the same size, about eight inches by twelve inches, and about half an inch thick. Each block represents two leaves or four pages of the book, being engraved on both sides. The blocks for a complete work can thus be stowed away in a very small compass. The cost of engraving a page of these wooden blocks is said to be but little more than the expense of setting up a page of Chinese type and preparing it for the press. An edition of one copy can be printed if no more are required, and thus the expense of keeping a large stock of printed books on hand, some of which might eventually have to be sold as waste paper when they grew out of date or revisions had to be made, as is the case among ourselves, is entirely avoided. Any errors or misprints that may be discovered can as a rule he corrected on the blocks with but very little trouble. A skillful printer can print by hand 5,000 leaves of two pages each in a day, using no press or machinery whatever. He supplies his own tools and receives as wages about 25 dollar cents a day. The paper ordinarily used is white and of the best quality, although a yellowish kind is also made use of at a reduction of 20 per cent. on the selling price. The books are bound in the usual Chinese style and fastened with white silk thread. They present an appearance which satisfies the taste of the most fastidious native.—*Nature.*

Simple Method to Toughen Glass.—The following receipt for keeping lamp chimneys from cracking is taken from the *Diamond*, a Leipzig journal devoted to the glass interest: Place your tumblers, chimneys, or vessels, which you desire to keep from cracking, in a pot filled with cold water, add a little cooking salt, allow the mixture to boil well over a fire, and then cool slowly. Glass treated in this way is said not to crack even if exposed to very sudden changes of temperature. Chimneys are said to become very durable by this process, which may also be extended to crockery, stoneware, porcelain, etc. The process is simply one of annealing, and the slower the process, expecially the cooling portion of it, the more effective will be the work.

The Allssoff machine, for hand printing, is being rapidly adopted in Russia, the native land of its inventor. It is larger than the type writer, and it does not do its work so fast. Both hands and feet are employed iu operating it. The hands turn a handle round a dial on which the letters are spaced, and the feet move a treadle. When the handle is stopped opposite a letter on the dial, that letter is ready to make its impression on the paper, which is pressed upon the type by the action of the treadle. The peculiar advantages of this Russian device are thus summed up by the engineer: "It can be made to print in six complete alphabets, or in four alphabets and the necessary signs and figures. Moreover, the impression is made in printer's ink, and if it is dusted with bronze powder, from twenty to twenty-five proofs can be obtained from it in an ordinary copying press."

STAFFORD'S UNIVERSAL WRITING INK!

A PERFECT BLACK WRITING FLUID.

It contains no gum, and flows very freely, making a smooth, even mark.

It positively will not corrode Steel Pens.

Writes darker than any known ink, and turns at once jet black.

Being a perfect chemical solution, it cannot thicken or deposit a sediment.

Never moulds in any climate. Freezing does not injure it.

Never changes in color or consistency while in use in the inkstand.

Resists Acids. Is more permanent than any other ink.

It will be found more economical than any other ink, as it can be used to the last drop.

One of the most valuable and remarkable features of this Ink is the extreme rapidity with which it dries on the paper, it being seldom necessary to use a blotter. This quality should recommend it to bookkeepers.

In the United States, this Ink has completely superseded the old fashioned pale black inks, and has to a great extent taken the place of the faint green writing fluids.

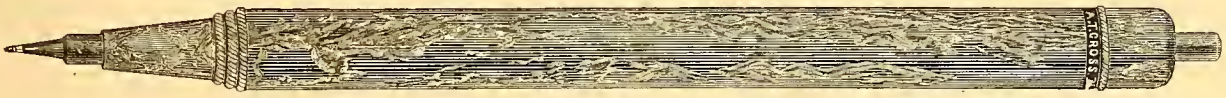
Mr. J. ADEE HEPSWITH, the eminent English Chemist, says:

"I find S. S. Stafford's Universal Ink to be proof against all acids; and, from my knowledge of its ingredients, I believe it to be the most permanent ink in existence, as it cannot **rust out** like **other inks** that are prepared from **galls** and **iron.** As it seems to be entirely **free from any tendency** to **thicken** or **corrode steel pens,** and is **BLACK AT ONCE,** I cannot but regard its invention as a valuable discovery."

S. S. STAFFORD, Chemist, No. 218 PEARL STREET, NEW YORK.

PERFECTED STYLOGRAFIC.

The original and genuine Pen. Warranted the best made. Thirteen Patents granted to **A. T. CROSS,** the last, June 20. 1880, being the most important and giving the name **Perfected.** All cuts are exact size.



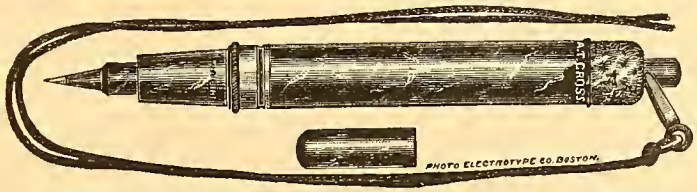
MAXIMUM.—Holds most ink of any pen made; tires the hand less than smaller barrels. Fits Hambler's Pocket. Same price as Long.

LONG.—The famous Desk Pen. Extra long. Holds most ink, except the **Maximum.**

SHORT.—Most widely known and sold heretofore; but Maximum and Long are much better for desk or Hambler's Pocket. So this will be largely superseded.

Thirteen patents granted; seven more applied for; more genuine improvements; better record; more styles; larger stock; more thoroughly protected by patents than all rivals combined.

☞See Descriptive Circulars.



GIANT, with Cord and Gold Ring, same price as Short.

Dealers and agents supplied with wood, glass and paper signs, placards, circulars, leaflets and cuts. We make both largest and smallest Pens, all of which will have the new improvements.

☞See Descriptive Circulars.

BRADSTREET'S

A JOURNAL OF

Trade, Finance and Political Economy.

THIS JOURNAL covers a ground the extent of which is occupied by no other publication, and forms an invaluable work of reference to the merchant and manufacturer.

REGULAR AND TRUSTWORTHY CORRESPONDENCE, furnished by experts, expressly for this journal, from all the principal trade centres of this country, is embraced in its columns.

THE CONDITION AND PROSPECTS of the various markets are carefully recorded, and the possibilities and opportunities for trade are demonstrated as by no other medium extant.

QUESTIONS OF COMMERCIAL INTEREST and importance are fully and ably discussed editorially, without prejudice, by some of the most responsible writers and statisticians of the time.

THE BUSINESS CHANGES occurring in the United States and Canada—such as failures, dissolutions of partnerships, chattel mortgages, etc., etc.—are printed in each issue, and the list is more complete and comprehensive than can be obtained through any other source.

THE CIRCULATION OF THIS JOURNAL being among the best merchants, manufacturers, and banking institutions of not only this country but many foreign, it presents an excellent advertising opportunity to a limited number of first-class banks, corporations, and business firms.

THE BRADSTREET COMPANY,

279, 281, 283 BROADWAY, NEW YORK.

Manufactured and for sale by

GEO. C. TAFT, 31 Hermon Street, Worcester, Mass., U. S. A.

Trade Gossip.

All new goods and designs which are not, strictly speaking, "Novelties" will be noticed under this head. The trade are requested to forward descriptions with samples in order to secure proper notice.

Allen C. Kerr, of Pittsburg, Pa., is expected in town next week.

D. N. Morrison, bookseller and stationer, Philadelphia, has sold out.

Chas. Dimond, dealer in notions, Providence, R. I., has made an assignment.

Rave & Speth, lithographers, New York city, have been succeeded by Speth & Co.

The stock of J. L. Strickler, dealer in wall paper, Pittsburg, Pa., has been damaged by fire. Insured.

J. D. Gill & Co., paper manufacturers, Pepperell, Mass., have sold their paper mill to J. A. Osborn & Co.

From the large sales of De La Rue's cards reported by Myers Brothers, it appears that these goods are being appreciated.

F. N. Hawkins has been admitted to the firm of Timms & Co., printers, Toronto, Ontario, Can. The style is now Hawkins, Timms & Co.

Metzger & Jordan have got out a new thing in fans which is likely to sell well. This firm lately removed to 104 Chambers street, the change being required by the growth of its business.

Thos. S. Dando & Co.'s travelers are now on the road with a complete line of their novelties. Among the most salable things they offer this season is the Christmas fan. Large orders are coming in for this particular novelty from all districts.

Among the visiting members of the stationery trade in the city this week are, Mr. Courts, of Clark & Courts, Galveston, Texas; Alonzo White, Hartford, Conn.; Mr. Merrill, Merrill, Hubbard & Co., Indianapolis, Ind.; J. H. E. Stelling, Charleston, S. C.; Ernst Besser, of E. Besser & Brother, Buffalo, N. Y.; Amos Pettibone, of Culver, Page, Hoyne & Co., Chicago, and a representative of M. J. Love & Co., Baltimore, Md.

Max Griebel, of L. Prang & Co., who left for Europe some time ago for the benefit of his health, is still very ill. A communication, dated at Berlin, was received from him on Saturday ast in which he stated that his physician believed it necessary for him to try the influence of the water cures at Kissingen, and, therefore, instead of returning by July 1, he would not be able to reach home till September.

Some question having arisen as to who constituted the firm of Doxey & Co., San Francisco, and it having been reported that Samuel Carson was "probably the company," William Doxey disclaims having any partner and has duly acknowledged and filed with the county clerk at San Francisco a certificate to the following effect: "I hereby certify that I alone am conducting business and constituting a partnership transacting book and stationery business in this State; that its principal place of business is at No. 691 Market street, in the city and county of San Francisco, State of California; that its firm name is Doxey & Co., and that my name and place of residence are signed hereto. San Francisco, May 26, 1881. William Doxey, San Francisco, California."

The Arbitration Committee of the Stationers' Board of Trade lately heard a case growing out of a transaction between Eberhard Faber and J. S. Crews & Co., of Lawrence, Kansas, and decided in favor of the latter. It appears that Mr. Faber consigned to J. S. Crews & Co. some goods on sale to the value of $300 and upwards. Crews & Co.'s store was subsequently robbed, and the Arbitration Committee, under advice of counsel, decided that the loss must be borne by E. Faber, on the ground that Crews & Co. took as good care of Faber's goods as they did of their own and the goods being Faber's property of course he loses them.

A very novel advertising medium is put out by Constantin Schmidt, the Broad street stationer, who is located right in the midst of the "bulls" and "bears." This article is in the shape of a large lead pencil of about three quarters of an inch in diameter, with a sharpened point to write with. The pencil serves as the handle for a fan, which is drawn from the upper end, and on the folds of the fan is told where the "bulls" and "bears" can get their stationery after having made good use of the fan to cool themselves off.

Janentzky & Co., 1125 Chestnut street, Philadelphia, invite attention to their papiermaché plaques, for which letters patent were granted on August 31, 1880. Certain parties are said to be trying to evade the letters patent and to supply the market with a similar article. Janentzky & Co., therefore, give notice that they are determined to protect their rights, and that they will proceed by law to enjoin all infringers, whether manufacturer, dealer or purchaser.

The Subject Volume of the American Catalogue is a complete key to the literature of the American market. The work was first undertaken by F. Leypoldt, in response to a general demand, nearly six years ago, and the first part of the Author and Title Volume was issued in the fall of 1878, the last part being delivered to subscribers early in 1880.

The large increase in the wholesale book, paper and printing business of Tuttle & Co., Rutland, Vt., has compelled that firm to seek additional storage room. It has leased for that purpose a basement 92 by 20, adjoining its present location. This is in addition to the extension which it was compelled to make a year ago.

Thomas March & Co., 919 Washington street, Boston, have just published a neat pocket edition map of Boston, and also guide maps of Nantasket Beach and Revere and Winthrop beaches, made from latest surveys.

W. Howard Bender, bookseller and stationer, Albany, N. Y., doing business under the firm name of E. H. Bender's Son, has sold out and transferred his business to E. H. Bender.

Neuberger, Messner & Co., wholesale dealers in notions, New York city, have dissolved partnership. Mayer Neuberger and Moritz Messner will continue under the old style.

Mr. Corbett, of Corbett & Black, publisher of the *Evening Telegram*, Providence, R. I., has sold out his interest to David O. Black, and has left town.

The Smyth Book Sewing Machine Company, of Hartford, has begun building for its business at the corner of Cushman and Sigourney streets.

N. Bangs, Williams & Co., booksellers and stationers, Providence, R. I., have made an assignment.

Smith, Clendenning & Rees, publishers of the *Constitution*, Keokuk, Iowa, have sold out.

Jacob Clark, publisher, Sydney, New South Wales, is insolvent.

George P. Wells, paper manufacturer, Manlius, N. Y., has made an assignment.

L. W. Coleman, publisher of the *Reporter*, Henderson, Ky., is advertisng to sell out.

A. C. Farley & Co., a well known and enterprising Philadelphia house, solicit the Pennsylvania agency for a staple line of stationery goods.

Mr. Merrill, of Merrill, Hubbard & Co., Indianapolis, William C. Taber, of Taber & Co., New Bedford, Mass., were in town during the past week.

Cussons, May & Sheppard, Glen Allen, Va., publish the "tableted envelope calendar." They are getting out a special edition for the trade, the sheets running to July, 1882.

A fire broke out on Thursday night, June 23, at No. 710 East Fourteenth street, New York, in the manufactory of the Eagle Lead Pencil Company, and caused a damage of $1,000.

On Saturday last a base ball match between the employees of A. W. Faber and those of another stationery house came off at the Elysian Fields, Hoboken. The Fabers were victorious by a score of 17 to 14.

The Xmas cards of John A. Lowell & Co., for which M. A. Reay is agent, are nearly ready for the trade. The designs and execution of these goods are said to surpass anything ever produced in the way of steel engravings.

J. W. Robinson, 21 Thorburn Square, Fort Road, London, S. E., has published a sheet of ready reference tables for printers and stationers. The value and usefulness of these tables are apparent, although they are not applicable to this country.

Last week R. Fideau, 16 Beekman street, filled two large orders for his patented hammocks to go to Spain. Mr. Fideau's mills and factory, at Rockville Centre, L. I., are running day and night to fill the great number of orders for his "Unparalleled" school bags, and no more orders for large quantities can be taken except for August and September deliveries.

J. H. Bufford's Sons report business as being excellent. They have orders in advance for two months, and are buying more machinery to increase their manufacturing facilities so as to keep up with the demand. The house at present shows a rare line of fine gilt French cards and a line of beach scene cards, both of which are in great demand.

Charles L. Downes, 535 Pearl street, New York, has got out a new stylographic pen, which has several novel and commendable features. In this pen the air is admitted at the top without unscrewing the cap, and the valve at the lower end of the air tube admits air into the ink chamber only when the pen is in use for writing. The spring is also protected from the ink. This pen is made in a variety of styles.

A. M. Collins, Cope & Co. have just added to their line of chromo advertising cards Nos. 345 to 352 inclusive, representing among other subjects fishing, shooting, &c. One represents a boy's dream. He thinks he finds a watch, and it suddenly takes legs and walks away. Design No. 290 of the postal card series is designed by J. C. Beard, the winner of the first prize in the recent competition. Set No. 280, entitled "Stock Brokers," is by Harry Beard, brother of J. C. Beard. The design represents stocks rising, falling, and a panic. The card mania is rapidly spreading West. One house in this city says that it has orders on hand for the immediate de-

livery of three and a half million of cards, the bills for which date from August 1.

Wolf Brothers & Wolfram, publishers of *Die Sonne*, Peoria, Ill., have dissolved partnership.

The stock of J. B. Christian & Co., booksellers and stationers, Hope, Ark., has been attached.

Hamburger Brothers & Co., fancy goods dealers, Sydney, New South Wales, are liquidating.

H. P. Hall, publisher of the *Globe*, St. Paul, Minn., has sold out to the *Globe* Printing Company.

D. F. Foley, in charge of the gold pen department of Aikin, Lambert & Co., left for Chicago last week.

Verran & Miller, dealers in wall paper, Quincy, Ill., have dissolved partnership. Charles S. Miller continues.

Whitworth & Bidlack, publishers of the *Republican*, Wichita, Kan., have been succeeded by Sheldon & Bidlack.

J. S. Johnson & Son, publishers of the *Herald*, Almont, Mich., have dissolved partnership. Patterson & Johnson succeed.

Henry Bainbridge & Co have just taken the sole agency for Whitney's inkstands. These goods have not been in the market for several months, and an opportunity is now presented for securing these well known and desirable inks.

The mill of the Pequanneck Paper Company, at Bloomingdale, N. J., was totally destroyed by fire on Friday morning, June 24. The flames originated from the explosion of a lamp in the engine room. The building is owned and the business is conducted by Mather & Co. The loss is $12,000 and is covered by insurance.

On the 11th instant the employees of J. B. Lippincott & Co., of Philadelphia, received a challenge for a game of base ball from the employees of A. W. Faber, of New York. The same having been accepted, the game will take place on the morning of July 4, on the Parade Grounds, Fairmount Park, Philadelphia.

Thos. S. Dando & Co. are offering a fac-simile of the first Christmas card ever issued. It was published in 1846 by Sir Henry Cole, K. C. B., from a design prepared by J. C. Horsley, R. A. When it is considered what an enormous extension the issuing of Christmas cards has undergone in the thirty-four years which have elapsed since that time, this original card cannot but be regarded with great interest and curiosity. It has therefore been reproduced to retail at 10 cents, and we would recommend its being made a feature in every shop window.

The result of the prize competition offered last year by Raphael Tuck & Sons, of London, is shown in the collection now offered by Willy Wallach, their sole agent. The designs for which prizes were awarded comprise eighteen numbers, and form a collection showing the great progress and skill of prominent English artists and the advancement of lithography, which, it is said, has never been equaled by any similar foreign collection. The general collection comprises about one hundred and fifty different series, each comprising from three to six separate and distinct designs. Most of the designs entered in competition for the prizes were secured by the publisher at large expense. In this collection are some of the most novel, artistic and interesting designs which have been shown in the market, and their execution is as perfect as their design is handsome. The best of the designs are also printed on heavy satin and can be used as well as cards for inserting in embroidery, so much in vogue with the ladies.

THE STATIONER.

DEVOTED TO THE INTERESTS OF THE

Stationery and Fancy Goods Trades.

WEEKLY---$2.00 PER ANNUM.

Single Copies - - - - 10 Cents.

NEW YORK, THURSDAY, JUNE 30, 1881.

Advertisements cannot be received for insertion in the current week later than 12 M. on Wednesday. The charge for advertising is 25 cents a line, each insertion. Special terms for standing and displayed advertisements to be had on application.

This journal aims to be a medium of information for and a representative of the interests of every one connected with the stationery and fancy goods trades. It contains a full and trustworthy survey of the market for stationery in this country, in all cases giving the actual prices at which goods can be bought of importers and jobbers in this city, together with a detailed account of novelties in the trade, patents relating to stationery, and current items of interest. A review of foreign markets and accounts of movements abroad will also be furnished, and no pains will be spared to make THE STATIONER a thorough and complete exponent of the trade.

Subscription and postage for Great Britain, per annum..... 12s.

Any information our readers may wish to obtain shall be cheerfully given, and prompt replies will be made to all inquiries addressed to us on any subjects of interest to the trade.

Communications on all trade matters are earnestly solicited. Address

HOWARD LOCKWOOD, Pres. and Treas.
American Stationer Association,
74 DUANE STREET, NEW YORK.

Subscribers to THE STATIONER can be supplied with the best cloth binder in the market. Deliverable at the publication office. Price, fifty cents.

Readers of this paper who avail themselves of the information obtained from its columns, by advertisement or otherwise, are requested to notify their correspondents of the source of their information.

THE eleventh monthly statement of our foreign trade for the current fiscal year shows an excess of merchandise exports for the month ended May 31 of $8,616,859 and for the twelve months of $266,773,866, or an increase of export values of over $104,000,000, as compared with the twelve months ended May 31, 1880. This, too, when values have diminished instead of rising. We consider this a very satisfactory statement of the growth of our foreign trade, particularly when we note that our imports show comparatively little variation.

A CORRESPONDENT has addressed the publisher of THE STATIONER, inclosing a draft which he asks to have distributed in small sums on drafts given to various firms. He then adds: "Get 10,000 booksellers and stationers to deposit with you $25, $50, $100 or more, subject to their drafts for sums like above; charge them $1 each per year; make a profit for yourself and about $50,000 for them, now being paid out for postoffice money orders. See?" Yes, we see. The convenience to the trade, in keeping a deposit always available for draft in small amounts, and thereby saving the cost of money orders, is best judged of by those who are engaged in the business. Whether it would be so convenient or profitable for this office is another matter for consideration, although THE STATIONER is always ready to accommodate its friends to a reasonable extent. We give our friend's suggestion publicity, so that the trade may consider it and express their views upon it.

THE anomalies of our postal laws are very funny. Sometimes the absurdity is due to the construction put upon the statute by the authorities, but as frequently the strict letter of the law is ridiculous. A firm in this city has lately been notified "that as the statute only permits writing upon fourth class matter (for the purpose of identification) of a mark, or number, or name, or letter, it will not be regarded as giving authority to write upon a sample of paper '28x42, 60,' the same not being a number but three distinct numbers and a mark in addition." If the figures are printed or stenciled, we presume that the samples will be permitted to pass. We regard the figures given above simply as a mark of identification; but it will be observed that the distinction is made as to there being three numbers. If the trade can only devise a series of single numbers, or an identifying mark or name which can be made the subject of a symbol or cipher, they will overcome the objections of the postal authorities. Again we say that it is funny.

LAST week we called attention to the fact that the publisher of this paper has established a "Free Library of Reference" of catalogues and price lists of American manufacturers, and we again mention it so that our readers may fully understand its character and objects. This, we believe, is the only thing of the kind in the world. We are frequently asked to give information as to different kinds of goods, and to answer such questions by mail or through our columns necessitates more correspondence and inquiry than we are sometimes able to devote in the frequently limited period before the answer is demanded—especially in the case of personal calls—and at times we are unable to obtain the necessary information. The arrangement of this Library enables any one asking, to get a definite answer at once, with little trouble. Each catalogue or circular is indexed (1) by firm name; (2) by town; (3) by general class of articles; (4) by special articles; and (5) we endeavor to keep in mind specific names of articles. It will be seen these are features which are of great value not only to us but to every person who may want such information as we may be able to supply. No charge, direct or indirect, is made for representation in this Library or for consulting it. We, therefore, invite our friends to avail themselves of its privileges, first, by sending duplicate copies of their catalogues; and, second, by resorting to it for information. Catalogues intended for this purpose should be addressed to the publisher of this paper and marked, "For Library."

ANSWERS TO CORRESPONDENTS.

J. S. M. & Co. ask who makes large size eyeletting machines suitable for heavy work?

Ans.—E. B. Stimpson, 31 Spruce street, New York, and H. L. Lipman, Philadelphia.

E. J. Co. makes inquiry where can materials be had for the new art of decorating? Think it is on the order of decalcomanie, but parties say the pictures are imported.

Ans.—Parties are right. The goods can be had of Palm & Fechteler, 403 Broadway, and of Charles Moller & Co., 35 Maiden lane, New York. Perhaps Janentzky & Co., Philadelphia, can also supply them.

J. J. D. & Co. say we saw an advertisement some time ago of a Perforated Tissue Paper Company, which makes a patent roller, on which you place perforated tissue. Please inform us where to find the company.

Ans.—The Albany Perforated Paper Company is at Albany, N. Y. This is the company referred to.

T. G. & Co., some time ago, wanted to know where to find Hoyt's A B C letter files.

Ans.—We have been unable to discover. Can any one of our correspondents tell us?

B. & Co. recently made inquiry about a stamp canceler, Wm. Simpson patentee.

Ans.—Since former reply we have made further inquiry and cannot learn anything more. Is there one of these cancelers to be had anywhere?

H. T. C. wants to know where he can get a lot of lead pencils stamped, he supplying the dies.

Ans.—This work is done by all of the lead pencil manufacturers, and by addressing either Faber, or the Dixon, Eagle or American companies, our correspondent will be able to find out what he can get them done for. We do not know of any other parties who do this kind of work.

Contracts for supplying the Navy Department with stationery were awarded, on Monday, to Francis B. Mohun at $24,000 and W. H. Dempsey at $3,298.

CHATTEL MORTGAGES.

PEBBLE PAINTING.

Painting upon pebbles is a very ancient mode of decoration, practiced some three hundred years ago by the Venetians, but now almost forgotten, like so many old art industries. The Italians used to work, among other things, very beautiful crests in high relief, parables from the Bible, or mottoes relating to love and war; and exceedingly scarce and valuable such articles have now become. A few remarks on decorating these very common objects of the seashore, now that so old a mode of decoration appears to be coming into notice again, may prove of some interest to those readers in search of something novel for the drawing-room, the boudoir, or "our next bazaar."

Large pebbles, of a diameter of three to four inches, are the most easy of decoration. Care should be taken to obtain the stones as round as possible, for the reason that the rounder the stone, the more even will be its surface. One entire half of the stone should be painted, the other left entirely plain, so as to show the pebble in its original state. Before commencing to paint, wash the article most thoroughly in hot rain water, and in place of soap use soda and washing powder, mixed sufficiently to make a thick foam of the water. When thoroughly freed from every particle of sand or other impurity and well dried, rub the stone well over with fine emery cloth and commence the decoration as follows: Coat that portion of the pebble you require your design to be worked upon with ordinary starch, gelatine, or common size, all according to the nature of the stone, some pebbles being much rougher in texture than others, and allow this to dry (I am now speaking of water-color decoration); then mix the water color with megilp or Chinese white; allow this to dry, and when this is done, apply a thick coat of gum arabic, taking care that the latter is as colorless as possible; lay aside for a few hours, then tint and finish by applying a coat over the whole of the finest Italian oil varnish. With regard to oil painting, the designs must be sketched on in the ordinary manner. The colors should be mixed with a good body color, say Robertson's medium, and thin the colors when necessary with oil of turpentine. Then tint and finish with the color needed, without the flake white, still using Robertson's or any other medium. For rough outline subjects use Sydertype, but with the brush instead of the pen; and when a little relief might be required throw in a few touches of Naples yellow or Chinese white. This latter process will produce some very rich effects, provided suitable subjects are chosen.

Another form of decoration is to blacken the surface of the stone, and when dry to paint a subject requiring entirely white colors, such as the stephanotis, etc. Perhaps the most suitable subjects are landscapes for the large pebbles; crests, college arms, regimental mottoes, etc., for the medium size; and for the smallest stones birds' nests, insects, and flowers, and especially butterflies. China colors can be used, but great care should be taken when firing the stones that the heat be applied as gradually as possible, and the stones allowed to cool very slowly.—*Art Interchange.*

Attention is invited to the new advertisement of Charles J. Cohen, Philadelphia. The house is well known to the trade throughout the United States, and its method of doing business on a clear and equitable basis has won the support of a very large portion of many sections. A great deal of energy has been displayed of late years in enlarging its premises and in preparing at all times to show the latest novelties in both staple and fancy articles. Mr. Cohen is ably seconded in his large undertakings by William L. Bayliss and William Barnard, with a very efficient corps of young men. Mr. Bayliss has been associated with Mr Cohen for sixteen years, and is well known to the entire trade for his ability and affability. Mr. Barnard is at the head of the financial department, a post he has filled with judgment and accuracy for thirteen years. Charles Blankenburg is the foreman and manager of the envelope factory, with which he has been connected since 1866. Mr. Cohen's father and predecessor, the late Henry Cohen, began the manufacture of envelopes by hand more than thirty years ago. Steam power was introduced in 1862, and shortly after Mr. Blankenburg entered Mr. Cohen's factory; his ability soon commanded the highest position in the establishment, and the great product now delivered daily to the warehouses and shipping rooms sufficiently attests his success. Mr. Cohen's envelopes have a wide reputation for excellence of quality and finish.

The "History of a Parisienne," a story of a Paris woman of fashion, by Octave Feuillet, and translated from the French by Charles Ripley, has been published by T. B. Peterson & Brothers, Philadelphia. In the "History of a Parisienne" Octave Feuillet makes a novel out of the materials which he finds in the upper circles of aristocratic society in France. His aim is to show how an accomplished, beautiful and amiable girl may be transformed, by being wedded to a worthless, cynical and depraved husband, into a kind of moral monster, capable of anything and believing in nothing.

Among the visiting members of the trade to the city during the week were, Mr. Van Epps, of Van Epps, & Co., Cleveland, Ohio; Harry Foster, of John A. Lowell & Co., Boston; Edward Niedecken, of H. Niedecken & Co., Milwaukee, Wis.; Mr. Walker, of Maurice J. Loeb & Co., Baltimore; Mr. Krite, of Neuhaus, Krite & Co., St. Louis, and Benj. Barnett, of Shorb & Boland, St. Louis.

Tourists' tablets with flexible covers are a very convenient article for use on a summering trip. They are made and sold by the Acme Stationery and Paper Company. They come in three sizes —commercial note, packet note and Congress letter—and are all made of a good quality of white paper. Another new thing which the same company has brought out is a composition book called "Pretty Stories." It is for the use of new beginners. At the top of each page is a cut of some familiar animal or object, the sight of which at once starts the child's mind upon a train of thought which, by following the printed directions on each page, can be readily written about, and the pretty story is finished soon to the end.

R. G. Hutchinson, 44 Maiden lane, is selling a very ingenious little contrivance in the way of a pocket head-rest for a car seat—a most capital thing for travelers. It is quite portable, occupying a space of only 7x2x3 inches, and it can easily be packed away in a hand satchel.

Market Review.

OFFICE OF THE AMERICAN STATIONER,
WEDNESDAY, June 29, 1881.

THE MONEY MARKET.—The monetary situation was generally characterized by ease, and the prevailing rates for call loans on pledge of good stock collateral were 3@4 per cent. Late in the week some few loans were effected as low as 2½ per cent., but 3 per cent. was the current quotation at the close. In time loans the transactions were not on a very large scale, the ruling figures being 2@4 per cent., according to the date of maturity and the collateral. In the discount market prime names sold at 3@4 per cent. The stock speculation was variable in tone and the fluctuations frequent, although not, save in a few instances, very violent. The government bond market was characterized by a fair degree of activity, but the amount of bonds coming from abroad tended to impart a slight degree of depression to the speculation. In railroad mortgages a moderate amount of business was transacted, and the dealings were well distributed throughout the entire list; the changes in prices are comparatively slight and no violent fluctuations took place during the week; the market, however, was rather feverish and was weaker than for some time past. In sterling exchange the volume of the week's business was quite large and a firm tone prevailed throughout. The posted rates of the prime drawers are: $4.84½ and $4.86½; the actual rates are $4.83½@4 84 and $4.85½@4.86, with cable transfers $4.86¼@4.86½, and prime commercial bills $4.82@4.82½.

THE PAPER MARKET.—Business with the jobbing trade has undergone no improvement during the week just closed, and is chiefly confined to the delivery of goods on orders of last month, new orders being quite limited. Some manufacturers are beginning to be anxious as to their future employment, as is shown by the low figures at which they offer to take orders. We refer more particularly to news, which has been offered during the past week at about the minimum quotation of prices at this time two years ago. While there is more or less cutting in all lines, the low grades of print and wrapping papers have a weak tone, which nothing but a greatly increased demand or a prolonged drought can overcome. Almost every mill is crowded to its full capacity, and as the demand is not sufficient to absorb all of the production, low prices or a surplus of manufactured stock must be the result. The *Tribune* has just renewed a contract for its supply, beginning with July 1, at 6¼c. less 2 per cent. The *Herald* has also renewed its contract, dating from July 1, for six months; but at what figures we are not able to state with any degree of certainty.

THE STATIONERY MARKET.—There is very little animation to be seen this week in the line of strictly staple goods. The thermometer ranging in the nineties, the annual stock taking which many houses in the trade accomplish at this time, and the near approach of the national holiday, which most out of town buyers all like to spend at their own homes, have all combined to make this an extremely dull week. In the fancy goods line there is a moderate trade going on; in fact, we have heard from a few large houses who say that they are driven to their utmost to fill their orders and to keep a supply of stock well ahead. In another week it is more than likely that we shall be able to report a more lively condition of trade. Prices continue about as they have been.

"THE GREAT ROCK ISLAND ROUTE"

Calls your attention to the following REASONS WHY, if about to make a Journey to the GREAT WEST, you should travel over it:

As nearly absolute safety as is possible to be attained. Sure connections in UNION DEPOTS, at all important points. No change of cars between CHICAGO, KANSAS CITY, LEAVENWORTH, ATCHISON or COUNCIL BLUFFS. Quick journeys because carried on Fast Express Trains. Day cars that are not only artistically decorated, but furnished with seats that admit of ease and comfort. Sleeping cars that permit quiet rest in home-like beds. Dining cars that are used only for eating purposes, and in which the best of meals are served for the reasonable sum of seventy-five cents each. A journey that furnishes the finest views of the fertile farms and pretty cities of Illinois, Iowa and Missouri, and is afterwards remembered as one of the pleasant incidents of life. You arrive at destination rested, not weary; clean, not dirty; calm, not angry. In brief, you get the maximum of comfort at a minimum of cost.

That the unremitting care of the Chicago, Rock Island & Pacific Railway for the comfort of its patrons is appreciated, is attested by its constantly increasing business, and the fact that it is the favorite route with delegates and visitors to the great assemblages, political, religious, educational and benevolent, that assemble from time to time in the great cities of the United States, as well as tourists who seek the pleasantest lines of travel while *en route* to behold the wonderful scenes of Colorado, the Yellowstone and Yosemite. To accommodate those who desire to visit Colorado for health, pleasure or business, in the most auspicious time of the year, the Summer season and months of September and October, the Company every year puts on sale, May 1st, at all coupon ticket offices in the United States and Canadas, round trip tickets to

DENVER, COLORADO SPRINGS AND PUEBLO,

At reduced rates, good returning, until October 31st. Also to San Francisco, for parties of ten or more, good for ninety days, at great reduction from regular fares.

REMEMBER, this is the most direct route for all points WEST and SOUTHWEST. For further information, time-tables, maps or folders, call upon or address

THE MANUFACTURE OF WALL PAPER.

The use of paper as a covering for walls originated in China. It was introduced in Europe as a substitute for tapestry hangings—whence the term paper hangings—by the French. At the present time, owing to the improvements which have been effected in printing, and the wide range of colors open to the artist designer, it offers probably the cheapest and most ornate means of mural decoration.

The blank paper is received by the manufacturer in the long rolls made by the Fourdrinier machine, and weighing from 80 to 85 pounds to the roll. It varies in quality according to the printing and finishing which it is to receive—weighing 9, 10, 12 and 14 ounces to the length of eight yards, which constitutes the usual length of the roll as sold at retail. The first process undergone is termed "grounding," and the object is to give the paper the requisite body to enable it to receive the colored pattern. While passing over a roller the paper is covered with a mixture of so-called Jersey clay, which contains some 18 per cent. of alumina, glue and water, and if the surface is to be finally polished—or satin finished—a percentage of lard oil is added. After the mixture is applied it is evenly distributed over the paper, first by two reciprocating brushes, then by a rotating brush roller, and lastly by two brushes like the first. It then is conducted up between endless belts across which sticks are laid, and over which sticks the paper is suspended in festoons. The sticks are so placed that a length of paper measuring just four yards hangs between any two. The belts are kept in constant motion, and the paper is thus conducted along the loft, which measures some 160 feet in length. Steam coils are placed beneath the belts and a temperature of 120° maintained. About nine minutes are occupied by any one festoon of paper in making the journey from grounding machine to the point where it is again made into a roll, and during this period it becomes thoroughly dried. Frequently coloring matter is mixed with the ground paint, and the paper is thus given a flat tint, which forms a background for the pattern, or which is left unaltered when the paper is meant to be perfectly plain.

Imprinting the pattern by blocks is done in two ways, either by the block or old process, or by the roller or improved process. In either case each color entering into the design must be printed separately, so that there must necessarily be as many blocks or types prepared as there are tints in the pattern. The blocks are constructed of two layers of wood, a thin piece of maple fastened to a thicker backing of pine board. Each block is about twenty-six inches wide, two feet long, and an inch and a half to two inches in thickness. On the maple all of the design to be printed in a single color is drawn and afterward cut out by engravers, so that the lines are in high relief. The more delicate figuring is not made in the wood, but is supplied by the insertion of bent pieces of brass. When the wood carving is completed, the work is brushed over with boiled oil, and when dry sent to the printer for use. The workman stands before a table, over which the paper passes.

Hanging above the table, supported by an india rubber cord, is the block. The upper end of the cord is attached to a small wheel traveling on an iron guide, so that the block may be swung from the table over to the place where it receives its covering of color. This last is obtained from what is termed the "slush box," which consists of a shallow box, the bottom of which is covered with painted ticking. This

box floats on a mixture of water and paper pulp contained in a larger box, so that its bottom is always perfectly level. The workman first places the paper across his table, then swings the block over to the slush box and brings its carved side down on the paint. Next he carries the block back again and places it on the paper, of course using great care in registering, so that the impression may fall exactly on the right place. A vertical movable arm attached to a frame above is now rested upon the back of the block and forced down by a lever worked by the foot of the operator. This process is repeated until the whole piece is covered with the pattern, when it is hung up until perfectly dry.

Hand printing is now used on borders where there are many colors and in the finer qualities of decorated paper, where the care requisite for printing the numerous tints can scarcely be exercised during the motion of the rapid working cylinder machines. In roller printing the impression is obtained from a series of rollers, on the surface of which the design is raised. This process is used for all the cheaper grades, and hence for very much the greater proportion of all the wall paper manufactured. The rollers are of maple, lined interiorly with brass. Four different sizes are used, measuring respectively 13, 16, 18½ and 22 inches in circumference. Their width in all cases is 18½ inches. The pattern of the design is first drawn on paper and colored, and then the outlines of the various parts are transferred upon the rollers, each roller printing, as before stated, only such portions as are of one particular hue. Unlike that of the blocks described above, the surface of the roller is not engraved away, but the pattern is made by driving in pieces of thin brass, which the workman bends in a vise so as to correspond with the lines of the pattern. Where there is a considerable area to be printed "solid," its outlines are raised in brass, and inside the metal boundaries thus made is packed glued felt. In some cases where the paper is not grounded rollers are covered entirely with felt with the exception of such portions representing the pattern as are intended to be left white. After the design is thus produced the roller is placed in a lathe, fixed in the slide rest of which is a vertical file which smooths the surface, or if the roller be entirely felted it is submitted, when the glue in the felt is dry, to the action of an emery wheel.

The printing machine consists of a large cylinder or drum around which the paper passes. While being thus carried the paper receives an impression from each roller in turn, the rollers being disposed around the periphery of the cylinder. Each roller is supplied with color by an endless belt of felt, which passes down into a receptacle filled with the paint. If the paper is striped the colors are blended by dry paint brushes held in contact with the surface as the cylinder rotates. A 12-roller machine prints twelve colors at once.

If, however, the paper is to be satin finished, before the above operation takes place it is put through a polishing machine. This consists of a central rotating brush against which the paper is carried by several metal cylinders. The alumina and oil in the groundwork admit of its being finely polished. The printed pattern is, however, in dead color, so that when the paper is finished some portions have a lustre while others do not, thus adding to the detail of the ornamentation.

As the printed sheet emerges from the machine, it is led over sticks on endless belts the same as before described during the grounding process. An ingenious device is employed for placing the sticks under the paper. At the ends of the roller over which the endless belt passes, are two cams. Above the cams and resting on their periphery is a pile of sticks. The cam shoulder equals in height the thickness of one stick. Hence at each revolution of the cam a stick is moved from the bottom of the pile and carried down on and across the belts. Between the latter comes the paper, which thus falls in folds over the sticks as they are laid in place.

After the paper has been carried on the belts to the end of the loft (becoming dried meanwhile) its end is connected to a swiftly rotating horizontal spindle which winds it into tight rolls. These measure only eight yards in length, the sheet being cut by the attendant as soon as a mark placed by the printing machine comes to the spindle. If the paper is to be embossed this is now done by passing it between engraved metal rollers. Nothing further then remains but to send it to the markets.

The coloring material is made of ordinary dry pigments combined with the Jersey clay and gum substitute. This last is produced from potatoes, large quantities of which are raised for this especial purpose. The tubers are simply dried and ground, the powder forming when mixed with water an extremely adhesive size. Sometimes ordinary glue is employed. Paris green and the arsenical colors are now rapidly going out of use in paper coloring, chrome green being utilized in preference to the former.

THE MYSTERIES OF A LUMP OF COAL.

For years no one had supposed that a lump of soft coal, dug from its mine or bed in the earth, possessed any other purpose than that of fuel. It was next found that it would afford a gas which was combustible. Chemical analysis proved it to be made of hydrogen. In process of time mechanical and chemical ingenuity devised a mode of manufacturing this gas, and applying it to the lighting of buildings and cities on a large scale. In doing this, other products of distillation were developed, until, step by step, the following ingredients are extracted from it: An excellent oil to supply lighthouses, equal to the best sperm oil, at lower cost; benzole, a light sort of ethereal fluid, which evaporates easily, and, combined with vapor or moist air, is used for the purpose of portable gas lamps, so called; naphtha, a heavy fluid, useful to dissolve gutta percha and India rubber; an excellent oil for lubricating purposes; asphaltum, which is a black, solid substance, used in making varnishes, covering roofs, and covering over vaults; paraffine, a white, crystalline substance, resembling white wax, which can be made into beautiful wax candles. It melts at a temperature of 110°, and affords an excellent light. All these substances are now made from soft coal.

Impermeable Paper.—By plunging a sheet of paper into an ammoniacal solution of copper for an instant, then passing it between the cylinders and drying it, it is rendered entirely impermeable to water, and may even be boiled without disintegrating. Two, three, or any number of sheets rolled together become permanently adherent, and form a material having the strength of wood. By the interposition of cloth or any kind of fiber between the layers, the strength is greatly increased.

A New Process of Printing on Satin.—Jackson Jarves, in a recent letter from Italy to the New York *Times*, says that a new process of printing on satin for decorative screens, panels, hangings, &c., is being shown at Florence. The process is the invention of Signor Gutman, whose subjects are chiefly the brightest-hued birds and flowers, amid tropical foliage, ferns and other graceful plants. They are skillfully done, Mr. Jarves says, and very striking on first appearance, but altogether too gaudy in general effect and lacking harmonious combination of colors.

Magic Mirrors.—The magic mirrors, which have been a good deal discussed of late, are all of metal. M. Laurent has succeeded in making them of glass, which is sufficiently elastic for the purpose. At first he used pressed glass, polishing the surface opposite to the projections; then he tried the thin glass of commerce, engraving a hollow design. The two methods may be combined. When at rest the mirror is plane, and gives good images. By a blowing or sucking action the characteristic features are brought out. Both sides are silvered.

A remarkable specimen of ancient Babylonian workmanship has been received as a portion of the proceeds of Mr. Rassam's expedition, which is of interest to metallurgists as well as to antiquaries. It is the largest single specimen of bronze casting which has been found in Mesopotamia, and is a very weighty plate of metal five feet four inches long, with a breadth of twenty-one inches and a thickness of two inches. The form of the plate leaves experts in doubt as to its original purpose, but it may possibly be one of a pair of folding doors.

ELECTRIC PROPERTIES OF PAPER.

M. Jamin, the celebrated electrician, has forwarded to the French Academy of Science, a very interesting communication made to him by M. C. Wideman, a chemist, who has discovered that ordinary paper, well dried and heated, acquires electric properties as soon as it is briskly brushed and feels crisp in the hand, and makes small luminous discharges in the dark. Electric paper adheres to a wall.

M. Wideman has discovered that it is possible to increase the electricity considerably by submitting the paper to a previous treatment. By plunging unstrained or silk paper into a liquid compound, equally of nitric and sulphuric acids, then washing well in water and drying, it becomes charged with electric properties. If it be placed on a wooden table or on a sheet of polished iron, and rubbed with the hand, it immediately attracts all light bodies, feathers, little pieces of paper, elder-pith, &c. When it is raised from a sheet of iron, one sees in the dark the whole surface to be luminous, as if covered with phosphorns; and by touching it with the finger one sees an electric spark. A Leyden jar may be charged with this paper, and made into a veritable battery. In a word, all experiments in electricity may be performed with it.

This paper preserves its curious properties for a long time, and if they are weakened, they can be revived by warming it slowly. It gives out an odor like ozone upon being rubbed. One sees by the foregoing that for a few pence an electric machine, capable of all experiments, may be procured.—*B. and C. Printer and Stationer.*

THE MAHOGANY TREE.

Full grown, the mahogany tree is one of the monarchs of tropical America. Its vast trunk and massive arms, rising to a lofty height and spreading with graceful sweep over immense space, covered with beautiful foliage, bright, glossy, light and airy, clinging so long to the spray as to make it almost an evergreen, present a rare combination of loveliness and grandeur. The leaves are very small, delicate and polished, like those of the laurel. The flowers are small and white, or greenish yellow. The mahogany lumber men, having selected a tree, surround it with a platform about twelve feet above the ground, and cut it above the platform. Some dozen or fifteen feet of the largest part of the trunk are thus lost; yet a single log not infrequently weighs from six or seven to fifteen tons, and sometimes measures as much as seventeen feet in length and four and a half to five and a half feet in diameter, one tree furnishing two, three or four such logs. Some trees have yielded 15,000 superficial feet.

New Archaic Discoveries.—Several pyramids have just been opened in Sakara, Egypt, inclosing the tombs of kings of the fifth dynasty. The mortuary chapel of each contains about eighty square metres of the smallest and most closely written texts giving precise details of the religious belief of that age. Except the finding of the Rosetta stone in 1799 scarcely any discovery in Egypt equals this in scientific value. All the Sakara pyramids, about sixty in number, will be opened as soon as possible and new discoveries of value will probably be made.

PHOTOGRAPHY IN MECHANICS.

Seal skin leather as well as seal skin fur has become fashionable. As imported, the skins (manufactured) are as distinct from those of any of our domestic animals as those of the alligator and the boa. There is no process, preparatory to use, that gives so distinguishing a mark to material as that of tanning to animal skins—the conversion of an animal pelt into commercial leather. The leather of the alligator is a patchwork of raised squares; that of the boa is a network of diamonds, defined by fine, depressed lines. Our goat skins are corrugated in regular lines, crossing at acute angles, but this surface is produced by "pebbling," a mechanical process. The seal skin as leather, however, has a fine arabesque surface of irregular prominences and depressions that gives it a very attractive appearance, and it is in great demand for pocket books, diaries, purses, satchels, &c. But the seal skins are costly and cannot be worked into cheap goods, such as are demanded by the million. Domestic leather is therefore employed to simulate the more costly leather of the seal, and is passed between rollers in connection with a metallic plate that contains the natural arabesque pattern of the seal leather in reverse. A photograph of the surface of the finished seal skin is taken upon a zinc plate, the plate submitted to etching acids, and the etchings deepened and dressed by the graver, when the plate and the imitation leather are passed between rolls and the imitation completed.

THE CAMERA IN FORGERY.—It is stated that the Bank of France has almost entirely abandoned chemical tests in favor of the camera for detecting forgeries. The sensitive plate not only proclaims forthwith the doing of the eraser or penknife, but frequently shows, under the bold figures of the forger, the sum originally borne by the check. So ready is the camera to detect ink marks that a *carte-de-visite* inclosed in a letter may to the eye appear without blemish, while a copy of it in the camera will probably exhibit traces of writing across the face, where it has merely been in contact with the written page.

One of the treasures sold from the bric-à-brac collection of M. Double, in Paris, has acquired same throughout Europe, and more than a century ago was admired by some of the wisest men in France. After Louis XIV. died, and before the great crash that closed the century had begun to appear, there was a slight recovery in some directions, not the least memorable of which in art was seen in the "Three Graces" of Falconnet, which sold for an even 100,000 francs. These Graces were designed for a timepiece, and were cut from a single block of marble. Above their heads they hold a vase containing the movement, with the hours marked on a band, toward which one of the figures is pointing.

A tool for glass and crystal fabrication has been introduced by Gadrat, in Paris. In the blowing of certain kinds of ware, the helper formerly presented a board which had the office of aiding in producing a smooth and even surface. After the blower had rolled the wares sufficiently to and fro, the helper had to present the board, and to blow at the same time upon that part of the mass, in order to cool it. This was both difficult and tedious, resulting in numerous failures. M. Gadrat uses an iron planchet mounted on a support. A treadle moves a pair of bellows which perform the blowing part much better than the helper, and will certainly before long do away with that person entirely.

ENAMELED FAIENCE.

Almost immediately after the invention of ceramic manufacture—properly so called—that is to say, of terra cotta, the application thereto of glaze or coloring enamels must have improved and given to it a peculiar physiognomy.

What we term *glacure*, is a light varnish, which enlivens and harmonizes the porous surface of terra cotta. In its simple state it is a mixture of silex and lead, and in this state it is transparent as we find it on antique vases; when vitrifiable, and mixed with tin, as in the case of majolicas, it is called enamel; and when of vitrifiable and earthen substance, such as can only be melted at the temperature required for the baking of the paste itself, it is known as glaze, or *couverte*, and can be identified in the Persian faiences and Flemish stoneware.

The bricks brought from the banks of the Euphrates are enameled. The Egyptians employed glaze, and the little figures they have left us of gods or animals in turquoise blue, or sea green, are cleverly colored pastes of the greatest antiquity.

The colors are obtained by the mixture of metallic oxides with the flux or emollient used after the baking, to make them adhere completely to the surface of the clay. The palette of a Chinese ceramist, which we may take as our model, for is contains all that the decorator can possibly desire in the way of brilliancy and diversity of tone, is thus composed: Oxide of copper, for greens and greenish blues; gold, for reds; oxide of cobalt, for blues; oxide of antimony, for reds; arsenic and stannic acid, for whites. The intermediate tones which may boast of having fascinated European chemists have had the effect of suggesting to Sèvres the textual copy of pictures, an exercise of ingenuity which cannot possibly be the legitimate aim of this kind of art.

The artists of antiquity were in constant relation with Asia Minor, and cannot possibly have been ignorant of the secret of the application of enamels or colors to clay. With the exception, however, of some fragments of vases, one of which represents a comic mask, enameled in yellow, black and red, ancient Greece and Italy have bequeathed to us nothing which can properly be called painted *faïence*. The Greeks possessed a surpassing sentiment of harmony. Thanks to a concourse of peculiar circumstances —to their Asiatic origin, their luminous climate, the beautiful outlines of their landscape, their philosophy, their social constitution, their intellectual superiority to the surrounding populations, and even the youthful virility to which humanity attained in their time, theirs was the unrivaled privilege to enjoy for a century and a half that serenity of soul to which the creation of great works is a natural instinct. Their pottery, no less than their sculpture, reveals their exquisite taste and the perfect equilibrium of their life. Simple and noble forms must have sprung up under the hand of the potter like flowers from a vigorous stem. Destined for the adornment of temples, or the repasts of a cultivated and refined society, for the prizes of games and contests, or the decoration of tombs, these vases were decorated naturally with mystic or bacchanalian scenes, sacred fables and figures of charioteers and gladiators.

The Greek colony which established itself in Etruria brought with it, scarcely modified at all, the stenciled outlines which had previously been traced at Athens, or elsewhere in Greece. It has even been ascertained that the Etruscan potters had ceased to understand the mystic sense of the allegories or historical facts, the representation of which they continued to repeat for centuries, to meet the demand of their Italian purchasers.

Works of immense erudition have been published in Germany, Italy, England, France, on ancient fictile art, or rather on Greek and Roman vases. What has chiefly occupied the writers of these works is the age of the vases, their nationality, the meaning of the sacred, profane, tragic, comic, or household scenes that adorn them, and the names of the gods, heroes, and other personages inscribed over the figures represented thereon. They have done their utmost to explain the use and character of the objects which these vases represent, such as beds, chairs, stools, tables, stuffs, jewel caskets, arms, implements, sacrificial instruments and altars. They have helped to resuscitate the manners and customs of antiquity, and have even succeeded, by the classification of the purest forms, the noblest ornaments, the best composed scenes, in establishing the chronology of the rise and fall of ancient Greek or Italian art. Unfortunately, all these results are presented in a phraseology bristling with Greek and Latin, and in bulky folios of most unattractive appearance.

It is much to be wished that benevolent *savans*, like the Baron de Wytte for example, should do over again, for minds of ordinary capacity, what has thus been done only for the learned. It is impossible to contemplate without a sort of superstitious reverence all this industry, ennobled as it is by the hands of so many great artists, and the actual use which has been made of it by the whole society of antiquity. How often, in inspecting the treasures of some museum of ancient art, is one not tempted to ask one's self if this be not perhaps the very cup in which Alexander sipped to try his physician, or that vase of red earth be not the one in which Plato may have dipped his hands when he sat down to the banquet?

The study of antique vases dates especially from the last years of the seventeenth century. A hundred years later it was all the rage. Madame Lebrun gives us in her "Memoires," which would have insured her the reputation of a clever woman, even if her brush had not made her famous, an account of an archæological feast, the idea of which was suggested to her by a perusal of the "Voyages en Grece du Jeune Anacharsis," by the Abbé Barthelemy. "When I came to the place where, in describing a Greek dinner, he explains the way of making several sauces, I immediately sent for my cook, and set her to work at once. As I was expecting some very pretty women among my guests, I took it into my head that we would all adopt the Grecian costumes. My studio, full of draperies of all sorts for the adornment of my models, supplied a sufficiency of garments, and the Count de Parois, who was then lodging in my house in the Rue de Clery, had a beautiful collection of Etruscan vases. I told him of my scheme, and he brought me a number of antique cups, bowls, and vases. I made my selection, and placed them on an uncovered mahogany table. * * *" The guests arrived; Madame Chalgrin, the daughter of Joseph Vernet, Lebrun-Pindare, to whom was allotted a wreath of laurels. Monsieur de Parois dressed himself up as Anacreon. * * * "My daughter," she adds, "who was charming (as is proved by portrait at the Louvre) and Mademoiselle Bonneuil (who afterwards, under the Empire, became the beautiful Madame Regnault de Saint Jean d'Angeley) were exquisite to look at, each holding up a very light antique vase, and preparing to offer it to us to drink from." It is only the eighteenth century which had wit and humor enough to laugh with such grace at the mania for antique. Under the Empire it was proposed and even attempted to introduce again, for common use, all the old shapes for utensils and cups, as well as their austere style of decoration.

But the fact that they were no longer in accordance with the manners, customs and fashions of that period was quite forgotten. In a sunny climate, full of warmth of coloring, among interiors of houses painted with sharp and decided tints, amid people who wore purple cloaks or light colored tunics, this style of decoration, with a red or a black ground, formed a repose for the eye. But, coming from the hands of our porcelain manufacturers, it appeared dull and hard; in the hands of decorative painters, who could neither understand nor perceive the elegance of figures expressed only by a neat and distinct outline, the heads became distorted and the attitudes as stiff and angular as those of a lay figure. Besides this, the style and shade of coloring became exaggerated, and notwithstanding the habit of taking exact copies of statues and bas-reliefs, the examples of colored earthenware left to us by Athens and South Italy were quite forgotten.

These are covered with gilt ornaments, sometimes in relief, which breaks the monotony of a mere silhouette We hear of certain bowls, at the bottom of which, while the earth was still in a soft and impressible condition, the potter cleverly applied a mold of the Syracusan medallion, which is the purest example of antique numismatic art. The most celebrated of these vases ornamented in relief is that of Cumæ, a hydria or ewer, which at one time would have become the property of France, had not Russia selected it in the Campana collection before France had made known her mind on the subject, and it is now one of the ornaments in the Hermitage Museum at St. Petersburg. The lower part of it is fluted, and the upper is composed of a bas relief colored and gilt, consisting of ten figures, the principal of which are Triptolemus and Ceres; in another frieze, on the most projecting portion of the spout, are walking figures of panthers, lions, dogs and griffins; round the mouth of the vase is wound a wreath of gilt myrtle leaves. The figures are dressed in bright colored garments, blue, red and green, and where, in some of the heads, the gilding has been rubbed off, you can perceive the delicacy of the hand which worked it to be as great as that with which a cameo is executed. It is called the Cumean vase, because it was originally found in the necropolis of that city. Far from having the horror that our modern professors express for polychromic art, the ancients, on the contrary, made it contribute to the decoration of the exterior as well as the interior of their dwellings; there is absolute proof of the fact that the Greeks colored their marble statues, as did the Romans their bronze busts.

With the exception of the Panathenaic amphoræ, offered to the Greek conquerors of the arena, full of the oil of olives sacred to Minerva, one can scarcely venture to speculate on the character and intended use of the great number of different articles which have descended to us, and which, judging by the degree of finish to which they were brought, must have cost vast sums of money to complete. The black vases were doubtless for common use among the servants; the others can only have been designed for ornament.—*Pottery Gazette.*

To Make an Acid-Proof Cement.—Finely powdered glass mixed with soluble silicate of soda, will be found to answer this purpose.

FOLEY'S

Celebrated Gold Pens and Pencils

THE FINEST AND BEST.

CIRCULAR.—To those engaged in mercantile pursuits, any invention that will facilitate their labor is highly worthy of notice, as well as of extensive patronage. One of the most important inventions of the present age is that of a pen that possesses the necessary qualities of firmness in mark and durability in use. Pre-eminently such are those of JOHN FOLEY, Manufacturer of Fine Gold Pens and Pencils, No. 2 Astor House. Their superior value is tested by the long time he has been engaged in our city in their manufacture. We, the subscribers, who know the value of FOLEY'S PENS from constant use of them for a number of years, cheerfully recommend them to those who wish for the best and most perfect Gold Pen ever made.

☞ This last, although of the Third Degree, was the Highest and ***ONLY*** Award made for Mucilage.

No other American Inks received a higher award than the Third Degree of Merit.

CARTER, DINSMORE & CO., Boston and New York.

BYRON WESTON

DALTON, MASS., U. S. A.,

HAS BEEN AWARDED THE

GRAND PRIZE GOLD MEDAL

AND RECOMMENDED THE

Medal of Honor and Perfection

At PARIS, 1878,

This being the **HIGHEST and ONLY AWARD** given for

LINEN RECORD & LEDGER PAPER.

—A SPECIALTY.—

THIS Paper has received THE HIGHEST PREMIUM over all others from *the Cincinnati Industrial Exhibition*, *Massachusetts Charitable Mechanics' Association*, *Franklin Institute* of Philadelphia, Louisville Exposition, Medal and diploma from *United States Centennial Commission*, *Medal of Progress American Institute*, *1877*, *and Medal of Improvement and Progress*, *Boston*, *1878*. Its

PRINCIPAL ADVANTAGES

are as follows:—1. It contains more LINEN than any other Ledger Paper, has a longer fibre, and is, consequently, tougher. 2. Having a harder and better body, it frays less in erasure, so that by simply using the rubber after the eraser, the ink is prevented from spreading. 3. It is more uniform in Weight Color and Finish. 4. It never cockles if properly bound. 5. Its chemical action upon ink is such that it both writes and rules up better. For proof of the foregoing, refer to a large number of Stationers, Bookbinders, Bookkeepers, and Recorders, who have given it, after a severe test, the preference over all others. This paper is *Double Sized*, and will stand any climate or the most acid of fluid inks.

☞ **Send for sample sheet, ERASE and REWRITE FOUR TIMES on same spot.**

Each sheet is water-marked with name and date.

LOCKWOOD PRESS, 74 Duane Street, New York.

Lockwood's Directory of the Paper and Stationery Trades.

THE ONLY STANDARD WORK OF THE KIND PUBLISHED.

Octavo in Size, bound in Cloth, about 300 pages. Printed on fine Book Paper.

SEVENTH EDITION, 1881.

LOCKWOOD'S DIRECTORY Contains: A descriptive list of all mills, in the United States and Canada, making all kinds of Paper, Binders', Press and Straw Boards and Wood Pulp. In each case, the exact location, shipping point, kind and width of machine, daily capacity, kind of paper made, and a large amount of other information are given. The population of every town mentioned is stated, with railroad connections, nearest bank, and money order, telegraph and express office. In addition the mills are fully classified according to goods made, so that one can see at a glance every mill making a certain line of paper. **This is a very valuable feature to Buyers of Paper and Sellers of Paper Materials.**

LOCKWOOD'S DIRECTORY also contains a full list of all Wholesale Paper and Paper Stock Dealers in the principal cities, together with a list of Stationers and Paper Dealers and Booksellers and other Merchants who sell Stationery and Paper throughout the United States. This list, the **first of the kind** published in this shape, will be found invaluable to all manufacturers wishing to reach the smaller trade.

LOCKWOOD'S DIRECTORY has always been a favorite medium for advertisers in all departments of these trades, and the present edition contains the announcements of hundreds of houses. These are classified in two departments, viz.: "MACHINERY AND PAPER MAKERS' SUPPLIES" and the "PAPER AND STATIONERY TRADES," and altogether form a STANDARD INDEX TO FIRST HANDS, and will be found valuable to BUYERS in every branch of the business.

LOCKWOOD'S DIRECTORY is sent, post paid, on receipt of Two (2) DOLLARS. Orders will be filled in order as entered. Address

HOWARD LOCKWOOD, PUBLISHER,

No. 74 Duane Street, New York.

_____ *1881.*

Mr. HOWARD LOCKWOOD, 74 Duane Street, New York:

Inclosed find two (2) dollars for one copy "Lockwood's Directory of the Paper and Stationery Trades," Seventh Edition, for 1881, which please forward at earliest moment. Yours truly,
